#103 High speed analog output response. Time to respond to within 99% of step change: 1 ms for frequency >5 kHz, 10 ms >500 Hz, 100 ms >50 Hz, 1 second >5 Hz. (Temp. stability ±0.01°/°C)

#107 Automatic calibration checks and automatically readjusts digital readout and BCD output circuits and at 0° and 360° to reduce readout errors to ±0.01°. This option available only on 305C .

COMBINED PLUG-IN AND MAINFRAME SPECIFICATIONS

MODEL	FREQUENCY RANGE	INPUT LEVELS (independent)	INPUT Z	ACCURACY(2) WITH INDEPENDENT LEVELS UNLESS OTHERWISE INDICATED Analog output accuracy: As specified below. Digital phase accuracv: For model 305C, same as analog accuracy. For model 305B, add ±0.15° digital readout error to analog accuracy specified.
305-PA-3001 Auto Ranging Plug-in	2 Hz to 700 kHz	10 mV to 300 V rms up to 10 kHz and to 50 V rms up to 700 kHz; can be extended to 40 kV rms with Textronix probes. Each channel has automatic gain ranging, and lamps which indicate when level is below 50 mV and above 50 V rms.	1 megohm shunted with 40 pF	±0.05°, 50 mV to 50 V rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 50 V rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz.
305-PA-3002 Single Range Plug-in	2 Hz to 700 kHz	10 mV to 3 V rms(1); can be extended to 3 kV rms with Textronix probes. Other ranges available on request.	1 megohm shunted with 40 pF	±0.05°, 50 mV to 500 mV rms from 50 Hz to 50 kHz; typically ±0.03°, 50 mV to 500 mV rms from 50 Hz to 50 kHz, ±0.05° to 10 Hz, ±0.1° to 250 kHz, and ±0.25° at other levels to 500 kHz.
305-PA-3005 High Frequency Plug-in	200 kHz to 11 MHz	1 mV to 3 V rms; manual level controls in 10 dB steps. Lamps indicate when inputs are out of range or when level controls are improperly set.	50 ohms	Broadband with equal inputs above 10 mV rms: ±0.4° from 200 kHz to 4 MHz; ±1° from 4 MHz to 11 MHz. With independent levels above 10 mV rms: ±1° up to 4 MHz and ±2° up to 11 MHz. Single frequency — above 10 mV rms: ±0.3° at any frequency from 200 kHz to 11 MHz at any fixed levels.
305-PA-3007 Programmable and Auto-Ranging Plug-in	2 Hz to 700 kHz	Auto-ranging: similar to levels of 305-PA-3001. Programmable: over-rides autoranging; extends low levels to 1 mV rms; DTL, TTL logic; program connector in rear of mainframe.	1 megohm shunted with 40 pF	Same as 305-PA-3001 for levels above 10 mV rms; typically ±0.35° from 50 Hz to 50 kHz for levels below 10 mV rms.
305-PA-3008 Power Freq. Plug-in	50-500 Hz without filters. 50 Hz, 60 Hz and 400 Hz L.P. filters available(3)	25 V to 250 V rms; 0.1 A to 5 A rms. Inputs are transformer isolated.	100 k ohm (voltage) 1 Ω max. (current)	At any single frequency, with filter set: ±0.1°, 25 V to 250 V rms, or 0.1 A to 5 A rms.
305-PA-3009 Network Analyzer (Gain/Phase/Amplitude)	5 Hz to 700 kHz (Note: 305-PA-3009A operates to 1 Hz with 305 mod. 14)	10 mV to 40 V rms. Each channel has automatic gain ranging. Direct reading of phase angle, amplitude ratio and level of each input. Compatible with Tektronix probes.	1 megohm shunted with 40 pF	Phase: ±0.1° from 40 mV to 40 V rms from 50 Hz to 50 kHz; typically ±0.25° at all other levels from 5 Hz to 500 kHz. Voltage Amplitude: above 40 mV (channel A or B): ±2% reading ±0.03% FS, 50 Hz to 50 kHz; ±5% reading ±0.03% FS, 100 kHz to 500 kHz.(5) Ratio: ±0.5 dB, 50 Hz to 50 kHz; ±1 dB, 50 kHz to 500 kHz.(5)
305-PA-3010 Special Purpose Plug-in (with filter)	For use at 125 ±10 Hz; matched filters in both channels reject higher frequencies	500 mV to 5 V rms. Other ranges available on request.	1 megohm shunted with 40 pF	±0.1°, 500 mV to 5V rms; ±0.25°, 100 mV to 500 mV rms.
305-PA-3015 Selectable Filter Plug-in	5 Hz to 500 kHz without filters; uses 2 of type 305-PA-3008-( ) filters (3); filter selection programmable	Ranges of 50-500 mV rms, 0.5 to 5 V rms, and 5-50 V rms selectable by remote contact closures.	1 megohm shunted with 40 pF	With filters, ±0.1° at fixed frequencies over all levels; without filters ±0.1° from 50 Hz to 50 kHz at all levels (typically ±0.03°), typically ±.25°, 5 Hz to 500 kHz.

(1) Can be provided for other voltage levels.

(2) For sinusoidal signal; can be used for square wave inputs over limited frequency range; can be used for amplitude modulated signals up to 97% modulation, depending upon model, level and frequency.

(3) 50 Hz filter, P/N 305-PA-3008-50; 60 Hz filter, P/N 305-PA-3008-60; 400 Hz filter, P/N 305-PA-3008-400. (Other frequencies available on request.)

(4) Available for use with 305-PA-3001, -3002, -3007 and -3010. Specify when ordering plug-in.

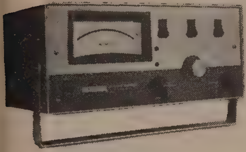
(5) For higher accuracy below 50 Hz, specify Model 305-PA-3009A.

DRANETZ

ENGINEERING LABORATORIES INCORPORATED

SOUTH PLAINFIELD, NEW JERSEY 07080 • TEL. (201) 755-7080

SERIES 301 LOW COST PHASEMETERS



FEATURES:

- 70 dB input level range
- 1° accuracy, 0.1° resolution
- 5 Hz to 0.5 MHz frequency range
- 0° to 360° phase range
- 0 to 3.6 Vdc analog output

Series 301 Phasemeters are low cost, direct-reading instruments for measurement of the phase difference between two sinusoidal signals.

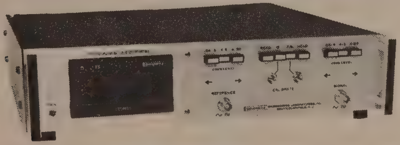
Phase angle is indicated by a large taut band meter with mirror scales of 0 to 36, 0 to 90, 0 to 180, and 0 to 360 degrees. The 70 dB input range of the 301 is achieved without range switching. Operating controls include an input reversal switch and an "Add 180°" switch which allows the operator to avoid the 0°/360° discontinuity. Model 301A also produces a DC voltage output proportional to angle.

SPECIFICATIONS

Frequency Range: 5 Hz to 500 kHz
Input Impedance: 100 KΩ
Absolute Accuracy (independent input levels):
±1°, 45 Hz to 40 kHz, inputs > 200 mV
±1.5°, 7 Hz to 100 kHz, inputs > 200 mV
±2°, 5 to 7 Hz and 100 to 200 kHz
1° additional for each additional 100 kHz
Minimum Input Levels: 1 V rms, 5 Hz to 30 Hz
300 mV rms to 50 mV rms, 30 Hz to 200 Hz
50 mV rms, 200 Hz to 50 kHz
50 mV rms to 500 mV rms, 50 kHz to 500 kHz
Maximum Input Levels: 160 V rms
Panel Meter:
6″ taut band movement; 0.5% fs linearity (add to accuracy)
Rectangular Wave Output: 1.5 V p-p, 5 nsec rise time
DC Output (Model 301A or 301AR only):
0 to +3.6 Vdc for 0 to 360°; Z out less than 50Ω
AC Power Input: 115/230 V, 50 to 400 Hz, 0.4 Amps rms
Case: 7″ x 16½″ x 11½″. For 19″ rack mount specify option R
Weight: 18 lbs.; shipping, 27 lbs.

SERIES 331

HIGH ACCURACY ECONOMY PHASEMETERS



- Accuracy to 0.05°, resolution to 0.01°
- Frequency range 2 Hz to 700 kHz
- Analog output and 4 or 5 digit panel readouts
- Input 0.05 to 220 V rms
- Accepts sine, square and other waveforms in either channel

The Dranetz 331 Series Phasemeters feature high accuracy over a broad amplitude and frequency range. Front panel controls (equipped with LO/HI indicators) are used to select proper voltage ranges, as well as to check and adjust calibration. The 331 incorporates several of the important features of the Superperformance 305 Series, including elimination of 0°/360° ambiguity and reduction of sensitivity to noise and even harmonics. The 331 is designed for calibrating equipment, for testing subassemblies and for general laboratory work.

SPECIFICATIONS

CHARACTERISTICS	331B	331C
Frequency Range:	2 Hz to 500 kHz	
Accuracy: Sine Wave:	±0.1° ±1 digit from 50 Hz to 50 kHz, ±0.2° per 100 kHz to 500 kHz and ±0.2° ±1 digit at 5 Hz.	±0.05° from 50 Hz to 50 kHz; ±0.2° from 10 Hz to 100 kHz; add ±0.2° per 100 kHz above 100 kHz.
Square Wave:	±0.1° ±1 digit from 10 Hz to 20 kHz; ±.5° per 100 kHz above 20 kHz	±0.05° from 10 Hz to 5 kHz; ±0.1° to 20 kHz; ±0.5° per 100 kHz above 20 kHz.
Angle Ranges:	000.0° to 360.0° or −180.0° to +180.0° automatic or selectable.	
Display:	Beckman (Sperry) 0.6″ 4 digit for ranges above.	Beckman (Sperry) 0.6″ 5 digit for ranges above.
Drift (30 day period):		
Sine Wave:	None	
Square Wave:	None	
DC Drift:	0.1°	
Repeatability (DC):	Better than 0.1°.	Better than 0.01° after readjusting 0 and FS.
Temperature Coefficient:	0.01°/°C independent of other conditions.	
Input Signal Amplitudes:	0.05 to 220 Volts rms in 3 ranges (0.05-0.5, 0.4-5, 4-220; can be extended with Tektronix probes.	
Input Impedance:	1 megohm shunted by 50 pF nominal	
Response Time:	700 milliseconds	
Maximum DC Component:	±200 volts; can be extended with probes	
Analog Output:	0.0000 to 3.600 V and −1.8000 to +1.8000 V DC, +10.00 mV DC/degree phase; output impedance less than 100 ohms.	
Ambient Temperature	0°C to 45°C	
Panel Controls and Adjustments:	3 range input level pushbuttons each channel; read-hold; power; 0° cal and 360° cal adjustments.	
Connectors:	BNC, both input channels, rear and front; PC rear for analog output.	
Power Requirements:	105-125 or 210-250 volts, 50/60 Hz, 70 watts.	
Dimensions:	3½″ high x 16″ deep, 19″ rack/portable package, 18 lbs. (7 kg) net wt., 25 lbs. (10 kg) shipping.	
Option:	#101: BCD output, TTL/DTL, 8421	#101: BCD output, TTL/DTL, 8421

ENGINEERING LABORATORIES INCORPORATED

SOUTH PLAINFIELD, NEW JERSEY 07080 • TEL: (201) 755-7080 • TWX: 710-997-9553

SERIES 325

POWER SYSTEM POLYMETER / DUAL MEASURE OF VOLTAGE, CURRENT, TIME, FREQUENCY

FEATURES

- Simultaneous measurement and display of two selectable parameters.
- Display of continuous, triggered or maximum readings.
- Full isolation of all inputs.
- Precision measurement of time interval in seconds or cycles.
- Large 0.6″ digital display.
- Precision frequency measurement optional.
- Portable for field use.
- A field instrument with laboratory accuracy.

The Series 325 is specifically designed for measuring key parameters in electric power systems. Simultaneous measurements of Voltage and Current, 2 Currents, 2 Voltages, Current and Time, and Voltage and Time may be made. Readings may be taken on a continuous basis, or the meter may be triggered to "freeze" readings at a specific time. Time may be measured either in seconds or cycles of the power line frequency. Timing and trigger inputs may be actuated from type A or B dry contacts or by AC or DC voltages. Special circuits assure positive triggering on first contact and prevent simultaneous start/stop conditions. Options and adapters are available for DC current, DC voltage, fast frequency measurement, low pass filters and BCD outputs.

APPLICATIONS

- Ideal for electric utility use.
- Testing of trip points on overcurrent, overvoltage, undercurrent, undervoltage, and underfrequency relays.
- With Model 314 Phase Angle Meter, ideal for impedance relays.
- Precision measurement of frequency.

SPECIFICATIONS

Frequency Range: 47-450 Hz. (25 Hz available on request.)

AC Voltage: 15 mV to 1000 V RMS, 1.5, 15, 150, 1000 V FS, transformer isolated, 5000 ohms per volt.

AC Current: 1.5 mA to 100 A RMS, 0.15, 1.5, 15, 100 A FS, transformer isolated, .001 ohms insertion resistance.

Time Interval (2 ranges): 0 to 999.99 seconds in .001 second increments. 0 to 9999.9 cycles in 0.1 cycle increments.

Trigger Inputs: (Start and Stop) Contact closure, DC step voltage change, or AC input.

Accuracies: V, I, ±0.3% reading ±0.03% FS; Time, ±0.003% reading ± last digit.

Out of Range: Display blinks when level is too high.

Measurement Modes: Continuous, triggered, and "hold maximum."

Dielectric Test: 4250 V RMS to ground from V and I terminals. 1600 V RMS to ground from trigger terminals. (Per ANSI-C39.5.) Also meets SWC test.

Power Supply: 95 to 140 or 190 to 280 V RMS, 47 to 450 Hz, 20 watts, International Universal type connector.

Operating Temp. Range: 0°F. to 125°F.

Case: Portable, weatherproof, with cover 11″L x 7″W x 9½″D (28cm L x 18cm W x 24cm D); without cover 11″L x 7″W x 7″D (Panel 11″ x 7″).

Weight: 10 pounds. (Shipping weight, approximately 17 pounds.)

OPTIONAL FEATURES

Option 101: Fast frequency measurement capability — 0.1 sec. meas. time, 0.01 Hz resolution; 1 sec., .001 Hz resolution; accuracy ±0.002 Hz ± resolution.

Option 102: Low pass filters for removing effects of harmonics from measurements.

Option 103: BCD outputs suitable for driving printers for recording measured data. DTL/TTL compatible.

Option 105: True RMS detection.

Option 106: Panel mount.

Option 107: Panel mount with remote display.

Option 108: Accessory power for 325-PA-( ) adapters.

Option 109: Dry contacts corresponding to START/STOP times (available only when Option 108 is chosen.)

325-PA-1001: DC Current Adapter.

325-PA-1002: DC Voltage Adapter.

325-PA-1003: Contact Opening Trigger Adapter.

325-PA-1004: Adjustable Threshold Trigger Adapter.

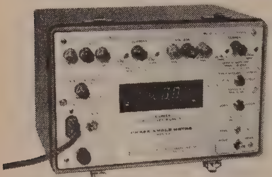
SERIES 314

POWER SYSTEM PHASEMETER / FOR ACCURATE & RAPID MEASUREMENT OF PHASE IN ELECTRIC POWER SYSTEMS



FEATURES

- Universal Current-Voltage Inputs, V-V, I-I, V-I
- Portable
- Immune to Harmonics
- Independent of Frequency Changes
- Digital Readout — "No Hands" Simplicity
- Accuracy ±0.5°, Resolution ±0.1°
- Independent of Input Levels
- Complete input isolation

APPLICATIONS

- Testing and Adjustment of Protective Relays
- Measuring Load Current Phase Angles — Measuring Power Factor
- Testing Polyphase Balance
- Determining Power Flow in Interconnected Systems
- Minimizing Circulating Reactive Currents
- Synchronizing Multiple Sources

Accurate, precise and rapid phase measurement is an essential technique in the setup, operation, and maintenance of modern power systems, subsystems, and the control and protection circuits used in them. The value of a phase meter in such applications is directly proportional to the speed, convenience, and validity with which it indicates the phase angles it measures. With the introduction of the Dranetz Model 314, virtually all of the limitations and error sources of electromechanical meters have been removed, and the overall accuracy of this class of phase measurements has been increased by more than a full order of magnitude. The basic accuracy of ±0.5° specified for the Model 314 is actually **maintained, without degradation,** over the wide ranges of frequency variation, voltage/current level, and harmonic content for which the instrument is rated. Furthermore, the direct-reading **digital** presentation of phase, to four-place resolution (0.1° increments) requires no interpretation or interpolation, and is not subject to reading errors or parallax. **The phase angle you see is the phase angle that exists — to within ±0.5°,** without correction or uncertainty.

SPECIFICATIONS

ELECTRICAL

Range: 000.0° to 360.0°, Direct-reading

Frequency Range: 47-53, 57-63 Hz (specify at time of ordering)

Input Current Range: (both input circuits) .015-50 A rms

Input Voltage Range: (both input circuits) 0.3 to 600 V rms

Current-Input Impedance: Approx. 2 or 20 milliohms

Display: Four digits, non-flickering, 0.6″ numerals

Resolution: 0.1°

Accuracy: ±0.5°

Burden:

Voltage: 1.8 VA max. at 600 V rms input

Current: Approx. 2.5 VA at 50 A rms input

Interaction Between Inputs: None

Errors Due to Harmonic Distortion: None for harmonic distortion up to 30%, any harmonic

Errors Due to Offground Inputs or Reversal: None

Overload:

Voltage: 100% overload for 1 minute

Current: 100 A rms for 1 minute

Dielectric Test: Up to 2200 Volts rms between inputs and ground (ANSI-C39.5)

Self-Check: Provided for 000.0°. Full scale (360.0°) is autocalibrated internally

Power Required: 115/230 V, 50-60 Hz, 20 Watts

MECHANICAL AND ENVIRONMENTAL

Case: Portable weatherproof carrying case with cover 11″L x 7″W x 9½″D (28cm L x 18cm W x 24cm D). Without cover 11″L x 7″W x 7″D. (Panel 11″ x 7″)

Operating Temperature Range: 10°F to 110°F

Weight: 10 pounds approx. (shipping wt. approx. 17 pounds)

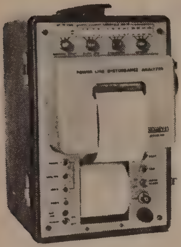
SERIES 606

POWER LINE DISTURBANCE ANALYZER/RECORDER



- For 115/230/460 V rms, 1 and 3 phase systems.
- Monitors, classifies, times and prints out line disturbances.
- Immediate and day-end printouts.
- Operates on command or disturbance — no wasted paper.
- For portable or permanent installation.
- 4 hour internal carry over power.

The 606 is designed specifically for monitoring power mains connected to computers, process control systems, hospital equipment and data communications devices, which are particularly susceptible to line transients, level changes or other disturbances. Using a digital microprocessor, the 606 classifies each disturbance into IMPULSE, CYCLE-TO-CYCLE CHANGE or SLOW RMS CHANGE. When preset thresholds are exceeded, the instrument prints out time, classification, magnitude, duration and channel designation. Data is also accumulated for overflow and day-end printout. The instrument is designed for both temporary pre-installation use and for permanent monitoring.

SPECIFICATIONS

Input Voltage Ranges: 115, 230, 460 V rms ±50%, all transformer isolated, Zin > 100 kΩ

Number of Inputs: Model 606-1, 1 input; Model 606-3, 3 inputs (3ϕ or separate circuits)

Test Modes:

AVG+ or AVG−: Increase or decrease in steady state rms, averaged over 10 sec

SURGE or SAG: Increase or decrease in cycle-to-cycle rms value

IMPULSE: 0-peak value of impulse having duration 0.5-100 microsec (excluding sine wave)

ACCUMULATED COUNT: Summation of disturbance data in memory (includes time, HI AVG+, LO AVG−, HI SURGE and number of HITS, LO SAG and number of HITS, HI IMPULSE and number of HITS)

Printing Modes:

AVG+ or AVG−: Prints time, AVG+ or AVG−, rms VALUE, CHAN., when exceeding threshold of 2, 5, 10, 15 V rms*

SURGE or SAG: Prints time, SURGE or SAG, rms VALUE, CHAN. and duration (cycles) when exceeding threshold of 2, 5, 10, 15 V rms*

IMPULSE: Prints time, IMPULSE, 0-pk VALUE & CHAN. when exceeding threshold of 50, 100, 200, 400 V and 0-pk.

SUPPLY DOWN or UP: Prints POWER DOWN or POWER ON and TIME

STORED DISTURBANCES: Stores data on disturbances during printing. Prints out when printer clears

ACCUMULATED COUNT: (Short Term) Overflow of data entering printer. Prints out automatically

DAILY ACCUMULATED COUNT: End-of-day print out. Prints number of day and ACCUMULATED COUNT

TEST: Prints time and ACCUMULATED COUNT

RESET: Prints time and ACCUMULATED COUNT, resets memory

PRINT OFF: Prints PRINT OFF, disables printer, all data goes into accumulator

Accuracy: AVG+ or AVG−: ±1% reading; SURGE/SAG: 1% reading; IMPULSE: 5% of reading to 10X threshold pk (or 4000 volts, whichever limits first)

Clock: Indicates real time in hours, minutes, seconds, crystal controlled. During power off, operates on internal batteries (4 hours). Clock resets from front panel buttons

Printer: 17 character, alpha-numeric, thermal, paper 2¼″ wide, prints 1 line/sec

Supply Power: 90 to 140 V, 47-450 Hz, 1ϕ, 0.5A

Case: Portable, aluminum, weatherproof, removable cover, equipped with carrying handle and feet

Size (with cover): 11″H x 7″W x 9½″D; net weight, 15 lbs.

Options: Opt. 101 (606-3 only),freq. disturbance; Opt. 102, meas. freq. 50 Hz nominal; opt. 103 (606-3), meas. freq. 400 Hz nom.

*These values for 115 V input; multiply by X2 or X4 for 230 V rms or 460 V rms.

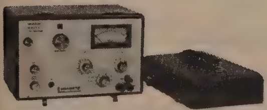
MODEL 910 UNINTERRUPTIBLE POWER SUPPLY: Model 606 operates normally during all above line disturbances as well as during complete line interruptions up to 50 millisec. For line interruptions up to 4 hours, unit prints power down and power return times, maintains clock operation and retains accumulated data in memory. For complete operation during power shutdown up to 2 hours, use Dranetz Model 910 uninterruptible power supply.

CHARACTERISTICS: Input, 60 to 180 Vrms, DC to 800 Hz; output, 105 to 125 Vrms, 60 Hz, 1A; carry over time, 2 hours; size, 11″ x 7″ x 9½″.

FOR FULL INFORMATION WRITE FOR BULLETIN 606

SERIES 602

FREQUENCY SELECTIVE VOLTMETER



- Broad range — 2 kHz to 350 kHz.
- High selectivity — spurious signals down more than 50 dB.
- Battery powered — long life.
- Excellent for K and N carrier systems.
- Meets W.E. KS-15538-L5A

The Dranetz Model 602 Frequency Selective Voltmeter is a low power transistorized instrument for the measurement of carrier signals hidden among other multiple signals. The instrument uses a frequency selective detector based on heterodyning to cover a broad frequency range, and uses a crystal oscillator for frequency and level calibration. The instrument has both high impedance and bridging inputs for 135 or 600 ohms (balanced or unbalanced).

SPECIFICATIONS

Frequency Range: 2-350 kHz

Input Levels:

Full Scale Ranges: −60 to +20 dBm, 5 dB/step

Sensitivity: −70 to +22 dBm

Selectivity: Spurious output down more than 50 dB

Accuracy:

Level: 135 ohm input, ±.25 dB
600 ohm input, ±.5 dB

Calibrator: ±.25 dB at 35 kHz ±250 Hz

Frequency: ±1 kHz or ±500 Hz

Frequency Response: ±1 dB ref 25 kHz

Meter Bandwidth: Nominal 500 Hz at −3 dB, 1000 Hz at −60 dB

Audio Bandwidth: Nominal 2.5 kHz at −6 dB, 8 kHz at −60 dB

Internal Noise: At least 20 dB below full scale

Battery Drain: 80 mA nominal

Size: 11″L x 7″W x 9½″D (28cm L x 18cm W x 24cm D) with cover; panel 7″ x 11″

Weight: Net 10 lbs., shipping 15 lbs.

Dytronics has pioneered in the development of an original technique for the measurement of phase angle. This measurement method has been recognized as an authentic "PRIMARY" technique. Measurements are dependent only upon fundamental concepts, and not upon secondary considerations. The measurement methods that have been developed by Dytronics have resulted in absolutely unmatched performance. Hundreds of our Phase Angle Standards that employ this exclusive "PRIMARY" technique are in use throughout the world.

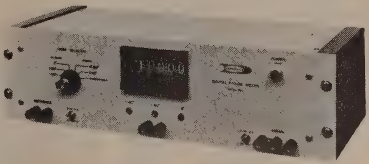
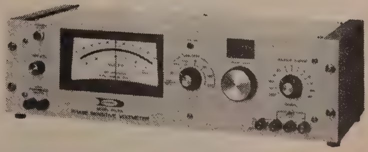
- SERVO DESIGN APPLICATIONS
- CALIBRATION OF NAVIGATION TESTING INSTRUMENTS
- CALIBRATION OF WATT METERS

Model 224 "hands-off" Digital Phase Meter

Hands-Off Phase Angle Measurements using new "Linear Mode Concept" 0.1° Accuracy 0.01° Resolution





Model Number	Frequency Range	Accuracy	Internal Filters	Outputs	0° to 360° Coverage without Ambiguity?
222	20 Hz-100 kHz	±0.1°	No	DC	Yes
224	20 Hz-100 kHz	±0.1°	No	DC-BCD	Yes
244/RS	400 Hz	±1.0°	Yes	DC	Yes
250B	4 Frequency	±1.0°	Yes	DC	Yes

SEE OUR CATALOG FOR A COMPLETE LIST OF MODELS AND SPECIFICATIONS

MODEL RT-501

HIGH-FREQUENCY DECADE VOLTAGE DIVIDER

- OPERATION UP TO 500 kHz
- ±0.0005% ACCURACY AT 5 kHz; ±0.09% ACCURACY AT 500 kHz
- LESS THAN 1 OHM OUTPUT IMPEDANCE
- 1 PPM RESOLUTION

HIGH-FREQUENCY RATIO TRANSFORMER

Dytronics offers an array of instrumentation for the measurement and generation of phase angle. This successful and advanced measurement technique pioneered by Dytronics is recognized as the finest throughout the world. DIT~MCO:
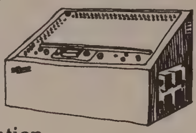
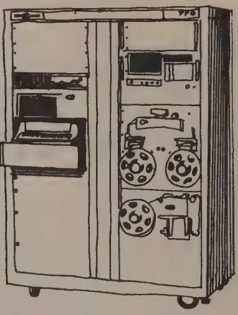
THE DIFFERENCE IN TESTING!

FOR TWO DECADES, THE SINGLE SOURCE MANUFACTURER OF FIXTURE/WIRE-CIRCUIT ANALYZER TEST EQUIPMENT AND SYSTEMS . . . THAT WORK!



200

Twenty years ago, in 1954 our first wiring analyzer, the DIT-MCO model 200, was purchased by Goodyear Aircraft of Akron, Ohio. At that time the 200 was a real innovation. Through the years technological advancements in the aerospace, computer, and communications industries have demanded more sophisticated and versatile circuit analysis test equipment.

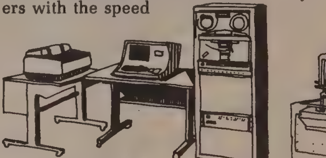


770

DIT-MCO has met the test!

We have remained the only company in the industry whose sole business is the design and manufacture of automatic test systems, computer controlled analyzers and systems, and fixturing devices. From the first rather simple model 200 (still operative after 20 years) we've come a long way.

Our variety of test equipment includes:

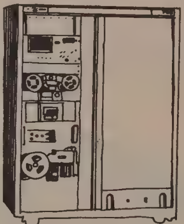


823

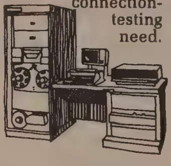
The 700 SERIES: Random access analyzers with the speed and reliability you want at the price you want to pay.

The 730 SERIES: A step-up . . . faster test speeds, greater terminal capacity, expanded versatility.

The 770 SERIES: Tape-programmed random-access wire-circuit analyzers with the speed and available instrumentation to meet almost every conceivable connection-testing need.



700



810B

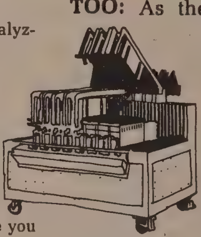
SYSTEM 803: A high speed random-access circuit analyzer combining the field proven capabilities of DIT-MCO test systems with the flexibility and capacity of computerization.

SYSTEM 810B: A multichannel real-time, on line multi-programmed controller and program library for automatic wire-circuit test equipment AND numerically controlled production test equipment.

SYSTEM 823: Computer controlled, ultra high speed wiring analyzer particularly applicable where UUT terminal capacities are high. Revolutionary new switching eliminates massive adaptor cable systems.

SWITCHING: A choice . . . reed, bar relay, EQA, or solid state to give you optimum speed/reliability combinations.

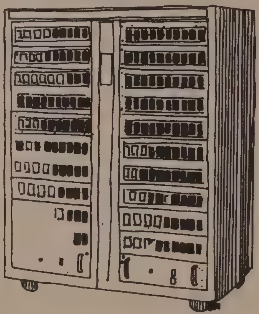
FIXTURING: Multi-layer board fixtures, spring pin and cam card fixtures, special custom access fixtures, and fixture/analyzer systems.



Fixture

AND CUSTOMER SERVICE TOO: As the largest exclusive manufacturer of automatic circuit test systems, we have demonstrated our ability to fully support all of our systems . . . in the past, now, and in the future.

For over 20 years DIT-MCO has been the acknowledged pioneer and leader in the field of circuit testing.



Switching

What's happening in circuit testing still happens best at DIT-MCO. Let our representatives show you how DIT-MCO equipment relates to your test needs. Call or write our nearest office. There is a DIFFERENCE in testing and DIT-MCO is IT!

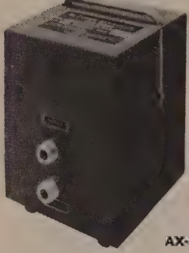
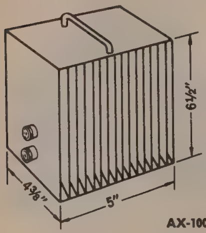
ATTENUATORS

AX SERIES ATTENUATORS



AX-100-20

- Oil-filled Self-Cooling.
- 50 ohm impedance.
- VSWR 1.1:1 to 500 MHz (1.15:1 for AX-500).
- Frequency Range DC-500 MHz, usable to 1 GHz.
- Stock values of attenuation are 3, 6, 10, 20, 30 db.



AX-100-20

Model*	Max. Power Watts	Accuracy	Attenuation Specify
AX-100	100	±0.5 db to 500 MHz	3, 6, 10 20,30 db
AX-500	500		

* Choose Stock Attenuation Value.

DUMMY LOADS

WL SERIES WAVEGUIDE WATER LOADS

WL-112

- Calibration resistor precisely located in coolant flow path permits calibration of load using 60 Hz line power (WLT Models).
- Quick-connect couplings on coolant connections guarantee safe, sure and convenient operation.
- Extremely low RF radiation.
- Optional equipment includes closely coupled Thermopiles, Output Meters reading directly in watts, and Flow meters.
- Water is both the lossy material and the coolant for these loads.

WLT-284

WAVEGUIDE LOADS

Model	EIA Desig.	Frequency Range GHz	VSWR Max.	Power Rating Average
WL-650	L	1.12-1.70	1.2	40KW

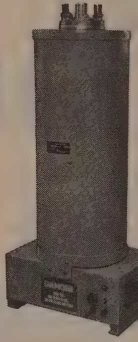
WL-28	V	26.5-40.0	1.15	500W

For Loads with Thermopiles, add T to designation. Example: WLT-284 (For use with Calorimeters).

DPTC-FM SERIES FM BAND DRY LOADS



DPTC-10KFM

Model	Average Power	Connector	VSWR
DPTC-10KFM	10KW	3⅛	1.2:1
DPTC-20KFM	20KW	3⅛	1.2:1
*DPTC-30KFM	30KW	3⅛	1.2:1
*DPTC-40KFM	40KW	3⅛	1.1:1
DPTC-50KFM	50KW	6⅛	1.2:1
DPTC-75KFM	75KW	6⅛	1.25:1

* Special Order Only.

Specifications: Model DPTC-10KFM

Power Rating: 10,000 watts
Duty: Continuous
Frequency: 85-110 MHz
VSWR: 1.2:1
Weight: 37 pounds
Connector: 3⅛ standard
Power Required: 115 VAC 60 Hz standard
Ambient Temp. Range: −40° to 52°C
Dimensions: 38 h x 11 d x 16" w.

The new Electro Impulse Dry FM Band Termination will save the costs of water or expensive installations for other types of loads.

Consisting of a practically indestructible resistive element in a stream of forced ambient air, the DPTC-10KFM will operate silently for just a few pennies a year . . . **and we guarantee it for 2!**

APPLICATION: Highly dependable Termination for FM Transmitters. Requires only 115 VAC, 30 watts power.

UNIQUE WARRANTY

"This Termination is Unconditionally Guaranteed against defects in parts or workmanship for a period of 25 months, provided it is operated within recommended parameters."

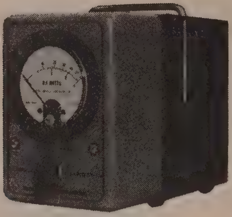
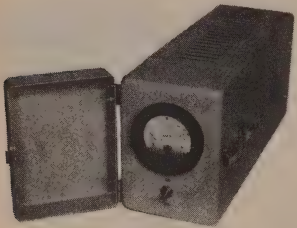
PM SERIES
TERMINATION-TYPE
RF POWER METERS



PM-10A

Full Scale Ranges	15 & 60 watts
Insertion VSWR	1:1:1
Accuracy (to 500 MHz)	±5%
Frequency Range MHz	.2-1000



DPM-3

Full Scale Ranges	50 & 150 watts
Insertion VSWR	1.1:1
Accuracy (to 500 MHz)	±5%
Frequency Range MHz	.2-1000

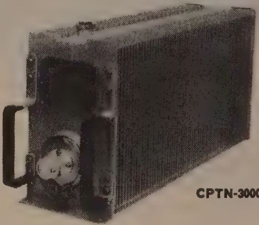
RUGGED, ACCURATE, SIMPLE TO CALIBRATE!

- Direct reading — no calibration charts.
- Calibrate anywhere — use line frequency standard.
- Portable — no power required.
- Detachable Load Resistor can be used as a Termination in a remote location.
- 50 ohms impedance — other impedances available.
- Type "N" Connector supplied — other types available upon request.

CPTN SERIES
COAXIAL DUMMY LOADS

CPTN-500

- No external power required.
- Up to 5,000 watts average power.
- Frequency range DC-3500 MHz.



CPTN-3000

- Rhomic Antenna Terminations also available.
- Oil filled termination cooled by convection — almost completely maintenance free.
- Units may be pulsed.
- Standard impedance is 50 ohms. Units can be furnished with 72, 300 or 600 ohms impedance. Request quotation from factory on special units.

HIGH TORK PRECISION METERS

PRODUCED IN VOLUME AT COMPETITIVE PRICES

EMICO is your dependable VOLUME source for 100% American-made AC and DC meters for a wide range of applications in the electronics, automotive, appliance, test equipment and process industries. Select any standard model or have EMICO design and engineer a meter to your exact requirements, including a custom dial face with special scale, trademark, name or colors. Send for a complete catalog of standard models or mail drawings and specifications for a prompt quotation on a custom meter.

PANEL METERS WITH METAL OR PLASTIC BEZELS

Plastic Bezel Meter
Model 42—2$\frac{5}{16}$″ square
Model 44—2$\frac{13}{16}$″ square

Metal Bezel Meter
Model 72—2¼″ square
Model 74—2¾″ square

Featuring the unique EMICO High-Tork movement, these versatile meters are available as AC or DC ammeters, voltmeters and milliammeters. All AC meters have 5% accuracy; DC meters available with 3% or 5% accuracy. These meters can be mounted into a 2 1-16″ diameter panel hole.

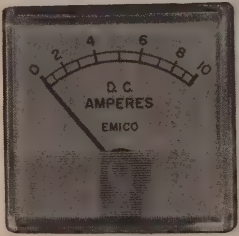
EMICO

THE CHARGE INDICATOR WITH A MODERN LOOK BUT AN OLD-FASHIONED PRICE



Plastic Face Meters

50 Series all approximately 2⅜″ square

The eye-catching appearance, durability, and low price tag have made these meters especially popular. The one shown above (Model 53) is ideal for battery charger applications. Features attractive, clear molded plastic bezel and easy-to-read scale that can be customized. Specific models available as DC ammeters, voltmeters and milliammeters with 3% or 5% accuracy. AC model accurate to 5% of full scale.

Edge-Reading Meter
Model 13 1$\frac{13}{16}$″ x ¾″

You can engineer added sales appeal into your product by giving it the EMICO edge—either Model 12 or the slightly larger Model 13. Both feature a clear molded plastic front and case plus excellent readability. Model 12, primarily a current indicating device, is available in DC ranges from 0-500 microamperes through 0-50 milliamperes. Model 13 can be supplied as a 0-500 microampes DC meter, as well as an AC or DC ammeter, voltmeter and milliammeter. Either 3% or 5% accuracy is available on DC meters, depending upon the sensitivity. All AC meters have a 5% accuracy rating.

EMICO®

Tough Guy in All Weather

Model 35W—3½" dia.

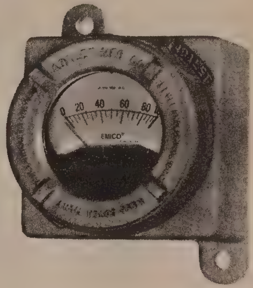
Designed for difficult environmental conditions, this intrinsically safe, rugged sealed meter is mountable anywhere with standard electrical fittings. Pressure tested under water in its polycarbonate housing. Magnetic shield standard. Concealed zero adjustment protects suppressed ranges. Independent five point calibration scale.

Send for detailed product brochure, today.

Tough Guy in Explosive Situations

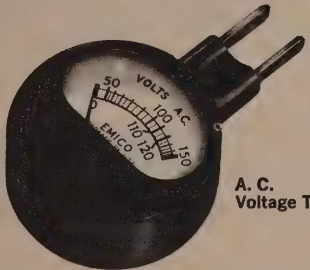
Model 35EP—5" x 7¼"

Designed for use in hazardous locations, this meter features UL listed sparkless, rustless aluminum housing. Magnetic shield standard. Concealed zero adjustment protects suppressed ranges. Independent five point calibration scale. Four alternate, field changeable, 90 degree mounting positions of meter eliminate extra plugged connection taps and allow positioning of housing for entrance of conduit from top, sides or bottom.



Send for detailed product bulletin, today.

JUST PLUG-IN FOR ACCURATE READING OF A.C. VOLTAGE



A. C. Voltage Tester

This handy pocket-size plug-in meter provides an instant accurate check of line voltage or fluctuation in the 0-150 volt range. Essential tool for electricians and electrical appliance servicemen, it's a well-appreciated accessory or premium offer for manufacturers of electrical products. Precision mechanism (5% accuracy) with damped meter movement. Convenient 90 degree swivel prongs for ease of reading from any position. UL listed.

OPTIONS

Option B Additional Resolution – 10 V Range: 10.00000 Vdc, 10 µV (1 ppm). 100 mV Range: 100.0000 m Vdc, 0.1 µV (1 ppm).
Option C Ready Signal – Output signal indicating "ready" state.
Option J Bipolar Operation – Programable positive and negative output voltage control.
Option K Negative Logic – Logic "0" ≡+2 V (min), Logic 1 ≡0.8 V (max).
Option L Binary Code – Accepts straight binary code.
Option M Control Panel – Manual controls for program check and instrument check. A single switch controls the manual/program mode. Program lines do not have to be disconnected for manual operation.

ACCESSORIES

p/n MR-1 memory register or buffer storage.
p/n MR-2 serial-to-parallel converter with storage.
p/n CM-1 CMOS Compatable Logic
p/N IS-40 Opto – Isolation

DIFFERENTIAL VOLTMETER (ΔVM) AND CALIBRATOR — MODEL 2902 (Bulletin 21)

The model 2902 is a high accuracy ΔVM for potentiometric and differential DC voltage measurements. Also, it is a highly stable and accurate reference/source/standard.

	MEASURE MODE		OUTPUT MODE
Ranges	1000V, 100V, 10V, 100mVdc	**Ranges**	100V, 10V, 1V, 100mVdc
Sensitivity	1000V, 100V, 10V, 1V, 100mV, 10mV, 1mV, 100µV, 10µV	**Resolution**	100µV, 10µV, 1µV, 100mV
		Stability	±0.0005%
Maximum sensitivity	0.5µV/division	**Current**	50 to 100mA
Zin	00 At null; 10 MΩ of null.	**Accuracy**	0.002% of setting
Accuracy	±0.002% of setting.	**Price**	$1495.00

DC VOLTAGE CALIBRATOR

RACK MOUNTING ASSEMBLY p/n RK-01 (Bulletin 26)

Complete with rack-style handles. Available for all models. **Price $20**

Model 501 — Series H

OUTPUT SPECIFICATIONS

Output Voltages: Unipolar (Bipolar see Option J)
10.0000 V dc
and 100.000 mV dc – See Option D

Resolution: 10 ppm (1 ppm – See Option B)
10 V Range: 100 μV or 10 μV
100 mV Range: 1 μV or 0.1 μV

Accuracy:
±(0.005% of setting + 0.0005% of range + 5 μV)

The reference is built into the instrument. It is a selected, aged zener diode that is temperature compensated.

The accuracy is based on the "Limit of Error" (or "Worst Case") Method. All other specifications noted hereafter, which effect accuracy, e.g., line load, temperature, drift are **included in the accuracy statement.** Thus, all other specifications listed are NON-ADDITIVE.*

Settling Time:
50μ seconds to 0.005% of programed voltage. Including polarity change.

Stability: *(Non-Additive)
24 hrs: ±0.001%; 90 days: ±0.0025%; 6 mos: ±0.005%

Ripple & Noise: (0.0005% of range + 5 μV) RMS
in a band pass of 0.8 Hz to 100 kHz. No random spikes.

Output Current: 10 V range: 50 mA; 100 mV range: EMF into 400kΩ load.

Note: The rated accuracy of the 100 mV range applies when the R_L is 400kΩ or higher. (See: "Output Impedance")

eg: Where Z_o = 20 Ω and R_L = 400kΩ
∴ IR error = 0.005% of programmed value.

Output Impedance:
10 V range = 0.03Ω; 100 mV range = 20Ω (constant).

Regulation: (*Non-Additive)
Line & Load = ±0.001%

Protection:
Short-circuit and overload protection with front panel indicator.
Standby/Ready signal to programer – See Option C.

Isolation:
Power transformer primary to analog output: 2.5 x 10^4 megohms, 300 pf. Control logic to analog output: with opto-Isolators p/n IS-40: 10^9 Ω, 130 pf, 500 Vdc.

Temp. Coef.: *(Non-Additive)
Ambient: ±0.0005%/°C. Operating Limit: ±0.001%/°C.

PROGRAMMING:

Standard TTL, DTL and CMOS optional.
Code: Binary Coded Decimal.
Logic: Positive.
Negative logic - see Option K
Logic swing: Logic "0" ≡ 0.8V (max.)
Logic "1" ≡ +2V (min.)
Input loading factor: 1 TTL standard load per bit.
Logic lines: 5 decade model ≡ 20 lines.
6 decade model ≡ 24 lines.
Options: Bipolar control: add 1 line.
Std by/ready: add 1 line.
Memory: add 1 line.
Ranging Amplifier: add 2 lines.

MECHANICAL SPECIFICATIONS.

Power Requirements:

105 to 125 Vac; 50-60 Hz, 10 watts
(220 VAC power – See option 220)

Temperature:

Calibration Temperature: 23°C ± 1°C
Ambient Temperature: 20°C to 30°C
Operating Limit: 10°C to 50°C
Storage Temperature: -40°C to 85°C

Dimensions:

W* 16.9 x H 5.2 x D 14.2 in.;
W* 42.9 x H 13.3 x D 36.2 cm.
*With rack mount accessory RK-01: W = 19.1 in.; 48.5 cm.

Weight:

12.5 lbs.; 5.7 kg. Shipping wt: 16.5 lbs.; 7.5 kg. (approx)

Warranty: 6 months includes accuracy and stability.

OPTIONS:

Additional Resolution: LSD$_2$ Option B $110

A sixth, programable decade may be added which provides resolution of 1 ppm. 10μV on 10V range; 0.1μV on 100mV range. 4 additional programing lines are required.

Stand-by/Ready signal: Option C $ 55

Output signal indicates the status of the calibrator.
Logic "0" = "Ready"
Logic "1" = "Standby"
1 additional line (output) is required.

100 Millivolt Range: Option D $165

Outputs from 1 μV to 100 mV dc. This is in addition to the 10 V range. All options and specifications do apply.
1 additional programing line is required.

Bipolar Operation: Option J $165

Programable positive or negative output control.
Logic "0" = Positive (+) output
Logic "1" = Negative (-) output
1 additional programing line (bit line) is required.

Negative Programming Logic: Option K $110

Logic "0" = +2 V (min.) Logic "1" = 0.8 V (max.)

Straight Binary Entry: Option L $ 55

Five decade instruments only (Option B not available).

Manual Control Panel with Display: Option M $330

The manual control assembly is factory installed and becomes part of the front panel. Each control bit may be manual programed for calibration and program check-out. A switch controls the manual/automatic mode. The bit light display is operative in both the manual and the automatic modes.

ACCESSORIES

Mating Connectors: (supplied with the instrument)

Program input:	Part # MP-0156-25-SP-2	(2 required)
Analog output:	Part # 3106A-14S 6P	(1 required)

Rack Mounting Brackets, with handles: part # RK-01

Memory Register: Part #MR-1 $220

This eliminates the requirement to "hold up" the bit lines in order to sustain the programed voltage output. The register will respond only to the strobe command. Thus, the programer may be used for other functions while the calibrator voltage is maintained.
Construction: Plug-in P.C. board.

Serial-to-Parallel Converter: Part #MR-2 $440

This accessory permits a program format that is parallel by bit and serial by digit. The number of bit lines is 9. Memory function is included.
Construction: Plug-in P.C. board.

CMOS Compatible Input: Part #CM-1 $165

When ordering specify, "family" and voltage swing.

Programable Ranging Amplifier: Model RA-3 $950

This is an additional chassis, which is operated in conjunction with the Model 501 H, to provide programable dc voltage outputs up to 200 V f.s.
(For complete specifications see Bulletin 33, pg 4)

Opto-Isolation: Part #IS-40 $225

The opto-isolators provide the maximum isolation between the logic circuit and the analog output. $10^9 \Omega$, 130 pf, 500 Vdc. Many applications do not require this high degree of isolation. The opto-isolators are conveniently mounted in a plug-in PC board. Therefore, the opto-isolators may be installed, in the field, when and if the need arises.

A. 1.4 KILOWATT/1140L

- **9 KHz to 250 KHz**
- **All solid state**
- **Linear output**
- **Failsafe**
- **Driven by any signal source**
- **Weighs less than 45 lbs.**
- **Works from 115 volt outlet**

The ENI 1140L is a revolutionary development in high power solid state amplifiers. The 1140L is designed for high power RF heating, Ultrasonics and high power laboratory applications. Optional matching transformers will deliver full power to any load impedance from 3 ohms to 800 ohms balanced or unbalanced.

B. 40 WATT/240L

- **20 kHz to 10 MHz coverage**
- **Up to 150 watts CW & pulse output**
- **Works into any load impedance**

Extraordinary performance in a wide range of transducer drive applications. Deliver up to 150 watts into any load regardless of its impedance. Compatible with all signal and function generators, the 240L is a high quality laboratory instrument for ultrasonics, biological research and electro-optic modulation.

C. 20 WATT/320L

- **250 kHz to 110 MHz coverage**
- **50 dB ± 1 dB gain**
- **Less than 5 Nanosec rise time**

This low distortion unit is an outstanding performer in NMR/ENDOR spectroscopy and for laser modulation. Constant forward power is available regardless of load impedance.

D. 50 WATT/350L

- **250 kHz to 105 MHz**
- **50 dB ± 1.5 dB gain**
- **More than 100V RMS into high impedance load**

Portable and lightweight, this unit is rugged enough for field operation and powerful enough for use in AM, FM, SSB, and Data Communication Systems.

NEW 300 WATT/A-300

- **300 KHz to 35 MHz**
- **55dB ± 1dB gain**
- **Up to 500 Watts pulse and CW**

Highest power in a portable package. Top quality signal transmission in AM, SSB, and Pulse Communication Systems. Cannot be damaged by mistuned antenna.

503L RF POWER AMPLIFIER
2.5 WATTS LINEAR OUTPUT
POWER
INPUT
1 V MAX
40 dB
2-500 MHz
OUTPUT

E. 100 WATT/3100L
- 250 kHz to 105 MHz
- Up to 180 watts pulse
- Operates from 115/230V
- AC single phase line
- Driven by any signal generator

Designed to replace bulkier tube amplifiers, the model 3100L will provide reliable and maintenance free operation for NMR, ultrasonics and communications applications.

F. 2.7 WATT/403L
- 150 kHz to 250 MHz coverage
- 37 dB ± 1.5 dB gain
- 2.5 Nanosec pulse rise time

The extended frequency coverage of this compact power amplifier along with its ability to work into any load make it ideal for general laboratory work as well as signal distribution.

G. 5 WATT/406L
- 150 kHz to 250 MHz coverage
- 40 dB ± 1.5 dB gain
- 9 dB noise figure

This high reliability unit will withstand 20 dB of overdrive for all load conditions, including short and open circuits. Widely used in CATV and in-plant TV distribution systems.

H. 20 WATT/420L
- 150 kHz to 250 MHz coverage
- 45 dB ± 1.5 dB gain
- Class A linearity

The widest band solid state power amplifier available at its 20 watt power level, the ENI 420L is a truly state-of-the-art instrument. As a drive source for high resolution acousto-optic modulators and deflectors the Model 420L is invaluable.

ROCHESTER, NEW YORK 14623

I. 3 WATT/500P & 500L
- Flat 27 dB gain
- 8 dB noise figure
- 500 L has AC power supply
- 2 MHz to 500 MHz usable coverage
- Thin film hybrid construction
- 500 P requires 24 VDC at 0.3 AMP

These compact units can deliver more than 300 milliwatts from 1.7 MHz to 560 MHz at low distortion. A thin film microelectronic circuit is the heart of these general utility laboratory amplifiers. Extremely wide band response at a very modest price.

J. 3 WATT/503L
- Flat 40 dB gain
- Class A linearity
- More than 3 watts of linear power
- 1.8 to 510 MHz frequency coverage

Three watts of power from 1.8 MHz to 510 MHz when driven by any laboratory signal generator. As a general purpose laboratory instrument and for wideband pulse systems the 503L is an exceptional unit.

Creative hands solving amplifier application problems worldwide.

THE COMPANY ENI's dedication to engineering excellence in the manufacture of RF power amplifiers has resulted in a growing list of more than 1,000 customers throughout the world. With over 55 field sales offices worldwide we can provide service and/or consultation that no other company offers ie; if we can't repair your unit in 5 days, we'll loan you a new one; 10 day free evaluation of our products, engineering assistance on applications problems is free, just call or write.

THE PRODUCTS Covering the frequency spectrum of 9 kHz to 1 GHz, ENI offers a full line of solid state RF amplifier models with outputs ranging from 300 milliwatts to more than 1000 watts. Capable of being driven by virtually any signal generator, frequency synthesizer or sweeper, ENI amplifiers are versatile and flexible sources of power for a wide variety of applications. Completely broadband and untuned, these highly linear units will amplify inputs of AM, FM, SSB, TV and pulse modulations with minimum distortion. Although all power amplifiers will deliver their rated power output to a matched load, only ENI power amplifiers will deliver their rated power to any load regardless of match. ENI units are designed to internally absorb reflected power from a mismatched load. Unconditional stability and failsafe design mean that the user need never fear damage or oscillation due to severe load conditions (including open or short circuit loads). For applications requiring more power than is available from a single unit, ENI Power Multicouplers permit the power addition of up t four amplifiers. Whether used a a laboratory instrument or for a OEM application, ENI can provid the right unit to suit your requirements.

THE GUARANTEE Free 10 Day evaluation of all products; 1 Ye Warranty (all parts and labor); Authorized factory service avai able in U.S.A., Europe, and Asia 100 percent inspection, 100 percent burn-in of all complete units.

erc Digital Instruments

STANDARD FEATURES

- BCD Outputs
- Reliable LED Displays
- Rugged, All-Aluminum Enclosures
- 115 Vac, 50-400 Hz Power, Standard; most available with 220 Vac 50-400 Hz, 5 Vdc, or 10-30 Vdc Power Supplies
- Remote Control Inputs
- "All 8's" Power Failure Indicator w/Clocks, Counters and Stopwatches
- All Connectors and Mounting Hardware Supplied
- Complete Family of System Building Blocks

SELECTED OPTIONS

Options listed are those most frequently ordered. Dozens of other standard options are available to adapt ERC's digital instruments for special applications. Data sheets with complete specs, option lists, and prices are available for each series of instruments.

PRICES

FOB Overland Park, Kansas. Terms: Net 30 days. ERC reserves the right to change prices without notice. All orders subject to acceptance.

DELIVERY

Small quantity, stock to four weeks ARO. Larger quantity, request quotation.

WARRANTY

Electronic Research Company warrants instruments of its manufacture to be free from defects in material and workmanship for one year (12 months) from the date of original purchase. Any instrument found to be defective during this period may be returned, transportation prepaid, to the factory for repair or, at our option, replacement without charge.

This warranty does not apply to any of our products which have been repaired or altered by unauthorized persons or which have had the serial number altered, effaced or removed. This warranty is in lieu of all other warranties whether expressed or implied.

The instrument will be returned to the customer unrepaired unless the nature of the defect and the name and phone number of a person to contact is noted with the unit. Equipment returned should be forwarded directly to Electronic Research Company, attention: Instrument Repair Department.

erc Clocks and Timers

Model 2200 Precision Timer

erc
0 0.1 3 0
PRECISION TIMER
START STOP TIMING

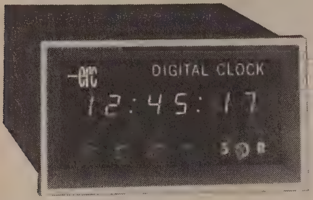
Features
- Wide timing range . . . 1 μsec to 999.99 secs
- Crystal-controlled oscillator for timing accuracy
- Time Selection by front panel switches
- Manual or electronic (remote) control with timer override (STOP) input
- TTL and relay outputs permit use in a wide range of timing applications

Price $249.0

Dimensions
Case Size II except Case Depth (Dim. A) is 7.250″ (184.2 mm).

Typical Applications
Use as timebase with ERC Series 2300 Counter allows scaling to read ou directly in RPM or other engineering units.
Accurate interval timing for process or laboratory control.
Control up to 28 Watts directly with internal relay.

Series 2400A Digital Clocks



Features
- 6-digit LED displays
- Available with Crystal or 60 Hz time base
- TTL-compatible BCD outputs
- Programmable time mark output available
- Battery backup capability

Models/Prices

Model No.	Time Base	Interval	Price
2401A	Crystal	12 Hr.	$353.00
2402A	Crystal	24 Hr.	353.00
2412A	60 Hz	24 Hr.	313.00

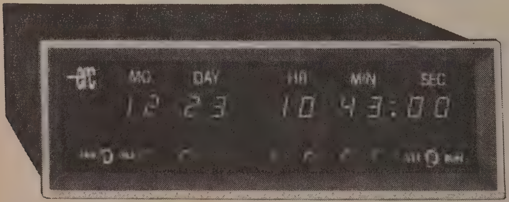
Selected Options

-01	Buffered, latchable, BCD outputs. Case Depth (Dim. A) is 7.250″ (184.2 mm)	add $40.0
-20	5 Vdc operation only	no charg
-22	220 Vac operation only	no charg
-26	No ERC logo	add $10.0
-28	Blank lens (no legends or logos)	add $ 5.0

Dimensions Case Size I

Typical Applications
Time-of-day display and systems use. One pps and 10 pps TTL outputs are useful for sequencing and timing. BCD outputs interface with printer for recordin time of printout of other system parameters. Uninterruptible timing is provide by use of Series 5200 Battery Backup System.

Series 2440A/2450A Calendar Clocks



Features
- LED displays
- Buffered, latchable, TTL-level BCD outputs
- Day-of-year or Month-day versions available
- Available with Crystal or 60 Hz time base
- Programmable time mark output (Models 2450A-2456A only)
- Battery backup capability

Dimensions Case Size III

Models/Prices

-32	Add 2 digits to the left of display	add $50.00
-33	Add 3 digits to the left of display	add $75.00

Note: Count-down models are available. Contact the factory for details.

Typical Applications

Remote control inputs facilitate accurate time interval measurement in a wide variety of applications.

An ERC Series 2600 Stopwatch and a Series 2500 single-limit BCD Tracking Comparator make a presettable precision timing system.

Mission Clock (not shown)

Features
- External time preset input
- External control line for count direction
- Crystal time base
- Polarity indication
- Thru zero operation
- ±99:59:59 Hr/Min/Sec display

Model 2690A $371.00

Dimensions Case Size II

erc Counters

Preset Counter-Comparators

erc
COMPARATOR
LO
HI
+00395

Features

- Serial TTL pulse-train inputs
- "HI" and "LO" limit LED indicators plus "IN" LED indicators for dual-limit models
- Logic and relay outputs facilitate a variety of interface applications
- TTL compatibility

Models/Prices/Dimensions

Model No.	Number of Digits	Case Size	Price
Single Limit Models			
2504-01	4	I	$200.00
2505-01	5	I	215.00
2506-01	6	II	230.00
2507-01	7	II	245.00
Dual Limit Model			
2524-01	4	II	$290.00

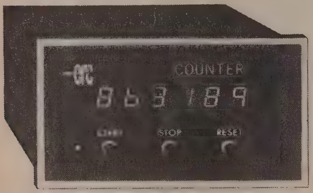
Selected Options

-02	Auto-Reset	add $25.00
-20	5 Vdc operation only	no charge
-26	No ERC logo	add $10.00

Typical Applications

A Series 2500 Preset Counter-Comparator with the Auto-Reset option is a complete batching system.

Series 2300 Totalizing Counters



Features

- 3 to 6 digit LED displays
- TTL-compatible BCD outputs
- TTL or contact closure inputs or Low-level input (10 mV rms min.)
- Rugged all-aluminum enclosures
- Schmitt-trigger input (Models 2324 and 2326 only)

Models/Prices/Dimensions

Model No.	No. of Digits	Input Type	Max. Count Rate	Case Size	Price
Unidirectional Counters					
2303A	3	TTL or Contact Closure	10 MHz	I	$216.00
2304A	4	TTL or Contact Closure	10 MHz	I	252.00
2305A	5	TTL or Contact Closure	10 MHz	I	283.00
2306A	6	TTL or Contact Closure	10 MHz	I	316.00
2306B	6	Low-level sine wave	10 KHz	I	335.00
*2324	4	TTL or Contact Closure and low-level sine wave	50 KHz	II	260.00
*2326	6	TTL or Contact Closure and low-level sine wave	50 KHz	II	300.00
Bidirectional Counters					
2313A	3½	TTL or Contact Closure	100 KHz	I	$245.00
2314A	4½	TTL or Contact Closure	100 KHz	I	278.00
2315A	5½	TTL or Contact Closure	100 KHz	I	315.00
2316A	6½	TTL or Contact Closure	100 KHz	I	351.00
2316B	6½	Low-level sine wave	10 KHz	I	371.00
2317A-04	7½	TTL or Contact Closure	100 KHz	II	436.00
2317B-04	7½	Low-level sine wave	10 KHz	II	456.00

*Series 2320 Industrial Counters have buffered and latched BCD outputs standard. Case Dept (Dim. A) is 7.250″ (184.2 mm).

Selected Options

-01	Buffered, latchable, BCD outputs. Case Depth (Dim. A) is 7.250″ (184.2 mm). (Standard on Models 2324 and 2326)	add $40.0
-03	Quadrature input logic. Count input is two signals approximately 90 degrees out of phase. Direction of count is determined by which signal leads or lags (Models 2313-2317 only)	add $50.0
-04	Presettable inputs, bidirectional models only. Case Size II	add $50.0
-10	No switches	no charg
-12	10-30 Vdc operation only	add $60.0
-18	Reset switch only	add $10.0
-20	5 Vdc operation only	no charg
-22	220 Vac operation only	no charg
-26	No ERC logo	add $10.0
-28	Blank lens (no legends or logos)	add $ 5.0

Typical Applications

Series 2300 Counters find wide application in batching and counting systems BCD outputs interface with a printer for automatic recording or with an ERC Series 2500 Comparator for preset limit control. A bidirectional counter and dual-limit comparator can control a closed loop system.

ERC Counters

Series 2800 Digital Presets

PRESET
1 0 0 0 0 1

Features

- Thumbwheel-switch preset selection
- TTL-compatible, buss-oriented BCD outputs (preset units can be selected remotely)

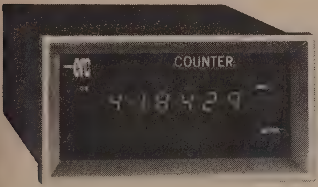
Models/Prices/Dimensions

Model No.	Digits	Case Size	Price
2804-01	±9999	I	$145.00
2806-01	±999999	II	165.00

Typical Applications

Generate BCD numbers for Series 2300 Presettable Counters and Series 2600 Time Interval Meters or to remotely select limits for Series 2500-03 Comparators.

Series 2700A Frequency Meters/Tachometers



Features

- Crystal time base
- 10 Hz to 20 MHz operation
- 4 and 6 digit LED displays
- Eight selectable time bases — 1, 10, 100 and 600 msecs and 1, 6, 10 and 60 sec.
- Accepts sine and square wave inputs
- 100 mV rms sensitivity
- Auto-reset insures accuracy of first reading
- Decimal point position externally selectable

Models/Prices

Model No.	Display	Price
2704A	9999	$340.00
2706A	999999	380.00

Selected Options

-01	Free-running gate; counter continuously gates without input signal present	add $15.00
-03	Front panel controls including mode select switch, sensitivity pot., and BNC input connector	add $40.00
-15	Bench Mount w/line cord	add $40.00
-22	220 Vac operation only	no charge
-26	No ERC logo	add $10.00
-28	Blank lens (no legends or logos)	add $ 5.00
-38	TTL input only	less $20.00

Dimensions Case Size II

Typical Applications

Used with ERC Series 2500 BCD Tracking Comparator, the Series 2700 Counter can display and control speed or events-per-unit-time.

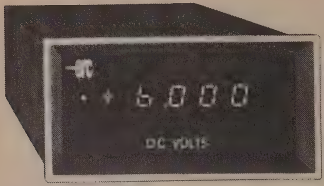
erc Voltmeters

Series 3500 Digital Panel Voltmeters w/5999 Count Full Scale



Features

- Optically-isolated BCD outputs
- Models available for 115 Vac or 220 Vac, 50-400 Hz; 5 Vdc; 10-30 Vdc; 20-60 Vdc
- Accuracy ±0.015% R, ±0.015% F.S., ±1 digit
- Auto Polarity
- Reliable LED displays
- Readout scaling capability
- Decimal point position externally selectable

Models

Model No.	Full Scale	Resolution	Input Resistance	Input Protection (Max. Signal Volt.)	Input Bias
3500	599.9 mV	100 µV	100 Megohms	130 Vac (RMS)	3 nA
3501	5.999 V	1 mV	1000 Megohms	130 Vac (RMS)	3 nA
3502	59.99 V	10 mV	1 Megohm	600 Vac (RMS)	0.3 nA

Price	All Models	$273.00

Selected Options

-12	10-30 Vdc operation only	add $50.00
-14	20-60 Vdc operation only	add $50.00
-15	Bench Mount w/line cord	add $40.00
-20	5 Vdc operation only	less $16.00
-22	220 Vac operation only	no charge
-26	No ERC logo	add $10.00
-28	Blank lens (no legends or logos)	add $ 5.00

Dimensions Case Size II, except Case Depth (Dim. A) is 7.250″ (184.2 mm).

Typical Applications

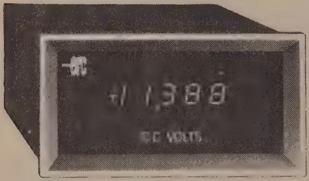
Use to convert output of transducer to BCD form. Then use ERC Series 2500 Comparator for control.

Interface with line printer. Use ERC Series 2400 Clock for periodic print command for automatic recording system.

Use external time base to scale voltmeter to read out in engineering units (RPM, pounds, gallons, etc.).

Many applications in automatic testing.

Series 4000 Digital Panel Voltmeters



Features

- TTL-compatible parallel BCD outputs
- Auto Polarity
- Stored LED displays
- Remote conversion controls
- Input isolated from BCD outputs

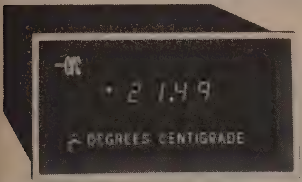
erc Temperature Indicators

Series 9300 Temperature Indicators



Features
- Temperature range of −60°C to +160°C
- Probe certification traceable to NBS
- Resolution to 0.01 degree
- Overall system is accurate to ±0.5°C
- TTL compatible, parallel BCD outputs
- Analog recorder output, 10 mV/°

Models/Prices

Model No.	Measurement Range	Resolution	Price
9300C	−60.00°C to +160.00°C	0.01°C	$645.00
9300F	−76.00°F to +199.99°F	0.01°F	645.00
9301F	−76.0°F to +320.0°F	0.1°F	645.00
9330C	−60.0°C to +160.0°C	0.1°C	600.00
9330F	−76.0°F to +199.9°F	0.1°F	600.00
9331F	−76°F to +320°F	1°F	600.00

Silicon Sensor Probes For use with Series 9300 Temperature Indicators

Probe No.	Description	Price
P-100	½″ Dia. Disc Surface Probe	$45.00
P-101	3/16″ Dia., General Purpose, Tubular, 10″ Long w/⅛″ NPT Pipe Fitting	55.00
P-102	3/16″ Dia., General Purpose, Tubular, 10″ Long	50.00
P-103A	⅛″ Dia., General Purpose, Bead, 0.4″ Long	45.00

Selected Options

-04	10 Probe Input w/selector switch	add $75.00
-15	Bench Mount Case w/line cord	add $40.00

Dimensions Case Size II except Case Depth (Dim. A) is 7.250″ (184.2 mm).

Typical Applications

BCD outputs allow interface with a line printer for automatic recording systems or use with ERC BCD Tracking Comparator for temperature control. Analog output allows use of stripchart recorder.

Series 9500 Thermocouple Indicators

erc
+1492
DEGREES FAHRENHEIT

Features
- 1 degree resolution
- Digital thermocouple linearization
- Grounded or floating T/C operation
- 500 Vdc input/output isolation
- TTL compatible, parallel BCD outputs
- Cold-reference junction compensation
- Large 0.6″ high LED display

Models/Prices

Model No.	Temp. Range	T/C Type	Price
9500KF	0-1999°F	K	$695.00
9500JF	0-1600°F	J	695.00
9500KC	0-1371°C	K	695.00
9500JC	0-1200°C	J	695.00

Note: T/C Type J is Iron-Constantan
T/C Type K is Chromel-Alumel

Selected Options

-15	Bench Mount Case w/line cord	add $40.00
-22	220 Vac operation only	no charge
-26	No ERC logo	add $10.00

Dimensions Case Size II except Case Depth (Dim. A) is 7.250″ (184.2 mm).

Typical Applications

BCD outputs facilitate application in automatic temperature control and recording systems.

erc Companion Instruments

Parallel BCD Tracking Comparators

erc
COMPARATOR
LO
IN
HI
-3924+0298

Features

- Accepts Parallel BCD data

*2555	5	I	215.00
*2556	6	I	225.00
*2557	7	I	235.00
Dual-Limit Models			
2543	3	II	$275.00
2544	4	II	310.00

*Units compare on external command (strobe).

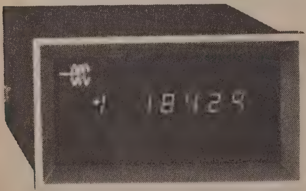
Selected Options

-03 Remote control limit selection. Limits can be set by front-panel thumbwheel switches or by external BCD program commands.... add $50.00
-20 5 Vdc operation only .... no charge
-22 220 Vac operation only .... no charge
-26 No ERC logo .... add $10.00

Typical Applications

A dual-limit comparator used with a DPM, temperature indicator, or any meter which has stored BCD outputs can be used to preset high and low alarm points. The single-limit comparator may be used if only one present alarm point is needed.

Series 2900 Remote Displays



Features

- Accepts parallel BCD input
- 4½- and 5½-digit LED displays, 0.43" high
- Latchable, TTL-compatible BCD inputs
- 115 Vac, 50-400 Hz operation

Models/Prices/Dimensions

Model No.	Display	Case Size	Price
2904-01	±19999	I	$180.00
2905-01	±199999	I	190.00

Typical Applications

Use for remote display of BCD data from any ERC digital instrument or paralle BCD source of 5½ digits or less. Remote display will interface with an absolute encoder for visual display of angular position.

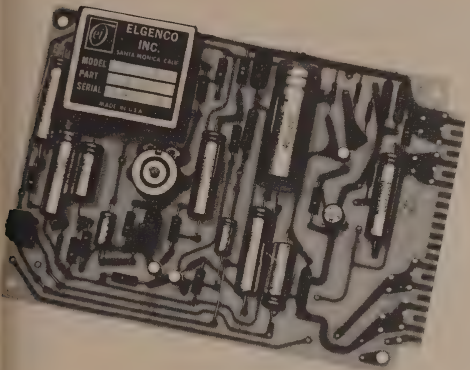
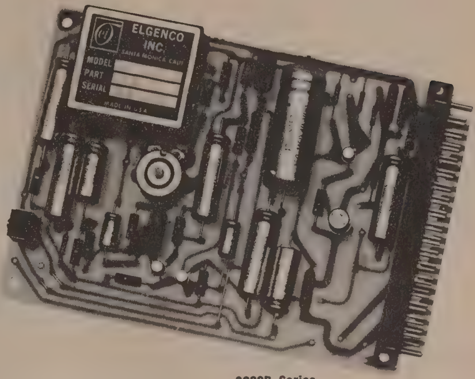
SERIES 3600 FIXED RANGE • NOISE GENERATOR CARDS



3600A Series



3600B Series

SPECIFICATIONS

FREQUENCY RANGE: The frequency band may be any combination of the listed low and high frequencies.

Lower Frequency: 10, 20, 50, or 200 Hz, 5 kHz.

Upper Frequency: 20, 50, 100, 200, or 500 kHz; 1, 2, 3, or 5 mHz.

SPECTRAL UNIFORMITY: Spectral uniformities are available as:

Upper Frequency	Spectral Uniformity
20 kHz to 500 kHz	±0.5, ±1.0, ±2.0 or ±3.0db
1 mHz to 3 mHz	±1.0, ±2.0, or ±3.0db
5 mHz	±2.0 or ±3.0db

As a rule of thumb, the roll off above the specified upper frequency gives a 3db point about twice the specified upper frequency. Roll off above 3db point approaches 12db per octave.

OUTPUT IMPEDANCE:

20 kHz to 500 kHz units	600 ohms
1 to 5 mHz units	200 ohms

POWER REQUIREMENTS:

	3600A Series or 3600B Series	Low Current Option 3600A or 3600B	3600C Series
Power supply voltage required	−30 VDC ±1%	−30 VDC ±1%	−24 VDC ±1%
Approximate current	50 ma	30 ma	37 ma
Output level	0 to 3.0 VRMS	0 to 1.5 VRMS	0 to 2.2 VRMS

Note: The 3600B series units are the same as the 3600A series except the 3600B series have a test point and Elco 00-7023-035-000-001 connector mounted on the PCB.

The 3600A and 3600C units mate with a Cinch 250-22-30-170, Elco 00-6007-022-940-022 connector or equivalent.

SPECIFICATIONS COMMON TO ALL UNITS:

Amplitude Probability Distribution: Gaussian.

Peak to RMS Capability: Minimum dynamic ranges 3.5 to 1 at specified maximum level. Increases with lower output levels.

Maximum Load: 900 ohms minus output impedance.

Operating Temperature Range: 0 to 50°C.

Size: 4½ x 6½ x ⅞ inches.

Weight: 7 oz.

PRICING: (See price list on facing page)

Base Price: 3600A, 3600C and 3600A or C with reduced current option (specify on order).

Base price plus $18.00: 3600B or 3600B with reduced current option (specify on order).

OPTIONS:

Other than specified frequency; add $10.00 each per frequency per board.

Steel shield plate, ¼-inch off conductor side of PCB; add $6.00 each.

Other than specified output impedance; add $5.00 each.

To operate on other power supply voltages, voltage difference must be 30-volts for 3600A or 3600B and 24-volts for 3600C. Specify on order; "Decoupled option for operation on ________ power supply," and add to price as:

Quantity Per Order	Add Each	Quantity Per Order	Add Each
1	$15.00	25-49	$2.50
2	10.00	50-99	2.00
3	7.50	100-249	1.95
4	6.00	250-499	1.90
5-9	5.00	500 up	1.85

DISCOUNT: Quantity discounts apply as:

Quantity	Discount	Quality	Discount
1-4	List	20-49	13%
5-9	5%	50-99	17%
10-19	10%	100	20%

MODEL 3609A POWER SUPPLY CARD

Size: 4½″ x 6½″ x 2 1/16″.

Input: 115/230 volts ± 10/20 volts, 50 to 1000 Hz.

Supplies power for up to 2 noise generator cards or up to 4 noise generator cards with reduced current option. Price: **$90.00**

MATING CONNECTOR: Mating Elco Connector; Elgenco, Inc. part numbers 7521-1122, for 3600A, 3600C and 3609A is available at $7.85 each.

SANTA MONICA CALIF.
MODEL
PART
SERIAL
MADE IN U.S.A.

SPECIFICATIONS IN RECOMMENDED CIRCUIT:

The 1600 series provide a low level wide band output. A portion of this wide band is specified to a certain flatness; uniformity. The 3 or 5 millivolt output is for the whole band extending to 5 mHz. Specifications are for 25°C unless specified otherwise.

SPECTRAL DENSITY UNIFORMITY: Available with uniformity to ±½db, ±1db, ±2db, or ±3db and many frequency ranges within 10 Hz to 5 mHz. See price list for complete list of standards.

SPECTRAL DENSITY: Approximately 2 $\mu v/\sqrt{\ }$ Hz .

RMS OUTPUT LEVEL: 1602A series 3 mv; 1603A, 1606A, and 1607A series 5 mv.

OUTPUT IMPEDANCE: Approx 20 ohms.

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian.

OPERATING TEMPERATURE RANGE: 0 to 50°C.

POWER REQUIREMENTS: −30 volts dc ±1% at approximately 3.5 ma.
Note: external passive components are required to properly install unit.

MOUNTING: .032″ Printed Circuit Leads.

Size: 11/16″ H x 1 51/64″ W x 1 37/64″ D.

WEIGHT: Approx 1.5 oz.

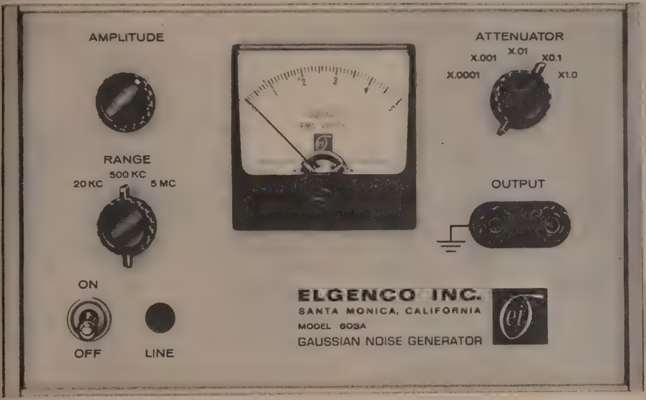
MODELS 602A-200/602A-1390/603A • ALL SOLID STATE NOISE GENERATORS 5 Hz TO 5 MHz



SPECIFICATIONS:

These specs are unique to the Series 602A-200, 602A-1390, 603A introduced on this page.

FREQUENCY RANGES: 5 Hz to 20 kHz, 5 Hz to 500 kHz, 5 Hz to 5 mHz.

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian.

OUTPUT SPECTRUM:

Accuracy	602A-1390	602A-200	603A
20 Hz to 20 kHz	±1 db	±1 db	—
20 Hz to 500 kHz	±3 db	±2.5 db	—
500 kHz to 5 mHz	±8 db	±5 db	—
10 Hz to 500 kHz	—	—	±1 db
500 mHz to 5 mHz	—	—	±3 db

RMS OUTPUT LEVEL: (Minimum value of maximum open circuit output).

20 kHz range	3 volts	3 volts	3 volts
500 kHz range	2 volts	2.5 volts	3 volts
5 mHz range	1 volt	2.0 volts	3 volts

OUTPUT IMPEDANCE:

	900 ohms ±10%	200 ohms ±10%	200 ohms ±10%

MAXIMUM LOAD: (on direct output)

	no limit	700 ohms	700 ohms

OUTPUT STEP ATTENUATOR: Five positions: X1.0, X0.1, X.01, X.001, and X.0001; calibrated to work into open circuit. Accuracy:

to 100 kHz	±3%	±3%	—
to 500 kHz	—	—	±3%
to 5 mHz	±10%	±10%	±5%
Output Impedance	200 ohms —	200 ohms ±1%	200 ohms ±1%

SPECTRAL DENSITY: Approximate spectral density (mv √ Hz) for 1 volt RMS output.

20 kHz band	5.0	5.0	5.0
500 kHz band	1.2	1.2	1.2
5 mHz band	0.6	0.4	0.4

PRICE

	$515.00	$625.00	$785.00

SPECIFICATIONS • ALSO COMMON TO SERIES 624A

These specs are common to the Series 602A-200, 602A-1390, 603A introduced on this page and the Series 624A on facing page.

DYNAMIC RANGE: 3.5 to 1 peak to RMS at 3 volts RMS open circuit; 5 to 1 at 2.1 volts RMS. Dynamic range is inversly proportional to output level as set by front panel amplitude control.

OUTPUT METER: Rectifier type meter circuit reads proportional to average value, calibrated to read RMS value of Gaussian Noise; 0-5 volts RMS scale.

OPERATING TEMPERATURE RANGE: 0 to 50°C.

POWER SUPPLY: Built-in highly regulated dc supply.

POWER REQUIREMENTS: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac; approximately 5 watts. A rechargeable battery option is available. Battery is recharged by operating unit on ac line.

DIMENSIONS: 5¼″ high x 8⅝″ wide x 11″ deep.

RACK MOUNT: A rack mounting adapter kit is available for rack mounting two units side by side. Also available is a rack mounting adapter kit for rack mounting one unit. One or two units use 5¼″ x 19″ of rack panel space with adapter kit. Full rack width cabinet option for one unit is available. Size of unit with this option is 5¼″ high x 17″ wide x 11″ deep and comes with rack mounting hardware.

SHIPPING WEIGHT: Approximately 12 lbs.

OPTIONS AVAILABLE: Full rack width cabinet with mounting hardware option; rechargeable battery option; BNC output terminal on rear panel option.

ACCESSORIES AVAILABLE: Dual adapter kit and rack mounting hardware; single unit adapter kit with rack mounting hardware and front and rear dummy panels; rechargeable battery adapter kit.

OPTIONS & ACCESSORIES FOR MODELS 602A/603A/610A & SERIES 624A

Adapter kit, single unit rack mounting (mounts one unit in rack, includes blank panel to make dual unit) Part No. 8804-0002	$95.00
Adapter kit, dual unit and rack mounting hardware (mounts two units side by side) Part No. 8804-0001	$15.00
Full rack width cabinet and rack mounting hardware option	add $60.00
Pink filters, Part No. 8890-0015	$73.00
Rechargeable battery option	add $255.00
Rechargeable battery kit	$265.00

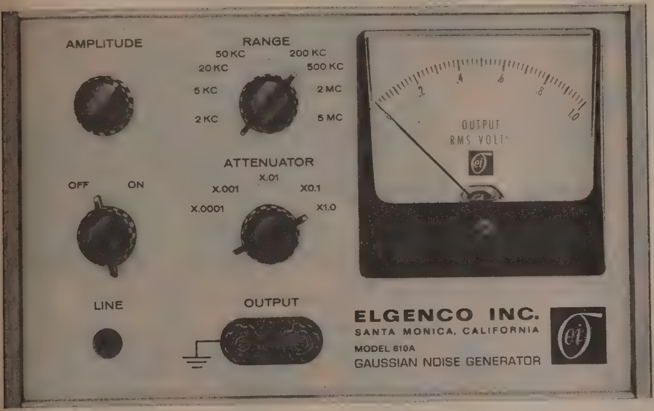
Model 602A with full rack width mounting option

Models 602A and 610A combined by dual unit adapter kit.

ELGENCO INCORPORATED

statistical instruments for industry
1550 EUCLID STREET • SANTA MONICA, CALIFORNIA 90404 • (213) 451-1635

MODEL 610A • ALL SOLID STATE NOISE GENERATOR • 5Hz TO 5MHz



SPECIFICATIONS

FREQUENCY RANGES: Eight ranges selectably by front panel switch; 5 Hz to 2 kHz, 5 Hz to 5 kHz, 5 Hz to 20 kHz, 5 Hz to 50 kHz, 5 Hz to 200 kHz, 5 Hz to 500 kHz, 5 Hz to 2 mHz, and 5 Hz to 5 mHz.

OUTPUT SPECTRUM: Uniform to ±0.5 db from 10 Hz to 500 kHz and ±2.0 db from 500 kHz to 5 mHz.

OUTPUT LEVEL: 0 to 1 volt RMS, adjustable by front panel amplitude control. A dynamic range of 5 to 1 peak to RMS value is provided.

OUTPUT STEP ATTENUATOR: Five positions; X1.0, X0.1, X.01, X.001, X.0001. Accuracy ±0.1 db to 500 kHz; ±0.25 db to 5 mHz.

SPECTRAL DENSITY: Approximate spectral density for 1 volt RMS output.

Band	volts/√ Hz	Band	volts/√ Hz
2 kHz	1.75×10^{-2}	200 kHz	1.75×10^{-3}
5 kHz	1.1×10^{-2}	500 kHz	1.1×10^{-3}
20 kHz	5.5×10^{-3}	2 mHz	5.5×10^{-4}
50 kHz	3.5×10^{-3}	5 mHz	3×10^{-4}

AMPLITUDE PROBABILITY DISTRIBUTION: Symmetrical Gaussian Distribution all ranges.

OUTPUT METER: Meter reads 0 to 1 volt RMS. Accuracy ±2% of full scale to 2 mHz; ±5% to 5 mHz.

MAXIMUM LOAD: 500 ohms on direct output.

OUTPUT IMPEDANCE: Approximately 50 ohms direct output. Step attenuated output 50 ohms ±1%.

POWER SUPPLY: Built-in highly regulated dc supply.

POWER REQUIREMENTS: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac; approximately 7 watts. A rechargeable power option is available. Battery is recharged by operating unit on ac line.

DIMENSIONS: 5¼″ high x 8⅝″ wide x 11″ deep.

RACK MOUNT: A rack mounting adapter kit is available for rack mounting two units side by side. Also available is a rack mounting adapter kit for rack mounting one unit. One or two units use 5¼″ x 19″ of rack panel space with adapter kit. Full rack width cabinet option for one unit is available. Size of unit with this option is 5¼″ high x 17″ wide x 11″ deep and comes with rack mounting hardware.

SHIPPING WEIGHT: Approximately 14 lbs.

PRICE: $1,565.00

MODELS 632A/631A • ALL SOLID STATE NOISE GENERATOR

Model 632A Dual Output DC to 400 Hz and 5 Hz to 40 kHz **$2,995**

LOW FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±1.0%.
OUTPUT SPECTRUM: Uniform ±0.1 db from DC to 350 Hz.

MAXIMUM OUTPUT: 1.0 volts rms. A dynamic range of 5 to 1 peak to rms value is provided.

MAXIMUM SPECTRAL DENSITY: Approx. 1.5×10^{-3} volts²/Hz.

OUTPUT MEAN: Less than 5 mv.

OUTPUT IMPEDANCE: Approximately 1,000 ohms.

HIGH FREQUENCY OUTPUT

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian ±2%.

OUTPUT SPECTRUM: Uniform ±0.5 db from 10 to 35,000 Hz.

MAXIMUM OUTPUT: 1.0 volts rms. A dynamic range of 5 to 1 peak to rms values is provided.

MAXIMUM SPECTRAL DENSITY: Approx. 2×10^{-5} volts²/Hz.

OUTPUT MEAN: Less than 1 mv.

OUTPUT IMPEDANCE: Approximately 100 ohms.

NOISE REGULATOR: rms output level continuously stabilized against a reference voltage.

OVERLOAD INDICATOR: Panel overload indicator lights when input noise level to regulator is out of regulation range.

POWER: 115/230 volts ±10/20 volts, 50 to 1,000 Hertz ac.

DIMENSIONS: 5¼″ high x 17″ wide x 11″ deep. 19″ wide with rack mounting flanges mounted (supplied).

Model 631A 5 Hz to 40 kHz **$1,995**

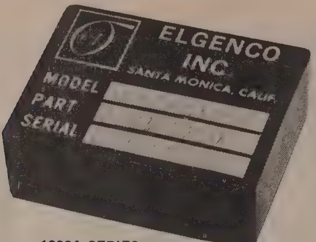
SERIES 1800 • NOISE SOURCE MODULES • 10KHz TO 100MHz



1800A SERIES

ELGENCO
INC.
SANTA MONICA, CALIF.
MODEL
PART
SERIAL

1800B SERIES

SPECIFICATIONS

The 1800 Series provides a low level wide band output. A portion of this band is specified to a certain flatness; uniformity. The approximate 6 mv open circuit output is for the whole band. The 1800B Series modules are the same as the 1800A series except the output is via a SMA connector. Specifications are for 25°C unless specified otherwise.

SPECTRAL DENSITY UNIFORMITY: Available with uniformity of ±0.5 db, ±1 db, ±2 db, ±3 db and ±4 db for many frequency ranges between lower frequencies of 10 kHz and 2 mHz and upper frequencies of 20 mHz, 30 mHz, 45 mHz, 50 mHz, 70 mHz, 80 mHz and 100 mHz.

SPECTRAL DENSITY: Approximately 0.3 μV per root Hz into 50 ohms.

RMS OUTPUT LEVEL: Approximately 3 mv rms into 50 ohms; 6 mv rms open circuit.

OUTPUT IMPEDANCE: Approximately 50 ohms.

AMPLITUDE PROBABILITY DISTRIBUTION: Gaussian.

OPERATING TEMPERATURE RANGE: 0 to 50°C.

POWER REQUIREMENTS: Model 1815, −15 VDC; Model 1818, −18 VDC; Model 1820, −20 VDC; Model 1822, −22 VDC; Model 1824, −24 VDC (well regulated power is required); current approximately 25 ma. Note: No external components are needed to properly install unit.

MOUNTING: .032″ printed circuit leads.

SIZE: 1.60 x 1.30 x 0.65 inches.

WEIGHT: Approximately 1 oz.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

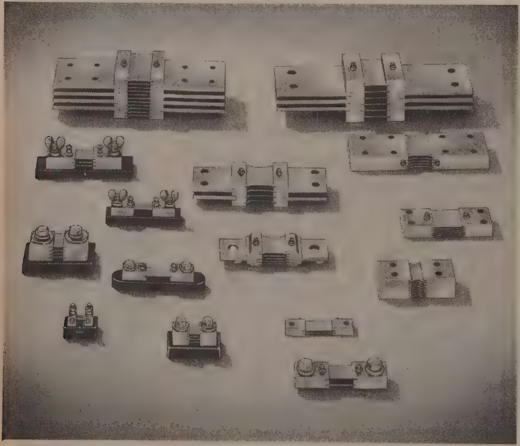
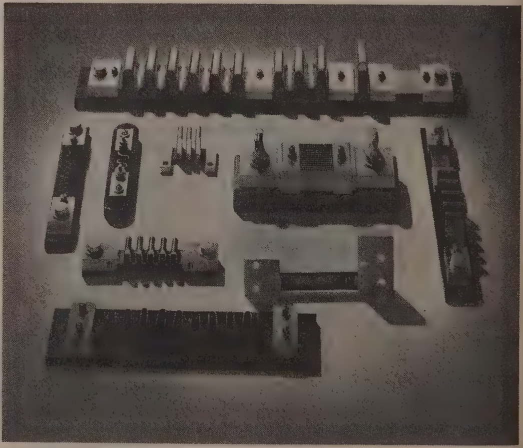
Accurate DC measurements start with an Empro DC ammeter shunt

We offer the widest selection of standard model shunts available anywhere. Actually there are more than 200 different models. Both switchboard and portable types. With current ratings up to 30,000 amperes. From this wide assortment you will probably find one just right for your application. If so, you will enjoy lower cost and faster shipment. But if you need a special shunt, we will gladly develop one custom-made to fit your requirements exactly. In either case, you can count on complete satisfaction at lowest possible cost. For we've built shunts since 1950. They are made with care by our own master craftsmen, using the finest materials and latest methods. Each shunt is tested before shipment to make sure it meets every specification. That's why we can say with complete confidence that accurate and precise DC measurements start with an Empro DC ammeter shunt.

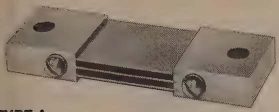
Standard models have ratings from 5 to 30,000 amperes



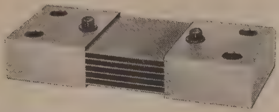
A few examples of our custom-made DC ammeter shunts



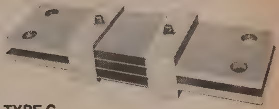
Empro gives you the world's widest selection of DC ammeter shunts



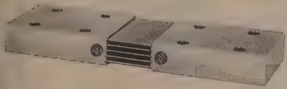
TYPE A
50 MV 15 through 600 amperes
100 MV 50 through 600 amperes



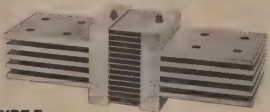
TYPE B
50 MV 300 through 1200 amperes
100 MV 300 through 1200 amperes



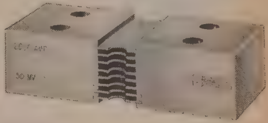
TYPE C
50 MV 1000 through 2000 amperes
100 MV 1000 through 2000 amperes



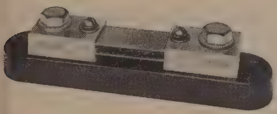
TYPE E
50 MV 1500 through 2000 amperes
100 MV 1500 through 2000 amperes



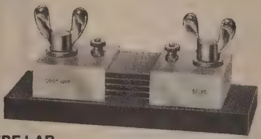
TYPE F
50 MV 2500 through 30000 amperes
100 MV 2500 through 10000 amperes



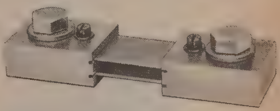
TYPE FL
50 MV 1000 through 3000 amperes



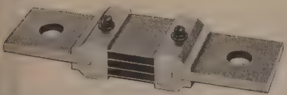
TYPE HA
50 MV 1 through 500 amperes
100 MV 1 through 500 amperes



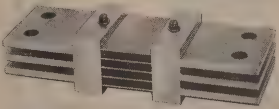
TYPE LAB
50 MV 15 through 1000 amperes
100 MV 15 through 1000 amperes



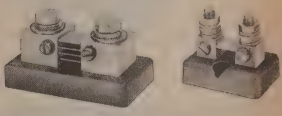
TYPE TRW-50
50 MV 100 through 600 amperes



TYPE W
50 MV 300 through 1000 amperes
100 MV 120 through 500 amperes



TYPE WT
50 MV 1000 through 10000 amperes
100 MV 600 through 6000 amperes



LIGHTWEIGHT
50 MV 5 through 1200 amperes

All types are also available in 25 MV • Accuracy is ¼%

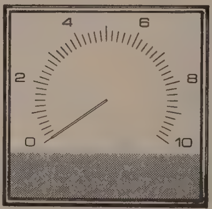
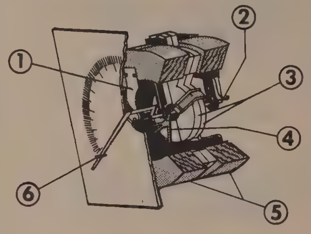
2½″ METER





1. Tension member assures constant band tension while absorbing shock and vibration to prevent band breakage.

2. Strong taut-band eliminates friction and will withstand heavy shock and vibration without damage.

3. Pole piece design assures uniform flux density from 0 to 250° deflection for better tracking.

4. Unique balance weight design assures proper balance even after heavy shock and vibration. No weight wires to shift as on other meters.

5. Large berrium ferrite magnet provides 40% more flux density than other "core magnet" designs for better torque.

6. Movement is suppressed slightly against stop peg to eliminate zero adjust. Pointer is always at zero in any position.

Field proven in the most rugged automotive and snowmobile OEM applications, this high performance 250° meter movement is featured in all the case styles shown at left. Write or call for data sheets and prices today!

HOW TO ORDER

ORDER BY MODEL NUMBER

When ordering, please specify the complete instrument model number and nomenclature. For example, "Model 8600A Digital Multimeter." Unless otherwise specified, factory installed options are designated by a 2-digit number preceded by a dash. The suffix "K" denotes the option is field installable. The complete option designation should include the model number as shown in the following example:

Instrument	Option	Order by
8600A Digital Multimeter	Rechargeable Battery Pack -01	8600A-01 Digital Multimeter

WHERE TO SEND YOUR ORDER

Orders should be made out to **John Fluke Mfg. Co., Inc.** or its subsidiaries and sent in care of your local **Fluke** representative (see list of representatives) or directly as follows:

Electronic Counters	**John Fluke Mfg. Co., LTD.** P.O. Box 1094 Buffalo, New York 14210
Logic Test Equipment	**Fluke Trendar Corporation** 500 Clyde Avenue Mountain View, CA 94040
All Other Orders	**John Fluke Mfg. Co., Inc.** P.O. Box 43210 Mountlake Terrace, WA 98043

SHIPPING METHODS

Shipments are made directly from the factory. Unless specifically requested otherwise, express or truck transportation is used, whichever is least expensive and most serviceable to you. Small items may be sent via parcel post. Air freight, air express, or parcel post will be used when specified on your order.

TERMS

U.S. and Canada terms are 30 days net. Unless credit has already been established, shipments will be made C.O.D. or on receipt of cash in advance. Terms for orders from other countries are irrevocable letter of credit or cash in advance unless other terms have been previously arranged.

PRICES

Unless otherwise specified, all prices are in U.S. funds and are subject to change without notice. See last page this section for price list.

QUOTATIONS AND PRO FORMA INVOICES

Upon request quotations or pro forma invoices will be furnished to you by your local **Fluke** sales representative or by **John Fluke Mfg. Co., Inc., John Fluke Mfg. Co., LTD or Fluke Trendar Corporation.**

TECHNICAL ASSISTANCE

Demonstration of a particular instrument may be conveniently arranged with the local **Fluke** representative. Technical assistance in selecting equipment and preparing orders is available from engineering personnel at these local offices supplemented by a highly qualified staff of application engineers at the factory.

WARRANTY

All **Fluke** instruments are warranted against defective materials and workmanship for one year.

SERVICE

Fluke authorized service centers are located throughout the world. **Fluke** Technical Centers are placed strategically throughout North America.

All **Fluke** instruments repaired by these facilities will be returned to the customer calibrated within the parameters listed in the original specification for that instrument and warranted for 60 days after repair.

Arrangements should be made with your local repair agency before sending equipment for repair or calibration.

MODEL 8000A

DIGITAL MULTIMETERS AND VOLTMETERS
FOR BENCH APPLICATIONS

3½ DIGIT DMM'S
THE 8000A FAMILY OF MULTIMETERS

The highly successful Fluke 8000A Digital Multimeter brought a new standard of excellence to the low cost field. Today, with expanded capability, the 8000A brings that standard to increased measurement capability through the addition of new options and accessories.

Choose from many options including rechargeable battery power, digital printer output plus the new low ohms and high current options. High voltage and RF probes and a clamp-on ac current probe highlight the list of 8000A accessories.

The latest development in the 8000A family include a mA-sec DMM and a DMM with analog display, both now available as standard Fluke instruments.

BASIC SPECIFICATIONS

	DC Volts	AC Volts	DC Current	AC Current	Ohms
Range	0.2-1200 V	0.2-1200 V	200 μA-2 A	200 μA-2 A	200 Ω-20 MΩ
Resolution	100 μV	100 μV	100 nA	100 nA	0.1 Ω
Accuracy[1]	(0.1 +1)	(1 +2)	(0.3 +1)	(1 +2)	(0.1 +1)

[1] Accuracy for 1 year, ±(% Input + No. of Digits), 15°C to 35°C

OPTIONS
RECHARGEABLE BATTERY PACK — 8000A-01

The rechargeable battery pack is entirely self-contained within the 8000A package. It is supplied with standard "D" sized nickel-cadmium batteries which provide, under normal conditions, 1000 discharge-charge cycles of operation. The battery pack will provide a minimum of eight hours operation, with recharge requiring less than 14 hours. Recharging is automatic whenever unit is plugged in and does not affect normal bench operation.

DATA OUTPUT — 8000A-02

The data output option provides parallel, buffered BCD data of the digital readout, polarity and overload. It is suitable for driving a digital printer or providing input to systems. The non-isolated buffered output will sink up to 10 mA of current and has a 15 kΩ pull-up resistor.

HIGH CURRENT — 8000A-05

8000A-05

The Fluke 8000A-05 Digital Multimeter offers extended current measurement capabilities to 20 amps with the -05, line, and -015, battery, options.

All of the specifications for the basic 8000A apply to the 8000A-05, -015 plus the following current specifications:

Range (DC)	10.00 A (1 min. operation 10 A to 20 A)
Accuracy (DC)	10 A Range ±(0.5% or reading +1 digit)
Range (AC)	10.00 A (1 min. operation 10 A to 20 A)
Accuracy (AC)	10 A Range 45 Hz to 3 kHz ±(1% of reading +2 digits)

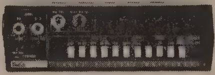
LO OHMS — 8000A-06

8000A-06

The Model 8000A-06 features 0.001Ω resolution and 2 ohm and 20 ohm resistance ranges. The instrument includes a front panel lead resistance cancellation control assuring the user that his measurement of the unknown R does not include the resistance in his test leads. All basic 8000A specs apply plus the following:

Range	1.999 Ω, 19.99 Ω
Accuracy (1 yr, 15°C-35°C)	1.999 Ω range ±(1% of rdg +2 dig) 19.99 Ω range ±(0.5% of rdg +2 dig)

SPECIALS
MODEL 8000A/MAS



8000A/MAS

The 8000A/mAS (or Mass Meter) calibrates x-ray tubes by directly measuring current as a function of time. Addition of mA-sec function has extended overall measuring capability to 31 ranges of ac/dc volts and current, resistance and mAS.

Ranges	2000, 200, 20, 2 mA sec and 200 μA sec.
Accuracy	±(1% of input +1 digit)

MODEL 8000A/MTR

8000A/MTR

The Fluke Model 8000A/MTR is similar to the Model 8000A but also includes an analog panel meter and rechargeable batteries.

This instrument provides 26 ranges including five ranges each of ac and dc voltage, five ranges each of ac and dc current and six ranges of resistance. The analog panel meter included in the unit is invaluable for peaking or dipping measurements. The panel meter also serves to monitor battery level.

DIGITAL MULTIMETERS AND VOLTMETERS
FOR BENCH APPLICATIONS

4½, 5½ DIGIT DMM'S

The new Fluke 8600A and 8800A automatic digital multimeters head the list of 4½ and 5½ digit DMM's offering new standards of convenience and performance.

They're multimeters with everything you want built-in to meet the widest possible applications of bench, field and laboratory.

All Fluke DMM's Feature:
- **Fully Guarded Input.**
- **Overload Protection.**
- **High Accuracy.**
- **Complete Line of Accessories.**

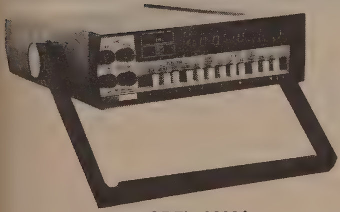
MODEL 8350A

MODEL 8350A

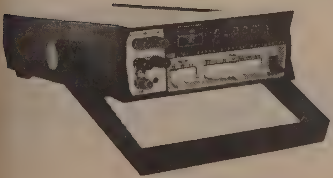
The Fluke 8350A offers you maximum performance and quality in a 5½-digit multimeter. Included in the standard 8350A multimeter is the ability to measure accurately dc volts from 1 microvolt to 1100 volts, ac volts from 10 microvolts to 1100 volts rms, and resistance from 10 milliohms to 12 megohms. These measurements are made with full-scale 120,000-count resolution, and accuracies up to 0.005%. Autoranging and autopolarity are standard.



MODEL 8600A

MODEL 8600A

Newest Fluke 4½-digit DMM includes a 4½-digit LED readout featuring five ranges of dc volts, five ranges of ac volts, five ranges of dc current, five ranges of ac current and six ranges of resistance. With 26 ranges, the instrument offers more measure power than any other instrument available. **Autorange** and **autozero** are standard. Options include Battery Pack (8600A-01) and Isolated Data Output (8600A-02).



MODEL 8800A

MODEL 8800A

This extraordinary 5½-digit DVM offers a basic dc accuracy of 0.005% with full autoranging. There are fifteen ranges which include five dc, four ac, and six resistance. Complete isolated four terminal ohms measurements are provided on all ranges. Separate current and voltage inputs are available to provide the ultimate in ohms accuracy by eliminating errors caused by input lead resistance. LED readout is bright and readable. Features Isolated Data Output option 8800A-02.

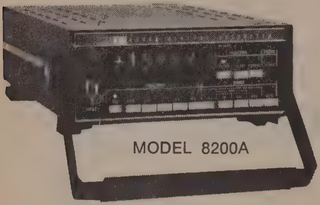
DIGITAL MULTIMETERS AND VOLTMETERS
FOR SYSTEMS APPLICATIONS



MODEL 8200A

MODEL 8200A

The Model 8200A four range dc DVM easily expands into a 400 readings per second systems multimeter by installing a family of plug-in options. Standard features of the basic instrument include 60% overrange, switched filter for assured broadband noise rejection, all push button selection, autoranging, automatic polarity selection and display as well as full guarding.

Multimeter options include 2 ranges of dc millivolts, 4 ranges of True RMS ac volts or 4 ranges of average responding ac volts, 6 resistance ranges and an isolated external reference-ratio input. System options are Data Output Unit or Printer Output Unit and Remote Control Unit. All options may be added in the field by the user at any time.

MODEL 8300A

MODEL 8300A

The 8300A is a versatile digital voltmeter with five full decades of digits plus a 6th digit for 20% overrange. Its mainframe will accept options in any sequence for expansion from a bench DVM into a bench or systems multimeter.

The basic instrument offers 3 ranges of DC voltage measuring capability including autorange, autopolarity, and switchable active filtering. In addition, the 8300A-10 option offers 5 ranges of dc volts, and the 8300A-02 option offers 5 ranges of dc volts and 5 ranges of ohms measurements. Other analog options include ac volts and dc-dc ratio. Systems options include Data Output and Remote Control.

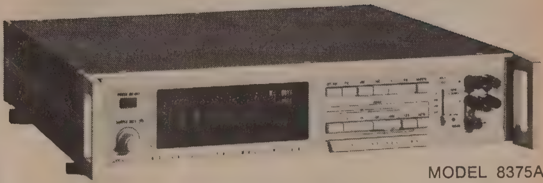
DIGITAL MULTIMETERS AND VOLTMETERS FOR SYSTEMS APPLICATIONS



MODEL 8375A

MODEL 8375A

The 8375A offers unusual capability in a 5½ digit multimeter. At a very low cost, its standard configuration combines highly accurate measurement of dc volts, true-rms ac volts and broad ranges of resistance, together with a unique self-test feature that permits rapid check-out of all measurement functions. In addition, a powerful set of systems-oriented options are available, all of which can be easily installed in any desired sequence in the field, including Data Output, Remote Control and DC Reference.

SPECIFICATIONS

	DC Volts	AC Volts	Ohms
Range	0.1-1100 V	1-1100 V	10 Ω-12 MΩ

MODEL 8400A

MODEL 8400A

The 8400A's outstanding accuracy is complemented by numerous and versatile functional capabilities. DC voltages are measured on five ranges with resolution to 1 microvolt. Overrange is 20% on all ranges except on the ±1,000 V range. 1100 V can be applied to any range without damaging the unit.

The basic DVM accepts a family of rugged plug-in option cards for AC Volts, Resistance DC/DC Ratio, AC/AC Ratio, True RMS Volts, Data Output and Remote Control.

SPECIFICATIONS

ELECTRONIC COUNTERS

1900A MULTI-COUNTER

GENERAL

Display:
6-digit LED, leading zero suppression, annunciation and overflow.

Automatic Features:
AUTORANGING: In both frequency and period modes, autoranging includes a unique 20% hysteresis in its switching thresholds, to eliminate redundant up range/down range commands. This allows measurements to be made on signals containing large amounts of FM and PM.

AUTORESET: A new measurement sequence is started every time a front panel button is activated.

INPUT CHARACTERISTICS

Sensitivity:
25 mV, typically 15 mV rms sine wave, 5 Hz to 80 MHz.

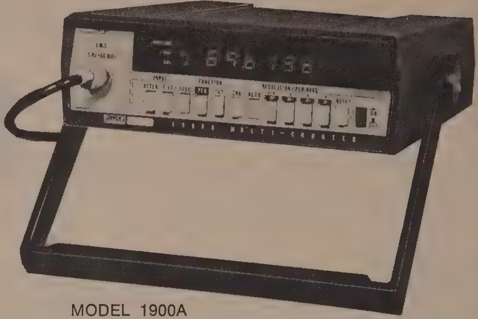
Impedance:
1 MΩ shunted by less than 30 pf.

OPERATING RANGES

Frequency:
5 Hz to 80 MHz. Four manually selected gate times provide resolution of 100 Hz to 0.1 Hz.

Period:
5 Hz to 1 MHz single and multiple period averages provide resolution of 100 ns to 100 ps.

Totalize:
1 count to 999999 counts.



MODEL 1900A

TIMEBASE CHARACTERISTICS

Aging Rate:
$<\pm 5 \times 10^{-7}$month.

Temperature:
$<\pm 5 \times 10^{-6}$ 0°C to 50°C.
$<\pm 2 \times 10^{-6}$ (typical) 20°C to 30°C.

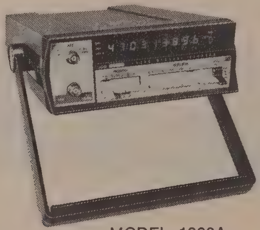
OPTIONS

1900A-01 — Rechargeable Battery.
1900A-02 — Data Output.

1920A TELECOMMUNICATIONS COUNTER

GENERAL

- **9-Digit LED Display, Leading Zero Suppression, Annunciation and Overflow.**
- **Burst Mode Measures Frequency of RF Bursts**
- **Optional Resolution Multiplier Multiplies Audio Tone Signals by 1000, Providing Resolution of 0.001 Hz in 1 Sec.**



MODEL 1920A

FREQUENCY RANGE

Direct:
5 Hz to 125 MHz with AGC.

Prescaled:
50 MHz to 520 MHz with AGC.
50 MHz to 1000 MHz (option -13).
50 MHz to 1250 MHz (option -14).

SENSITIVITY

Direct:
15 mV up to 100MHz decreasing to 25 mV at 125 MHz.

Prescaled:
15 mV to 520 and 1000 MHz decreasing to 30 mV at 1250 MHz.

GATE TIMES

Direct:
1 ms, 10 ms, 0.1 s, 1.0 s, 10 s.

Prescaled:
4 ms, 40 ms, 0.4 s, 4.0 s, 40 s (520 MHz).
8 ms, 80 ms, 0.8 s, 8.0 s, 80 s (1000 and 1250 MHz).

TIMEBASE CHARACTERISTICS

Aging Rate (per month):
$\pm 3 \times 10^{-7}$.

Temperature Stability:
$\pm 2 \times 10^{-6}$ 0°C to 50°C.
$\pm 5 \times 10^{-7}$ 20°C to 30°C.

OPTIONS

1920A-01 — Rechargeable Battery
1920A-02 — Data Output
1920A-04 — TCXO $\pm 3 \times 10^{-7}$
1920A-06 — Resolution Multiplier
1920A-13 — 1000 MHz Prescaler
1920A-14 — 1250 MHz Prescaler

ELECTRONIC COUNTERS

1953A PROGRAMMABLE UNIVERSAL COUNTER/TIMER

GENERAL

- **9-Digit LED Display, Leading Zero Suppression, Annunciation and Overflow.**
- **Measures Frequency, Period(s), Ratios, Time Interval and Gateable Totals. Variable Trigger Level Controls with Status Indicators. Scope marker output. TCXO Timebase.**
- **Options Include Prescaled Inputs to 1250 MHz, Full Remote Programming, Oven Stabilized Timebase.**

FREQUENCY MEASUREMENTS

Range:
DC to 125 MHz (dc coupled).
5 Hz to 125 MHz (ac coupled).

Gate Time:
0.1 ms to 10 s in 6 decade steps.

PERIOD MEASUREMENTS

Range:
DC to 25 MHz (dc coupled).
5 Hz to 25 MHz (ac coupled).

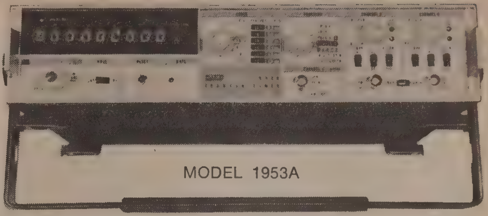
Periods Averaged:
1 period to 10^5 periods.

Frequency Counted:
10 MHz.

Resolution:
1 ps at 10^5 periods to 0.1 μs at 1 period.

TIMEBASE CHARACTERISTICS

	Standard	-04 Option	-10 Option
Aging Rate (constant temp.)	$<\pm 3\times10^{-7}$/mo.	$<\pm 3\times10^{-7}$/mo.	$<\pm 1\times10^{-7}$/mo.
Temp. Stability: 20°C - 30°C	$\pm 5\times10^{-7}$ typ.	$\pm 2\times10^{-7}$ typ.	$\pm 3\times10^{-9}$ typ.
0°C - 50°C	$<\pm 2\times10^{-6}$	$<\pm 5\times10^{-7}$	$<\pm 1\times10^{-8}$



MODEL 1953A

TIME INTERVAL MEASUREMENT

Range:
0.1 μs to 10^7 s.

Input:
Channels A and B; common or separate.

Resolution:
0.1 μs to 10 ms in 6 decade steps.

SENSITIVITY

Channel A or B:
A Channel: 30 mV rms from dc to 75 MHz decreasing to 50 mV at 125 MHz.
B Channel: 30 mV rms from dc to 25 MHz.

Channel C (Prescaled):
15 mV from 50 MHz to 520 MHz (AGC) (option -07).
15 mV from 50 MHz to 1000 MHz (options -13 or -14), decreasing to 30 mV at 1250 MHz (option -14 only).

OPTIONS

1953A-02 — Data Output
1953A-04 — Superior TCXO
1953A-05 — Timebase Multiplier
1953A-07 — 520 MHz Prescaler
1953A-10 — Oven-Stabilized Timebase
1953A-11 — Basic Remote Programming
1953A-12 — Full Remote Programming
1953A-13 — 1000 MHz Prescaler
1953A-14 — 1250 MHz Prescaler
1953A-16 — Rear Input

1952B UNIVERSAL COUNTER/TIMER (SIMILAR IN APPEARANCE TO 1953A)

GENERAL

- **6-Digit LED Display with Leading Zero Suppression, Annunciation and Overflow.**
- **Measures Frequency, Period(s), Ratios, Time Interval and Gateable Totals.**
- **DC Coupled Amplifiers to 80 MHz.**
- **Variable Trigger Level Controls with Status Indicators, Scope Marker Output.**

FREQUENCY MEASUREMENTS

Range:
DC to 80 MHz (dc coupled).
5 Hz to 80 MHz (ac coupled).

Gate Time:
0.1 ms to 10 s in 6 decade steps.

PERIOD MEASUREMENTS

Range:
DC to 10 MHz (dc coupled).
5 Hz to 10 MHz (ac coupled).

Periods Averaged:
1 period to 10^5 periods.

Frequency Counted:
100 kHz.

Resolution:
0.1 ns at 10^5 periods to 10 μs at 1 period.

TIMEBASE CHARACTERISTICS

Frequency:
10 MHz.

Temperature Stability:
$<\pm 5 \times 10^{-6}$, 0°C to 50°C.
$<\pm 2 \times 10^{-6}$ (typical), 20° to 30°C.

Aging Rate:
(constant $<\pm 5 \times 10^{-7}$ month temp.)

TIME INTERVAL MEASUREMENT

Range:
0.1 μs to 10^4 s.

Input:
Channels A and B, common or separate

Resolution:
0.1 μs to 10 ms in 6 decade steps.

SENSITIVITY

Channel A or B Sinewave:
A Channel: 50 mV rms from DC to 50 MHz, decreasing to 75 mV rms at 80 MHz.
B Channel: 50 mV rms from DC to 10 MHz.

Channel A or B Pulse:
A Channel: 150 mV pulse amplitude with minimum pulse width of 20 ns.
B Channel: 150 mV pulse amplitude with minimum pulse width of 50 ns.

OPTIONS

1952B-03 — TCXO $\pm 2 \times 10^{-6}$ 0°C to 50°C
1952B-17 — 7th LED Digit
1952B-18 — 7th and 8th LED Digit
1952B-19 — Information Pak (Gate Out, Clock Out, External Reset).

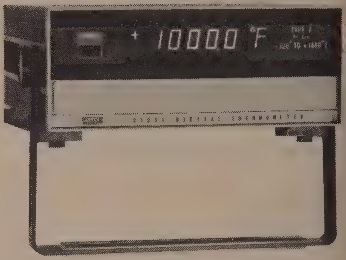
DIGITAL THERMOMETERS

TEMPERATURE MEASUREMENT WITH FLUKE THERMOMETERS

The 2100A Digital Thermometer is not just a single instrument, it is a whole series of instruments designed to satisfy a wide variety of temperature measuring applications. Its versatility ranges from a systems instrument capable of monitoring up to 100 different thermocouples and outputing the data to a digital recorder or computer, to a fully portable battery operated instrument able to take measurements from any type of thermocouple as well as having two direct mV ranges. All of this with a resolution of 0.1 degrees.

Four basic instruments make up the series. Since many of the parts are common, instruments can easily be converted from one type to another.

All of the instruments can be ordered for operation with any of the standard types of thermocouples; J, K, E, T, R, S, and will measure the usable temperature span of each thermocouple without the need for range changing. For example, with a K couple, the temperature range is −320°F to +2400°F and for an R couple, the temperature range is 0°F to 3200°F. The resolution is 0.1°C for all types of thermocouples and 0.1°F for the J, K, E, and T, and 0.2°F for the R and S thermocouples. A unique feature of the design is that the linearizing data for all six types of thermocouples is contained in a single ROM of 4K bits which allows the user to easily change from one type of couple to another. The curve of each thermocouple is subdivided into 64 straight line segments which gives the 2100A digital thermometer excellent conformity to standard NBS Thermocouple Tables.

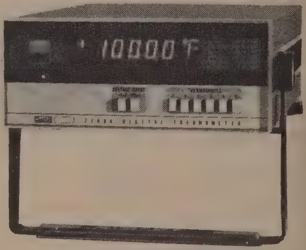


MODEL 2100A-03

MODEL 2100A-03

DIGITAL THERMOMETER FOR ONE TYPE OF THERMOCOUPLE

The 2100A-03 is used to measure the temperature of a single thermocouple of a predetermined type. The complete temperature span of each thermocouple is covered and the reading is displayed in either degrees Celsius or degrees Fahrenheit.



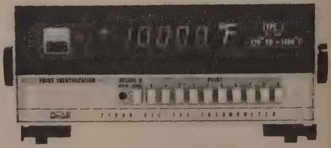
MODEL 2100A-06

MODEL 2100A-06

DIGITAL THERMOMETER FOR SIX TYPES OF THERMOCOUPLES

This is the same basic unit as the 2100A-03 but with the addition of 8 select switches on front panel. Any one of the six available thermocouple types can be selected by means of the switches, but only one type of thermocouple can be connected at one time. Two additional ranges for dc voltages of 40 mV and 400 mV are provided.

These ranges have a resolution of 1 µV and 10 µV respectively and have a noise level of less than 0.5 µV peak to peak.



MODEL 2100A-10

MODEL 2100A-10

DIGITAL THERMOMETER FOR TEN THERMOCOUPLES OF THE SAME TYPE

This is the same basic unit as the 2100A-03 but with the addition of 11 manual switches on front panel. This allows up to 10 thermocouples (all of the same type) to be connected to the rear of the instrument and then switched, one at a time, into the measuring instrument. An error of 0.1°F or 0.1°C is added to the existing errors in the 2100A-03 specifications. A separate switch on the front panel isolates this bank of ten switches from external inputs when the 2150A is used. Channel identity of the selected thermocouple is available when the DOU is fitted.

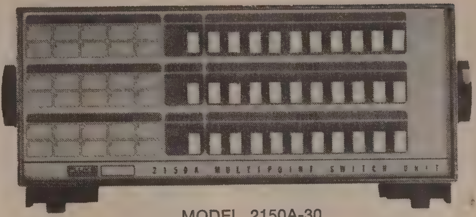
DIGITAL THERMOMETERS

MODEL 2150A

The 2150A is a multi-point switch unit. It consists of up to three sets of ten point-select push button switches and can be used with any of the three measuring instruments. Up to 30 thermocouples can be connected to each unit and units can be connected in series to allow up to 100 points to be monitored by one measuring instrument.

The following units are available:

2150A-10 — Ten point selector switch unit.
2150-20 — Twenty point selector switch unit.
2150A-30 — Thirty point selector switch unit.



MODEL 2150A-30

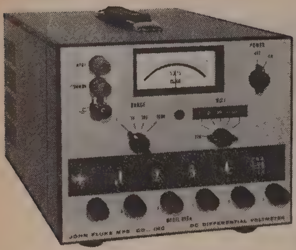
DIFFERENTIAL VOLTMETERS



MODEL 895A

DC AND AC/DC DIFFERENTIAL VOLTMETERS

Model	Input Range	% of Input Accuracy DC	AC[1]	Frequency Range	Max Full Scale Sensitivity	Max Meter Resolution
885AB	0-1100V	±0.0025		—	100μV	1μV
891A[2]	0-1100V	±0.01		—	1mV	10μV
895A[2]	0-1100V	±0.0025		—	100μV	1μV
883AB	0-1100V	±0.005	±0.1	20Hz-5KHz	100μV	1μV
887AB	0-1100V	±0.0025	±0.05	30Hz-5KHz	100μV	1μV
893A[2], AR[3]	0-1100V	±0.01	±0.05	50Hz-10KHz	1mV	10μV

AB and -01 models are combination line and battery-powered.

1. Reduced accuracy over wider frequency range.
2. Infinite input resistance to 1100 volts D.C.
3. Model 893AR is rack configuration, 3½" high at no extra cost.

MODEL 931B

TRUE RMS DIFFERENTIAL VOLTMETER — MODEL 931B

Voltage Range:
Differential Mode: 0.01 to 1100V RMS in 5 ranges
Direct Mode: 0.003 to 1100V RMS in 11 ranges

Crest Factor: (Differential Mode) 10, 1500 volts peak

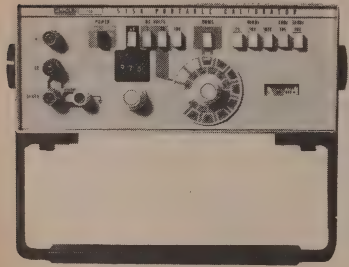
Input Power: 115/230V AC, 50-440 Hz

Input Impedance: 1 megohm shunted by less than 8 pF

Accuracy:
Differential Mode: ± (0.05% of reading + 0.005% of range) from 30Hz to 50KHz. Reduced Accuracy specifications from 1 Hz to 1MHz.
Direct Mode: ±3% of end scale

Price:
931B $1095.
931B-01 $1195.

CALIBRATORS



MODEL 515A

PORTABLE CALIBRATOR — MODEL 515A FEATURES

- **0.003% DC Accuracy for 1 Year.**
- **AC Volts, DC Volts and Ohms.**
- **Single Set of Output Terminals for All Functions.**
- **Built-in Rechargeable Battery Pack.**
- **Color-Coded Controls.**
- **DC Volts — 0 to 999 μV, 1 V, 10 V, 100 V.**
- **AC Volts — 1 V, 10 V, 100 V.**
- **Ohms — 10 Ω through 10 MΩ in Decades.**

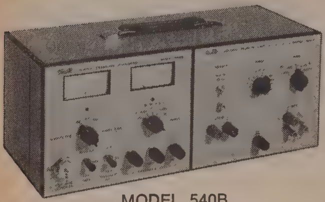
AC AND DC STANDARDS

REFERENCE AND TRANSFER STANDARDS



MODEL 540B

THERMAL TRANSFER STANDARD — MODEL 540B

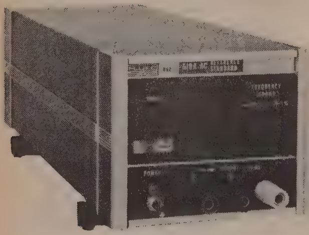
SPECIFICATIONS

Voltage Range	0.5 to 1000 V in 14 ranges.
Galvanometer Resolution	0.0012% of input/scale div. at rated input.
Accuracy	(% of input.)

Range	Frequency	AC/DC Difference
All except 1000V	5Hz-50KHz	±0.01%
1000V	5Hz-20KHz	±0.02%
1000V	20KHz-50KHz	±0.04%
	50KHZ-1MHz	±0.1%

CURRENT TRANSFER ACCESSORIES

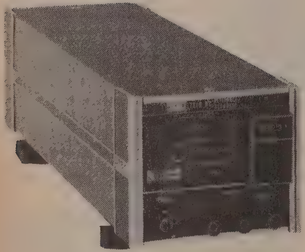
Accessories for the Model 540B are Thermal Converters (A55). Current Shunts (A40). Coaxial Cable Kits (A55-110), and Storage Cases (C41 and C55).



MODEL 510A

AC REFERENCE STANDARD — MODEL 510A

The Fluke 510A is a precision ac voltage source which can be used as a calibration standard or as a fixed frequency source for test applications. An output voltage of 10 volts rms and a current of 10 ma rms to an accuracy of ±0.01% for 30 days and ±0.02% for 90 days are featured. Any fixed frequency output from 50 Hz to 100 kHz is available. Total harmonic distortion is less than 0.005%. The 510A can be calibrated with dc. An optional rechargeable battery pack provides up to 16 hours of operation without ac line power.



MODEL 731B

DC REFERENCE STANDARD — MODEL 731B

The Fluke Model 731B DC Reference Standard is a solid state versatile instrument providing standard cell accuracy, but utilizes the excellent performance capabilities of the latest solid state technology. The instrument furnishes a variety of precision voltages with switched output ranges including 1.0; 1.018 + ΔE; 1.019 + ΔE; 10.0; and ΔE volts. Delta E (ΔE) provides a variable output of 0 through 999 μV which is either added to the voltage of a standard cell transfer or may be used directly as a low level source stable dc voltage.

Output Voltage	10.000 V, 1.000 V, 1.018 + ΔE, 1.019 + ΔE, ΔE.
Output Accuracy	30 days 10 ppm, 90 days 15 ppm, 1 year 3 ppm.
Transfer Accuracy	2 ppm between standard cells. 3 ppm between standard cells and 1V output. 5 ppm between standard cells and 10 V output.
ΔE Resolution	1 μV.

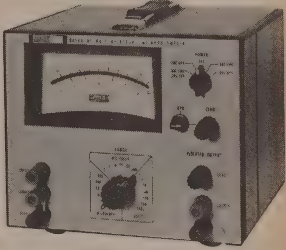
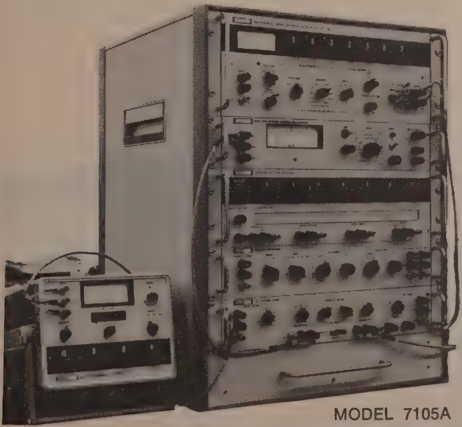
NULL DETECTOR — MICROVOLTMETER



MODEL 845AB

MODEL 845AB AND 845AR

Input Ranges	1μV to 1000 VDC in 19 end-scale ranges
Accuracy	±2% end scale + 0.1 μV)
Input Resistance	100 megohms on 300 mV range and above 10 megohms on 100 mV range and below
Input Power	845AB rechargeable battery or 115/230 VAC ±10%, 50-440 Hz, 845AR 115/230 VAC ± 10%, 50-440 Hz



MODEL 7105A

CALIBRATION SYSTEM

MODEL 7105A

DC VOLTAGE AND RATIO CALIBRATION SYSTEMS

FEATURES

- 5 PPM Accuracy
- Traceable to NBS.
- 0.1 PPM Resolution and Ratio Accuracy.
- Self-Calibrating.
- All System Instruments are Fluke Solid State.
- Functional Enclosure for Self-Contained Operation.

FREQUENCY SYNTHESIZERS

MODEL 6010A SYNTHESIZED SIGNAL GENERATOR

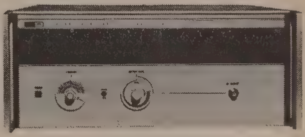
The Fluke 6010A Synthesized Signal Generator employs a microprocessor to assure you a new measure of performance. This versatile 7-digit, 10 Hz to 11 MHz instrument offers new dimensions in price/performance. Compare these features:

- **Memory — Store and Recall up to 10 Frequencies, Modulation and Attenuator Settings.**
- **Free-Form Entry of Frequency in Hz, kHz or MHz.**
- **Automatic Range Selection.**
- **7-Digit LED Readout.**
- **0.1 Hz Resolution, 10 Hz - 11 MHz Coverage.**
- **Compact — Measures 5¼″ x 8½″ x 19″.**
- **Interfaces Directly with Most Systems.**

MODEL 6010A

MODEL 6039A FREQUENCY SYNTHESIZER

The Fluke Model 6039A Frequency Synthesizer is an economical solution to many HF signal source requirements where programmability, high resolution and high speed are of concern. It features 1 MHz to 40 MHz frequency range, 1 Hz resolution (0.1 Hz from 1 MHz to 4 MHz), storage of remote frequency commands, −100 dB to −80 dB spurious, low noise and 0.8 msec switching speed. Options include two types of internal frequency standards, fixed output frequencies of 10 MHz, 5 MHz, 1 MHz, or 100 kHz and a high level output amplifier (+21 dBm).



MODEL 6039A

MODEL 6160B FREQUENCY SYNTHESIZER

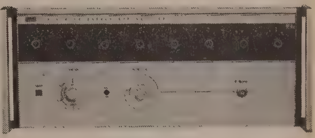
The Fluke 6160B Frequency Synthesizer offers better spectral performance than any other medium priced synthesizer. Covering the frequency range of 1 to 160 MHz in two ranges, (1 to 12 MHz and 10 to 160 MHz), the 6160B can be either manually or remotely controlled.

With non-harmonic spurious performance better than −83 dB, signal-to-phase noise ratio better than 74 dB and switching speed of less than 800 μsec in an operating environment of 0 to 50°C and 0 to 80% RH, the 6160B represents the highest performance for the lowest cost.

Option -02 — Frequency Std. 2 x 10^{-9}/24 hrs.

Option -04 — Rear Panel RF Output

Option -05 — TCXO 5 x 10^{-6}/year



MODEL 6160B

MODEL 645A FREQUENCY SYNTHESIZER

All solid state frequency synthesizer covers the frequency range of dc to 50 MHz. Offers modular construction and excellent spectral purity. Discrete non-harmonic spurious better than −100 dB. Includes .01 Hz resolution, search, sweep and rack mounting kit.

Optional — 2 x 10^{-9} Per Day Drift Rate Frequency Standard

Optional — A607 BDC-to-Decimal Interface

MODEL 645A

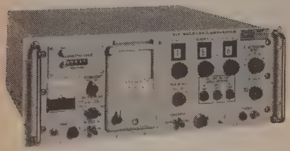
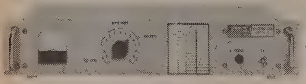
TIME AND FREQUENCY STANDARDS



MODEL 207-5

VLF RECEIVER — MODEL 207-5

The Model 207-5 is a coherent VLF tracking receiver for calibration of laboratory and communications center frequency standards. Frequency coverage is from 8.0 to 31.9 KHz in steps of 100 Hz with an additional channel at 60 KHz. The instrument is all solid state and employs integrated circuits. Multi-channel capability plus high sensitivity assures round-the-world reception of VLF signals for frequency standardization. The Model 207-5 includes an internal frequency standard and a frequency comparator.



MODEL 203A

FREQUENCY DISTRIBUTION AMPLIFIER — MODEL 203A

The Model 203A is a multi-channel distribution amplifier that features high stability, high interchannel isolation and freedom from harmonics and spurious outputs. These amplifiers are being widely used for distribution of standard frequencies in laboratories, communications installations and industrial facilities.

AUTOMATIC TEST EQUIPMENT

TERMINAL/10 COMPUTER CONTROLLED CALIBRATION SYSTEM

All Fluke ATE Systems Feature:

- Modular, flexible architecture. Easily expanded to meet your changing requirements.
- Time-shared multi-user test terminals. Several test terminals can simultaneously share a single computer configuration.
- User-oriented software.

The Fluke 7505A is a fully automatic calibration terminal designed to easily and precisely calibrate a wide variety of Test Instruments (TI). Typical of TI types that can be tested and calibrated using the 7505A include:

- Digital Voltmeters
- Differential Voltmeters
- Vacuum Tube Voltmeters
- Digital Multi-Meters
- Volt-Ohm Meters
- Oscillators
- AC, DC and Ohms Sources
- AC and DC Calibrators

The 7505B model of Terminal/10 provides these features:

- DC Voltage 0 to 1100V at ±10 ppm accuracy
- AC Voltage 0 to 1100V, 10 Hz to 1.2 MHz at ±0.02% Midband accuracy
- DC and AC Current to 10 amps
- Ohms to 10 Megohms
- Fully traceable to NBS

The Fluke 7510A is a fully automatic calibration terminal designed to provide fast and complete calibration of high-frequency instruments, including:

- Oscilloscopes
- Oscilloscope Plug-Ins

The 7510A model of Terminal/10 provides these features:

- Time-shared, multi-station operation
- Automatic Test Program Generators
- Wideband Stimulus, DC to 1400 MHz
- Pulse, Sine, and Squarewave Outputs, computer controlled in Amplitude and Frequency
- Direct Measurement of Oscilloscope Calibrator and Power Supplies

LOGIC TEST EQUIPMENT

TRENDAR 200

TRENDAR 200 TESTCLIP

FEATURES

Three instruments in one

- **In-circuit IC Comparator**
- **Logic States Clip**
- **Logic Probe**

Small, rugged, easy to use.
No controls to adjust, no scales to interpret.
Thresholds are automatically detected.
Automatically derives power from unit under test (UUT)
Minimum loading of UUT.
No calibration or routine maintenance.
DTL, TTL, C-MOS, and HTL compatible versions.

WHY USE TESTCLIP?

- Dramatically reduces IC troubleshooting time.
- Most effective method for diagnosing loop faults.
- Simple to use — frees personnel from troubleshooting drudgery.
- Reduces need for costly test equipment.
- Spare card inventories are significantly reduced due to increased productivity.
- Provides accurate results and highest test confidence.

SPECIFICATIONS

Supply Voltage*	Failure Blanking
200-01 4.5 to 10 V	Nominal 400 nsec @ 5 V
200-02 4.5 to 5.5 V	Nominal 100 nsec @ 5 V
200-03 10 to 15 V	Nominal 200 nsec @ 10 V

IC Pin Capacity: Handles 8, 14, and 16-pin dual in-line packages. Flatpacks require special probing adapters.

Logic Monitor: Single indicator displays ON for logic one, OFF for logic zero at IC pin selected by sixteen position rotary switch.

Logic Probe: 12″ lead, allows probing of nearby circuit nodes.

PULSE REPETITION RATE

Maximum pulse repetition rate 1 MHz for 200-01, 5 MHz for -02 & -03 (indicated by flashing at approximately 5 per second). Single pulse indication, single flash approximately 100 msec long.

TRENDAR 1000A LOGICTESTER

FEATURES

- **Single Pass, Go/No-Go Testing**
- **Precision Fault-Finding using FAULTRACK©**
- **129 Signal Sources**
- **Fully Compatible wtih TRENDAR 2000A Digital Logic Test Station**
- **Lowest True Cost**

GENERAL DESCRIPTION

The portable TRENDAR 1000A LOGICTESTER provides the same thorough test exercising — up to 4,000,000 128 bit words per second — as the program compatible TRENDAR 2000A. These test stations have established new levels of throughput in production board testing and field support.

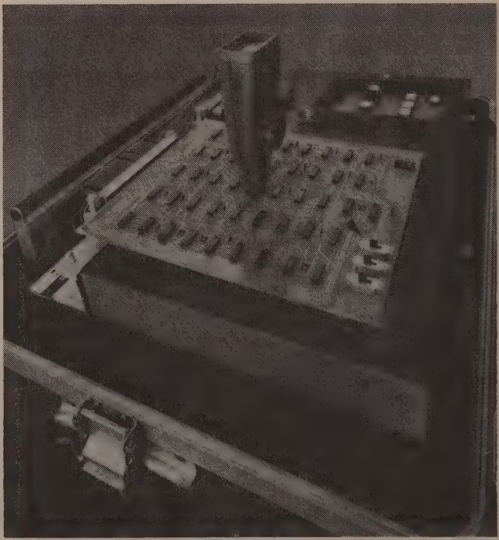
With the addition of Fluke Trendar's unique Output Count Integrator, the TRENDAR 1000A now offers the same fast one-pass, go/no-go testing as the larger TRENDAR 2000A.

Ideally suited to field service and low volume production testing, the TRENDAR 1000A is a complete test station.

TECHNICAL DESCRIPTION

OUTPUTS FROM PATTERN GENERATORS

Number: The LOGICTESTER supplies 129 (128 standard plus 1 programmable) separate signal outputs for test circuit modules.



TRENDAR 1000

Levels: Standard TTL ("O" $\leqslant 0.4$ V; "1" $\geqslant 2.4$ V).

MAXIMUM NUMBER OF PATTERNS

The maximum number of patterns is selectable from 40 thousand to 40 million.

OUTPUT COUNT INTEGRATOR

Inputs: 60.

Outputs: 9 test points, representing one overall count signature.

TEST REPEATABILITY

All circuit modules tested sequentially will undergo the identical test patterns for a given maximum number of patterns setting.

FLUKE
JOHN FLUKE MANUFACTURING COMPANY, INC.
P.O. BOX 7428, SEATTLE, WASHINGTON 98113

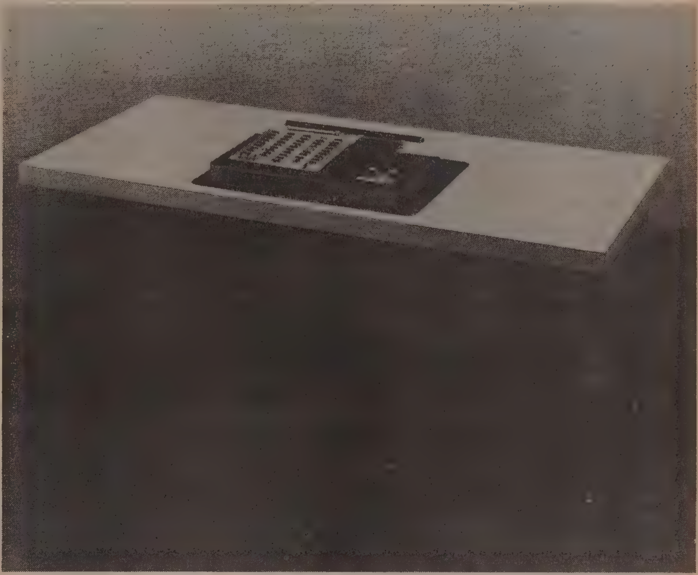
LOGIC TEST EQUIPMENT

TRENDAR 1010A LOGICTESTER

The TRENDAR LOGICTESTER console provides the same thorough test exercising — up to 4,000,000 128 bit words per second — as the program compatible TRENDAR 2000A. These test stations have established new levels of throughput in production board testing and field support.

The TRENDAR 1010A is a production digital test console for modest volume at a surprisingly low price. It is capable of one pass, go/no-go testing. And, if a fault is detected, the tester narrows the failure to a small group of outputs, and the operator then isolates the fault by measuring transition behavior with a built-in probe. See Model 1000A Technical Description.



TRENDAR 1010A

TRENDAR 2000A

FEATURES

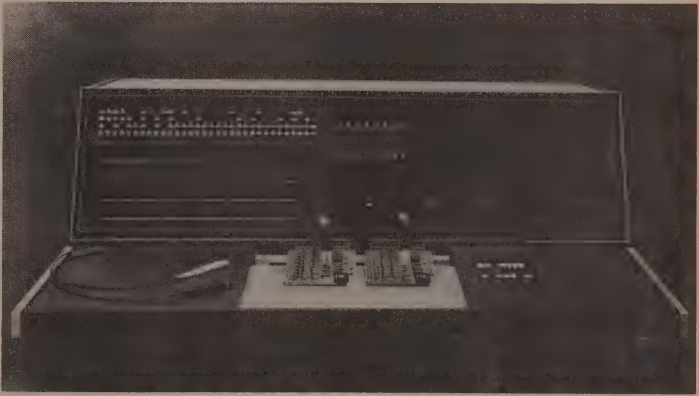
- **Highest Confidence Level in Tested Boards**
- **Fastest Startup**
- **Higher Productivity**
- **Fault-Finding Superiority**
- **Compatible Field Service Unit**
- **Lowest Annual Cost**

GENERAL DESCRIPTION

The TRENDAR 2000A production line tester station for high volume testing of digital circuit boards is the most recent version of the field proven TRENDAR 2000.

Up to 4 million 128-bit words per second are generated by the TRENDAR 2000A to test the most complex boards.

High speed testing and fault isolation produce a three to ten times increase in board throughput per man hour. Trendar techniques are quickly learned by technicians. Two days of training are sufficient and the TRENDAR 2000A typically will be testing boards the week it is delivered.



TRENDAR 2000A

TECHNICAL DESCRIPTION

OUTPUTS FROM PATTERN GENERATORS

Number: Test Station supplies 128 separate signal output pairs for reference and test circuit modules. Outputs are derived from 4 pattern generators producing 32 drive signals each.

TEST RATE

Test rates from 1 test/sec to 4 million tests/sec selectable by 12 position switch plus overlapping vernier. A test is a simultaneous comparison of 128 pairs of comparator inputs.

NUMBER OF TESTS

Number of tests selectable from 1 test to 10 million tests.

All patterns follow identical sequences from the start of a test, to allow repeatable troubleshooting. The statistical probability of a change is the same for each bit position of a given pseudorandom generator.

TEST REPEATABILITY

All circuit modules tested sequentially will undergo the identical test patterns for given test settings.

TEST MODES

Auto Test automatically applies up to ten million tests in each of four sequences.

INITIALIZATION

In the Auto Test mode all circuits are run through an initialization sequence.

TROUBLESHOOTING MODES

Stop on Fail will halt the test station with the logic patterns held in the pattern existing at the instant a failure was detected.

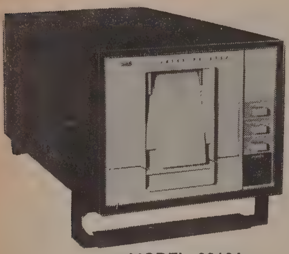
DIGITAL PRINTER



MODEL 2010A

MODEL 2010A

The Fluke 2010A is a versatile, low cost printer specifically designed for instrumentation requirements. The basic printer records 10 columns of data which can be expanded to 18 columns with the 01 option. Data storage is a standard feature and cables are available to interface to all Fluke digital measuring instruments.

Accuracy	Identical to input device
Printing Rate	2.65 lines/second — Black (375 ms) 2.5 lines/second — Red (400 ms)
Paper	2¼″ wide fan-fold or Standard 2¼″ wide roll paper
Data Input	1, 2, 4, 8 binary code for each data column 1 through 16 and for function columns 17 and 18 and decimal Parallel data entry standard Logic Level DTL/TTL compatible, positive logic Logic "1" = +3.5 V minimum to +5 V maximum or open

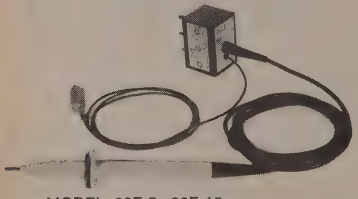
VOLTMETER ACCESSORIES

80K-40 HV PROBE

MODEL 80K-40

(80 K-40) Voltage Range	1 kV to 40 kV.
Input Resistance	100 MΩ.
Ratio	1000:1.
Overall Accuracy	20 kV to 30 kV ±2% (Calibrated 1% at 25 kV).
Upper Limit	Changes Linearly from 2% at 30 kV to 4% at 40 kV.

80F-5, 80F-15 HV PROBES



MODEL 80F-5, 80F-15

	80F-5	80F-15
Input Voltage Range	500 - 5000 V	1000 - 15,000 V
Input Resistance	50 MΩ	100 MΩ
Division Ratio	1000:1	1000:1
Ratio Accuracy (23°C ±1°C) (into 10 MΩ ±0.1% voltmeter input)	±0.05% of input	±0.05% of input

80E-10 HV DIVIDER

Accuracy	±0.01% for both division ratios over a temperature range from 18°C to 28°C and for any input voltage up to rated maximum. Derate at 2 ppm/°C outside this temperature range to 0°C and 50°C.
Maximum Input Voltage	10,000 VDC.

80I-600 CLAMP-ON AC CURRENT PROBE

MODEL 80I-600

Range	2A-6000A.
Frequency Response	30 Hz - 1 kHz.
Accuracy	±3%.
Division Ratio	1000:1.

A-90 CURRENT SHUNT

The Model A-90 current shunts may be used for both DC and AC current measurements over a wide range of currents and frequencies. Voltage may be sensed across the shunts with virtually any voltmeter.

Ranges 0.1, 1.0, 10, 100 mA and 1, 10 A.

80RF, 81RF RF PROBES

MODEL 80RF, 81RF

	81RF	80RF
Frequency Response	100 kHz to 100 MHz; ±1 dB	100 kHz to 500 MHz; ±1 dB 10 kHz to 500 MHz; ±3 dB
Extended Response (Useful for relative readings)	20 kHz to 250 MHz	1kHz to 1 GHz
Voltage Range	0.25 V to 30 V RMS 350 VDC Max.	0.25 V to 30 V RMS 200 VDC Max.

PHYSICAL ACCESSORIES

Carrying Cases, Dust Covers, Rack Mounting Hardware, Chassis Slides, Test Leads are included in the complete line of physical accessories available to protect or enhance the convenience of your Fluke instrument. Ask for the "Voltmeter Accessories" data sheet.

MEGOHMMETERS

Freed can supply a complete range of insulation resistance measuring equipment with fixed and variable d.c. test voltages from 5 to 2500 volts. Insulation and leakage measurements can be made on transformers, motors, cables, electronic assemblies and components, dielectric materials, electrical appliances and tools, capacitors and resistors.

Type	Resistance Range	Test Voltage	Accuracy	Power Requirements	Size and Weight	Price
1620	0.1 to 4,000,000 megohms 1 to 2,000,000 megohms @ 500 volts	Variable 50 to 1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15″ x 9″ x 7½″ 24 lbs. •	400.00
1620-A	0.01 to 4,000,000 megohms 0.1 to 200,000 megohms @ 50 volts 1 to 2,000,000 megohms @ 500 volts	Variable 5-100 volts d.c. 100-1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15″ x 9″ x 7½″ 24 lbs. •	415.00
1620-B	1 to 2,000,000 megohms 10 to 2,000,000 megohms @ 2500 volts	Variable 250-2500 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15″ x 9″ x 7½″ 24 lbs. •	455.00
1620-C	All features same as Type 1620 with additional circuitry for capacitor measurements	Variable 50 to 1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15″ x 9″ x 7½″ 24 lbs. •	435.00
1620-D	0.01 to 40,000,000 megohms 0.1 to 2,000,000 megohms @ 50 volts 1 to 20,000,000 megohms @ 500 volts	Variable 5-100 volts d.c. 100-1000 volts d.c.	±5% at full scale except highest range ±10%	105-125 volts 50-60 cycles	15″ x 9″ x 7½″ 25 lbs. •	455.00
1020-C	0.1 to 2,000,000 megohms 0.1 to 200,000 megohms @ 50 or 100 volts d.c. 1 to 2,000,000 megohms @ 500 volts d.c.	Fixed 50, 100, 500 volts Regulated	±3% all ranges except highest range ±5%	105-125 volts 50-60 cycles	9½″ x 10½″ x 8″ 18 lbs. •	330.00
1020-D	0.1 to 2,000,000 megohms 0.1 to 200,000 megohms @ 100 or 200 volts d.c. 1 to 2,000,000 megohms @ 500 volts d.c.	Fixed 100, 200, 500 volts Regulated	±3% all ranges except highest range ±5%	105-125 volts 50-60 cycles	9½″ x 10½″ x 8″ 18 lbs. •	330.00
2030-A	10 to 2,000,000 megohms	Fixed 500 volts d.c.	±5% full scale	battery operated transistor supply	6″ x 8″ x 4″ 8 lbs.	225.00
2030-B	1 to 20,000,000 megohms	Fixed 500 volts d.c.	±5% full scale	battery operated transistor supply	6″ x 8″ x 4″ 8 lbs.	260.00
2030-C	1 to 2,000,000 megohms	Fixed 50 volts d.c.	±5% full scale	battery operated transistor supply	6″ x 8″ x 4″ 8 lbs.	235.00
2030-D	1 to 2,000,000 megohms	Fixed 100 volts d.c.	±5% full scale	battery operated transistor supply	6″ x 8″ x 4″ 8 lbs.	235.00
2030-E	1 to 2,000,000 megohms	Fixed 200 volts d.c.	±5% full scale	battery operated transistor supply	6″ x 8″ x 4″ 8 lbs.	235.00
667	0 to 10,000 megohm	Fixed 100-250-500 1000 v.d.c.	± 2.5% of scale length	battery operated transistor supply	8½″ x 4½″ x 5″ 4½ lbs.	210.00

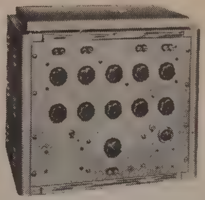
FREED TRANSFORMER CO., INC.

INCREMENTAL INDUCTANCE BRIDGES

Direct in-line readings of inductance and conductance of iron core component at audio frequencies with or without super-imposed direct current. The bridge uses the Owens circuit with provisions for measuring the series or parallel inductance and conductance of the unknown inductor; five precision resistance and capacitance decades are provided to indicate these values. "Q" or storage factor can be measured as the product of the inductive reactance and the conductance.



1110-C

Type	Inductance Range	Conductance Range	Frequency Range	D.C. Current	Accuracy	Dimensions and Weight	Price
1110-C	1111.1 h to 1 mh 5 decades 1.1 h to 1 µh 2 decades	0.015 µmho—100 mho "Q" = 600 max @ 100 cycles	20 cycles to 10KC	up to 2 amperes	±0.5% to 5 KC ±2% to 10 KC	21¾" x 17½" x 15¼" 50 lbs.	695.00
1115	111.1 h to 100 µh 5 decades 0.11 h to 0.1 µh 2 decades	0.15 µmho—1000 mho "Q" = 600 max @ 100 cycles	20 cycles to 10 KC	up to 15 amperes	±1% to 5 KC ±3% to 10 KC	21¾" x 28" x 15¼" 80 lbs.	995.00
1185	111.1 h to 100 µh 5 decades 0.11 h to 0.1 µh 2 decades	0.15 µmho—1000 mho "Q" = 600 max @ 100 cycles	20 cycles to 10 KC	up to 30 amperes	±1% to 5 KC ±3% to 10 KC	21¾" x 33¼" x 15¼" 100 lbs.	1395.00

NULL DETECTOR

Sensitive null detector for bridge measurements, with self contained selective filters to limit the amplifier characteristics at various bridge measuring frequencies.

1140-B

Type	Sensitivity	Frequency Range	Filter	Power Requirements	Dimensions and Weight	Price
1140-B	10µ volts @ 1 KC for 15% meter deflection filter in	20 to 20,000 cycles	Fixed 60, 400, 1000 cycles Adjustable ±5% of center Other frequencies available	105-125 volts 50-60 cycles	Cabinet 12" x 8½" x 10"—18 lbs. Rack—19" x 6" x 10"	275.00

D.C. SUPPLY

A constant voltage transformer regulated current source designed for use with the Freed Incremental Inductance Bridges. Solid state bridge rectification, L-C filters and low internal impedance provides good current regulation with a minimum of circuit complexity.

Type	Current Ranges	Voltage Ranges	Regulation	Power Requirement	Dimensions and Weight	Price
1170-A	4 ranges, 0-5, 25, 100 and 1000 milliamperes	Maximum no load voltage 1000 Ma, 270V, 100 Ma, 270V 25 Ma, 85 V, 5 Ma, 48 V	± 1% for line variation 105-125 V	105-125 volts 60 cycles	19" x 10½" x 13½" 66 lbs.	375.00

DECADE CAPACITORS

The Freed series of Decade Capacitors cover a wide range of values and can be supplied as individual decades from 0.0001 PF. per step to 1 mf. per step or in various combinations of assembled decade boxes. All capacitors are non-inductively wound and heat treated for stability.

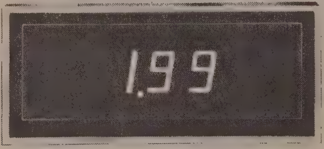
Maximum operating voltage, 500 VDC or peak. Capacitors can be supplied to better than ±1%, write for complete information.
In addtion to listed equipment, Freed manufactures a complete series of decade inductors, AC and DC regulated power supplies, comparison and limit bridges.
Write for complete catalog.

FREED TRANSFORMER COMPANY, INC. 1795 WEIRFIELD ST. (Ridgewood) Brooklyn, N.Y. 11227

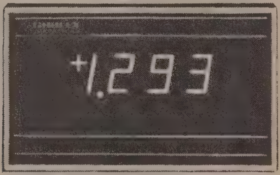
WE'VE GOT THEM ALL!

DPMs

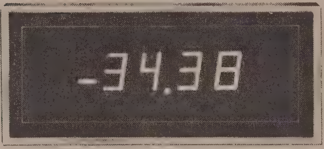
2½, 2¾, 3½, 3¾, 4½ digit models



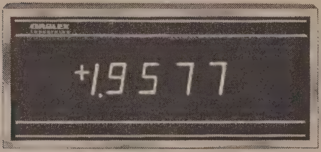
Model 37 2½-digit



Model 36 3½-digit



Model 37 3¾-digit



Model 45 4½-digit

GRALEX PROVIDES THE BROADEST LINE OF DPM'S IN THE INDUSTRY WITH A CHOICE OF MODELS FOR ALMOST ALL APPLICATIONS.

FEATURES INCLUDE:

- Big bright displays
- Reliable performance
- Applications versatility
- Standard size in most models
- Quality components and construction
- Low power consumption
- Choice of input configurations
- Easy installation
- Great value

2½ and 2¾ Digit Series 37
Economy grade models are available in AC line or DC powered versions with LED readouts. The planar gas discharge display can also be obtained in the 2¾ digit models.

3½ and 3¾ Digit Series 37
The Designers Choice includes interchangeable AC line or DC powered models. Displays are planar gas discharge or LED. The extended range 3¾ digit versions are priced only slightly above 3½ digit models.

Model 36
is a systems oriented 3½ digit design. BCD output is standard and all controls useful for interfacing with digital systems are included.

Model 45
is a high accuracy 4½ digit meter that is fully systems compatible. A very wide choice of input voltage and current ranges is available as well as ratiometric versions.

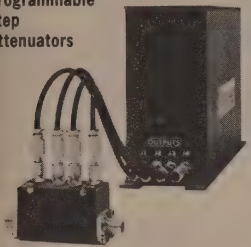
LOW COST SOLID-STATE COMPONENTS AND TEST EQUIPMENT

ULTRA-BROADBAND 0.1 to 18.0 GHz PIN DIODE CONTROL COMPONENTS

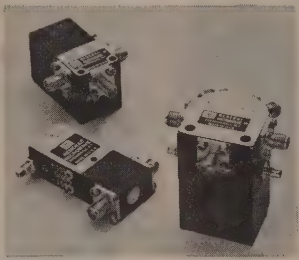
Programmable Step Attenuators



High Speed,
As fast as 3 μsec.
Solid State reliability.
Up to 120dB range.

- Programmable steps of 1, 2, 6 or 10dB
- Accuracy as low as ±0.2 dB, repeatability ±0.1dB
- Flat response, low insertion loss

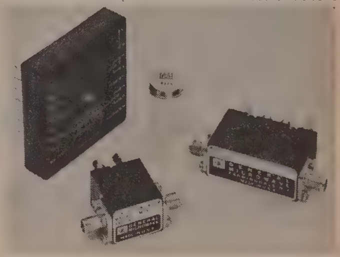
Switches/Modulators



From SPST to SP5T.
With built-in drivers.

- Subminiature size
- Low insertion loss
- Fast switching speed
- High isolation

Absorptive Attenuators



Available with voltage-controlled logarithmic and high-speed switch drivers.

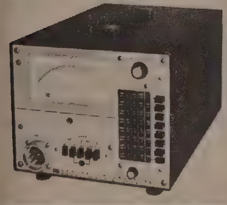
- Can also be used as nanosecond switches or pulse modulators.

BROADBAND RADIATION HAZARD METERS

Frequency Range: 0.01—18GHz
Power Range: 0.2—200 mW/cm^2

- Detects and measures potentially hazardous nonionizing energy radiating or leaking from microwave energy sources
- Assures conformance with OSHA radiation protection guide
- Designed to comply with U.S. Dept. HEW standards

MICROWAVE POWER METERS



Frequency Range: 0.01-40 GHz
For Laboratory and System Applications

- Direct reading from 10 nanowatts to 3 watts
- Accuracy: as low as 0.5%
- Analog and digital
- Available with automatic zero setting, automatic range and scale selection

COMPUTING
FREQUENCY COUNTER

New 20 MHz Computing Frequency Counter

$595.00*
assembled

The SM-109A is the answer to your low frequency measurement problems. With its exclusive Heath-designed circuitry you can make rapid, high resolution, low frequency measurements that cannot be obtained with a standard frequency counter. It measures the elapsed time for a number of periods of the input waveform, then automatically computes the input frequency — all in much less time than would be required with a conventional counter. The display provides 6-digit resolution with automatic decimal placement and range indication. Range is 0.1 Hz to 20 MHz with sensitivity as low as 20 mV. Features include display of either Hertz or counts per minute . . . input for use of an external frequency standard . . . 1 megohm input impedance. (Shipping weight 12 lbs.)

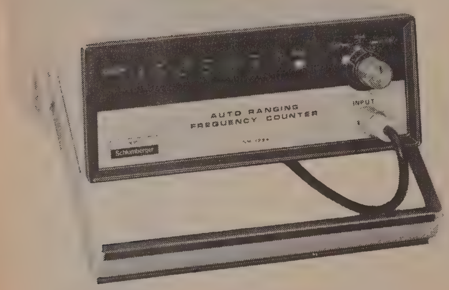
Precision 65 MHz Frequency Counters

SM-110A:
$495.00*
assembled

SM-110C:
$895.00*
assembled

Heath's SM-110 series counters have the features and capability to handle the most exacting measurements . . . at prices far lower than others. The SM-110A has a 1 Hz to 65 MHz range on the 1 megohm/15 pF input and a 10 MHz to 180 MHz range on the *separate* 50 ohm input. Input sensitivity is 10 mV rms at 35 Hz, 15 mV rms at 180 MHz. The 1 MHz crystal time base provides accuracy and stability sufficient for general design and testing applications. In addition to the features found in the SM-110A, the SM-110C has an extremely stable TCXO time base and complete remote programming capability. Frequency range extends to 600 MHz. (Shipping weight 11 lbs.)

PROGRAMMABLE
FREQUENCY COUNTER



Autoranging 110 MHz Frequency Counters

SM-128A:
$340.00*
assembled

SM-128B:
$425.00*
assembled

The Heath SM-128s are a pair of high performance counters with very reasonable prices. They deliver guaranteed performance to 110 MHz with 15 mV sensitivity. Typical performance is even better: 140 MHz at 2-10 mV sensitivity. The front panel trigger level control adjusts input trigger level above and below the zero-crossing point to reduce effects of signal noise. Two preset gate intervals of 1 sec and 10 ms are switch-selectable . . . or use the autoranging function for maximum resolution at all times. The SM-128A uses a standard clock stable to ±10 ppm/mo. over 0-40° C. The SM-128B has temperature stability of ±1 ppm/mo for precision applications. (Shipping weight 10 lbs.)

Best-Buy 30 MHz Frequency Counter

$250.00*
assembled

This compact frequency counter is Heath's best counter buy. It offers a guaranteed 5 Hz to 30 MHz range, with typical performance ranging from 2 Hz to 40 MHz. Input sensitivity is guaranteed to be 10 mV across the range, but typically it runs from 5.5 to 7.5 mV. Two preset switch-selectable gate intervals allow resolution to 1 Hz. Autorange automatically determines correct range for maximum resolution without overranging. The trigger level control allows adjustment of the input amplifier . . . to eliminate the effects of noise on the signal. Other features include 6-digit display, high impedance input, and external clock input. (Shipping weight 7 lbs.)

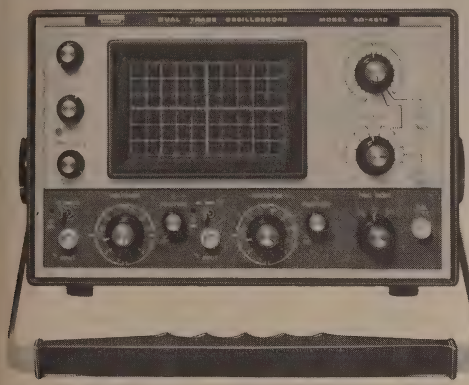
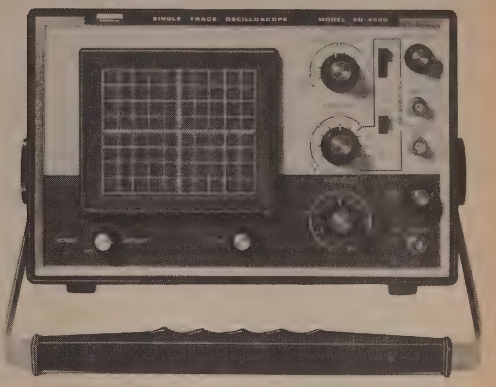
with counters and scopes from Heath





Dual-Trace 15 MHz, 1 mV Scope features delay lines for complete waveform display

$549.95* kit

$750.00* assembled

Heath's 4510 is a compact scope with the professional performance necessary for today's high speed, sensitive circuits. It offers a DC-15 MHz bandwidth, vertical sensitivity of 1 mV/cm over the full bandwidth, time base sweep to 100 nsec/cm and complete dual trace capability — all at a practical price.

Internal delay lines for the vertical amplifiers allow display of at least 20 nanoseconds of the pretriggered waveform, insuring that the complete waveform will be displayed. X-Y operation uses the standard vertical inputs, making phase measurements easy.

The post-deflection accelerated CRT of the 4510 provides a brighter trace and allows faster writing speeds. It will typically trigger on signals up to 45 MHz and is guaranteed to 30 MHz. No stability control is needed with the digitally-controlled trigger circuits. In the automatic mode, a reference baseline is generated even when the trigger signal is absent. Complete triggering controls are provided with choice of AC or DC coupling, triggering at any point on the vertical signal. Choice of automatic or normal sweep uses any one of 22 time bases from 0.2 sec/cm to 0.1 μsec/cm.

All major circuitry is located on five easily-removed circuit boards for easy trouble-shooting and service. For maximum performance at low cost, order the factory assembled and calibrated SO-4510. To save even more, the IO-4510 offers the same performance and features in an easy-to-assemble kit. (Shipping weight 34 lbs.)

Single Trace 10 MHz, 10 mV Triggered Scope with TV coupling

$299.95* kit

$420.00* assembled

The 4530 features a DC-10 MHz bandwidth, wide-band triggering capability, sensitive 10 mV/cm vertical input, TV coupling and a calibrated X-channel input — making it one of the best scope values on the market today.

Trigger bandwidths are guaranteed to 15 MHz, AC and DC coupled. Trigger circuits are digitally controlled, requiring only a level control and a slope switch. Various trigger signals can be selected: a sample of the vertical input signal, a sample of the line voltage or an externally applied trigger signal. In the TV trigger coupling mode, the 4530 can be easily triggered on the vertical component in a composite video signal.

Time bases can be switched from 200 ms/cm to 200 ns/cm. and any sweep speed can be expanded five times.

The 4530 is easy to operate, easy to service and offers high performance-per-dollar ratios. The factory assembled SO-4530 comes completely calibrated. For even greater value, build your own with the IO-4530 kit. (Shipping weight 30 lbs.)

Heath has a complete line of scopes for every application

Whatever your application, Heath has a scope with the performance and features you need. In addition to the scopes described above, we also have single trace DC-15 MHz scopes for design or just plain trouble-shooting—at prices that won't destroy your budget. If you need a low cost scope for classroom demonstrations or general design work in audio, TV and receiver circuitry, then our 5 MHz scope is the scope for you. The complete line—kit and assembled — is described in the latest Heath catalogs. Send for your free copies today.

HIPOTRONICS

AC/DC hipot & insulation testers

NON-DESTRUCTIVE UNITS FOR PRODUCTION OR LABORATORY USE . . . IN RANGES UP TO 10 KV AC AND TO 25 KV DC

AC/DC HIPOT TESTERS & MEGOHMMETERS (300 Series)

- Three test functions . . . with one flexible unit: (1) AC dielectric/insulation tests, (2) DC dielectric/insulation tests, and (3) insulation/resistance tests with direct megohmmeter readings.
- Two versions available . . . to fit all requirements:
  A Series — current readings as low as 1 ua on four range meter, resistance to 1,000 megohms on two range megohmmeter.
  B Series — current readings as low as 0.01 ua on six range meter, resistance to 100,000 megohms on four range megohmmeter.
- Bench-top or rack mount . . . fits any standard 19-inch equipment rack.

FEATURES:

- Overload circuit has continuously adjustable sensitivity from 50 ua to 5 ma, allowing non-destructive testing of insulation and dielectrics.
- Dual range output connected KV meter, with calibrated set point for megohmmeter readings clearly marked.
- Reset button and failure indicator.
- Recalibration facilities.
- Guard circuit for grounded or ungrounded operation.
- Front panel re-entrant test lead connections.
- AC/DC function indicator lights.
- Zero start interlock — compels operator to start tests at zero volts.

SPECIFICATIONS:

Input . . . . 115 VAC, 60 Hz, 1 amp max.
Size & Weight . . . . 21″W x 19″D x 10″H; approx. 50 lbs.
Meters . . . . 2% full scale accuracy, 4½″ meter.
Current meter ranges:
A Series . . . . Ranges of 0-50/500/5000 ua, DC, 0 to 5 ma AC, 1 to 1000 megohms in 2 ranges
B Series . . . . Ranges of 0-0.5/5/50/500/5000 ua, 0 to 5 ma AC, 1 to 100,000 megohms in 4 ranges

Model	Output Voltage (KV) AC	DC	Current Meter Range AC	DC	Megohm Ranges
H 301A	1.0	1.5	0-5 ma	0-50/500/5000 ua	2
H 301B	1.0	1.5	0-5 ma	0-0.5/5/50/500/5000 ua	4
H 303A	2.5	3.0	0-5 ma	0-50/500/5000 ua	2
H 303B	2.5	3.0	0-5 ma	0-0.5/5/50/500/5000 ua	4

H 306B	5.0	6.0	0-5 ma	0-0.5/5/50/500/5000 ua	4

OPTIONAL EXTRAS (ALL UNITS):

Item	Price
HV test probe	$10
Gravity operated output shorting solenoid with discharge resistor	$35
Audible failure signal	$15

AC/DC HIPOT TESTERS (100 Series)

- Similar to our 300 series . . . without the direct reading megohmmeter. Megohms can be calculated from the accurate readings on the KV and DC current meters.
- Two versions available . . . a standard unit with simplified control features, and a more deluxe unit with all the necessary controls for laboratory precision testing programs.
- Bench top or rack mount . . . this attractive bench-top unit fits any standard 10-inch equipment rack.

FEATURES:

- Overload circuit has continuously adjustable sensitivity from 50 ua to 5 ma permitting non-destructive testing of insulation and dielectrics.
- KV meter recalibration facility.
- Output control continuously adjustable from zero to maximum.
- Front panel re-entrant test lead connections.
- AC/DC function indicator lights.

ADDITIONAL FEATURES IN DELUXE HD MODELS:

- Zero start interlock with HV on and off switches — compels operator to start tests at zero volts.
- Triple range KV meter and DC current meter.

SPECIFICATIONS:

Input . . . . 115 VAC, 60 Hz, 5 amps max.
Size & Weight . . . . 21″W x 19″D x 10″H; approx. 60 lbs.
Meter . . . . 2% full scale accuracy. 4½″ meter.

OPTIONAL EXTRAS (ALL UNITS):

Item	Price
HV test probe	$10
Gravity operated output shorting solenoid with discharge resistor	$35
Audible failure signal	$15

AC & DC PRODUCTION HIPOT TESTERS (A and B Series)

- Simple to operate . . . reliable for go-no/go testing. Designed for use by unskilled or semi-skilled personnel in mass testing of electrical components, transformers, etc.
- Visual indicators . . . illuminate on front panel when component leakage or internal arcing is detected . . . audible alarm optionally available.
- Compact, lightweight, and rugged . . . this unit goes where the problem is.

Hipot testers are available in all models which comply with revised UL specification 499, paragraph 280B. Consult factory for details.

FEATURES:

- Arcing detector employs corona pickup network for optimum sensitivity.
- Leakage detector sensitivity continuously adjustable from 500 ua to 5 ma permitting non-destructive testing of insulation and dielectrics.
- Output connected KV meter for maximum accuracy.
- Shielded output lead through re-entrant jack.

ADDITIONAL FEATURES IN HD MODELS:

- Audible failure alarm circuit incorporated into design of all deluxe models.

SPECIFICATIONS:

Input . . . . 115 VAC, 60 Hz, 3 amps max.
Size & Weight . . . . 7″H x 12″W x 8″D; approx. 20 lbs.
Meter . . . . 3% full scale accuracy, 4″ meter.

megohmmeters/insulation testers

HIPOTRONICS

PORTABLE HIGH RESISTANCE SERIES COVERING RANGES FROM 100,000 OHMS TO 20,000,000 MEGOHMS

Model H M3AS

. . . FOR TESTING INSULATION RESISTANCE TO ASTM SPECIFICATION D-257 AND TO APPLICABLE UL, CSA, AND MIL STANDARDS

FEATURES

- No meter bounce; therefore, meter averaging not required, even with large capacitive loads or any input voltage change in 20,000,000-megohm range . . . Output voltage is double regulated with both a ferro-resonant line and solid state electronic regulators.
- Dead shorts on megohmmeter output will not damage components . . . short circuit protection will handle continuous shorting without injury to any component.
- Grounded or ungrounded testing . . . with three-terminal output (positive, negative, and guard).
- Verify the calibration at any time . . . self-contained calibration resistors permit operator to periodically verify the calibration.
- Discharge internal and load capacitance . . . switch position and resistor provided for complete capacitive discharge.
- No zero shift . . . on any range. VTVM circuit drives the meter on this high quality megohmmeter.
- Better than 2% accuracy on all readings below 1 million megohms, with 3% on 20 million megohms.

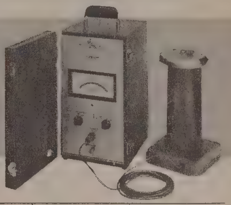
SPECIFICATIONS:

Input:	(all models)	115 volts, 60 Hz.
Weight:	(all models)	20 lbs. (approx.)
Size:	(all models)	7″H x 12″W x 8″D

Model No.	Output Voltage	Megohm Range	Megohm Ranges
H M1	500	1 to 1,000 megohms	2
H M3A	50 100 500 1000	0.1 to 1,000,000 megohms 0.2 to 2,000,000 megohms 1 to 10,000,000 megohms 2 to 20,000,000 megohms	6 6 6 6
H M3AS		Same as H M3A, but with mandatory 2 hand operation	
H M6B	50 250 500	0.1 to 1,000,000 megohms 0.5 to 5,000,000 megohms 1 to 10,000,000 megohms	6 6 6
H M6S		Same as H M6B, but with mandatory 2 hand operation	
M6C	250	0.1 to 1,000,000 megohms	6

AC/DC kilovoltmeters

. . . SELF-STORING ANALOG SERIES WITH ACCURACY GUARANTEED TO 0.5% DC AND 1.0% AC (TRACEABLE TO NBS)



Model KV50A

FEATURES

- Precision instruments for laboratory use — yet ruggedly designed and packaged for field and portable service.
- Models to 200 KV available from stock.
- Unique packaging concept permits one-hand portability for field use . . . plus safe storage for dividers behind front panel . . . yet operator safety is assured with two-piece construction.
- Average-reading meter calibrated in rms.
- Ripple measurements . . . merely turn the switch to AC.
- Burn-out proof . . . cannot be injured by over voltages or sharp rise time transients.

SPECIFICATIONS:

	Model KV50A	Model KV100A	Model KV200A
DC accuracy	0.5%	0.5%	0.5%

liquid dielectric tester

TEST YOUR OIL, NOT YOUR OPERATOR. MODELS OC-50A, OC-60A, OC-90A AND OC-51M: PORTABLE, AUTOMATIC UNITS (50, 60 AND 90 KV) AND MANUAL UNIT (50 KV) DESIGNED TO TEST THE BREAKDOWN VOLTAGE OF INSULATING OILS IN ACCORDANCE WITH ASTM SPECIFICATIONS

FEATURES

- Performs tests to ASTM D149, ASTM D877, and ASTM D1816.
- Fully automatic — just select motorized rate of rise.
- Accuracy assured — memory meter records breakdown point.
- Wide range — 50 KV rating is standard to accommodate the dielectrics now being used in transformers, bushings, capacitors, etc.
- Cup options — accepts all standard cups.

Prices and specifications subject to change without notice.

SPECIFICATIONS

Input:	115 volts, 50/60 Hz, 2 amps, single phase	
Output:	OC-50A	0-50 KV rms @ 2 KVA
	OC-60A	0-60 KV rms @ 2 KVA
	OC-90A	0-90 KV rms @ 2 KVA
	OC-51M	0-50 KV rms @ 2 KVA
Accuracy:	2% at full scale	
Dimensions:	OC-90A	16½″ W x 18½″ H x 20¾″ D
	All others	15½″ W x 14½″ H x 11½″ D
Weight:	OC-50A, OC-51M	60 lbs.
	OC-60A	65 lbs.
	OC-90A	90 lbs.

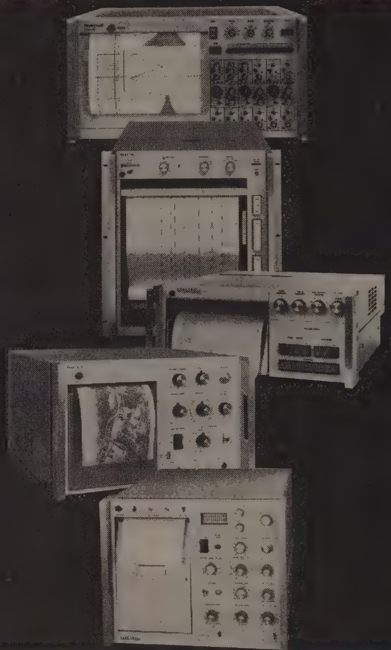
Honeywell

Transduce, Condition, Record, Analyze, Readout.



Spectrum Analyzers.

Real-time, time compression spectrum analyzers/digital integrators with MOS FET shift-register memory for digital time compression. Modular design allows simple conversion from 200 to 400 line models. All analyzers provide 11 frequency scales from 0 to 20 Hz to 0 to 50 kHz as well as 0 to 1 MHz.

Correlation and Probability Analyzers.

Two all-digital, high-speed correlation and probability analyzers that provide real-time measurements in 3 modes. Correlation (auto and cross); enhancement (or signal recovery); and probability (density and distribution). Both models have linear and exponential averaging, digital bin marker and a large dynamic range. Both correlators directly interface with the all digital Fourier Transform Analyzer Model SAI 470.

Oscillographs.

New Model 1858 is a complete data acquisition system with built-in signal conditioning in a 65-lb package only 8¾ inches high with 8-inch wide record and internal paper take-up. 18 channels, each with dc to 5,000 Hz response. 42 discrete paper speeds up to 120 inch/sec. Easier to set up and operate than any other graphic data acquisition system. 0.1% internal timing.

8-inch Visicorders, galvanometer-type oscillographs with dc to 25 kHz response, available with 24 or 12 data plus two or four event channels, internal take-up, 4 interval timing system.

12-inch Visicorder model has 36 data channels, dc to 25 kHz, plus six event channels, paper speeds from .005 to 200 inch/sec. Reversible drive system for record analysis.

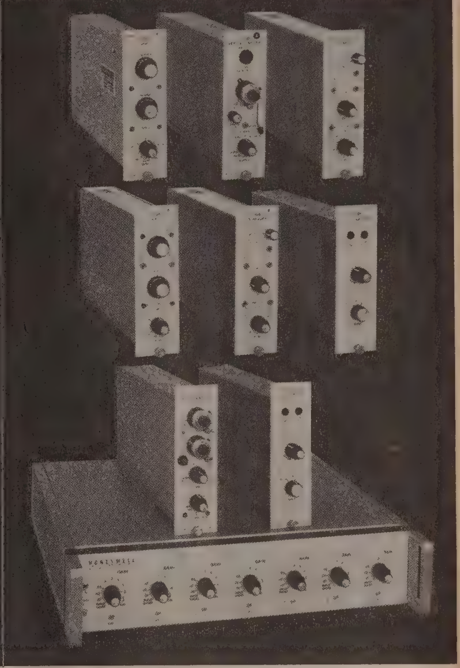
Model 1856 Linescan Recorder gives permanent, hard-copy records of the output of infrared, video and sonic scanners, radar systems and real-time spectrum analyzers.

Model 1806A Recording Oscilloscope — single-channel, four-axis captures continuous or one-shot signals on 6-inch paper at frequencies from dc to 1 MHz.

Data Transmission Recording System uses Visicorder light-beam oscillograph to produce immediately-readable, permanent, simultaneous recordings to 9600 bps of up to 28 separate inputs or outputs of the data set. in any combination.

Honeywell

Transduce, Condition, Record, Analyze, Readout.



Tape Recorders/Reproducers.

Laboratory and portable systems, including the new model Ninety-Six, first all-new high-performance laboratory system since 1970. Simultaneously records/reproduces any combination of direct or FM data at nine pushbutton controlled speeds from 15/16 to 240 inch/sec. Choice of IRIG compatible tape heads allow ½ or 1-inch wide tape handling and 7, 14 or 28 data channels. Omniband electronics for more functions on fewer cards. Flutter, skew and time-displacement errors minimized by vacuum-buffered, balanced-tension transport. Wideband phase lock servo with absolute minimum time base error. Dozens of other outstanding features include selective track recording, full TTL-compatible remote control and modern cabinet design with modular subassemblies for ease of access and service.

Honeywell Model 5600 portable system is a full 14-channel instrumentation grade recorder that handles virtually any tape recording application. Extensive use of aerospace technology and electronics give laboratory performance in a 70-lb package. Features include easy conversion of tape width, power source and recording technique for a variety of special requirements at remote locations.

Signal Conditioning.

Complete line of signal conditioning devices for measurements from microvolts to hundreds of volts. Includes strain-gage, thermocouple and dc amplifier units.

New Accudata 218 Gage Control/Amplifier gives strain-gage transducer excitation, automatic bridge balancing and complete signal control in a single plug-in module. Three output amplifiers to drive oscillographs, magnetic tape systems, A/D converters, oscilloscopes and other recording and display devices.

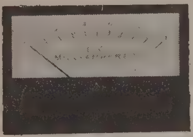
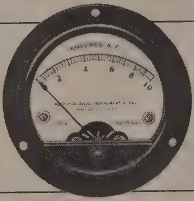
CUSTOM PANEL METERS

Available in sizes of 1½", 2½", 3½", 4½", 6" and 8". These smartly styled meters are available with die cast metal bezels for mounting the 1½" to 4½" meters behind equipment panels. They can also be supplied with an illumination provision. Other options include painted fronts and mirror dials. Four stud mounting permits interchangeability with most other meter types. Refer to dimensions on bottom of page. 2% A.C. Repulsion, 2% and 1% Moving Coil D.C. and VU meters available.





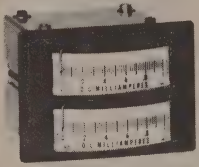
BAKELITE PANEL METERS FOR INDUSTRIAL APPLICATIONS

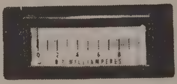
For more industrial panels Hoyt has a complete line of both round and square Bakelite Panel Meters. Square and Round Bakelite styles are available in 2½", 3½", and 4½" cases. Both A.C. Repulsion and D.C. D'Arsonval Movements available in most ranges. Some metal case styles also available in 2½" to 8" round sizes.

D.C. MILLIAMPERES

NEW ACRYLIC CASE PANEL METERS

These new 6" No. 2260 and 3" No. 2340 meters are supplied in scratch resistant acrylic cases. The 2260 has a projected front to permit behind the panel mounting without the customary bezel. Both models have a plain lined case front, and are available with either A.C. Repulsion or D.C. D'Arsonval movements.



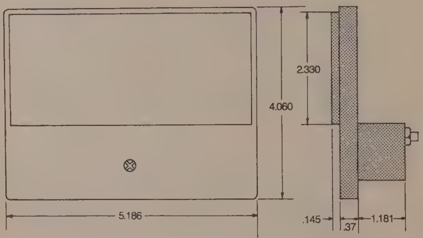


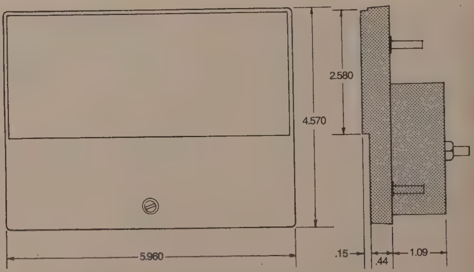
EDGEWISE PANEL METERS

The newest Hoyt Edgewise Meter No. 685 is designed without any barrel projection so that the meter may be used as a single unit or mounted together horizontally or vertically in quantities of two or more. Mounting bezels are available for one, two, or three stack units. This is completely shielded from interaction and stray magnetic fields. Our other Edgewise No. 673/S with a narrower .64" front is best for limited front panel space. Both types available in 2% Moving Coil ranges or VU Meters.

Many other styles available — write for catalog.

PROJECTED FRONT PANEL METERS





No. 3145 DC/No. 3146 AC ***Available SOON***
5" projected front meter. Mounts without bezel. Unobstructed, translucent case back and dial for best illumination distribution.

No. 2260 DC / No. 2261 AC
- Acrylic case — choice of colors
- Mounts on panel or through rectangular hole from behind panel

Both panel meters available with DC moving coil, AC moving vane, AC rectified and VU meter movements

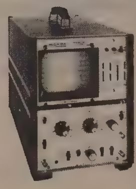
HICKOK test instruments

WIDEBAND OSCILLOSCOPE

LAB QUALITY AND PERFORMANCE ALONG WITH ECONOMY

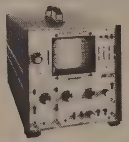
A lab quality 10 MHz triggered Oscilloscope, the Model **511** combines economy with reliability, ruggedness and advanced solid state circuitry. Provides 10 MHz response with 5 mV/cm sensitivity. Excellent pulse response minimizes overshoot and ringing. Foolproof triggering to 15 MHz. Bright 8 x 10 cm display for easy viewing. X-Y operation for vectorscope measurements. Auto mode triggering provides baseline for recurrent sweep operation and beam finder quickly locates off-scale traces. 12 calibrated verticle ranges and 18 calibrated sweep speeds as well as TV-V, TV-H and TV-VITS sync. Simplified front panel controls are colored coded and convenient for versatile, easy operation in industrial, lab, or service work. Regulated power supply maintains calibration within 0.1% over full line voltage variation. Power Required: 105-125 VAC, 50-400 Hz, 35 watts. Size: 8½" w x 19"d x 10½"h. Wt.: 15 lbs. Combination 10:1/direct probe included. **$465.00**



DUAL-TRACE OSCILLOSCOPE

THE ULTIMATE SIGNAL TRACING INSTRUMENT

Model **512** has all the features of the Model 511 plus the versatility of 4 dual trace modes. Display channel A only, channel B only, alternate A & B, chopped (100 kHz) A&B, or A + B, or A – B. Dual trace allows easy signal comparisons: input vs. output, left vs. right channel, differential amplifiers, phase shift, etc. Simplified color coded controls permits all this flexibility with fiddle-free operation. Power required: 105-125 VAC, 50-400 Hz, 35 Watts. Size: 10½" w x 19" d x 10½" h. Wt.: 17 lbs. Supplied with 2 combination 10:1 probes. **$675.00**



FUNCTION GENERATOR

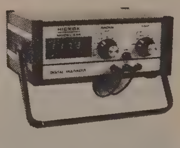
SINES, SQUARES, TRIANGLES AND MUCH MORE!

Model **270** provides sine, square, and triangle waves from 1Hz to 500 KHz in 6 ranges, with both step and variable attenuation, vairable DC offset (±6v) and 24v P/P output @600 ohm impedance. But this is only part of what this versatile instrument can do. The model 270 also has capability (rear panel input) for AM & FM modulation, sweep, ramps, pulses, mixed output, plus FSK and Tone Burst. The 270 has many uses in Audio and TV Service, the test lab, industry, the 2-way radio shops plus experimentors and Hams. Power required: 105-125 VAC 50-400Hz, 10W. Size: 8½" w x 4" h x 6" d. Wt. 4 lbs. **$166.00**

DIGITAL MULTIMETER

DIGITAL PRECISION YOU CAN RELY ON

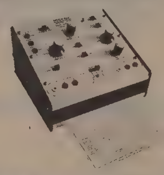
Model **334** is a complete digital measuring instrument backed by Hickok's ten years of digital multimeter experience. It measures AC & DC voltage from 1 mV to 1200V with up to 0.5% accuracy, current from 1µA to 2 Amps and ohms up to 20 megohms — 26 ranges and functions in all. Uses advanced P-MOS IC's and C-MOS logic for lowest parts count and greatest reliability. Fully guarded input takes overloads with no damage. Ohm ranges take full line voltage continuously! Green fluorescent display is easy to read and easy on your eyes. Lab quality at an affordable price. Power requirements: 105-125VAC or 210-250VAC, 50-400Hz, 5 watts. Size: 8½" w x 4" h x 6" d (exc. handle) Wt. 4 lbs. Probe included. **$229.00**



CURVE TRACER

WITH UNIQUE INSTA-BETA DISPLAY

The Model **440** is a complete professional curve tracter with several unique user-oriented features such as a pull-out instruction card and INSTA-BETA display that takes the guesswork out of beta and FET parameter measurement. The INSTA-BETA display shows a single Ic/Ib curve for transistors and a single Id/Vgs curve for FET's. The Model 440 also displays normal transistor, diode, and FET curves with up to 100mA collector current in 5 ranges; up to 100V collector voltage with 3 steps of horizontal sensitivity; and 11 ranges of base current or gate voltage. Two sets of panel sockets and connectors are included for easy device matching. Power required: 105-125VAC or 210-250VAC, 50-60Hz, Size: 8½" w x 4⅝" h x 7½" d. Wt. 4½ lbs. **$165.00**

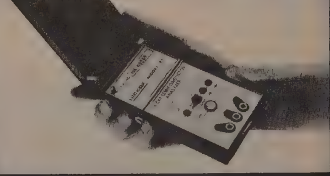


PORTABLE SEMICONDUCTOR TESTER

AS EASY TO USE AS IT IS TO CARRY

Model **215** gives instant GOOD/BAD analysis of NPN's, PNP's, FET's and diodes in or out of circuit. Automatically determines lead configuration and indicates in bright LED displays whether semiconductor is GOOD or BAD. No buttons to push for fast, "no hands" operation. Low power CMOS circuitry extends battery life. Small, compact instrument in a rugged polypropylene case. Powered by 2 standard 9 volt batteries (not included). Size: 3⅜" w x 5¾" d x 1⅞" h. Wt.: 12 oz. . **$138.00**

Recharger for use with n. cad batteries — Hickok P/N 20800-421 .... **$ 4.95**



These and other fine instruments from Hickok are available through local distributors.

PHAZOR

The operation of the Phazors is unique in that the input and reference signals are applied to an electronic multiplier which derives the instantaneous product of their amplitudes. The multiplier output is then applied to a DC meter which produces a deflection proportional to the time average of this product.

Expressing this function mathematically we have: Meter Deflection = $\frac{k}{T}\int_0^T V_S \cdot V_R\,dt$

PHASE METERS

High Accuracy and Resolution • Measures 0°-360° Without Ambiguity • Rejects All Noise and Harmonics (without filters) • Wide Input Voltage and Frequency Range • Self Calibration Assures Accuracy

MODEL 200A

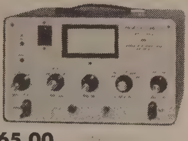
$595.00

APPLICATIONS: Measures phase shift in transformers, amplifiers, etc. • Readings not affected by noise and harmonics • Measures in-phase or quadrature voltage components • .01 degree can be measured employing special techniques.

SPECIFICATIONS

ACCURACY: .... ±2 degrees
FREQUENCY: .... 20 Hz to 20 KHz

MODEL 210AB



$965.00

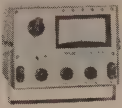
This instrument retains the essential feature of other Phazor models in that accurate measurements can be made even though signals may be complicated by noise and harmonics. The quadrant is read directly on a projection readout. The angle within the quadrant is displayed on the meter.

SPECIFICATIONS

ACCURACY: ..... ±2 degrees
FREQUENCY RANGE: 15 Hz—30 KHz
SENSITIVITY: .... 5 millivolts

VECTOR VOLTMETERS

Precise Measurement of:
IN-PHASE VOLTAGE • QUADRATURE VOLTAGE
TRUE RMS VOLTAGE • PHASE ANGLE
NULL VOLTAGE



MODEL 300PB

$1,100.00

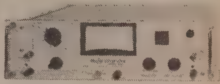
- Portable — All Solid State
- Direct Reading Phase and Quadrant Indicator
- Battery Operated — Eliminates Power Line Ground Loops

SPECIFICATIONS

INPUT VOLTAGE: .... 1 MV—300 V
INPUT IMPEDANCE: .. 1 megohm
VOLTAGE ACCURACY: 2% full scale
PHASE ACCURACY: ... ±1 degree
FREQUENCY RANGE: 60 Hz—10 KHz
NULL SENSITIVITY: .. 10 microvolts
HARM. REJECTION: .. 40 db down without filters
WEIGHT: .... 9 lbs., approx., with batteries

AC Power Pack Available — $150.00

MODEL 300C



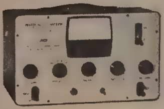
$1,700.00

- All Solid State
- Direct Reading Phase Angle
- Wide Frequency Range
- Rejection of Noise & Harmonics
- Input & Reference Isolation

SPECIFICATIONS

INPUT VOLTAGE:..........300 μV to 300 V
INPUT IMPEDANCE:....10 Megohm
VOLTAGE ACCURACY:....2% Full Scale
PHASE ACCURACY:........±1 degree
FREQUENCY RANGE:....15 Hz to 100 KHz
REF. VOLTAGE:..............100 MV to 130 V
NULL SENSITIVITY:......Less than 2 μV
HARM. REJECTION:......40 DB without filters
RACK PANEL SIZE:........19″ W x 5¼″ H

NULL METERS



A PHASE SENSITIVE NULL METER

MODEL 100 A

$465.00

SPECIFICATIONS

Input Impedance
High Gain . . . 2 megohm shunted by 30 MMF.
Low Gain . . . 2.5 megohm shunted by 15 MMF.
Sensitivity—6 millivolts off-scale deflection
Frequency Range—30-10,000 Hz
Selectivity—40 DB down on all noise and harmonics
Reference Voltage—8 volts to 120 volts
Maximum Input Voltage—120 Volts RMS
Peak Input Voltage—400 Volts
Power Supply—105-125 Volts, 50-400 Hz, 25 Watts
Dimensions—Height 9 inches, Width 15 inches, Depth 8 inches (19″ rack avail.)
Weight—25 pounds
Also available:
Model 100AH (similar to 100A with freq. range of 30 Hz to 50 KHz)

Powertron

ELECTRONIC GENERATORS

A complete line of 1ϕ, 2ϕ & 3ϕ models with power output ratings from 3 VA to 9 KVA and frequency accuracies to .0001%.

These AC Power Supplies provide stable, low distortion AC power at frequencies within the audio frequency spectrum. The highly reliable and versatile power sources find wide application in calibration and test stations, motor drives, gyro wheel supplies, laboratory use, military component testing, and operating foreign equipment.

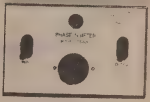
FOR ADDITIONAL INFORMATION SEE SECTION 4000—OR REQUEST COMPLETE CATALOG #969.

PHASE SHIFTERS

MODELS PS 60 and PS 400

FOR MEASUREMENT AND COMPARISON OF PHASE ANGLES OR AS A SECONDARY PHASE STANDARD.

$415.00



SPECIFICATIONS

Range ....0° —360° (continuously variable)
Accuracy .... ± 1.0 degrees
Supply Frequency
60 C. P. S. for Model 60, 400 C. P. S. for Model 400 (other frequencies on request)
Input Voltage .... 26 to 115 volts
Input Impedance
Approx. 1500 ohms for Model 60
Approx. 500 ohms for Model 400
Output Voltage .... ⅓ input voltage Approx.
Output Load .... 1 megohm or greater
Dimensions .... Height 5$^{11}/_{16}$ inches, Width 9 inches, Depth 6⅛ inches.

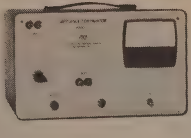
IMPEDANCE COMPARATORS

PRECISE,, RELIABLE AND RAPID COMPARISON OF COMPONENTS

The circuit consists of a bridge, two arms of which are precisely matched. The two remaining arms are the standard and the component under test. Any voltage resulting from bridge unbalance is amplified and fed to a phase discriminator. The percentage deviation is read directly in both sign and magnitude on a meter.

FEATURES: High Accuracy & Stability • Fast Response • Linear Meter Scales • Self Calibrated

MODEL 60



$355.00

SPECIFICATIONS

FREQUENCY: ....60 CPS
FULL SCALE RANGES:..±1%, 5%, 10%, 20%
IMPEDANCE LIMITS:
Resistance ....5 ohms to 5 megohms
Capacitance ....500 mmfd. to 500 mfd.
Inductance ....15 milihy to 10,000 hy

MODEL 1100

$595.00

SPECIFICATIONS

FREQUENCY: ....1KC, 10KC and 100KC
FULL SCALE RANGES:..±.5%, 2%, 5%, 20%
IMPEDANCE LIMITS:
Resistance ....3 ohms to 10 megohms
Capacitance ....30 mmfd. to 50 mfd.
Inductance ....10 microhy to 100 hy

OTHER MODELS AVAILABLE

MODEL 1010 — 1KC, 10KC — ±5%, 10%, 20% — $455.00
MODEL 1000 — 1000 CPS — ±1%, 5%, 10% — $455.00
MODEL 1100A — Similar to Model 1100, includes automatic category selection. $945.00

Infodex offers a standard line of 3″ rectangular and 5″ rectangular scopes. Each series embraces 22 standard models, ranging from X-Y indicators with AC-coupled Z axis for grey scale modulation, through a choice of 18 triggered sweep ranges, to three models with 12-step multi-range sweep. All sweep models have TTL-compatible Z axis control.

For the medical market Infodex offers a compact 6″ screen display operating from 12VDC regulated, 15-30VDC unregulated, or 115VAC. Larger screen units include 8″, 12″, and 17″ rectangular screen for conventional or "non-fade" trace presentation.

Infodex circuit design and packaging gives outstanding manufacturing flexibility so that we can provide specials with reasonable lead times and at reasonable prices. Be sure to consult us about your requirements.

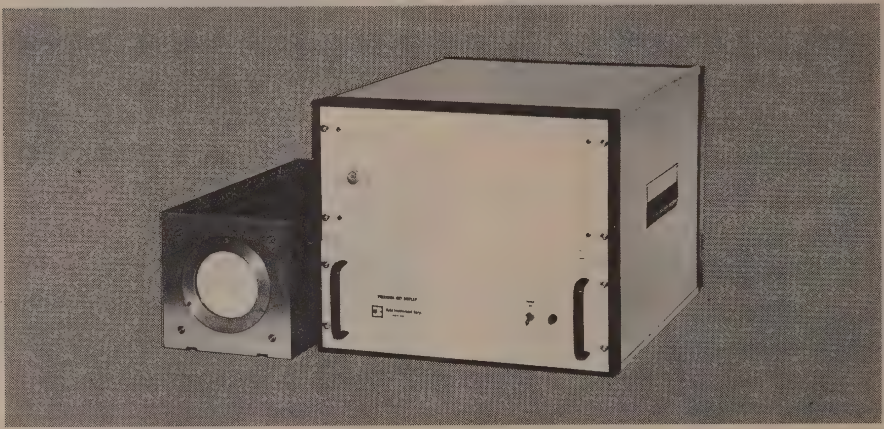
Precision CRT displays



Precision X-Y CRT displays for film recording and film reading

The Infodex line of Precision CRT Displays consists of a series of high resolution cathode ray tube displays utilizing all Silicon solid state circuitry for application in:

a. film and hard copy printing recorders
b. flying spot scanners
c. film readers
d. radar displays
e. computer output displays
f. TV monitors
g. Heads-Up displays

or any application requiring a precision programmable light source. They are capable of random access X-Y deflection or scanning at any rates from DC to the maximum bandwidth capability of the deflection system.

Users of precision display systems who are familiar with the PD900, 950, 1200 and 1400 originated by Beta will be interested to know of the new (1975) model, the PD1250.

The PD1250 is a magnetically focused display using a gun/orifice combination which provides more energy density in the trace than the PD900 or PD950 thus providing more exposure on the recording film. In addition it is faster than the PD1200.

The PD1250 has excellent settling time, 10μs to 0.1%, 1 mhz small signal bandwidth, and improved drift, temperature stability and repeatability compared with the electrostatic focus models.

	PD900	PD950	PD1200	PD1250	PD1400

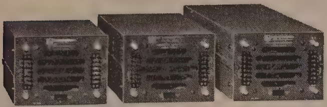
Precision CRT modules



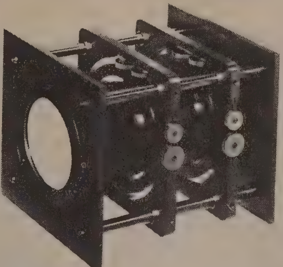
±35 Volt deflection amplifiers

The models DA223, DA224 and DA225 are dc-coupled, all-silicon, solid-state modular packages capable of supplying up to ±2.0, ±4.0 and ±6.0 amperes of deflection current respectively to each axis of a directly-coupled deflection yoke. A unique method of damping optimizes the amplifier for the particular yoke being used by means of an adjustable potentiometer. The amplifiers also feature extremely fast settling time and high bandwidth. The user has the choice of operating the amplifiers Class A for achieving nonlinearities of ±0.02% maximum or Class AB for minimum power consumption.

New this year is the "H" version of this series of amplifiers. With all of the features mentioned above, the new H version uses an improved integral sensing/feedback system which provides high stability and repeatability during operation. Any of the models can be ordered with this feature as a DA223H, etc.

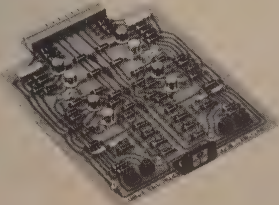
All of the above amplifiers are in regular production and normally in stock. For higher current requirements, the DA226 is available. The DA226 or DA226H is built to order and supplies ±8 amperes.

All of the above amplifiers are also available as powered assemblies. These consist of a PAK 16 low voltage supply and the deflection amplifier mounted in a rack mounting assembly with a single front panel 16" high. Call for descriptive literature.



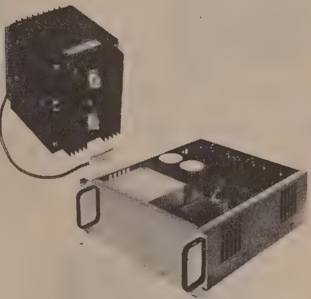
Precision tube and coil mounts

Flexible combinations of standard assemblies for the precision mounting and alignment of CRT's, yokes and coils: CRTM Basic CRT Mount includes removable bezel, rods and neck end clamps; DSTM Dual Gun Recording Storage Tube Mount, includes rods and neck clamps both ends; MCM Micropositioner Coil Mount allows 6 independent motions and positive lock; FYM Fixed Yoke Mount for application where micropositioning is not required; FYMS Fixed Yoke Mount for servo-type mounted yokes; CCM Centering and/or Alignment Coil Mount; MS983 Magnetic Shield Enclosure.



Modular CRT building block components

Individual, compatible plug-in circuits such as: DF2050 Dynamic Focus Generator; DF347 Dynamic Focus Amplifier; LC2656/2676 Precision Linearity Correction Circuit; VA2548 Video Amplifier (10 mhz); VA2549 Gamma-Corrected Video Amplifier (10 mhz); VA2077 Video Amplifier (30 mhz); SG1190 Sawtooth Generator; PP2425 Phosphor Protection Circuit; DA1340 Deflection Amplifier (±0.75 amperes); EDA800 Electrostatic Deflection Amplifier (350 volts plate-to-plate positive or negative); FR1882 Static Focus Regulator; BA1714 Blanking Amplifier. All circuitry features silicon semiconductors and temperature stable metal-film resistors throughout.



High & low voltage CRT power supplies

SERIES HV provides regulated high voltage outputs for CRT electrodes — anode, focus grid, G2 and filament.

Model No.	Anode Output Range
HV7	2-7 kv
HV25	10-25 kv

SERIES PAK provides regulated low voltage outputs for modules — ±35 volts, ±20 volts, G1 and filament.

Model No.	±35 volt (deflection) Output
PAK16	16 amperes

Also available; complete film recorders and scanners

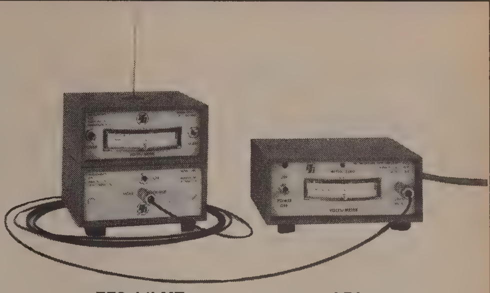
FIELD GENERATING AND MEASURING EQUIPMENT

- Instruments for Industry's new EFS-1 E-Field Sensor reads directly in volts/meter and operates from two standard 9-Volt Batteries. When the application requires a low cost test instrument for measuring strong electric fields from 10kHz to 220MHz with no tuning or bandswitching or frequency related adjustments . . . use the EFS-1.

EFS-1 with LMT attached

The IFI Light Modulator-Transmitter attaches directly to the EFS-1 to convert the voltage output to an optical signal which is coupled through non-conducting fiber links for remote reading and control . . . without disturbing the field being measured. Call or write today for full details.

- The LDI Light Demodulator-Indicator is another accessory which is identical in size and similar in appearance to the EFS-1. It accepts the light-flash input from the LMT fiber optic link and converts it to a meter indication reading directly in volts/meter.

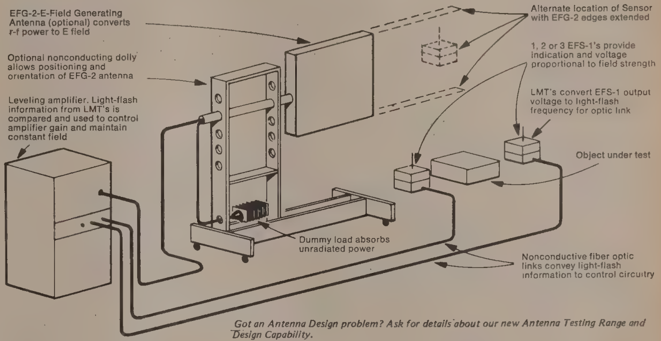


EFS-1/LMT
LDI

IFI's Automatic Constant Field Generating System can improve the quality as well as the quantity of your data and save you as much as two manhours per sweep. When it comes to generating high level fields there is really no other way.

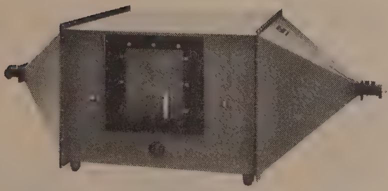
Automatic Constant-Field Radiated Susceptibility Testing System.

Typical test set-up using IFI's broadband amplifier, leveling preamplifier, EFS-1 and LMT and Model EFG-2 E-Field Generaing Antenna. The EFG-2 generates a strong field over the range from 10kHz to 220MHz with a continuous power handling capability of 1000 watts. For help with your EMC measurement problems, call or write IFI Application Engineering Department.



EFG-2-E-Field Generating Antenna (optional) converts r-f power to E field
Optional nonconducting dolly allows positioning and orientation of EFG-2 antenna
Leveling amplifier. Light-flash information from LMT's is compared and used to control amplifier gain and maintain constant field
Alternate location of Sensor with EFG-2 edges extended
1, 2 or 3 EFS-1's provide indication and voltage proportional to field strength
LMT's convert EFS-1 output voltage to light-flash frequency for optic link
Object under test
Dummy load absorbs unradiated power
Nonconductive fiber optic links convey light-flash information to control circuitry

Got an Antenna Design problem? Ask for details about our new Antenna Testing Range and Design Capability.



The IFI Crawford Cell. It not only costs far less than a screened room — it's more versatile; instrumentation requirements are simpler; it eliminates both antennas and resonance problems. The IFI Crawford Cell provides broadband measurement of radiation from, or susceptibility to radiation of equipment placed in the cell. Compact (53″ x 24″ x 16″ with larger or smaller units available), the Model CC-103 Crawford Cell can be located anywhere in the lab. VSWR is $<$ 1.1:1 up to 300MHz. Calibration traceable to NBS.

SERIES 70

INTERSTATE

FUNCTION/PULSE GENERATORS/0.00002 Hz to 20 MHz

SERIES 70, a universal signal-source line, offers the ultimate blend of function generator, pulse generator, and sweep generator capabilities, combining broad frequency with an exceptional range of operating features.

CALIBRATED COARSE/ FINE TUNE Fine tune vernier is centered on the frequency dial. Two calibration scales (X1 & X2 on frequency dial) improve resolution and permit continuous tuning across the 20 KHz audio band.

SYMMETRICAL OR VARIABLE SYMMETRY WAVEFORMS Symmetrical waveforms to 20 MHz, or variable symmetry waveforms to 1 MHz with 5% to 95% time symmetry adjustment of sine, square, and triangle.

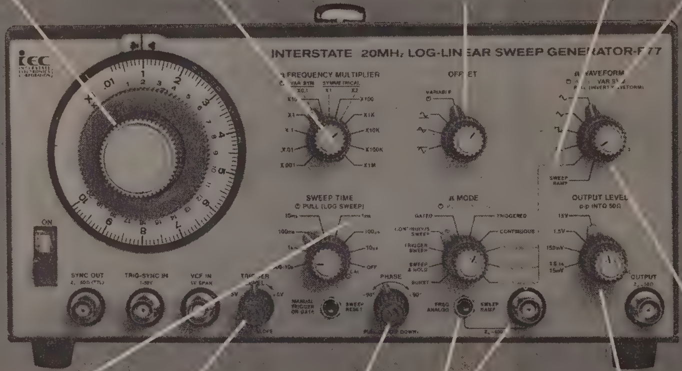
UNIPOLAR, BIPOLAR, OR VARIABLE OFFSET Unipolar offset clamps selected positive or negative waveform baseline to zero volts independent of variations in signal level. Variable offset baseline is smoothly adjustable from −15 to +15 V open circuit.

TRUE "PULSE GENERATOR" PULSE SERIES 70 is the first function generator series to offer pulse generator users a high-quality pulse with constant width setability independent of frequency.

POWER AMPLIFIER INPUT Using rear-panel BNC, generator can be operated as an analog power amplifier to amplify externally applied waveforms or pulse signals as much as 600%.

SWEEP SYNC Rear-panel TTL-compatible squarewave output can be used as a sync reference for plotters and recorders, or as an autonomous output when ramp generator is used independently.

LINEAR OR LOG SWEEP Log sweep pull-switch converts linear ramp to an exponential (logarithmic) sweep, so lower frequency portion of swept frequency has greater visibility.



F77

CONSTANT DUTY CYCLE PULSE Can also be generated when the squarewave output is operated in the variable symmetry setting. Circuits that are sensitive to duty cycle "on/off" times can be tested using varying pulse rates, without adjusting the width control.

WAVEFORM INVERSION CONTROL Pulls on to invert the output polarity in any mode of operation.

ADJUSTABLE TRIGGER LEVEL AND SLOPE CONTROLS Give oscilloscope-style triggering and facilitate noise discrimination and external signal synchronization.

VARIABLE START-STOP (Same as SERIES 50A).

FREQUENCY ANALOG/ SWEEP RAMP Two auxiliary signals are switch-selectable to the single output port to be used to drive recorders or graphic displays while using sweep techniques.

CALIBRATED ATTENUATOR Four-step attenuator with 20-dB vernier provides excellent resolution and signal-to-noise ratio for signals down to 1.5 millivolts, p-p.

		sine, square, triangle with variable symmetry control to 1MHz; dc waveform	standard "pulse generator" pulses	pulse amplifier waveform	"constant duty cycle" (variable symmetry) pulse	standard pulse: 15 nanosec fixed rise/fall	standard pulse: separately adjustable rise/fall 15 nanosec to 1 sec	fixed and variable offset; 7.5 V range into 50 ohms, 15 V open circuit	15 V p-p into 50 ohms (30 V open circuit)	simultaneous high/low outputs with 30-dB separation	single output, controlled by 60-dB step attenuator with vernier	1000:1 VCF	trigger and gate; variable start-stop phase, slope and level adjustments	continuous sweep, triggered sweep, sweep-and-hold, burst	1000:1 sweep width	sweep up/sweep down selection	direct-reading sweep limit control	selectable logarithmic/linear sweep	external sync	selectable sweep ramp or frequency analog out	sweep sync	analog power amplifier

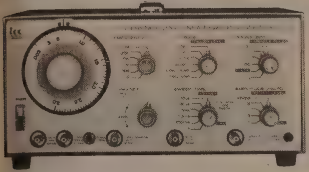
INTERSTATE FUNCTION & PULSE GENERATORS

SERIES 30 Function Generators
3MHz/10V p-p into 50 ohms



All Series 30 models produce sine, square, and triangle waveforms with sync output and continuously variable offset. Other features include front panel offset switch and calibrated coarse/fine frequency vernier.

F31 $395
- 2-step, 40-dB attenuator
- 1000:1 VCF
- dc (zero) waveforms
- ±5V offset into 50 ohms
- plus all of the above

F33 $495
- 5-step, 60-dB attenuator
- trigger & gate modes
- variable width pulse
- external sync
- plus all other F31 features

F34 $595
- continuous & triggered sweep and burst modes
- direct-reading sweep limit
- analog of frequency out
- plus all other F33 features

F35 $595
- AM, 40-dB dynamic range
- FM, 1000:1
- internal 400Hz modulation
- sinewave to 6MHz
- plus all other F31 features

F36 $695
- AM, 40-dB dynamic range
- FM, 1000:1
- internal 400Hz modulation
- sinewave to 6 MHz
- plus all other F33 features

F37 $745 *NEW!*
- selectable logarithmic/linear sweep characteristics
- two separate plotter drive signals for log and linear applications
- plus all other F34 features

F38 $495 *NEW!*
- 200 mV p-p to 20 V p-p into 50 ohms
- external capacitor BNC to extend low frequency range below 0.03Hz
- plus all other F31 features

IEC INTERSTATE ELECTRONICS CORPORATION
A Subsidiary of **A-T-O** Inc.

SERIES 20 Pulse Generators
50MHz/10V into 50 ohms

All Series 20 models include constant duty cycle mode, normal (single pulse) and double pulse modes, trigger and gate with slope and level controls, single input BNC, single mode control, full-range offset, and pulse width and delay from 10 ns to 1 second. Three amplitude ranges: 10 V, 5 V, 1 V into 50 ohms with 10:1 vernier.

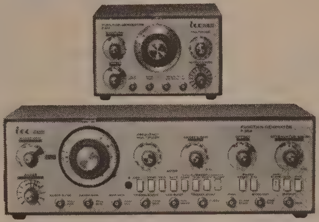
P22 $695
- single output, selectable positive or negative pulses
- fixed rise/fall times less than 3.5 ns
- plus all of the above

P23 $750
- dual outputs, simultaneous positive and negative pulses
- fixed rise/fall times less than 3.5 ns for each output
- plus all other P22 specifications and features

P24 $950
- single output, selectable positive or negative pulses
- adjustable rise/fall times from 5 ns to 0.5 sec
- independent rise and fall controls
- plus all other P22 specifications and features

P25 $1095
- dual outputs, simultaneous positive and negative pulses
- adjustable rise/fall times from 5 ns to 0.5 sec for each output
- independent rise and fall controls
- plus all other P22 specifications and features

SERIES 50A Function Generators
11MHz/15V p-p into 50 ohms

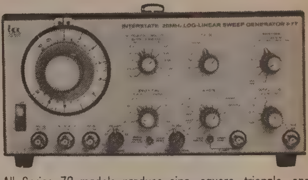


Both Series 50A models: waveforms include sine, square, triangle, 15/85% duty cycle positive and negative pulses and ramps. Also included is calibrated coarse/fine frequency vernier.

F51A $595
- variable width pulse
- fixed and variable offset
- 1000:1 VCF
- plus all of the above

F55A $1495
- trigger & gate modes
- 10-step 70-dB attenuator
- variable start-stop phase angle
- waveform inversion switch
- phase lock for frequency conversion and phase-shift applications
- continuous, triggered, & sweep and hold modes
- burst — single or multiple cycles
- direct-reading sweep limit control
- plus all other F51A features

SERIES 70 Function/Pulse Generators
20MHz/15V p-p into 50 ohms



All Series 70 models produce sine, square, triangle, and dc-level waveforms with 5/95% waveform variable symmetry control to 1 MHz, and fixed and variable offset (±7.5 V into 50 ohms). Also included on all models is a calibrated coarse/fine frequency vernier.

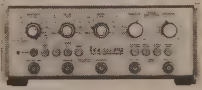
F71 $695 *NEW!*
- instant duty cycle pulses
- 1000:1 VCF
- waveform inversion
- hi/low output; 30-dB separation
- plus all of the above

F72 $895 *NEW!*
- standard "pulse generator" pulses; adjustable rise/fall to 15 ns
- 3 ns to 1000 ms adjustable pulse width
- pulse amplifier waveform
- trigger & gate with variable start-stop phase
- external sync
- plus all other F71 features

F74 $945 *NEW!*
- standard "pulse generator" pulses; fixed 15 ns rise/fall
- 3 ns to 10 ms adjustable pulse width
- 60-dB step attenuator with vernier
- continuous and triggered sweep, sweep-and-hold & burst modes
- sweep up/sweep down
- direct-reading sweep limit control
- sweep ramp/frequency analog outputs
- trigger & gate with variable start-stop phase
- external sync
- plus all other F71 features

F77 $1095 *NEW!*
- selectable logarithmic/linear sweep characteristics
- sweep sync
- analog power amplifier
- plus all other F74 features

SERIES 10 Pulse Generators
10MHz/10V into 50 ohms



P12* $540 *NEW!*
- dual outputs, simultaneous positive and negative pulses
- fixed rise/fall times less than 5 ns for each output
- normal (single pulse) and double pulse modes
- external or manual trigger and gate
- synchronous and asynchronous gating
- pulse width and delay variable from 50 ns to 1 sec
- normal/complement output selector
- adjustable amplitude from 1 V to 10V into 50 ohms

*Available USA & Canada only

All Interstate instruments are warranted against defects in material and workmanship for one full year; detailed operation and maintenance manuals are supplied for each instrument. Hardware for 19" rack mounting is optionally available at $35.00; rear panel function generator BNC's in parallel with front panel BNC's are also optional for $35.00. Many Interstate instruments have GSA listings; contact your local representative for further information and assistance.

Frequency Meter

FM-2400CH (25 to 1000 MHz)

The FM-2400CH provides an accurate standard frequency signal for testing and adjustment of mobile transmitters and receivers at predetermined frequencies between 25 and 1000 MHz. Up to 24 crystals may be inserted. The frequencies can be those of the radio frequency channels of operation, and/or of the intermediate frequencies of the receivers between 5 MHz and 40 MHz. Frequency stability (standard) ±.001% from +32° to +122°F. Frequency stability with built-in thermometer, calibrated crystals and temperature corrected charts, ±.00025% form +25° to +125°F. (±.000125% special 450 MHz crystals available). Unit has solid state circuitry and rechargeable batteries.

SPECIFICATIONS

Crystal Oscillator
Frequency Range — 5 to 20 MHz
Frequency Stability — Standard —
±0.0005% from +50° to +104°F
±0.001% from +32° to +122°F
with built-in thermometer —
±0.00025% from +25°F to +125°F
with crystals calibrated and supplied with temperature corrected charts.
±.000125% +55° to +95°F
Frequency Tuning — 0.005%

Transmitter Pickup
Frequency Range — 25 to 500 MHz/1000 MHz
Sensitivity — 100,000 μV at 25 MHz to 250,000 μV at 470 MHz across 50 ohms

Counter Circuit
Frequency Ranges — 0 to 1.5 KHz
0 to 15 KHz
Residual Error — 100 cps at zero beat

RF Signal Generator
Frequency Range — 25 to 500 MHz/1000 MHz
Low Output* — 80 dbm to –100 dbm
High Output — Approximately 500 μV across 50 ohms
Crystal and tuning specifications are the same as for the Crystal Oscillator above.

*CH Model supplied with external attenuator to reduce signal to 0.5 to 2 μV range.

External Accessories

#246 IF Oscillator, 190 KHz to 8 MHz	**$35.00**
#241 Audio Oscillator, 1,000 Hz	**$35.00**

I.F. Signal Generator
Frequency Range — 5 MHz to 20 MHz on Fundamentals, and to 40 MHz on 2nd harmonics
Frequency Stability — ±0.002% from +32° to +122°F
Frequency Tuning — None
Output — 1,000 μV minimum into an open circuit
4 Nickel-Cadmium rechargeable batteries, charger supplied

Panel Controls

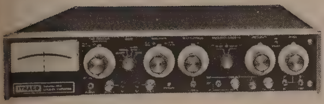
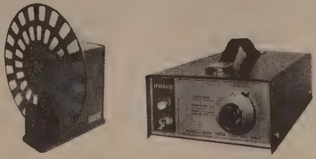
Lock-in amplifiers and accessories



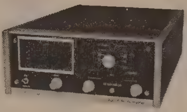
391A DYNATRAC® LOCK-IN AMPLIFIER

- Heterodyne lock-in – the world's only tracking lock-in that does not respond to interfering signals at multiples of the signal frequency. This means superior performance in all applications.
- 100nV to 1V full scale sensitivity
- .1Hz to 200kHz frequency response
- Noise and Ratio measurement options available



383 LIGHT CHOPPER

- 0.5Hz to 3kHz range; continuously variable
- Single and dual frequency blades available
- Dual reference outputs
- Separate solid state controller



3512 RATIOMETER

- 0.001 resolution
- Linear and log ratios
- 0.2% accuracy for inputs greater than 1VDC
- Optional $\sqrt{X^2 + Y^2}$ and BCD output modes

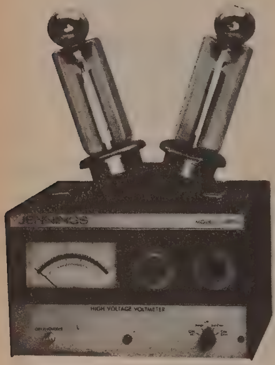
high voltage test and measuring equipment

SOLID STATE AC VOLTMETER



MODEL J-1005

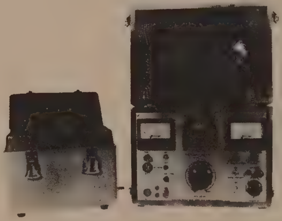
A compact, portable instrument for the accurate, direct reading of very high voltages at rf, audio and power frequencies . . . determination of the amplitude of pulses with oscilloscope connections for viewing wave shapes . . . removable high voltage input circuit for remote panel mounting of the meter . . . internal battery and ac line operation.

Specifications	Model J-1005
Voltage Ranges	Peak Kilovolts (single-ended) 0-2.5, 0-5, 0-10, 0-25, 0-50 Peak Kilovolts (double-ended) 0-2.5, 0-5, 0-10, 0-25, 0-50, 0-100
Frequency Response	Flat from 10 Hz to 20 MHz at full rated voltage. Internal resonances are above 100 MHz.
Accuracy	±3% of full scale on all voltage ranges.
Oscilloscope Connection	600 to 1 division ratio (approx.).
Meter Calibration	The meter is calibrated in peak kilovolts with linear voltage scales of 0-2.5, 0-5, 0-10, 0-25, 0-50.
Input Impedance	Greater than 2 x 10^{12} ohms and approx. 4 pf single-ended to ground, 2 pf double-ended.
Power Supply	117/230 volts ±10%, 50/60 Hz, 5 watts, or rechargeable battery.
Dimensions	Height, 16″; width, 10¾″; depth, 8″.
Net Weight	12 pounds (approx.). Ranges can be increased by using JCD5 series capacitors.

PORTABLE AC HIGH VOLTAGE TESTER

MODEL JHP-70A

The smallest and lightest instrument available at its power level the JHP70A will generate and measure 70,000 volts peak for on-site testing of high voltage components such as capacitors, switches, transformers, bushings, vacuum tubes, etc.



Maximum Output Voltage	70 KV Peak
Maximum Continuous Current	30 MA RMS
Short Circuit Current (Est.)	100 MA RMS
Power Requirements	105-125 Volts RMS
Frequency	50-60 Hz
Current	15 Amps
Surge Current	10 Amps
Weight:	
Control Cabinet	28 lbs.
Transformer	43 lbs.

MINIMEGOHMMETER — PORTABLE DIGITAL MEGOHMMETER

MODEL 15100

A hand-held portable instrument for general purpose electrical insulation testing. Applications include both production and maintenance testing of a wide variety of electrical equipment including motors, generators, cables, signal equipment, circuit breakers, transformers, switchgear, and insulators. Power is supplied by a self-contained rechargeable battery. Test voltage is fixed at 500 VDC, and there is a factory pre-set current limiter. This feature along with a digital readout makes for a simple and foolproof tester. There are three megohm ranges: 2.00-20.00 M, 20.0-200.0 M, and 200-2000 M and 0-200.0 ohms range for continuity testing. Test values are read on a 3½ digit LED display. Accuracy is ±2% of reading ±2% full scale ±one digit. The unit is compact, 7″ x 6″ x 3″, and weighs less than 3½ lbs. An external battery charger and vinyl carrying case are available as accessories.

ITT JENNINGS 970 McLaughlin Ave. • San Jose, Calif. 95116 • (408) 292-4025

high voltage test and measuring equipment

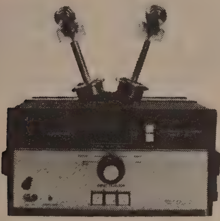
DIGITAL DC HIGH POTENTIAL TESTERS

Model 16420

Compact portable instruments for measuring high voltage leakage currents in the insulation of electrical equipment including: rotating machinery, transformers, switchgear, relays, interrupters, contactors, capacitors, cables and insulators. The high voltage power supply is electronically regulated against line and load changes. Circuitry is all solid state and features an adjustable current limiter (30 to 300 microamperes) for protection of the tester and non-destructive testing of components. Model 16400's functions are separately accessible, permitting its use as a portable laboratory high voltage power supply or as a digital kilovoltmeter. AC line operation.

Specifications	MODEL 16420
Max. Output Voltage	40 KV DC
Max. Output Current	300 μamps
Ripple	3% of rated output
Load Regulation	3%
Input Regulation	1%
Displays	Two 3-digit high intensity plasma "kilovolts" and "microamps"
Voltmeter and Microammeter Accuracy	0.5% of full scale, 1 bit LSD
Power Requirements	117/230 volts ±10% 50/60 Hz, 30 watts

AC & DC DIGITAL KILOVOLTMETERS



• DIGITAL AC KILOVOLTMETER, MODEL 11100

Direct Reading: For on-line applications.

Accuracy: Calibration better than 1.0% of full scale.

Wide Range: 0-10, 0-100 kilovolts; 10 Hz - 30 MHz.

Portability: Operates from internal battery or line. Weighs less than twelve pounds.

Oscilloscope Jack • Remote Display • Stability

Specifications	Model 11100	Model 12100
Voltage Ranges	Peak kilovolts (single-ended) 0-10, 0-50 Peak kilovolts (double-ended) 0-10, 0-100	DC: 0-10KV, 0-50KV AC (RMS): 0-10KV, 0-35KV ACpk (+): 0-10KV, 0-50KV ACpk (−): 0-10KV, 0-50KV
Frequency Range	Flat from 10 Hz to 30 MHz at full rated voltage. Internal resonances are above 100 MHz	8 Hz to 100 KHz on AC peak measurements, 8 Hz to 20 KHz on AC RMS measurements
Accuracy	±1% of full scale on both ranges	DC & AC pk: 1% of reading ±0.1% of full scale ±digit (LSD), AC (RMS) ±2% of full scale
Digital Display	3½ digit high intensity plasma	
Input Impedance	2X10¹² ohms and 4 pf single ended to ground, 2 pf double ended	10¹⁰ ohms and < 10 picofarads
Oscilloscope Connection	BNC connector, 600:1 division ratio approximate	BNC connector, output 1 volt for full scale reading
Power Supply	117 or 230 volts ±10%, 50/60 Hz, 5 watts or rechargeable battery, 8 hours recharge	
Dimensions	9″ x 16″ x 15″	6″ x 14″ x 11″
Net Weight	12 lbs. (approx.)	12 lbs. (approx.)

• DIGITAL AC/DC KILOVOLTMETER, MODEL 12100

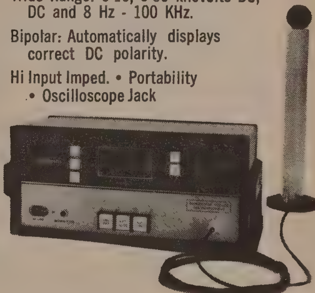
Versatility: Reads average DC, peak AC or true RMS AC.

Accuracy: DC calibration better than 1% of reading ±0.1% of full scale ±1 digit (LSD).

Wide Range: 0-10, 0-50 kilovolts DC; DC and 8 Hz - 100 KHz.

Bipolar: Automatically displays correct DC polarity.

Hi Input Imped. • Portability • Oscilloscope Jack



HIGH VOLTAGE AC DIVIDER

MODEL 13200

These dividers can be used with an oscilloscope to measure and observe voltages up to 60 kv at frequencies up to 20 MHz. Their low circuit loading design and shielded construction make them particularly suitable for rf measurement applications including tank circuit and transmission line voltages, pulse parameters, modulation voltages, and transient wave characteristics.

Specifications	Model 13200
Voltage	60 kv peak
Current	12.5 amperes RMS maximum through the voltage divider.
Input Impedance	Above 10¹² ohms, 4 pfd.
High Frequency Response	Flat to 20 MHz at 50 kv peak; maximum frequency 50 MHz at 20 kv peak.
Division Ratio	325:1 to termination of 3 ft. of RG-58A/U cable.
Low Frequency Response When operated into shunt resistance of 1 megohm 10 megohms	1000 Hz 100 Hz
Weight	2 lbs. 4 oz.

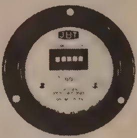
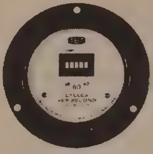
vibrating reed frequency meters

ROUND MOLDED CASE REED METERS

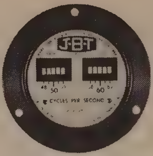
MODEL 34-FX-ser. A, a popular 9 reed meter.



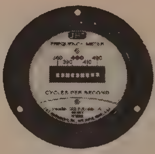
MODEL 21-FX, 5 reeds, matches other 2½″ panel instruments.



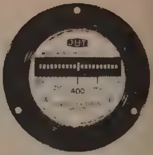
MODEL 31-FX, 5 reeds, standard. For appearance when operating, see "RESPONSE PATTERNS," below.



MODEL 30-FX, ser. A, 5 reeds in each of two frequency ranges.



MODEL 33-FX ser. A, 9 reeds for measuring frequency of high-cycle power sources.



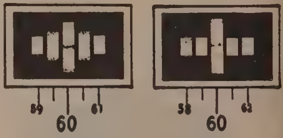
MODEL 36-FX-21, ser. A, 21 reeds for close reading over 380-420 cycle band. Shown operating at 400 cy.

- **USES, Commercial and Military** — J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, television, and radar service, on engine-generator sets and standby equipment, in laboratories, in many types of aviation and electronic equipment, on panel and control boards, in inspection setups, and in high-cycle power sources—wherever constant or known frequency is important to accurate and efficient operation of equipment. Superior performance for commercial and military applications is assured by more than 30 years of continuous experience and know-how covering the design and complete manufacturing of hundreds of thousands of these instruments in our Connecticut plant. Current production incorporates several innovations covered by recent J-B-T patents.

- **ADVANTAGES** — At reference temperature of 77°F most models have guaranteed accuracy of 0.3% or better of the frequency being measured, but the tables that follow indicate that certain models may be ordered with accuracy of ±0.1%. Accuracy on interrupted DC may be somewhat less. High fatigue strength provides a safety factor for continuous operation. Temperature compensations are not required as frequency change per °F is only .0075%, negative. For example, a 50°F temperature rise causes a 60 cps reed to read only 0.2 cps lower than at reference temperature.

- **OPERATING PRINCIPLE** — The patented, simplified design used in the J-B-T meter operates on AC or interrupted DC. Each reed is adjusted to respond by resonance to the frequency shown on the dial. As the current excites the driving coil, the reed "in tune" with the frequency in the coil will respond by vibrating rapidly because of permanent magnet polarization and induced magnetism from the coil. The instrument is adapted to specified operating voltage by a series resistor. To determine frequency, simply read the reed.

- **RESPONSE PATTERNS** — Breadth of actuation differs with the increments of frequency between reeds. For example, at 60 cycles, half-cycle steps give the broad response shown below at left, whereas full cycle steps bring the sharp response at right. In general, the lower the frequency the greater the amplitude, the higher the frequency the less the amplitude. Thus a 25 cycle reed normally will have substantially greater amplitude than a 400 cycle or a 1000 cycle reed.



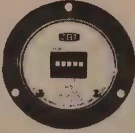
- **STABILITY** — All meters are permanently calibrated at the factory and do not require subsequent adjustment. J-B-T reeds have relatively high Q characteristics, an especially desirable factor in electronic circuits. Wave form or external fields do not ordinarily have an adverse effect. Built with no pivoted parts and with lock washers at every critical point, these rugged meters can take rougher treatment than many instruments.

- **TRUST THE METER** — If a meter plugged in on a 60-cycle AC power line does not indicate exactly 60 cycles, trust the meter. Power supply may momentarily be off-frequency due to changing load conditions. All J-B-T Frequency Meters are meticulously calibrated at the factory, entirely independent of frequency of power supply. Production and inspection equipment are checked regularly against National Bureau of Standards frequency signals.

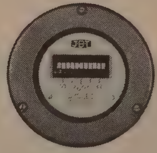
SEALED FREQUENCY METERS

MODEL 15-FHAC, 1½″; widely used as frequency standard for cathode follower circuit.

MODEL 21-FHXX, 2½″ 5 reeds, cased to match other 2½″ panel meters.



MODEL 34-FHXX-Z-11, ser. A, Accuracy, ±0.2%, 3½″, 11 reeds.



FHXX TYPE Sealed meters, glass-to-metal construction, with solder terminals and detachable flange, supersede the former FXH sealed meters. While JAN-I-6, MIL-M-6B, and MIL-M-10304B (Type MR36) do not refer specifically to frequency indicators, the FHXX series uses the front mounting dimensions of these specifications, and meets or exceeds the sealing requirements, and for 3½″ meters, electrical requirements, including 3000 volt breakdown. (1½″ and 2½″ meters meet 1000 volt breakdown.§) Electrical characteristics and accuracy are the same as for corresponding F models without the HXX designation. Sampling procedure includes a test in water where the absolute pressure of the air above the water is reduced to 2.5 inches of mercury (approx. 57,000 ft. altitude) and is maintained for one minute. Available in 3½″, 2½″ and 1½″ cases. For dimensions, see Table, Lines 1, 3 and 8. Standard voltage is 100-130.

§Model 15-FHAC meets 800 volt breakdown.

Some meters may have dials not exactly as shown

J-B-T INSTRUMENTS, INC.
NEW HAVEN, CONNECTICUT 06508

vibrating reed frequency meters

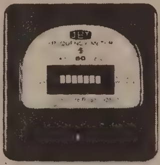
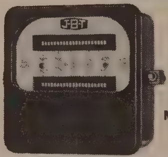
MODEL 34-FG for standard flush-type mounting. (match makers)

Same model with 13A-234 molded half-bezel.

MODEL 34-FB



MODEL 34-FS



MODEL 41-FX-42

RUGGEDIZED AND ILLUMINATED

Model with "RUG" — Sealed vibrating reed frequency meters and sealed elapsed time meters are available, when so ordered, to the intent of MIL-M-10304B, covering ruggedization of other kinds of meters, and usually are specified only for extra-severe shock and vibration.

LL Construction — Requirements for lighted meter dials have led to illuminating the 3½″ FHXX Series of sealed meters. Light from a source behind the panel is admitted through a sealed window built into the meter case. Inquiries are invited.

400 CYCLES, IN 1 CYCLE STEPS; 800 CYCLES

Among the variations which J-B-T produces on special order, are 21-reed, 390-410 cycles in 3½″ case; and 11-reed; 780-820 cycles with 4-cycle increments. Quotations on request.

FG SERIES FOR PICTURE WINDOW FRAME OPTIONAL

FG FREQUENCY METERS. The sparkling clear-plastic front and bright textured metal insert below the dial add zest to any panel. FG meters not only match the 3½″ wide x 3″ high front of the New EG elapsed time meters on the next page, but are interchangeable as to mounting with Triplett and other brands of panel meters. Standard voltage is 100-130 volts; accuracy and electrical characteristics equal corresponding FX frequency meters in the table on preceding page. For example, Model 30-FG differs from Model 30-FX only in the case. FG mounting details appear in line 9 of the Table of Dimensions below and in Prints SK-160 and SK-164. For picture window mounting diagram, use the half-bezel adapter. Listed below are typical 3½″ FG models and others are available. Groupings of 5 to 21 reeds and voltages of 28 to 230 are available on order.
Inquiries are invited on a 2½″ FG series.

30-FG, 48-52 and 58-62 cps, 10 reeds	**$40.75**
33-FG, 380-420 cps, 9 reeds	**49.25**
34-FG, (illus.) 56-64 cps, 9 reeds	**40.50**
13A-234 Half-bezel adapter, separate black **molded** frame and hardware for picture window appearance on any 3½″ FG or EG meter	**3.75**
13A-239 Half-bezel adapter, separate black **metal** frame particularly recommended for all 3½″ FG frequency meters and EG elapsed time meters; with hardware	**3.75**

NOTE ON METER VOLTAGE

J-B-T Vibrating Reed Frequency Meters of all sizes normally are made with two studs and are designed to be connected across one phase of a multi-phase line. The single phase voltage where the meter will be used thus becomes the voltage to be specified for the meter. Special meters with extra studs are made for the purpose of using at two or more voltages, not additional phases.

FB SERIES FREQUENCY METERS TO MATCH "BIG LOOK" PANEL METERS

SERIES FB METERS. Newest Match Makers, combine the GE "Big Look" case design with the time-tested accuracy of J-B-T vibrating reed frequency meters, at realistic prices. Typical 3½″ models for 100-130 volts follow and others are available. Line 11 in Table of Dimensions below gives mounting details. Groupings of 5 to 21 reeds and voltages of 28 to 230 are available on order. For further details: 60 cycle models, Drawing SK-182 (A); 400 cycle, Drawing SK-183 (A).

30-FB, 10 reeds, dual range, 48-52 and 58-62 cps	**$41.50**
33-FB, 9 reeds, 380-420 cps	**50.00**
34-FB, 9 reeds, 56-64 cps	**41.00**

3″ SQUARE-CASED FREQUENCY METERS

FS SERIES. Matching other 3″ x 3″ meters on a panel with square black molded cases, these meters are otherwise the same as the FX Series. For instance, 33-FS is the same as 33-FX except for the case. See Table of Dimensions, Line 10.

33-FS, 380-420 cps, 9 reeds, 3″ square molded case	**$48.50**
34-FS, 56-64 cps, 9 reeds, 3″ square molded case	**39.00**

PORTABLE FREQUENCY TESTERS

FP SERIES, METAL OR MOLDED CASE. Accuracy of ±0.3% meets the exacting test requirements of aviation, signal, and communication equipment. **M-Types** use anodized gray aluminum case, 6⅛″ long x 4″ wide x 3 3/32″ deep. Leads permanently attached. See Print SK-63-10. With pertinent name plate, **33-FP-9M** is known as **TS-328 A/U. L-Types,** sturdy molded case within top grain leather carrying case 6 3/32″ x 4¼″ x 2¾″; 4′ leads with 5″ test picks and banana plugs.

33-FP-9M, 380-420 cy., 9 reeds, 100-130 volts, 130 ohms per volt 1.0 watts power consumption; commercialy quality and packing	**$65.25**
34-FP-9M, 56-64 cy., 9 reeds, 100-130 volts, 140 ohms per volt, 0.9 watt power consumption; commercial quality and packing	**55.75**
33-FP-9L, 380-420 cy., 9 reeds, 100-130 volts	**62.50**
34-FP-9L, 56-64 cy., 9 reeds, 100-130 volts	**53.50**

42- AND 50-REED 400 CYCLE INDICATORS

MODEL 41-FX-42 and **41-FX-50.** Both are widely used in commercial and military testing especially in aviation-electronic trouble-shooting. Model 41-FX-42 (supersedes Model 41-FX) has two banks of 21 reeds: one for 300-500 cps in 10 cycle steps, and for vernier effect, one for 380-420 cps in 2 cycle steps. Model 41-FX-50 has two banks of 25 reeds giving a continuous covering from 355-600 cps in 5 cycle steps. Black molded case, flush front is 4 3/64″ x 4 3/64″ x 2 17/32″ deep behind panel over studs. Power consumption is .45 watts at 30 volts, 2.7 watts at 115 volts, and 5.0 watts at 200 volts. For 41-FX-42, see Print MD-38-11; for 41-FX-50, Print SK-79.

41-FX-42, 100-130 volts only	**$163.50**
41-FX-42, 3 voltages: 200-240; 115; and 30; 4 studs (without switch)	**183.75**
41-FX-50, 3 voltages: 200-240; 115; and 30: 4 studs (without switch)	**236.00**

J-B-T INSTRUMENTS, INC.
NEW HAVEN, CONNECTICUT 06508

elapsed time meters

USES AND ADVANTAGES OF ELAPSED (OR RUNNING) TIME METERS

To record operating time of AC electrical and electronic equipment, these self-starting synchronous instruments normally register in 1/10th hour steps to 9,999.9 or 99,999.9 hours, then automatically reset. They are widely used for tube life, TV equipment, punch presses, conveyors, oil burners, ground support equipment, maintenance schedules, etc. J-B-T engineers recommend the AC type of elapsed time meter for superior accuracy, especially where voltage or ambient temperature vary widely.

EG SERIES FOR HIGH VISIBILITY; MODERN PICTURE WINDOW OPTIONAL

EG ELAPSED TIME METERS. These are designed to give a bright, jewel-like look to panels when used alone, in multiples, or in conjunction with other instruments such as the matching FG series of frequency meters. A gleaming textured metal shroud below the dial and a clear-plastic case front 3½″ wide x 3″ high give high visibility to the numeral read out. Dimensions are same as line 9 for FG meters on opposite page. For optional picture window frame effect, on panel area 3.83″ wide x 2.27″ high, add preferred 13A-239 metal, or 13A-234 molded half-bezel adapter. The quiet, sturdy motors and extensively field-tested mechanisms of other J-B-T elapsed time meters are used in the EG series. Two models are catalogued. Other voltages, frequencies, numerals and 2½″ EG Series will be quoted.

31-EGW-5, (illustrated) 5 wide digits, 0-9,999.9 hours, 60 cps, 110-125 volts **$27.00**

31-EGW, 6 wide digits, 0-99,999.9 hours, 60 cps, 110-125 volts **27.50**

13A-239 and 13A-234, half-bezel adapters, see opposite page.

BASIC 3½″ ELAPSED TIME METERS — 5-DIGIT WIDE NUMERAL ELAPSED TIME METERS

MODEL 31-EXW-5. Newest in the J-B-T line of elapsed time meters is Model 31-EXW-5 with 5 wide, easy to read numerals. This model is particularly recommended for **new** equipment because, with superior visibility, rugged construction and attractive price, it is expected to supplant the 31-EX. The meter registers to 9,999.9 hours and automatically resets. Tenths are shown in red on white, units in white on black. Model 31-EXW-5 is interchangeable electrically and mechanically with both 31-EX (below) and 31-EXW shown below. Mounting, which is the same as type MR-34 or MR-35 to MIL-M-6B, also JAN-I-6, and terminal location are per print SK-125 Rev. E.

31-EXW-5, 5 digits, 0-9,999.9 hours, 60 cy., 110-125 volts **$21.75**

MODEL 31-EX. This instrument has been the most widely used of any J-B-T elapsed time meters and continues to be available where parts lists of production runs call for style of numeral and dial appearance, as illustrated. The black molded case, which mounts according to Print SK-80 Rev. F, is interchangeable with the wide-numeral meters, 5-digit 31-EXW-5 and 6-digit 31-EXW.

31-EX, 5 digits, 0-9,999.9 hours, 60 cy., 110-125 volts **$22.75**

31-EX-200, same except 200-240 volts (not regularly stocked) **31.50**

ELAPSED TIME METERS — TENTHS OF MINUTES

MODEL 31-EXM, 60-cycles, 110-125 volts, reading 0-9,999.9 minutes; for short-run applications or reading at closer intervals than 31-EX. Tenths of minutes in red on white, minutes in white on black numerals otherwise identical with 31-EX.

31-EXM **$28.75**

6-DIGIT WIDE-NUMERAL ELAPSED TIME METERS

MODEL 31-EXW. One of the most easily-read and most versatile of J-B-T elapsed time meters is Model 31-EXW, illustrated. Easy-to-read, wide numerals register to 99,999.9 hours then automatically reset. Distinctive contemporary dial shows tenths in red on white and units in white on black. This model is interchangeable, electrically and mechanically with Models 31-EXW-5 and 31-EX. The black molded case is also interchangeable with all 3½″ FX types of frequency meter. Print SK-125 Rev. E gives mounting information.

31-EXW, 6-digits, 0-99,999.9 hours, 60 cy., 110-125 volts **$23.25**

3″ SQUARE-CASED ELAPSED TIME METERS

MODEL 31-ES. The square black molded case matches the appearance of other 3″ x 3″ panel meters including FS series of frequency meters described on the preceding page. Unlike line 10 of the table shown there, depth behind panel (b) is 2²¹⁄₃₂″, and terminals are located on horizontal center line, each spaced ½″ from center (G). Variations can be made for 99,999 hours (suffix U), 230 volts, matte finish or 50 cycles. Now supplied with tenths in red on white, and units in white on black.

31-ES, 60 cy., 110-125 volts, 0-9,999.9 hours **$23.75**

Spectrum Analyzer P9040A
3 0 0
KAY
HORIZONTAL

KAY's new spectrum analyzer

- 1-300 MHz
- Phase Locked
- 72 db Dynamic Range
- 1 KHz Resolution
- Compact Plug-In
- Low Cost: Only $2390

Originally designed to fill the need for a VHF spectrum analyzer for CATV measurements, this new analyzer is receiving wide acceptance to fill the need for a high performance low cost analyzer for spectrum analysis in the HF VHF frequency range.

The 9040 spectrum analyzer is available self contained in the 9014 power supply with X and Y outputs for independent use with any storage oscilloscope. At $2585.

The unit is also a compatible plug-in for the Tektronix 5103N and 5403 series of oscilloscopes and the Kay 9000AS split screen storage main frame. In addition to the spectrum analyzer plug-in, the Kay 9001AS Test Set main frame is compatible with a series of plug-ins including wideband sweep oscillators, gain loss/return loss measurement devices and the summation sweep receiver widely used in CATV system testing.

The 9040 features phase locked operation with 1 KHz resolution in the 1-300 MHz frequency range. The 72 db dynamic range with sensitivity to −50 dbmv's 75 ohm, −100 dbm 50 ohm is displayed in either 10 db/div or 2 db/div. Scan width is variable from 3 KHz per division to 30 MHz per division with excellent linearity. Scan speed is variable from 40 sec. per scan to 60 Hz in addition to a one shot sweep for use with XY plotters.

I.F. filters at 1 KHz, 30 KHz and 1 MHz are manually selected or automatically selected in the Auto Mode to reduce scan loss error. The unit also features built in frequency markers for calibration of both amplitude and frequency with cal adjustments readily accessible on front panel. A precision 0-70 db rotary attenuator provides attenuation in 10 db steps with 1% accuracy to 300 MHz. Spurious responses are greater than 72 db down.

AIRCRAFT INDICATORS

KRATOS' aircraft instruments incorporate a superior, frictionless, tautband movement characterized by extreme ruggedness, high accuracy, excellent damping, and an insensitivity to wide temperature excursions. Many dial presentations, unlit, spraylit, and transilluminated are available as off-the-shelf designs in all standard aircraft packages. Will display any parameter that can be converted to voltage, current, or resistance. Key areas of application in cockpit instrumentation are secondary (electrical parameters) and engine instrumentation.

Features include: Standardized, 1% taut-band movements; Linear scales; no parallax; interchangeable platforms and scales; integral or separate transducers. DC voltage and current are measured directly, while AC voltage and current, watts, vars, power factor, and frequency inputs are converted to DC by transducers. Transducers also permit the display of physical parameters such as pressure, temperature, rpm, etc. Expanded scales are available for increased accuracy. All meters and synchroscopes are manufactured in accordance with USA St. C39.1-1964, and are approved by most major utilities.

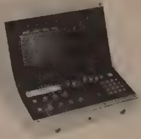
moxon INSTRUMENTATION

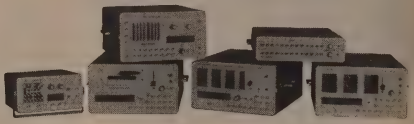
DATA GENERATORS WORLD'S LARGEST DIGITAL DATA GENERATOR SELECTION

These precision, compact instruments utilize exclusive patented linear programming to provide the equivalent of up to 960 toggle switches . . . in a portable bench-top housing. All units have both serial and parallel outputs with data rates in excess of 10 MHz.

The newest member of this unique family of generators incorporates a keyboard to program a self-contained CRT. The data pattern is visually presented as a waveform representing a "1" as a high level and a "0" as a low level. Sixteen lines of 64 bits each are displayed to aid the operator in formulating the data program. Once a satisfactory pattern has been established, the data is transferred to the transmit memory and sent to the device under test at rates up to 15 MHz in Serial or 10 MHz in Parallel.

A separate memory is then used to store the response of the device under test and this data can then be displayed by the CRT. This unique capability of displaying both the generate and receive data patterns sets the Model 777 apart from all other units available.





VIDEO CHARACTER GENERATORS

These Video Character Generators produce 16 lines of 32 characters each in black or white for commercial broadcast or closed circuit TV applications.

Character messages may first be generated and displayed in a preview position prior to insertion into a program. Messages may be viewed as a full page, or a line-at-a-time using a roll-down feature that displays individual lines at selected locations on the screen. Characters are easy-to-read 7 x 8 dot matrix, in place of conventional 5 x 7.

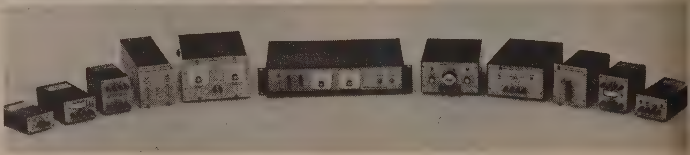
The Model 72 consists of a generator and integrated keyboard, while the Model 71 provides a separate standard 64 character ASCII keyboard which may be operated at remote locations up to 20 feet distant. Up to 4 generators may be operated from one keyboard.

Generators also include a character insert/delete capability, as well as offering a memory and computer interface option.

The rack or desk mounted units are supplied with all connectors required for connection to composite sync and video inputs and providing program, preview and sync outputs.

POWER SUPPLIES FINEST ISOLATED POWER SUPPLIES AVAILABLE IN WIDE RANGE OF OUTPUTS

To insure testing results that are precise, try one of the Mitey Mite Series Power Supplies that essentially eliminate noise, ripple and spikes . . . power supplies that provide battery quality DC . . . 0 to 50 volts with current to 5 amps. DC isolation: 10,000 megohms, AC isolation: less than 0.1 pF and ripple typically below 20 microvolts peak-to-peak.



TIMING PRODUCTS NEW TIMING PRODUCTS ADVANCE STATE-OF-ART TECHNOLOGY

MODEL 514 TIME CODE GENERATOR — Supplies all popular codes. Serial or parallel output, BCD or binary.

MODEL 520 TIME CODE TRANSLATOR — Accepts all standard and many unique time codes. Standard decoded outputs. Serial, parallel and pulse rates.

MODEL 524 TAPE SEARCH AND CONTROL UNIT — Operates with Models 520 or 540 to interface with any standard instrumentation tape recorder and provide output for search and playback.

MODEL 540 TIME CODE TRANSLATOR/GENERATOR — Provides simultaneous translation and generation within the same chassis. NEW REMOTE DISPLAY AND TIMING TERMINAL UNIT ALSO AVAILABLE. COMPUTER INTERFACES FOR ALL ABOVE UNITS AVAILABLE.

VARIABLE RELUCTANCE TRANSDUCERS

Since pioneering variable reluctance transducers in 1938, Moxon has paced the industry with new transducer types and systems. Today's precision sensor types include Rotary Position, Linear Position, Velocity and Torque.

One of the newest DC-DC Linear Transducers is an LVDT type which provides high accuracy using self-contained electronics.

Also available is a new series of Torque Transducers offering 5 to 200,000 inch pound readout in both directions at speeds of 25,000 RPM. (Refer to Transducers section in EEM or contact the factory.)

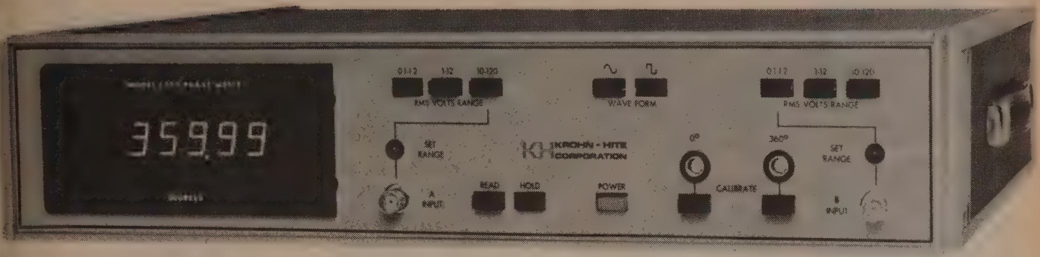
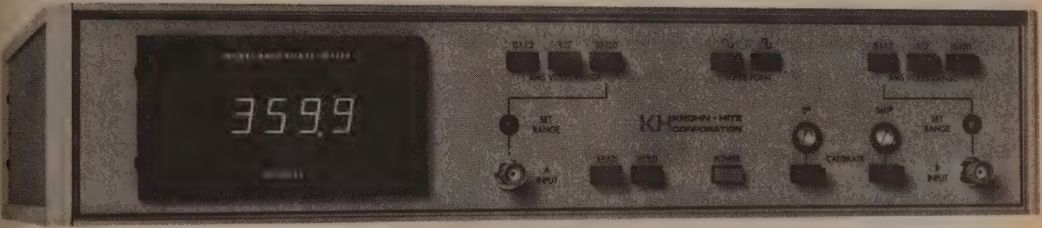
Phasemeters



MODEL 6500
Accuracy: 0.05°
Resolution: 0.01°
Frequency Range: 10Hz to 5MHz
Display: 5 digit Planar gas discharge
Input Voltage Range: 0.1-120 volts RMS
Accepts sine, triangle, square and positive pulse waveforms



MODEL 6400
Accuracy: 0.1°
Resolution: 0.1°
Frequency Range: 10Hz to 5MHz
Display: 4 digit Planar gas discharge
Input Voltage Range: 0.1-120 volts RMS
Accepts sine, triangle, square and positive pulse waveforms

Model	Phase Accuracy	Frequency Range	Resolution	Input Waveforms	Input Voltage Range	Display	Price
6500	0.05°	10Hz to 5MHz	0.01°	∿ ⊓ ∿ ⎍	0.1V-120V RMS	5 digit	$1995
6400	0.1°	10Hz to 5MHz	0.1°	∿ ⊓ ∿ ⎍	0.1V-120V RMS	4 digit	$1400

For Rack Mounting, Order Part No. PMR-6; Price $25.00.

The Larson Space Saver Model is designed to provide the maximum scale length (2.5") in the minimum panel space (4.9 sq. in.).

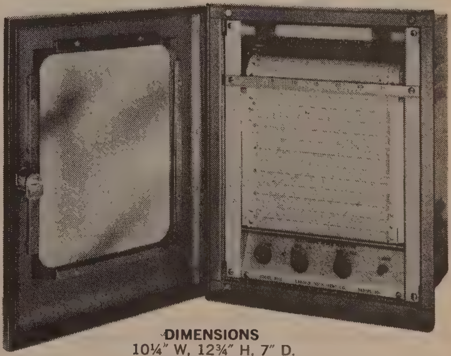
Available in either a horizontal or vertical mount version, it can monitor and control a wide range of d.c. or a.c. values. See typical specifications on facing page.

Inkless Event Recorder

The Larson Model ROS instrument will continuously record the time, sequence and duration of as many as 30 different events on one chart. The record is made on electro-sensitive paper, by a stylus which marks only when current flows through the paper. The recording is instantaneous, accurate and permanent.

RESPONSE and RESOLUTION. The recorder can remain on stand-by for an unlimited length of time, yet be ready to respond within 1 millisecond when a signal is applied. The instrument will record up to 60 pulses per second for each stylus. Response time of the styli is 1 millisecond.

CHART SPEEDS. ½" per hour to 10" per second. Standard speeds are ½", 1", 2", 3", 4", 6", 8" and 10" per hour, minute or second.



DIMENSIONS
10¼" W, 12¾" H, 7" D.
WEIGHT 20 Lbs.

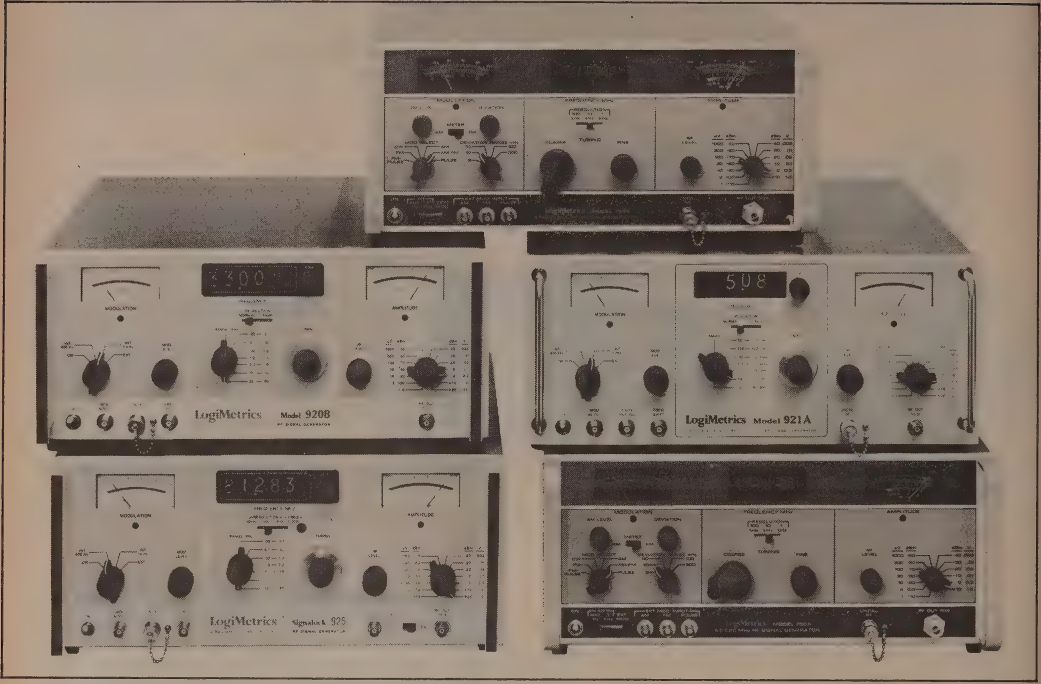
LogiMetrics RF SIGNAL GENERATORS



LogiMetrics provides the industry's most complete line of solid state signal generators, all of which are equipped with digital frequency readout. The signal generators cover the range of 50 kHz to 520 MHz with integral counters and leveled outputs. A precision attenuator allows the power to be varied from +23 dBm (3 V RMS) to –127 dBm (0.1 μV RMS) into 50 ohms.

The generators inherent stability and ease of calibration allow users to perform RF measurements with superior convenience and accuracy and at the best cost effectiveness.

Model 315 combines two models 925 for single sideband test.

Among the many features offered in the line is Signalock® *, the capability to count external signals and full modulation. Solid state design, self calibration and plug-in circuit cards insure ease of maintenance and long equipment life.

LogiMetrics signal generators are available with Federal Stock Nomenclature and under G.S.A. contract.

* LogiMetrics holds the original patents on the digital readout signal generator and Signalock®, the circuit that is the key to stabilized signal generators. These patents are licensed to other major companies.

Model	Frequency Range MHz	Accuracy	Digits Display	Features
925	.05 to 80	±10 Hz	6	AM, Signalock®
920B	.05 to 80	±500 Hz	5	AM, High Accuracy
921A	.05 to 80	0.01%	3 (+ x 100)	AM, Low Cost
750A	4.5 to 520	±0.0001%	5	FM/AM Pulse
950A	1.5 to 80	±500 Hz	5	FM/AM Com. Test
315	.25 to 80	±10 Hz	6	Two Tone S.S.B. Test

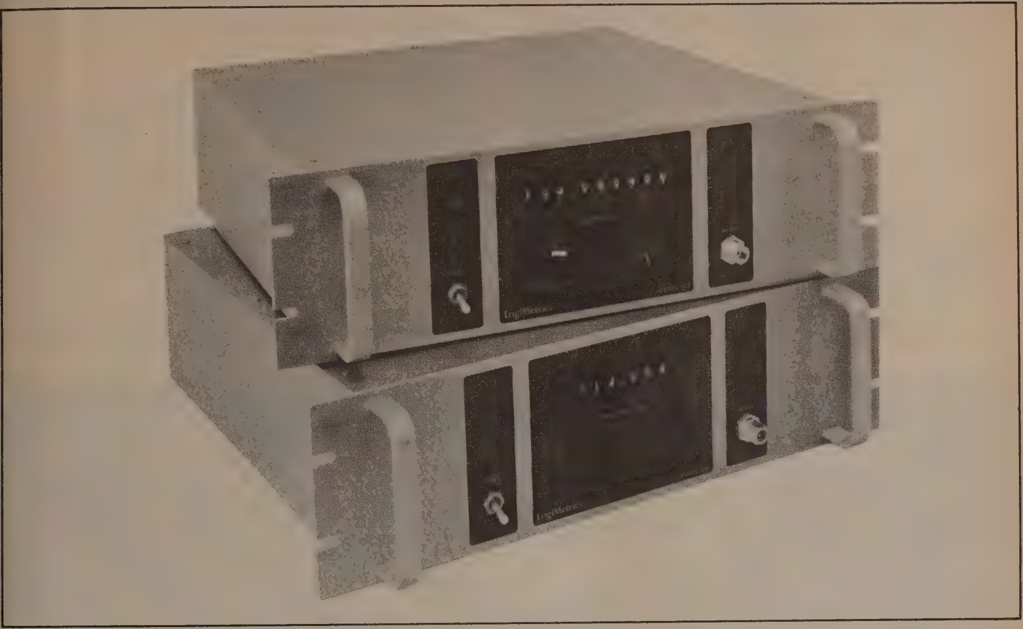
LogiMetrics FREQUENCY SYNTHESIZERS



LogiMetrics offers the first series of frequency synthesizers specifically designed for systems applications in satellite communications, frequency-agile radar, ECM, programmable local oscillators for surveillance receivers and microwave common-carrier systems. In these and similar applications, a relatively small slice of frequency is needed and that is what these remarkable synthesizers provide.

Their custom design obviates the need for expensive wide band, laboratory-style synthesizers. In addition, the synthesizer can offer much better performance characteristics in such critical areas as phase noise, spurious outputs, and cost.

LogiMetrics' standard synthesizers feature a choice of front panel digital thumbwheel switches or remote programming for frequency selection. They operate with an external frequency standard. Three optional internal standards are also available. The fixed outputs are leveled at +13 dBm ±1 dBm. Switching time is a maximum of 800 microseconds, using an external 5 MHz standard. Residual amplitude modulation is 94 dB.

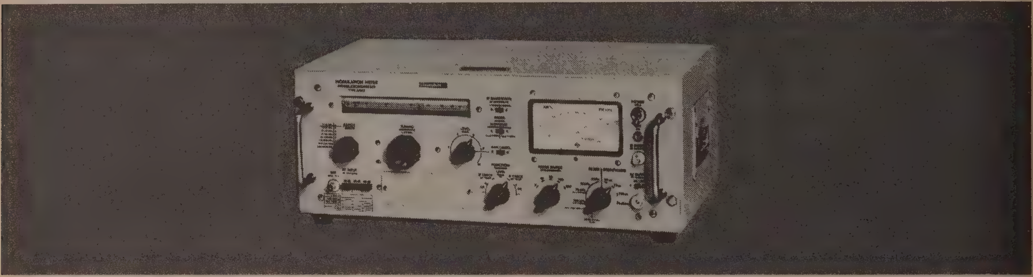
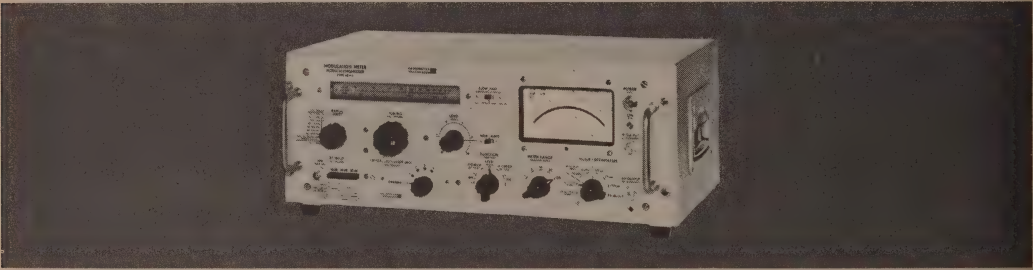
AFM2 MODULATION METER

The AFM2 Modulation Meter meets an increasing demand for sophisticated and critical modulation measurements on AM, FM or FM stereo generators and transmitters. It has all the important features (including low noise and distortion, and a linear wide-band detector) required to cover the broadest possible range of applications, both in the laboratory and on the transmitter site. The AFM2 has been accepted as a standard instrument by all leading European Broadcasting Authorities.

ABRIDGED SPECIFICATION

Frequency range:	5-1000 MHz
Sensitivity:	3 mV
Meter (f.s.d.):	AM: 3% to 100% FM: ±3 kHz to ±300 kHz
Accuracy:	2% of reading +1% of f.s.d.
IF:	2 MHz
Two IF bandwidths:	±25 kHz and ±400 kHz
Four deemphasis networks:	50, 75, 750 μsec and 6 dB/oct (ref. 1 kHz)
Four low-pass filters:	3, 15, 75 and 200 kHz
Band-pass filter:	50 Hz to 15 kHz
Distortion:	FM: < 0.1% at ±75 kHz; AM: 0.2% at 30% mod.
AM residual:	< 0.03% up to 200 MHz < 0.3% up to 1000 MHz
FM residual:	< 25 Hz up to 250 MHz < 100 Hz up to 1000 MHz
Dimensions/Weight:	W=485mm (7¾") D=245mm (9⅝") H=197mm (7¾")/13 Kg (28.6 lbs.)
Optional accessory:	Crystal-controlled plug-in oscillator with a choice of four frequencies within the range 67-1000 MHz.





AFM3 MODULATION METER

The AFM3 Modulation Meter is intended for accurate measurements of AM or narrow-band FM on VHF/UHF mobile equipment transmitters, both in the laboratory and in production and service departments. It may also be used as an AM/FM station monitor.

ABRIDGED SPECIFICATION

Frequency range:	6-1000 MHz
High sensitivity:	3 mV
Meter (f.s.d.):	AM: 1% to 100% FM: ±1 kHz to ±100 kHz
Accuracy:	2% of reading +1% of f.s.d.
IF:	1 MHz
IF bandwidth:	±300 kHz
Four deemphasis networks:	50, 75, 750 μsec and 6 dB/oct (ref. 1 kHz)
Two low-pass filters:	3 kHz and 15 kHz
Two band-pass filters:	50 Hz to 15 kHz and 300 Hz to 3 kHz (3 dB points)
Distortion:	FM: < 0.2% at ±15 kHz; AM: 0.2% at 30% mod.
AM residual: (with filter 0.3-3 kHz)	< 0.015% up to 200 MHz < 0.05% up to 500 MHz < 0.15% up to 1000 MHz
FM residual: (with filter 0.3-3 kHz)	< 8 Hz up to 200 MHz < 15 Hz up to 500 MHz < 30 Hz up to 1000 MHz
Dimensions/Weight:	W=485mm (7¾") D=245mm (9⅝") H=197mm (7¾")/13 Kg (28.6 lbs.)
Optional accessory:	Crystal-controlled plug-in oscillator with a choice of four frequencies within the range 67-1000 MHz.

THE LONDON COMPANY

test equipment FROM RADIOMETER COPENHAGEN

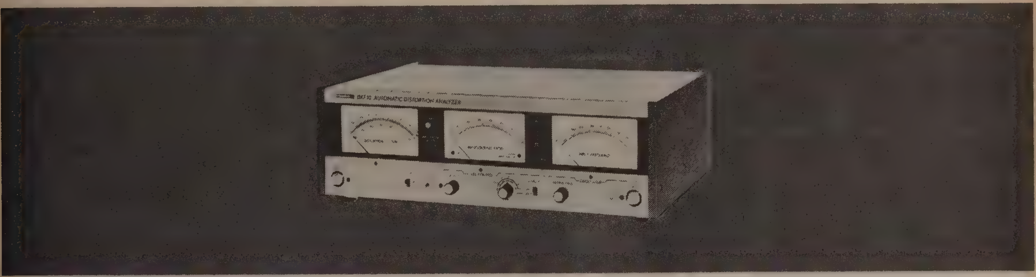
BKF10 AUTOMATIC DISTORTION ANALYZER

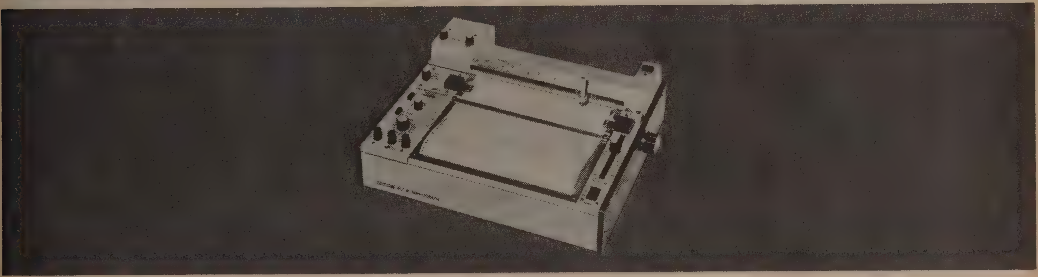
The BKF10 Automatic Distortion Analyzer is an outstanding and advanced instrument for sweep-frequency measurements of all the important parameters of Hi-Fi amplifiers, tape recorders, etc. It is a complete system in itself and incorporates the following features:

- Fully automatic distortion measurements—no balancing, etc.
- Built-in AF sweep oscillator with very low distortion.
- Automatic recordings of distortion and amplitude response—separately or simultaneously.
- Automatic recordings of distortion as a function of output power.
- Three precision meters indicate: Distortion and S/N ratio, Input/Output ratio and Input Frequency.
- Constant input level or constant output level capabilities.
- Facilities for incorporation in automatic test systems.

ABRIDGED SPECIFICATION

Fundamental Freq. range:	20 Hz to 20 kHz
Harmonic Freq. range:	10 Hz to 150 kHz
Distortion range:	0.02% to 10%
Input voltage limits:	10 mV to 30 V RMS
Min. sweep time (20 Hz-20 kHz):	Approx. 1 min.
S/N ratio range:	−80 dB to −20 dB
HP-LP filter cut-off freq.:	250 Hz
Input/output ratio range:	−50 dB to +90 dB
Input Freq. meter range:	20 Hz to 20 kHz
Sweep oscillator range:	20 Hz to 20 kHz, Int. and ext. sweep facilities
Osc. output voltage limits:	1 mV to 1 V rms
Recorder outputs: (dc analogue voltage)	For Distortion, Input/Output ratio Input Frequency and Output Frequency
Control inputs: (dc analogue voltage)	For external control of Frequency and Osc. amplitude output
Dimensions/Weight:	W=440mm ($17\frac{5}{16}$") D=344mm ($13\frac{9}{16}$") H=144mm ($5\frac{11}{16}$")/9.5 Kg (21 lbs.)





REC61 SERVOGRAPH

The REC61 Servograph is a general-purpose, high-sensitivity, dc analogue recorder built up on a modular system which can be used in conjunction with almost any form of instrumentation found in physical and electronic laboratories.

A special version, REC61S2, is available for convenient recording of distortion and amplitude response curves in connection with the BKF10 Automatic Distortion Analyzer.

ABRIDGED SPECIFICATION

Chart feed (time axis):	1 sec/cm to 2 h/cm, reversible
Charts:	250mm rolls (22m) and sheets to DIN 16230
Sensitivity:	4 μV/cm to 500 mV/cm dc, dependent on type of input module used
Input modules:	Plug-in, high input resistance (1-10 MΩ), floating inputs providing sensitivities of: 500 mV f.s.d. (REA110), 10 mV and 100 mV f.s.d. (REA111) and 100 μV to 12.5 V f.s.d. (REA112)
Recording system:	Potentiometric slide-wire, servo-driven pen
Response time:	0.6 s for 99% of f.s.d.
Resettability:	0.05% of pen deflection
Accuracy:	0.1% of pen deflection
Pens:	Expendable fibre pens
Mounting:	Horizontal or vertical, fits 19" rack
Dimensions/Weight:	W=440mm (17.3") D=355mm (13.9") H=130mm (5.1")/10 Kg (22 lbs.)
Optional accessories:	Event Marker and Tracking Potentiometer with remote control facilities

SMG1 STEREO GENERATOR

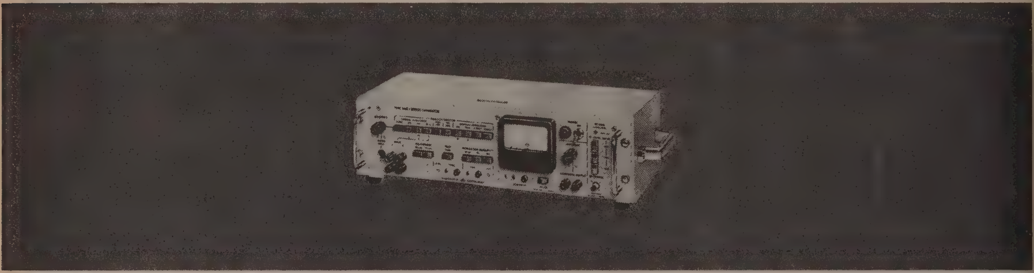
The SMG1 Stereo Generator complies with the standards for stereophonic broadcasting approved by the FCC and EBU. It provides an RF signal of 100 MHz, FM-stereo-modulated, for the testing of FM stereo receivers. In addition, an AF composite signal is available for the testing of multiplex decoders. The SMG1 includes a built-in oscillator for FM stereo modulation and a pilot signal, and is thus a self-contained instrument for use in the laboratory and in production and service departments.

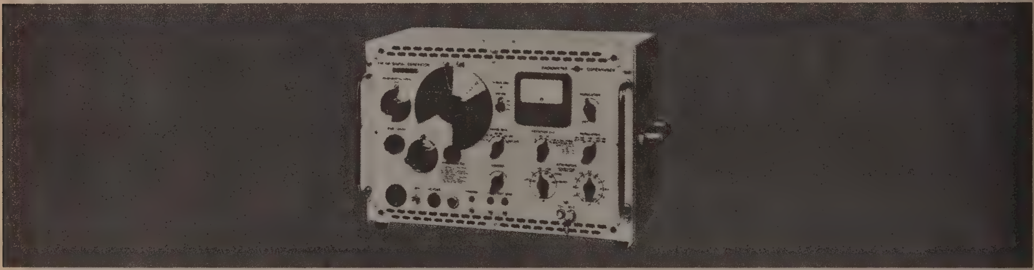
ABRIDGED SPECIFICATION

Operating modes:

1) Stereo modulation of either the R or L channel individually or both simultaneously.
2) Mono or stereo sub-channel output.
3) Stereo modulation with stereo material from records or tapes for listening tests.
4) SCA modulation with FM sub-carrier.

External modulation source:	L and R input: 40 Hz to 15 kHz, 250 mV AUDIO input (records and tapes): 40 Hz to 15kHz, 0.25 V to 10 V. SCA input: 10 to 75 kHz, 250 mV.
Internal modulation source:	80 Hz, 1 kHz and 5 kHz Alternative model available with 10 kHz instead of 5 kHz
Pre-emphasis:	50 μs and 75 μs
AF composite output:	0-7 V peak. Distortion < 0.2% L/R separation < 40 dB M/S separation < 45 dB Pilot signal: 19 kHz, variable 0-15% mod.
RF output:	100 MHz, variable ±0.5 MHz 10 μV to 100 mV in 20 dB steps FM ±75 kHz peak deviation for 100% modulation on meter Output impedance: 75 Ω Distortion, < 0.2% at ±75 kHz, deviation, typically 0.1%
Meter:	Scaled: 0-100% peak value and 0-15% for pilot signal
Dimensions/Weight:	W=565mm (22½″) D=235mm (9¼″) H=160mm (6¼″)/9.1 Kg (20 lbs.)





MS27 FM-AM SIGNAL GENERATOR

The MS27 FM-AM Signal Generator is a general-purpose, line-operated instrument for use in the laboratory and in production and service departments. It covers 0.3 to 240 MHz with an output of 0.1 μV to 0.1 V into 50 Ω and 75 Ω. Variable FM deviation and AM. Internal/External FM-AM facilities. Accepts external modulation up to 60 kHz for stereophonic modulation. Rugged mechanical construction.

ABRIDGED SPECIFICATION

Frequency coverage:	0.3 MHz to 240 MHz in 5 ranges
Calibration:	500 kHz crystal calibrator
Frequency stability:	Typical 10 ppm/10 min. after 1 hour warm-up
Incremental tuning:	±50 kHz (2 kHz divisions)
Carrier output:	0.1 μV to 0.1 V into matched load in 2 db steps
Output impedance:	50 Ω and 75 Ω, BNC connector
Stray radiation:	Negligible
FM:	0 to ±75 kHz full-scale deviation, up to ±600 kHz dev. in the higher frequency ranges. Distortion: < 1% at ±75 kHz dev.
Residual FM:	Typical: 0.5 ppm
AM:	0 to 80%. Distortion: < 5% at 50% AM
Internal mod.:	1 kHz. Distortion: < 0.5%. Output: approx. 15 V (3 kΩ source)
External mod.:	Approx. 3 V into 200 kΩ. 10 Hz to 60 kHz
Dimensions/Weight:	W=565mm (22¼″) D=275mm (10¾″) H=350mm (13¾″)/23 Kg (51 lbs.)

CLTI COMPONENT LINEARITY TEST EQUIPMENT

METHOD

The CLT1 Component Linearity Test Equipment is based on a principle first developed by L. M. Ericsson in Sweden for the measurement of the non-linearity of nominally linear electronic components, such as resistors, capacitors, etc., this non-linearity being taken as a measure of the components' reliability. The method is non-destructive and therefore lends itself to both quality and production control. The criterion for classifying a component as less reliable is that its non-linearity is higher than the average non-linearity of the batch on test. The rejectable components enable the manufacturer to study the cause of the rejection and will thus lead to more reliable components.

In the CLT1, the non-linearity is determined by the measurement of the 3rd harmonic (30 kHz) of a pure 10 kHz current which is fed to the component, the non-linearity being defined as the ratio of the value of the 3rd harmonic voltage to that of the fundamental frequency voltage expressed in dB.

ABRIDGED SPECIFICATION

Component range:	< 1 Ω to > 100 MΩ in 5 ranges
Max. power delivered:	1 VA at 10 kHz
Max. voltage delivered:	550 V
Voltmeters:	For 10 kHz: 0.01 to 1000 V in 5 ranges For 30 kHz: linear indication: 0.1 μV to 1 V in 5 ranges logarithmic indication: 20-160 dB in 5 ranges
Total accuracy of measurement:	1-1.2 dB
Residual non-linearity:	−140 dB to −160 dB depending on range
Component measuring speed:	Up to 10 components/sec.
Recorder output:	1 V dc for f.s.d. on both linear and log. scales.
Dimensions/Weight:	W=500mm (19¾") D=310mm (12¼") H=630mm (25")/40 Kg (88 lbs.)
Optional accessories:	Low impedance matching transformer. 900-231

Provision for remote switching and remote control of the 10 kHz voltage, and a recorder output for the registration of the 3rd harmonic voltage, whether set to the linear or to the logarithmic meter indication.

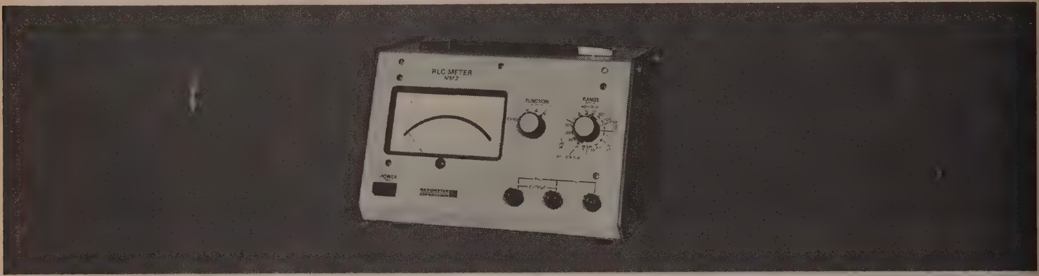
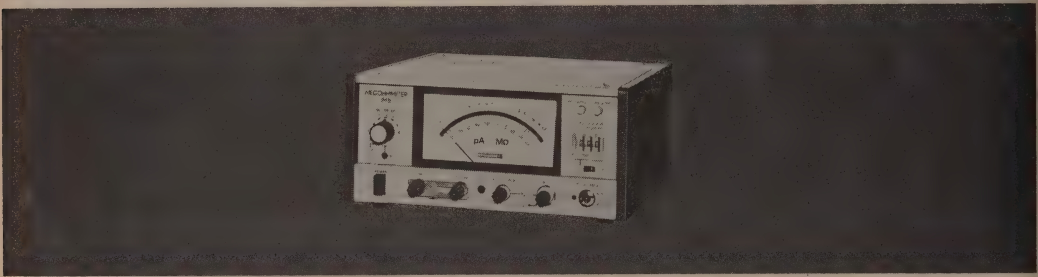
MM2 RLC METER

The MM2 RLC Meter is a direct reading, wide-range component tester for use in the laboratory and in production and service departments. It measures from 3 Ω to 1 MΩ in 12 ranges and from 3 μH to 100 H and 3 pF to 1000 μF in 16 ranges each. It is extremely easy and quick to use, and requires no balancing.

ABRIDGED SPECIFICATION

Resistance range:	3 Ω to 1 MΩ f.s.d. in 12 ranges
Inductance range:	3 μH to 100 H f.s.d. in 16 ranges
Capacitance range:	3 pF to 100 μF f.s.d. in 16 ranges. 100 μF to 5000 μF in one reciprocal range
Accuracy:	2% of reading +1% of f.s.d. (3 pF to 100 μF)
Test frequencies:	R: 160 Hz L and C: 160 Hz to 1.6 MHz dependent on range
Test voltage:	R and L: 10 mV at f.s.d. C: 10 mV to 316 mV at f.s.d. dependent on range
DC bias:	Up to ±60 V dc
Recorder output:	−1 V dc at f.s.d.
Dimensions/Weight:	W=250mm (10″) D=190mm (7¾″) H=165mm (6½″)/3.2 Kg (7 lbs.)
Optional accessories:	807-200 Component Clips IM501 Component Adapter





IM6 MEGOHMMETER

The IM6 Megohmmeter is a line-operated instrument for use in the laboratory and in quality control, production and service departments. It is an extremely advanced instrument with a low response time covering the range from 1 MΩ to 10^9 MΩ in 1 range of 9 decades or in 8 ranges of 2 decades. Resistance measurements are made with a highly stable test voltage which is variable in 1 V steps from 1 V to 999 V. It also measures dc current from 1 pA to 1 mA. Finally, the IM6 is provided with remote control facilities and a recorder output.

ABRIDGED SPECIFICATION

Resistance range:	1-10^9 MΩ
Test voltage:	1-999 V, variable in 1 V steps, internal or external control
Stability of test voltage:	Better than 10^{-7} for 10% line voltage variation
Current range:	1 pA to 1 mA
Accuracy:	5% of the indicated value (resistance or current)
Recorder output:	Resistance: −0.5 V/decade Current: 0.5 V/decade Source resistance 10 kΩ
Response time:	< 1 s to max. 3 s for resistance < 3 s for capacitance up to 1 μF
Dimensions/Weight:	W=300mm (12″) D=330mm (13¼″) H=140mm (5½″)/4.5 Kg (9 lbs.)
Optional accessories:	807-200 Component Clips LMS 1 Limit Sensor

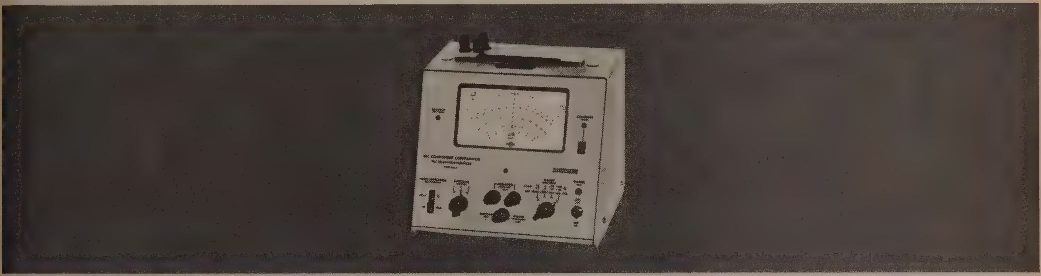
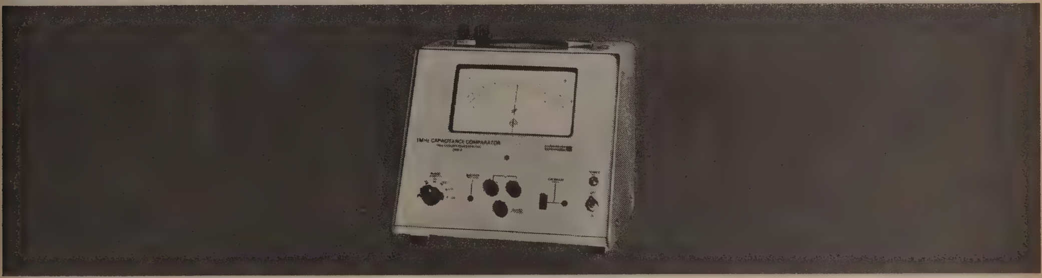
TRB11 COMPONENT COMPARATOR

The TRB11 RLC Component Comparator is a line-operated instrument intended for rapid comparison measurements of R, L and C in production control and incoming inspection. Direct percentage or radian deviation from a comparison standard. When used in conjunction with a limit sensor, it can be made to operate sorting machines in the selection of components.

ABRIDGED SPECIFICATION

Resistance range:	10 Ω to 10 MΩ
Capacitance range:	20 pF to 20 μF
Inductance range:	1 mH to 10 H
Test frequency:	1 kHz, 250 mV
Accuracy:	R, L, C and θ: 3% of f.s.d.
Meter:	Center zero, calibrated in ±% deviation from 1.5% to 100% f.s.d. for R, L and C, and 0.015 to 0.6 radians f.s.d. for phase angle
DC polarization of components on test:	−50 V dc to +20 V dc
Limit sensor/ recorder output:	±125 mV for f.s.d.
Dimensions/Weight:	W=280mm (11⅛") D=237mm (9⅜") H=235mm (9⅜")/6.2 Kg (13.7 lbs.)
Optional accessories:	807-200 Component Clips LMS1 Limit Sensor IM501 Component Adapter





CMB12 CAPACITANCE COMPARATOR

The CMB12 Capacitance Comparator is a line-operated instrument intended for rapid comparison measurements in production control and incoming inspection. It operates at 1 MHz in accordance with I.E.C. and MIL recommendations, and can be used for both direct and comparison measurements. When used in conjunction with a limit sensor, the CMB12 can be made to operate sorting machines in the selection of components.

ABRIDGED SPECIFICATION

Capacitance range:	1-1000 pF f.s.d.
Accuracy:	1% of reading +1% of f.s.d.
Meter:	Center zero with ±3 and ±10 pF scales
Test signal:	1 MHz, 100 mV
DC polarization:	±60 V dc
Guard terminals:	Up to 500 pF without affecting accuracy
Dimensions/Weight:	W=280mm (11⅛") D=237mm (9⅜") H=235mm (9⅜")/7 Kg (15 lbs.)
Optional accessories:	807-200 Component Clips LMS1 Limit Sensor IM501 Component Adapter

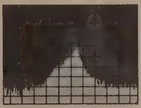
>
> *Quoted From Cover Story Electronic Design April 12, 1974*

Here's Why The.....
H. F. SPECTRUM ANALYZER MODEL 2370
Is Unique.....

Digital Storage of Spectral Information

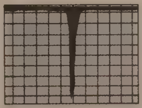
A most interesting innovation in this equipment is the digital storage and display in which the analogue information relating to amplitude and frequency of the signal being analyzed is converted to digital form giving a 256 level by 512 ordinate representation which is entered into a MOSFET recirculatory store. The stored information is continuously scanned at a field rate of 76 Hz and displayed on a bright 130 by 100 mm television camera monitor tube as a brightness modulated picture on a vertically scanned raster. This is the first use of such a display in an h.f. spectrum analyzer and overcomes the disadvantages of long-persistence tubes and storage tubes. It also enables the display to be retained indefinitely at any brightness.

Split Memory



Another very important advantage of the display method used is that the store can be split into two parts so that two displays can be screened together with independent brilliance controls and with the facility of updating either display while retaining the other. See left hand photo, front page.

Resolution



The 5 Hz filter bandwidth and 0.1 dB level resolution enables rapid analysis of extremely narrow filters as depicted on the center photograph, front page.

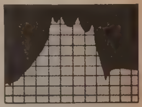
Electronic Graticule

An electronically produced graticule is superimposed on the display and can be shifted along either axis and scaled horizontally to give exact frequency setting and easy setting of amplitudes to a reference level.

Operational Simplicity

An important design principle has been simplicity of operation. The user has only to select the required centre frequency, sweep width and resolution; a built-in logic program then automatically selects the best r.f./i.f. gain ratio, sweep rate and filter bandwidth. This eliminates the possibility of measurement error resulting from incorrect setting of the controls.

Frequency Measurement



A nine-digit electronic counter is incorporated giving readout in MHz with automatic positioning of the decimal point. Three modes of operation are available; measuring the center frequency of any sweep, measuring the absolute frequency at any point on a display by use of a movable bright-line electronic cursor, or measuring the frequency difference between these two values. This last mode is particularly useful for such applications as rapidly measuring sideband frequencies relative to a carrier, or complex network characteristics as shown in right photograph on front cover.

Network Response Measurement

A built-in tracking generator produces a swept output signal with a frequency within 2 Hz of the analyzer tune frequency. This permits the spectrum analyzer to be used as a swept or manually-tuned selective level measuring set for frequency response characterization of networks over wide dynamic ranges. The split store system is very useful in this context for displaying the response of a standard network for as long as is required, while comparing with it the displayed response of a network under test.

Signal Generator

FM/AM SIGNAL GENERATORS

DESCRIPTION	FREQUENCY	FEATURES
FM/AM SIGNAL GENERATOR Model 2002B	10KHz to 88MHz	0.1µV to 1V ±1dB, fully solid state, AM variable to 100%, FM deviation ±1KHz to ±50KHz max. dependent upon range. Incremental frequency controls with discrimination of 0.025% and direct readout in KHz. Xtal calibrator. External frequency shift permits phase mod. or phase locking. Digital Synchronizer available.
FM/AM SIGNAL GENERATOR (6625-913-7223) Model 995B/Series	200KHz to 220MHz	0.1µV to 100mV. Calibrated ΔF. Step attenuator, Crystal standardized; extremely stable. Deviation ±600KHz on top bands. Has simultaneous FM & AM. Also available for narrow band working FM spurious less than 25Hz Model 995B/5.
FM SIGNAL GENERATOR (6625-937-2801) Model 1066B/6	10MHz to 470MHz	0.1µV to 100mv. 50 fm at 1 KHz and 5 KHz internal, deviation to ±400 KHz, ΔF to ±100 KHz, both meter monitored. Stability .0025% 10 min. Xtal calibrator.
FM/AM SIGNAL GENERATOR Model 2015	10MHz to 520MHz	Covers 10MHz to 520MHz in 11 bands with discrimination permitting tuning to narrow band (±3KHz) receivers. FM deviation 10KHz and 100KHz. AM to 80%. Precision ALC eliminates need for external set carrier control. Fundamental signal with low spurious content. Will also operate from external 24VDC. Portable, 5½" high 11" wide. Lowest cost for performance generator on USA market today.
DIGITAL SYNCHRONIZER Model 2171	10MHz to 520MHz	Used with Model 2015 to set frequency to stability of ±2 in 10^7 to resolution of 100Hz. Once locked frequency may be digitally tuned to at least 1% from center frequency, with full modulation capabilities retained.
LOW NOISE VHF/UHF FM SIGNAL GENERATORS Models 2011-2012-2013	130MHz to 180MHz 400MHz to 520MHz 800 MHz to 960MHz	Highly stable low noise unit for testing narrow band mobile receivers. Velvet vernier tuning. Infinitesimal leakage. Noise less than —140dB/Hz, VHF/UHF; —125dB/Hz, 800 — 960MHz, 20KHz from carrier. Output level 0.01µV to 100mV into 50Ω FM deviation to ±30KHz f_m 300Hz to 3KHz.
AM/FM SIGNAL GENERATOR AND SWEEP GENERATOR Model 2008	10KHz to 510MHz	This unique combination Generator/Sweeper provides both facilities without sacrifice to the precision quality of either function. Eleven bands with 1 : 1.5 cover span from VLF thru UHF. Output 0.1µV to 100mV into 50Ω. Stability 5 p.p.m. FM deviation ±3KHz ±10KHz ±30KHz ±100KHz and above 45MHz ±300KHz. Mod. frequency to 125KHz. AM to 80%. Comprehensive sweep facilities on all bands. Full Modulation facilities may be retained in sweep mode. Xtal calibrator and markers.
SOLID STATE PRECISION FM SIGNAL GENERATOR (6625-491-7755) Model 2006	4MHz to 1000MHz	Solid state precision FM unit accepts any 4 of 5 oscillators with bands 4 to 10MHz; 10 to 90MHz; 88 to 220MHz, 215 to 500MHz and 440 to 1000MHz. Output 0.1µV to 100mV into 50Ω. FM ±100KHz to ±300KHz max. dependent on frequency. Mod frequencies 20Hz to 125KHz internal or external. Synchronized version 2006/1 available.

FM DEVIATION METERS

DESCRIPTION	FREQUENCY	FEATURES
FM DEVIATION METER (6625-060-3320) Model 791D	4MHz to 1024MHz	Deviation ranges, ±5, ±25, ±75 and ±125KHz full scale. Accuracy 3%. Crystal standardized. Local oscillator can be xtal controlled for measuring deviations down to 10Hz.
FM DEVIATION/ AM MODULATION METER Model 2300A (USA) (6625-480-8706)	4MHz to 1000MHz to 2500MHz using ext. oscillator	Wide range, mod. freq. up to 200KHz; deviation ranges ±1.5, ±5, ±15, ±50, ±150, ±500KHz. Local oscillator can be xtal locked, external oscillator can be used. De-emphasis 50µsec. 75µsec. switch selected. FM accuracy ±3% for deviation up to ±500KHz f_m 30Hz to 150KHz. AM modulation two ranges 30% and 100% mod. freqs. 30Hz to 50KHz (carrier 4 to 350MHz).
FM DEVIATION/ AM MODULATION METER Model 2300B	4MHz to 1200MHz	Measures FM deviation to 500KHz, AM depth to 95% at carriers up to 400MHz. Very low internal noise allows narrow deviation measurements. Filter for noise measurement. De-emphasis 50µS, 75µS and 750µS. Distortion and channel separation on FM stereo meets FCC testing requirements.
PORTABLE MODULATION METER Model 2303	25 to 520MHz	Measures FM on all mobile bands thru 520MHz deviations 15, 5 and 1.5KHz. Accuracy 3%. Low noise. AM measurements to 225MHz. 95% depth. 3% accuracy. AC or battery operated. 13 lbs.
PROGRAMMABLE FM/AM MODULATION METER Model 2301A	4MHz to 1000MHz	FM deviation in six ranges from ±1.5KHz to ±500KHz FS. f_m 30Hz to 200KHz demodulated output distortion 0.25%. AM 30% and 100% FS. Automatic internal carrier level setting.

FM/AM Modulation Meter
Model 2300B

Model 2015
Low cost, high performance AM/FM generator

MOBILE RADIO TEST GEAR

DESCRIPTION	FREQUENCY	FEATURES
PORTABLE MODULATION METER Model 2303	25 to 520MHz	Measures FM on all mobile bands thru 520mHz deviations 15, 5 and 1.5KHz. Accuracy 3%. Low noise. AM measurements to 225MHz. 95% depth. 3% Accuracy. AC or battery operated. 13 lbs.
MOBILE RADIO SIGNAL GENERATORS	All Mobile Bands	Special low noise signal generator series for all bands. 130MHz thru 960MHz. See Signal Generator Section, Models 2011, 2012, 2013, and general purpose 2015.
AUTOMATIC DISTORTION METER Model 2337	20Hz to 20KHz	Simultaneous indication of level down to 3mV, distortion down to 0.1% without tuning adjustments. With external filter, the unit becomes ideal for SINAD testing.

DIGITAL COMMUNICATIONS – P.C.M. TEST GEAR

MULTIPLEX TEST SET Model 2807	Voice Channel	Both sinewave and pseudo random noise stimulus available to measure channel gain, frequency response, idle channel noise, gain linearity, quantization distortion and interchannel crosstalk. National and International models available.
PATTERN GENERATOR AND ERROR DETECTOR Model 2808	1.536 to 8.448 Mbit/s	Generates pseudo random test signal in AMI, RZ or NRZ formats. Errors and blanking can be introduced to test regenerator clock recovery. Automatic locking of pseudo random signal in receiver. Performs bit by bit analysis of received signal.
DATA LINE ANALYZER Model 2809	300Hz to 3400Hz	Used for testing data transmission lines and links; measures peak-to-average rating (PAR), frequency response and system noise level. Has correction for phase-intercept distortion.

INTERMODULATION AND BASEBAND TEST GEAR

NOISE LOADING TEST SET TRANSISTORIZED (6625-965-8625) (AN/GSM 161A) Model 2090A	12KHz to 12.388MHz (i.e. up to 2700 channels)	Solid state unit has built-in standardizing noise source in receiver for gain setting, out-of-band testing, etc. Includes noise generator, receiver and a choice of many different filters. NPR measurements can be made up to 75 dB.
NOISE LOADING TEST SET Model 2090B	12KHz to 12.388MHz	Designed to meet latest CCIR and CCITT requirements (Recommendation 399-1 Oslo 1966). Operation similar to model 2090A.
Model 2099AB		This filter extension box can be added to any 2090A or 2090B system to provide accommodation for up to nine extra high, low or band stop filters and six extra band pass filters with oscillators. Minor modification required to existing generators and receivers to provide access. Simple field modification kits available.
AUTOMATIC NOISE RECEIVER Model 2092C	12KHz to 12.388MHz	The Automatic noise receiver automatically adjusts its sensitivity to the incoming noise level, intermodulation noise level, or residual noise level. The noise power ratio (NPR) of a microwave system or component under test, is automatically determined and the result displayed digitally. A three digit display will give direct readout of NPR, dBm, dBmO, dBrn or dBrnO with or without 'C' message or psophometric weighting. Can be used with any current noise generator.
HF SPECTRUM ANALYZER Model 2370	30Hz to 110MHz	Comprehensive spectrum analyzer system with dispersion from 20Hz/div to 100MHz full width, resolution 0.1 dB, filter bandwidths from 5Hz to 50KHz, displayed dynamic range 100dB, 10 x 12 cm filter-free digitally stored display, frequency measurement to counter accuracy. See front page illustration and text opposite.
TWELVE CHANNEL NOISE GENERATOR (6625-948-4724) Model TM7816A	300Hz to 3400Hz	Generates twelve non-related channels of Gaussian noise from twelve separate solid state sources. Output: each channel 1mW in 600Ω balanced, 300Hz to 3400Hz. Attenuation to —32 dBm in 2 dB steps. Spurious noise in OFF channel (all other channels ON) is less than 10 dBa (—75 dBm FIA weighted). Programmable option available.
TV AUTOMATIC MONITORING SYSTEM Model 2914/15		See television section overleaf.

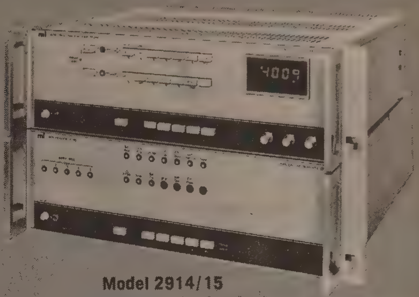
Model 2910 series
Non Linear Distortion Analyzer with Sampler



Model 2914/15
TV Automatic Monitoring System

TV TRANSMISSION TEST EQUIPMENT

DESCRIPTION	FREQUENCY	FEATURES
TV SIDEBAND ANALYZER Model 2360R		Provides a symmetrical or asymmetrical swept video signal for testing video amplifiers or transmitters using 625, 525 or 405 line systems, positive or negative modulation. Uses Converter TM6936 for UHF channels.
TV SWEEPER Model 2361		Main sweep unit has internal rep. rate 0.01Hz to 100Hz with linear, semi log, CW, single shot and manual modes. TV field lock, blanking and phase shift controls and alternate trace separation. Produces ultra flat, low distortion sweep. Plug-ins available: Video 25KHz to 30MHz. VHF 1 to 300MHz, UHF 220MHz to 1000MHz.
TV SWEEP ANALYZER Model 2900		Comprehensive frequency sweep analyzer combines Model 2361 Sweeper and video unit, Blanking and Sync Mixer Model 2908 and Differential Probes unit, Model 2907. Measures response of active or passive transmission networks. Differential measurements on composite signal to an accuracy of 0.01dB. Also measures termination impedance and return loss.
LUMINANCE/CHROMINANCE GAIN & DELAY TEST SET Model 2904/1		Measures gain and delay inequality with gain discrimination 0.5dB, delay discrimination 2 nanoseconds, visible display of misalignment with scope.
NON-LINEAR DISTORTION ANALYZER with SAMPLER Model 2910		Makes accurate, simultaneous measurements of differential gain, differential phase and luminance non-linearity, even in the presence of noise. Gain and phase can be directly measured against a calibrated pulse which can be varied over the ranges of 0 to 11% in .1% steps and 0 to 11° in .1° steps respectively, with the luminance non-linearity being resolvable down to 0.1% using an external scope display.
TV AUTOMATIC MONITORING SYSTEM Models 2914 and 2915		Automatically analyzes and displays all essential parameters including: amplitudes of bar, sync, various T pulses, and noise; luminance linearity, chrominance gain, chrominance/luminance crosstalk, differential gain and phase, etc., all measured in the most suitable units of measure and presented digitally when under manual control (see illustration above). ✱ Data Selector Model 2916 enables both local and remote print out of results.

COMMUNICATIONS RECEIVERS

DESCRIPTION	FREQUENCY	FEATURES
Model 1830	120 KHz to 30MHz	A unique series of communications receivers covering 10KHz thru 870MHz. All feature superb construction and top performance. Low frequency models provide AM/CW/SSB. 990 series offer AM/FM. Xtal locking facility optional on all models to enhance stability.
Model 990R	27MHz to 240MHz	
Model 990S	230MHz to 870MHz	

BRIDGES AND Q METERS

DESCRIPTION	FREQUENCY	FEATURES
UNIVERSAL BRIDGE Model 1313A	1KHz and 10KHz 20Hz to 20KHz External	0.1μh to 110h, 0.1pf to 100μf, 0.003Ω to 110MΩ. Accuracy 0.1%. Built-in osc. and det. Direct reading; simplest possible operation. Uses adapter TM6113 for biasing inductors to 200mA.
PORTABLE UNIVERSAL BRIDGE Model 2700	1KHz internal 20Hz to 20KHz External	0.2μh to 110h, 0.5pf to 1100μf, 0.01Ω to 11MΩ. Accuracy 1%. Transistorized, simple. Measures incremental L, electrolytics & non-linear resistance using external bias supplies.
Q METER Model 1245A	1KHz to 300MHz	Q ranges 5 to 1000, △Q 25-0-25. Accuracy 5% to 100MHz, 20% to 300MHz. Calibrated capacitor 7.5 to 500pf, △C ranges ±1 and ±5pf. Extremely stable and easy to operate. Uses separate oscillators. Dielectric and Series Loss Test Jigs available. Also HF & LF inductors.

MICROWAVE SIGNAL SOURCES

DESCRIPTION	FREQUENCY	FEATURES
Model 6055	0.85 to 2.15GHz	A unique series of transistor and gunn diode microwave signal sources covering 400MHz to 18.0GHz. Digital display of frequency, accuracy typically ±1%. Variable output levels typically 10mW on gunn diode sources. Up to 150mW on transistor models, Gunn Diode Models are 6057, 6058 and 6059. Model 6551 has FM. Special frequency coverages on request.
Model 6056	2.0 to 4.0GHz	
Model 6057	4.5 to 8.5GHz	
Model 6058	8.0 to 12.5GHz	
Model 6059	12.0 to 18.0GHz	
Model 6070	0.4 to 1.2GHz	
Model 6551	1.4 to 1.7GHz	

S/D & D/S MODULES & INSTRUMENTS, PHASE-SENSITIVE INSTRUMENTATION, RESOLVER/SYNCHRO INSTRUMENTS, AC RATIO BOXES

PHASE ANGLE VOLTMETERS

These instruments combine phase-sensitive modes with the functions of a multi-range conventional AC voltmeter. They provide voltage measurements of the total, fundamental, in-phase and quadrature components of an AC signal, as well as phase angle. They feature high harmonic-rejection, quadrature overload capability, and signal and reference isolation.

Model 220, 225-Digital Phase Angle Voltmeter

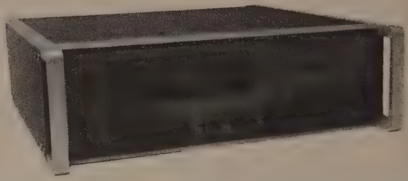
These new instruments directly measure and display phase angle and all components of signal voltage (total, fundamental, in-phase, and quadrature) at 1, 2, 3, or 4 push-button selected frequencies from 30Hz to 32KHz. Features include push-button and autorange selection of voltage, 4½ digit display of voltage and phase, push-button function selection, and panel display of selected function and voltage range. Other features are fully programmable operation, 0.1% full-scale voltage accuracy, 0.25° phase accuracy (0° to 360.0° display), digital output, and analog recorder output. Optionally available with ratiometric measurement modes.

Model 213—Single-Frequency Phase Angle Voltmeter

This instrument provides phase-sensitive measurement at a single prespecified frequency with ±5% bandwidth from 30Hz to 10KHz with full-scale measurement from 300μV to 300V.

Model 214—Four-Frequency Phase Angle Voltmeter

This instrument provides phase-sensitive operation at 2, 3, or 4 frequencies, 30Hz to 20KHz. Features include ±5% bandwidth, 300μV to 300V full-scale ranges, and rapid field change of frequency modules.



Model 220, 225

Model 213

RESOLVER/SYNCHRO SIMULATORS & BRIDGES

Most instruments offer a dual mode capability, permitting a single model to work with both resolvers and synchros. All units feature direct in-line readout of angle, i.e. 359.999° and input/output isolation.

Series 530—R/S Simulators

These 3½" full-rack simulators provide resolver and synchro output at 11.8, 26, 90 and 115V line-line voltages, with either 26V or 115V 400Hz excitation. Accuracy is 2 arc-seconds. Standard resolutions are .0001°, .001° and 1°.

Model 530/20—Broadband R/S Simulator

This 5¼" full-rack instrument features nominally 10 arc-second accuracy from 50Hz to 10KHz.

Model 532—Synchro Simulator, Model 531—Resolver Simulator

A miniature synchro simulator at 11.8V (or 90V) 400Hz line-line with 5° thumbwheel switches and 30 arc-seconds accuracy. Resolver model with 26V 400Hz line-line output.

Model 540/10 & 540/11 Resolver/Synchro Bridges

These 3½" rack-mounted bridges measure resolver and synchro transmitters with 2 arc-second accuracy at 400Hz (540/10) and 400Hz to 100Hz (540/11). Standard resolutions are .0001° and 1°.

Model 541/10, 542/10 Bridges

These miniature bridges measure angular position of 400Hz resolvers or synchros with accuracy of 5-arc-seconds. Manual balance is by 5° thumbwheel switches.

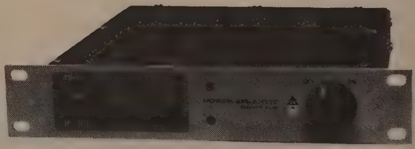
Model 540/20—Broadband Resolver/Synchro Bridge

This 5¼" rack-panel bridge features 10 arc-second accuracy over most of the frequency band from 55Hz to 10KHz.

Series 530

ANGLE POSITION INDICATOR—Model API-8025

This electromechanical servo measures synchro and resolver transmitters with 6 arc-minutes accuracy. Optional features include 4 arc-minute accuracy, retransmit components, dual-mode, and two-speed operation.



Model API-8025

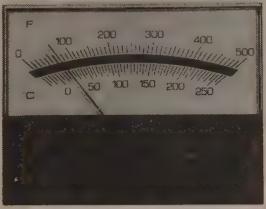
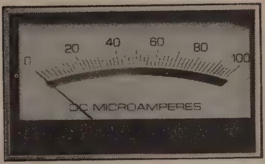
PANEL METERS FOR THE DISCRIMINATING

featuring fast delivery from factory modification centers

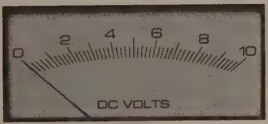
Surface Mount
black or
clear cover



Bezel Mount
black or clear
cover meter



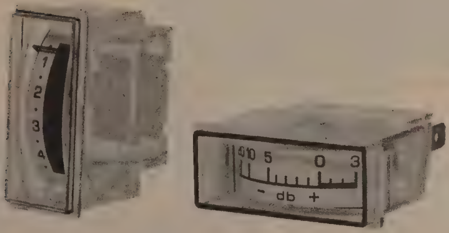
Windo-Mount
flush with
front of panel



TAUT BAND PANEL METERS

Standard accuracy ±2% full scale, ±1.5% tracking
Contemporary styling
Technically advanced movement and suspension
Six sizes: 1½″ through 8″
Flat 100° arc, linear scales
Many options and modifications available
See following pages for information and prices

Available in styles shown above,
also in edge reading style



MOVING MAGNET PANEL METERS

Standard accuracy ±5% full scale
High style — low cost
Rugged, dependable movements
Many options and modifications available
See following pages for information and prices

PYROMETERS · THERMOCOUPLES

Many types and styles for a wide range of applications.
Meters match styles described above.
See MODUTEC display in Section 5300

CONTROL METERS

for actuating & monitoring IC control circuits
Fast, precise response
Reliable — economical
Request Catalog CM-1011 for detailed information

MODUTEC TAUT BAND PANEL METERS

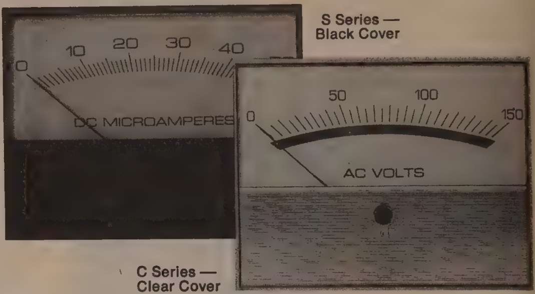
1½", 2½", 3½", 4½", 5½", 8" sizes

See overleaf for ranges & prices

SURFACE MOUNT

S Series — Black Cover
Handsome aspect ratio and clean-cut detailing add distinction to any panel. Optional colors available.

C Series — Clear Cover
Clear acrylic case front reduces contrast between the meter and adjacent panel for a pleasing overall effect.

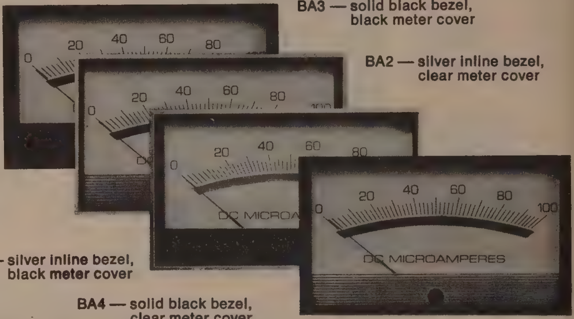


S Series —
Black Cover

C Series —
Clear Cover

BEZEL MOUNT

BA Series
Actually a package comprising a surface mount meter and a slender, graceful bezel in the combination shown. Mounting hardware and instructions are included. Bezels are available in optional colors; all meter options apply.



BA3 — solid black bezel, black meter cover

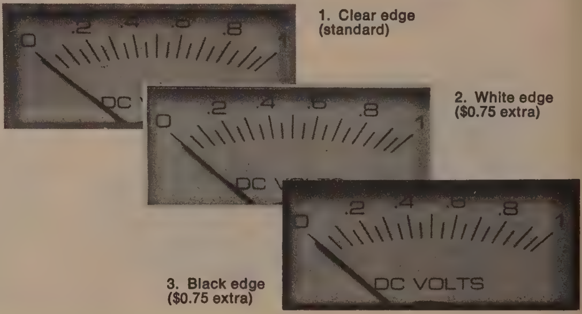
BA2 — silver inline bezel, clear meter cover

BA1 — silver inline bezel, black meter cover

BA4 — solid black bezel, clear meter cover

WINDO-MOUNT™

W Series
A sophisticated and original design that has been widely imitated, the W Series meters are easily installed without special adapters, and do not sink the meter dial deep behind the panel. Uniquely attractive edge options are available, as shown at right.



1. Clear edge (standard)
2. White edge ($0.75 extra)
3. Black edge ($0.75 extra)

BLUE-DOT™ RUGGEDIZED (MIL SPEC) METERS

K Series
Blue-Dot meters are available in the styles described above, in all but the 8" size. Their covers are Lexan, so that they easily withstand physical punishment that would break or damage ordinary meters. Their movements are specially shockproofed, sealed, and compensated. This means that you can specify meters for tough situations without having to make concessions to size and appearance.
Blue-Dot meters meet various MIL, USA STND, and UL specifications for environment, shock, vibration, and flame resistance. For full information request Catalog 622.

**24 OR LESS CATALOG METERS SHIPPED IN 1 WEEK OR YOU PAY ½ PRICE

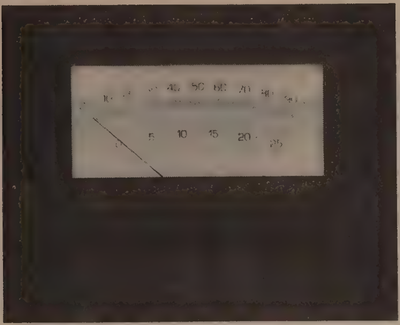
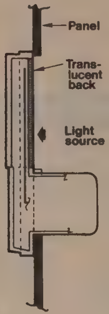
MODUTEC TAUT BAND PANEL METERS

New Additions — 3½″, 4½″, 5½″, 8″ sizes

See next page for ranges & prices

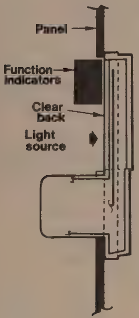


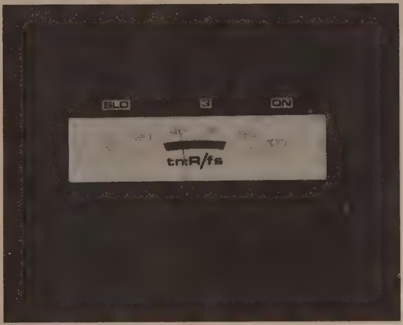


L SERIES

Trans-Lit™ Panel Meters

- Illuminated *through* the meter dial — highest quality lighting of any meter.
- Optional smoke-grey covers bring "blackout technology" to panel meters for the first time.
- Save money in installation and illumination accommodations.
- Available in Surface Mount, Bezel Mount, and Windo-Mount styles.

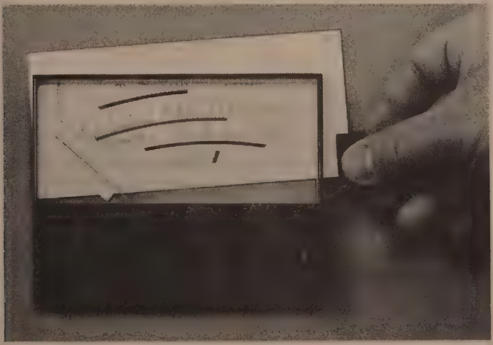




V SERIES

Thru-Vue™ Panel Meters

- Provide a "window into the product".
- Multiple metering functions visible through one cutout.
- Smoke-grey covers available for "meter blackout" effect.
- Bring high volume design advantages to custom and small run units.
- Save space and installation costs.



R SERIES

Multi-Dial™ Panel Meters

- Dials can be quickly switched — lift one out and drop another in!
- Accurate dial positioning is "built in".
- 1½% tracking standard.
- Entire meter remains sealed during dial replacement.
- Wide selection of dials available.
- Meter can be installed for trans-lighting, using translucent or transparent dials

PANEL METERS

OPTIONS - MODIFICATIONS - UNCASED MOVEMENTS

MOVING MAGNET METERS See following pages

OPTIONS — TAUT BAND METERS

A number of desirable options are available for immediate incorporation at modest additional cost. These are simply listed here but are described fully in Catalog 622.

*Improved Accuracy — Tracking & Full Scale ($4-$11)
*Colored Covers & Bezels ($1)
Blank Dials ($0.75; 8″ — $1.25)
Customer Specified Resistance ($2 plus set-up)
Fast Response ($1 plus set-up)
*Custom Pointers ($1-$1.50)
High Temperature Case & Cover ($2.25)
Dead Set Pointer ($5; 8″ — $7.50)
Illumination ($3.75 w/o lamps)
Hand Lettered Custom Dials ($7.50-$15)
Mirror Scale ($1)
Heavy Damping ($1)
*Single Point Calibration ($2.25)
Smoke-Grey Covers ($2; 8″ — $3)
Improved Terminal Resistance Tolerance ($1)
Sealed Case ($2.75)
Temperature Compensation ($4)
*Unit Meter Packaging ($1)
High Resistance Voltmeters ($3)
Rear Zero Adjustment ($2.25)

OPTIONS — MOVING MAGNET METERS

(Moving magnet meters are described, with ranges and prices, on following pages). The taut band meter options listed at left and designated with (*) are also available in moving magnet meters, at similar or reduced additional cost. The following options are available only in moving magnet meters:

Cases & Covers to UL Specs ($1)
Skin Pak (for retail, etc. — $0.50)
Self Leads ($1)
No Zero Adjustment (Reduces list price $0.25)
Magnetic Shielding ($1)
Thru-Vue Transparent Back & Scale ($1)
Tinted Covers ($1.50)
Heavy Duty Terminals ($1)

MODIFICATIONS

Certain modifications of catalog meters, the specifications of which are usually detailed by the customer, can be accomplished quickly at a nominal added charge. These, typically, might be:

Custom colors;
Special hot-stamp marking;
Custom dials;
Special cases and covers;
Zero right movements, etc. Consult factory for your requirements.

METER MECHANISMS

Modutec supplies many high-volume users with meter movements, either dial mounted or without dials. Both the Modutec Taut Band Movement and the Modutec Moving Magnet Movement are ideal for many user-installed applications. Custom units can be built — within technical limitations — to the user's specifications for performance, size, and shape, assuming sufficient volume to support tooling and set-up efforts. Inquire.

MODUTEC, INC. 18 Marshall St., Norwalk, CT 06854 (203) 853-3636 TWX: 710-468-2039

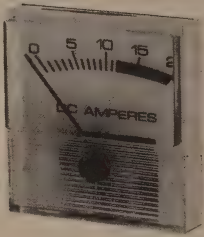
MODUTEC

MOVING MAGNET PANEL METERS & INDICATORS

1″, 1½″, 2½″, 3½″ and Edge-Reading (1.8″) sizes

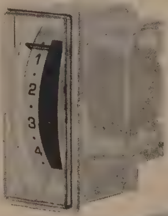
M SERIES

Modutec M Series meters and indicators have been specifically designed to meet the needs of large-volume users for accurate, well-made meters that are low in cost yet highly styled, assets to the equipment in which they are installed. They are available in five sizes, several styles, and in a wide selection of types and ranges.



Surface Mount Designated MS Style (black cover) or MC Style (clear cover) these are similar in appearance to the Taut Band Surface Mount meters shown four pages back. A new 1″ size, shown at right, is available in the MS and MC styles.

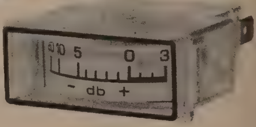
Bezel Mount The graceful bezel is easily installed and protects the meter in addition to looking well. The appearance is as shown four pages back, and the same variations, designated MB1, MB2, MB3, and MB4, are available. Cost of the bezel mount is $2.65 added to the prices listed on the next page.



Windo-Mount This easily installed flush-mounting meter is designated MW Style, and looks the same as the W Series, four pages back; the same edge options are available at a unit added charge of $0.50.

Edge Reading The ME Style meters may be used horizontally or vertically (specify when ordering), flush mounted or surface mounted. They make the most of panel and chassis room, and are available in one size only.

Options for M Series meters are listed on the preceding page.



FEATURES

- Available in microampere sensitivities previously restricted to moving-coil-construction meters.
- Molded front covers, available in clear or painted styles, molded plastic case.
- Plastic materials to meet UL requirements available as option.
- All styles except edge reading have scales printed on translucent rear wall of case, which facilitates back-lighting.
- Solder lug terminals are standard. Push-on tab terminals are available as an option.
- Quick-mount hardware available on all styles.
- Accuracy 5% full scale (3% available as an option).

High Sensitivity (200μA basic — 1140 ohms)	6.70	7.05	7.45	7.90	6.35

Bezel Mount — Available only on 1½″, 2½″, 3½″ meters; added unit cost $2.65, before discount.
Surface Mount and Windo Mount styles with clear cover — deduct $0.30 from unit prices, before discount.

DISCOUNT SCHEDULE (per type): 1-9 list; 10-24 10%; 25-99 20%; 100-249 30%; 250-499 40%; 500+ inquire.

MODUTEC, INC. 18 Marshall St., Norwalk, CT 06854 (203) 853-3636 TWX: 710-468-2039

Why you should consider a Digital Oscilloscope like the Nicolet EXPLORER T.M.

How the Digital Oscilloscope Works:

A DIGITAL OSCILLOSCOPE uses an analog-to-digital converter (ADC) to digitize the input signal and store it in a solid-state memory. The stored signal is then reconstructed through digital-to-analog conversion on the cathode ray tube (CRT). Since the signal is stored in a memory rather than on a special CRT, it can be displayed, expanded for closer inspection, and compared with other live or stored signals without concern for fading or repeating the signal. Points of interest may be selected by moveable electronic cursor for alphanumeric display of actual time and voltage values right on the same CRT.
Stored data may be outputted in digital form to a magnetic tape recorder or programmable calculator or in analog form to an X-Y recorder.

How the Digital Oscilloscope is Similar to the Analog 'Scope:

It has the characteristics of an analog oscilloscope with choice of plug-ins, input amplifier/attenuators, filters, choice of ± internal or external trigger, choice of sweep speeds, and built-in CRT display.

Why the Digital Oscilloscope is Better:

The DIGITAL OSCILLOSCOPE is superior to the analog oscilloscope in all these ways:

POWER TO MEASURE ACCURATELY: Horizontal resolution is 1 part in 4096 (4096-word by 12-bit memory). Vertical resolution, depending on plug-in used, is 1 part in 256 (8-bit resolution) or 1 part in 4096 (12-bit resolution).

ABILITY TO STORE AND COMPARE WAVEFORMS: Signals may be measured and stored in the DIGITAL OSCILLOSCOPE'S solid-state memory; signal fading is not a problem. Stored signals may then be displayed singly or superimposed on stored or live signals for comparison.

KEEP A LIBRARY OF RECORDS WITH NO LOSS OF RESOLUTION: The digital magnetic tape accessory allows you to keep a large number of records any of which can be found by tag word and read back into the EXPLORER later.

ANALYZE DATA VIA INTERFACE WITH H-P 9800 SERIES PROGRAMMABLE CALCULATORS: The NIC-191 Calculator Interface accessory plugs in for bidirectional versatility. Some DIGITAL OSCILLOSCOPE users have interfaced their instruments to minicomputers.

USE IT AS A VERY SPECIAL X-Y OR Y-T "RECORDER": The EXPLORER is extremely useful as a high speed, high resolution X-Y or Y-T "Recorder." Analog output is provided for hard copy records when desired.

PUSHBUTTON STORAGE CONTROL: Press a pushbutton to "freeze" a signal. Press another pushbutton to return to "live" measurement.

TAKE A CLOSER LOOK: Both the X and Y axes may be expanded, in steps of 2, up to a factor of 64 times so that waveform details may be closely examined. The expanded waveform can be automatically centered vertically on the CRT to save operator time and make expansion easier.

EASY CHOICE OF Y-T or X-Y DISPLAY: Two signals from one event may be displayed as functions of time, or of each other, at the flip of a switch.

READ ACTUAL VOLTAGE RECORDED, AND TIME FROM TRIGGER, AT ANY POINT ON A WAVEFORM: A moveable electronic cursor permits the selection of any point of interest on a waveform for display of that point's actual voltage and time values. No mental calculations are required.

FAST OR VERY SLOW MEASUREMENTS: With sweep speeds ranging from 100 nanoseconds to 200 seconds per point, sweeps of as little as 102.4 microseconds to as long as 9.48 days may be selected.

And, with all these extras, the DIGITAL OSCILLOSCOPE is *easier to use* than any analog 'scope. The DIGITAL OSCILLOSCOPE is now in use in hundreds of laboratories where it is revolutionizing measurements in the frequency range of DC to 5 Megahertz. (New plug-ins are being developed to add to the versatility of the EXPLORER DIGITAL OSCILLOSCOPE. Contact Nicolet for specifications and availability.)

Specifications:

MAINFRAME SPECIFICATIONS

Memory
4096 12-bit words.
All 4096 words can be used, or two 2048-word parts, or four 1024-word parts for record, display or readout modes.

Display Expansion
Separate controls for horizontal and vertical axes for expansion by factors of X2, X4, X8, X16, X32, X64.

Point Selection
Horizontal and vertical crosshairs are controlled separately to target the point around which expansion will take place.

Data Add/Subtract
Constants may be added or subtracted from Y values.

Autocenter
Vertically centers the expanded display.

Display
Switch-selectable choice of X-Y or Y-T.

Digital I/O
Binary out on rear panel, TTL-compatible. Accessories for interfacing and magnetic tape read-in and read-out.

Pen Recorder Output
X and Y axes 0-4.5 volts nominal. Variable read-out speeds.

Size
20.5'' length, 10.25'' width, 12.25'' height (standard model) or 20.7'' length, 19'' width, 7'' height (rack-mount model) 8 cm x 10 cm CRT

Weight
42 pounds including typical plug-in unit

Power
115 Volts ±10%, or 230 volts ±10%, 85 watts.
48 to 66 Hz. Specify voltage when ordering.

MODEL 93A PLUG-IN SPECIFICATIONS

Two Input Channels: Amplifier modules may be mixed or matched.

Single Ended Amplifier/Attenuator (Model C)
Input Ranges: ± 1, ± 2, ± 4, ± 10, ± 20, ± 40, ± 100, ± 200, ± 400 Volts full scale. Impedance 1 megohm, approximately 47 pf.
D.C. Offset: nominally 90% of range setting, ten-turn pot control.
Maximum Input Signal: 100X range setting, or ± 400 volts, whichever is least.

Differential Amplifier/Attenuator (Model D)
Differential Input Signal Ranges:
±100 mV to ±40 volts full scale in 9 steps in a 1, 2,4 sequence.
Maximum Common Mode Input Signal Ranges:
±8 volts on ±100, ±200, ±400 mV ranges.
±80 volts on ±1, ±2, ±4 volt ranges.
±400 volts on ±10, ±20, ±40 volt ranges.
Maximum Safe Input Signal: 300X range setting, or ± 400 volts, whichever is least.
D.C. Offset: At least 100% of range setting, ten-turn pot control.
Frequency Response (to -3 db point): DC to at least 5 MHz. Selectable upper -3 db points @ nominally 0.5 MHz and 1 kHz.
Input impedance: 1 megohm, approximately 47 pf.
Common Mode Rejection Ratio:

Ratio	Frequency	Amplifier Setting
>10,000:1	DC to 1 kHz	±100 mV, ±1 V, ±10V
> 4,000:1	to 10 kHz	
> 5,000:1	DC to 1 kHz	±200 mV, ±2 V, ±20V
> 1,000:1	to 10 kHz	
> 2,500:1	DC to 1 kHz	±400 mV, ±4V, ±40V
> 500:1	to 10 kHz	

Ratio decreases by less than 20 db per decade above 10 kHz
Overload Recovery Time:
(Time required to recover to within approximately 1% of correct voltage after removal of a test signal applied for one second. Signal source resistance 10K ohms)
Signal amplitude 200% of range setting; approximately 2 μS
Signal amplitude 100 times range setting; approximately 20 MS

Analog-to-Digital Converter: 12 bits, monotonic
Measurement Accuracy: (At normal room temperature range).
Voltage:
1. Scale calibration: 0.25% of range. Front panel adjustable.
2. Other errors: nonlinearity, misadjustment and noise, less than 0.05%.
3. Drift ± 0.25% per 5°F after warm up.
4. Sample-and-Hold Aperture time variation: Nominally 5 nanoseconds for single signal.
5. Signal Channel Crosstalk 0.05% or less.

Time:
1. Calibration: ±0.02%
2. Drift: ±0.01% per year.

Trigger Signal:
Range: ± 0.25 to ± 5V, a.c. or d.c. coupled.
Maximum allowable: 25V
Trigger occurs on transition through an adjustable threshold level.
External trigger input impedance is nominally 1 megohm.
Sweep Trigger Insensitive Times: At slow sweep speeds (10 μsec per point or slower) there is essentially no ''dead'' time between sweeps. At faster sweep speeds, a dead time of from 5 to 50 milliseconds exists depending upon the number of points used per sweep and the number of points displayed on the CRT. During this time, following acceptance of a signal into memory, the instrument is insensitive to incoming sweep trigger pulses.
Sweep Time Per Point: Ranges of 0.5, 1, 2 times 1, 10, or 100 microseconds, milliseconds, or seconds, one or two channels, simultaneously.
Push Button Controls:
Manual Trigger: Simulates electrical trigger signal.
Hold Last: Stores the information which followed the last trigger.
Hold Next: Stores the information which will follow the next trigger.
Live: Accepts the next valid trigger and records new information presented to the input.
Retain Reference: Displays stored information while also viewing ''live'' signals.
Remote Control: Hold and live commands +5 volts normal level, 0 to 0.5 volts, or switch closure to initiate action.
Filter: Low pass; nominally -3db at specified cut-off, 0.5 MHz or 1 kHz.

MODEL 94A PLUG-IN SPECIFICATIONS

One Input Channel: Accepts either Model C or D amplifier module. (Module C and D Amplifier specifications same as Model 93A Plug-In)
Analog-to-Digital Converter: 8 bits, monotonic
Sweep Time Per Point: Ranges to 1, 2, 5 times 100 nanoseconds; 1, 10, or 100 microseconds; 1, 10, or 100 milliseconds; 1 or 10 seconds.
Sample-and-hold circuit aperture time: 3 ns.
Accuracy: ±0.4% of full-scale voltage.
Bandwidth: 5 MHz (3db)
(Other specifications same as for Model 93A Plug-In)
Specifications subject to change without notice.

For full details, including technical brochures and applications notes, or to discuss your possible application of the EXPLORER DIGITAL OSCILLOSCOPE, please call Product Manager Bruce Hervey at Nicolet.

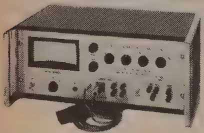
OSI EQUIPMENT FOR CURRENT AND POWER MEASUREMENT

MULTIRANGE A.C. WATTMETER

Model WM1000 wattmeter measures real power consumed by small motors, electronic test equipment and other electrical loads.

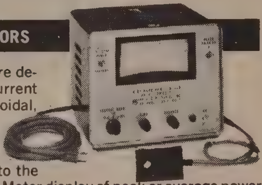
Selectable full scale ranges are 50, 100, 500 and 1000 watts with an accuracy of ±3%.

WIDEBAND WATTMETER



PM-4004 Wideband Pulse Power Monitors provide the unique ability to measure power in solid state switching circuits. The d.c. response and 30 nanosecond risetime insures accurate determination of instantaneous power waveform. Power input, power output, or power dissipated in solid-state devices may be readily determined. Built-in meters provide average or peak power reading. Instantaneous power, current, or voltage may be observed by connecting an oscilloscope to "monitor output" jack.

WIDEBAND POWER MONITORS

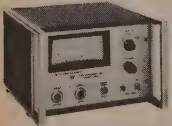


PM-6010 Series Power Monitors are designed to provide power or current measurements where d.c., sinusoidal, non-sinusoidal or pulse power is delivered to a load. Currents up to 1000 Amperes can be handled with negligible circuit interaction due to the use of circuit isolated transducers. Meter display of peak or average power is provided. 0 to 1 volt output proportional to instantaneous power or current is available for oscilloscope monitoring of detailed waveforms with risetimes less than 1 microsecond in the d.c. to Megahertz frequency range.

WIDEBAND d.c. to Megahertz CURRENT MEASURING EQUIPMENT

CM Series current measuring units provide an output signal proportional to instantaneous current flowing through the transducer window. The d.c to Megahertz response and ability to faithfully reproduce 1 micro-second transients provide an ideal way to monitor critical circuits without electrical connection and with minimum interaction caused by measurement. The panel meter provides a display of direct current while the +1 to −1 volt output can be used for monitoring or control purposes with current flow in either direction.

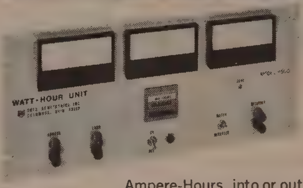
AUDIO WATTMETER



MODEL PM1215

The Model PM1215 Audio Wattmeter measures DC to 30 kHz power delivered to resistive or reactive loads. Full scale ranges of 400, 800, and 1600 watts are provided corresponding to voltage inputs of 25, 50, and 100V RMS. A front panel meter displays average power. A 0 to 1V output is provided for oscilloscope observation of the instantaneous power wave shape.

WATT-HOUR AND AMP-HOUR METERS

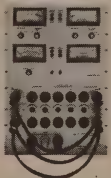


Registration of total energy consumption of motors, processes and equipment in a.c. or d.c. circuits is available on resettable counters. Other units provide a registration of charge flow, or Ampere-Hours, into or out of battery systems. Multiple measurement panels are available which provide display and electrical outputs related to instantaneous current, voltage and power in addition to energy registration.

CLAMP-ON CURRENT TRANSDUCER

Model CM-56F Current Transducer provides measurement of current without interrupting circuit. Accuracy of better than 0.50%, measurements to 50 Amperes and d.c. to Kilohertz response are featured. An electrical output providing an analog 0.1 Volt/Ampere signal is available for use in control systems, computer interfacing or recording.

POWER TEST PANELS



MODEL PTP-100

Current
Voltage
Power
VARS

Power Factor
Frequency
Watt-hour
Amp-hour

MODEL WM-2C5C

Power test panels are available for DC and AC (2, 3, or 4 wire) system loads. Voltage ranges from 50 to 500 volts and current ranges from 10 to 10,000 Amperes may be specified. Isolated electrical outputs are provided to drive recorders or remote indicators. Packaging methods include 19" rack panel, standard instrument housings and NEMA type enclosures. Available options: Digital meters, BCD outputs, true RMS outputs, set-point switched outputs and data storage for computer interfacing.

MILITARY EQUIPMENT

MODEL AH-10

NUCLEAR POWER PLANTS
SHIPBOARD • AVIONICS • SPACECRAFT

OSI has an established reputation for building rugged, highly reliable measurement systems to meet government and military specifications. Systems include current, power, amp-hour, watt-hour, etc.

DESCRIPTION

The O.S.I. WH Series AC Watt-Hour Meters provide a convenient and highly accurate way to characterize, monitor and control critical manufacturing processes where product quality and cost are related to electrical energy input.

These solid-state units utilize Hall-effect watt-transducers and are especially suitable for watt-hour totalization, power monitoring and observation of power waveforms in applications where SCR chopped, or other non-sinusoidal waveforms are involved. The power wave shape applied to the load may be sinusoidal with wide power-factor variations, zero-crossing controlled sinusoidal, phase controlled SCR, or other waveforms derived from a 60 Hertz input.

In addition to the display of totalized watt-hours since last reset, the units provide a panel meter indication of average power in watts.

These units should be invaluable in processes where monitoring can lead to increased yields of quality products. They should lead to elimination of much costly down-time through the early detection of process variations which, if not corrected, could lead to breakdown.

SPECIFICATIONS

INPUT

Overload (Continuous):
Voltage, 1.25 X Rating
Current, 2 X Rating (5, 10 and 15 A Models)
10 X Rating (50 A thru 2000 A Models)

Burden (At Max Rated Input)
Voltage: 1.25 VA
Current: 1.25 VA

Power Factor Range: 0.5 Lead to 0.5 Lag

Frequency Range: 50 to 70 Hz

Instrument Power: 115 VAC 60 Hz 5 VA

OUTPUT

Response: 400 MS

Temperature Effect: (−15°C to +35°C) ±0.5% F.S.
(−10°C to +60°C) ±1% F.S.

Wattmeter: 4½″

Watthour Counter: 5 Digit (Push Button Reset)

Electrical Output: 8 V at Calibration Point

Pulse Output: 4 V for External Electronic Counter

Accuracy: (Linearity, setpoint, P.F.)
Meter: ±1.5% F.S. (WH3-1 to WH3-42)
±2.0% F.S. (WH3-43 to WH3-102)
W-H Counter: ±0.5% F.S. (WH3-1 to WH3-42)
±1.0% F.S. (WH3-43 to WH3-102)

Electrical Output: (Watts and W-H)
±0.5% F.S. (WH3-1 to WH3-42)
±1.0% F.S. (WH3-43 to WH3-102)

Zero Drift: ±0.1% F.S. of rated W-H per hour

Instrument Size: 19″ x 5¼″ x 11″ WHD

External Transducer Size: See Tables

SIGNAL CONDITIONERS

THE SG-11 IS A PLUG-IN MODULE with power supply, balance calibration and monitoring circuits. The power supply circuit offers high temperature and time stability, providing line and load regulation of 0.01%; excitation voltage is adjustable from 0 to 16 volts at 0 to 150 mA. Featured is a self-restoring current limit circuit. All units may be wired for constant-current operation.

THE SG-11 has very high isolation to line—under 0.03 pF coupling capacitance from power line to DC output—SG-11 performance approximates battery operation.

All controls are 10 turn potentiometers of very high resolution. Calibration is bipolar single shunt.

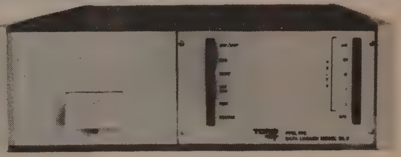
Two types of enclosures are available: A 19" relay rack that permits the mounting of eight units side-by-side and a portable enclosure accepting a single plug-in unit. A plug-in power supply is also available.

MODEL SG-11 PLUG-IN UNIT (eight shown in rack)	**$187.50**
PORTABLE ENCLOSURE (MODEL SG-11-P as shown)	**$ 39.50**
RELAY-RACK MOUNTING ENCLOSURE (MODEL SG-11-R as shown) with solder terminals only	**$129.00**
RELAY-RACK MOUNTING ENCLOSURE (MODEL SG-11-RC as shown) with MS connectors (mating connectors included)	**$395.00**

THE MODEL SG-16 series (not illustrated) provides lowest-cost strain-gage conditioning. A 20 channel system with common power supply occupies only 5¼ inches of vertical panel space at a total cost of $75 per channel. Amplifier options range from $10 per channel for 10ma galvo drive amplifiers to $100 per channel for low-drift differential amplifiers. Write for Bulletin SG-16.

THERMOCOUPLE MONITOR

THE TM 100A SCANS UP TO 100 THERMOCOUPLES, displaying temperature in digital form. A high-low limit circuit compares temperature with preset thumbwheel switches; a lamp matrix displays all out-of-limit channels. Interface provides for auxiliary printout or computer entry of data.

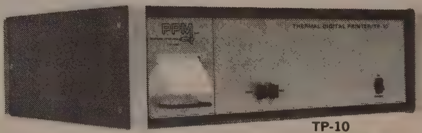


DATA LOGGER

THE MODEL DL-2 IS A COMPLETE DATA ACQUISITION SYSTEM in a compact, portable package. It scans up to 100 differential signals, digitizes them and a thermal printer records their values. Options include floating decimals, internal digital clock, conditioning for thermocouple or strain-gage transducers and punched paper or magnetic tape recording.

Input signals include DC voltage, resistance and frequency. Write for Bulletin DL-2.

Data Logger with 10 Channels	**$2320.00**
Data Logger with 100 Channels	**$3220.00**



TP-10

SILENT THERMAL DIGITAL PRINTER

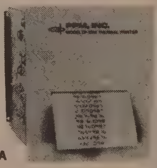
Model TP-10 is a quiet, moderately priced, reliable instrumentation printer with only one moving part. It prints up to 14 columns at 5 lines/second from BCD input signals.

Prints on standard thermal actuated paper . . . excellent legibility.

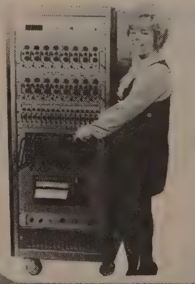
Model TP-10A is a plug-in printer module for OEM applications. All electronics except the power supply are included.

Options for TP-10 include a digital clock card, for recording the time of an event's occurrence, and a digital voltmeter card.

Write or call for prices and Bulletin TP-10.



TP-10A



PPM SYSTEMS

PPM OFFERS CUSTOM SYSTEMS AND SYSTEMS COMPONENTS for data acquisition, process and speed control. PPM Data Acquisition Systems will accept as many as 1000 individual signals; these signals are scanned, digitized and recorded in printed form or on punched or magnetic tape. Alarm outputs are available for signals falling outside of the preset limits. For systems applications we offer several Systems Components, such as: Printers, Scanners, and Digital Clocks.

For comprehensive information, write us or call us collect today.

MODEL
304A
WAVE
&
SPECTRUM
ANALYZER
1 Hz to 5 KHz

A low cost, extremely stable instrument covering the frequency range from 1 Hz to 5 KHz. Three switch selectable filters provide maximally flat passbands wtih 24dB/octave skirts. Electronic tuning and automatic electronic sweep with direct readout of tuned frequency add to the versatility of this unit. Inputs of 3μv to 100V F.S. can be accommodated with a dynamic range capability of better than 70 dB. Constantly scaled outputs, proportional to amplitude and frequency, allow a simple connection to an oscilliscope or X-Y plotter for spectrum analysis. This compact, lightweight, portable instrument may be operated under battery power with an optional inverter.

MODEL
304TDL
WAVE
&
SPECTRUM
ANALYZER
1 Hz to 5 KHz

Our "Top of the Line" instrument in the 1Hz to 5KHz range features signal tracking without an external pilot or reference frequency. Five switch selectable constant bandwidth filters allow for signal analysis windows as narrow as 1Hz. The electronic tuning feature provides single and repetitive sweeps over increments as narrow as 50Hz. The unit may also be tuned by an external DC voltage. Fourteen (14) input ranges of from 30μV to 100V F.S. and a dynamic amplitude range of greater than 70dB linear (up to 90dB in the log mode) provide a wide range of rapid data display. An input overload indicator and sweep range/time/bandwidth compatibility indicator provide instantaneous indication of conditions which would lead to erroneous results.

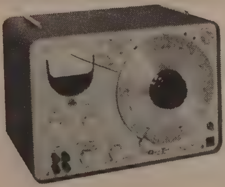
MODEL
2449
WAVE
&
SPECTRUM
ANALYZER
10 Hz to 50 KHz

A low cost precision instrument covering the audio and supersonic ranges. The analyzer features electronic tuning which may be manually or automatically scanned over all or discrete portions of the frequency range. The three constant bandwidth, flat-topped, filters of 7 ,100 and 1000 Hz are ideal for spectral density analysis of random signals. An AFC mode allows the analyzer to lock on to a drifting signal and follow it over a frequency range determined by the bandwidth. The 2449,when used with an oscilloscope or X-Y plotter, is a spectrum analyzer whose center frequency, sweep width and resolution can all be varied. Averaging time, bandwidth and sweep speed can be selected for optimum results in random signal analysis.

MODEL
306TDL
WAVE
&
SPECTRUM
ANALYZER
10 Hz to 50 KHz

A higher frequency version of our Model 304TDL covers the range of 10Hz to 50KHz making it suitable for audio and supersonic signal analysis. The Model 306TDL has all the features of its low frequency counterpart with the sweep ranges, sweep times and bandwidth filters adjusted to match the higher frequency range. A high degree of frequency stability is featured with a five digit direct display of tuned frequency to a resolution of 1Hz. A BFO output which is a sinewave at the tuned frequency and variable to 1V RMS is available as a driving signal for amplitude response testing, used in transfer function analysis and frequency response testing.

MODELS
303 & 2156
WAVE
&
SPECTRUM
ANALYZERS



The Model 303 and Model 2156 are similar instruments covering the frequency range of 30Hz to 100KHz and 10Hz to 30KHz respectively. Basically, dual-conversion hetrodyne receivers, in which the selectivity of the second IF can be varied in four fixed steps, their broad frequency coverage makes these instruments extremely useful for harmonic measurements and complex signal analysis. These analyzers can also be used as frequency tuned or selective voltmeters. Tuning of the instruments is accomplished manually with a precisely calibrated large tuning dial with both mechanical and electrical vernier controls. Full scale input ranges are from 100μv to 300 V.

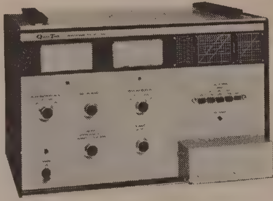
MODEL 315B RESISTOR NOISE TEST SET

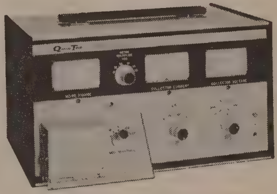


The Model 315B is the recognized and accepted standard of the electronics industry and government agencies for measuring current noise in resistors. It conforms to the recommendations of NBS and IEC and meets the requirements of Method 308, of MIL-STD-202B. It measures resistor current noise in absolute values over a resistance range from 1Ω to 25MΩ. The index of measurement is the accepted unit of microvolts of noise per volt of applied DC in a decade of frequency expressed in dB with a 1 microvolt reference.

MODEL 2500 AUTOMATIC RESISTOR NOISE TEST SET

The Model 2500 Automatic Resistor Noise Test Set is introduced to bridge the gap between the manually operated Model 315B Resistor Noise Test Set and the completely automated version called the Model 5012. The Model 2500 is designed to be operated with mechanical handling equipment, with interfacing to control both the mechanical and electrical cycles. Three bin sort information is provided to the handler. The readout of the Model 2500 is in resistor NOISE INDEX in accordance with the recommendations of the National Bureau of Standards.

MODELS 512B & 340B/1340 TRANSISTOR NOISE FIGURE TEST SETS



The Model 512B is a low cost instrument designed to measure Noise Figure directly in dB of both NPN and PNP bipolar transistors and FETs of both P and N channel. Two measurement bandwidths from 10Hz to 10KHz and 10Hz to 50Hz which cover broadband audio and noise and 1/f, burst, popcorn and other low frequency noise phenomena. The Model 340B/1340 measures Noise Figure of RF type transistors and FETs at spot frequencies in an effective bandwidth of 14KHz. Each frequency requires a plug-in head for either 1, 2, 10.7, 45 or 60MHz. Each of the units has independent controls to set the collector current and voltage and the Model 340 has adjustable gate bias voltage for FETs.

MODELS 2173C-2181 TRANSISTOR NOISE ANALYZER & 2283-2181 I.C. NOISE ANALYZER

These labortaoy type instruments measure the noise spectral density of transistors, FETs and linear integrated circuits. Noise is measured in an equivalent 1Hz bandwidth at 5 spot frequencies of 10Hz, 100Hz, 1KHz, 10KHz and 100KHz. Each instrument is a complete test system containing all the required adjustable power and bias supplies. These instruments have proven extremely useful in providing the user with information for low noise circuit development, quality control and production test for evaluating product quality. A cover interlock switch removes power while inserting and removing the device under test and also prevents stray pickup by requiring the shield cover to be closed during test.

MODELS 2307 & 2310 AUTOMATIC TRANSISTOR NOISE FIGURE TEST SYSTEM

These automatic systems are designed to measure the Noise Figure of transistors at high speeds using automatic handling equipment. For a complete measurement, it is only necessary for the transistor under test to remain stationary for 200 milli-seconds. The systems may also be operated manually using a hand-loaded test jig. Collector current, voltage and base resistance can be varied over wide limits without affecting calibration. Since most of these units are built to order, simplified versions can be supplied or additional features incorporated. Ten foot shielded cables are supplied to connect the instrument to the automatic handler or the manual test jig.

MODEL 2494 BURST NOISE TEST SET

The Model 2494, Burst (Popcorn) Noise Test Set is designed to detect the presence of "Popcorn" noise and to provide the threshold circuitry to segregate units on the basis of average noise voltage levels as well as peak voltage to average voltage ratio. Since the detection of burst noise inherently requires a relatively long observation period, the equipment is designed to measure four devices simultaneously in order to provide reasonable operator productivity. In addition to the GO-NO-GO information, a two digit LED readout, which can be made to read average noise voltage or the number of times the ratio threshold is exceeded, is provided for each of the four test channels.

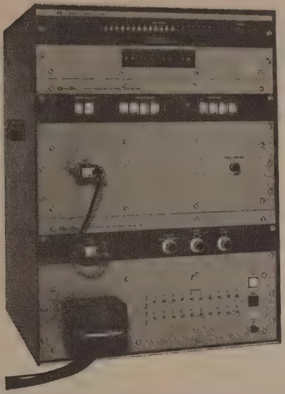
Quan-Tech

Division of SCIENTIFIC-ATLANTA, Inc.

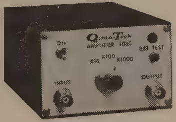
RANDOLPH PARK WEST, ROUTE #10, RANDOLPH, N.J. 07801
TELEPHONE: (201) 361-3100 TWX: 710-987-7946

MODEL 5012 AUTOMATIC RESISTOR NOISE TEST SYSTEM



The Model 5012 automatically and rapidly measures the precise value of resistance and current noise of individual resistors or multi-element resistor networks. GO-NO-GO limit selectors are available to program noise and resistance reject levels for data storage or sorting. In addition, data is presented on front panel digital readouts, as well as digital outputs for computer processing. These systems are semi-custom, built to order and are extremely flexible. Their capabilities can be added to or changed without affecting the accuracy or speed of measurement. Resistor current noise measurement meets the requirements established in Method 308 of MIL-STD 202.

MODEL 206C LOW NOISE AMPLIFIER



The Model 206C is the latest version of a versatile battery operated amplifier, with a flat frequency response from 1 Hz to 100 KHz and selectable gains of 20, 40 and 60dB. A noise spectral density of less than 5 x 10^{-9} volts/$\sqrt{Hz}$ makes the 206C ideal for both laboratory and field applications in the amplification of very low level signals. Battery life is approximately 2000 hours.

MODEL 207 ISOLATION AMPLIFIER

The Model 207 is a reliable, low noise amplifier providing a high degree of isolation. The high CMR can be used to reduce the effects of ground loops or EMI so important in medical applications or other complex instrumentation systems. 1000 hour battery operation makes the 207 ideal for field measurements or in locations with poor power line conditions.

MODEL 2220 SERIES INSTRUMENTATION AMPLIFIERS

The 2220 series are high gain, low noise amplifiers with an outstanding performance record in oceanography and related applications. These amplifiers have a nominal gain of 80dB and are flat from 10Hz to 100KHz. A wide selection of plug-in filter boards are available to control the gain vs. frequency characteristics.

MODELS 420 & 421 RANDOM NOISE GENERATORS

Accurately calibrated and stable random noise sources have true Gaussian amplitude distribution and spectral density independent of frequency (white). The Model 420 is flat from approximately DC to 100KHz while the Model 421 is flat from 10KHz to 12.5MHz and is usable to 20MHz (–3dB). The outputs of both units are continuously metered and calibrated in $\mu V/\sqrt{Hz}$ which is the accepted basic standard of the industry.

MODEL 317C PROBABILITY DENSITY ANALYZER

The capability of measuring probability density or cumulative probability distribution, over a frequency range from dc to 1.75MHz, enhances the utility of the 317C. Measurements are no longer limited to the lower frequency spectrum found in vibration analysis. Self-contained true RMS calibration, internal sweep and analog outputs for an X-Y plotter, provide a convenient method of obtaining probability data. Gated clock outputs for low frequency or low probability are available at the front panel.

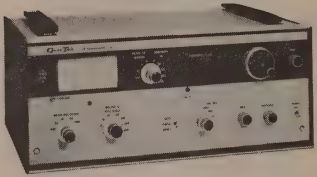
TELEPHONE: (201) 361-3100 TWX: 710-987-7946

MODEL 2429 TORSIONAL VIBRATION ANALYZER

The Model 2429 is a unique instrument that is calibrated for measurement of angular vibration magnitudes of 1 millidegree to 30 degrees peak full scale over the 1 Hz to 5000 Hz frequency range, using electromagnetic or optical non contacting sensors with 100 point per revolution sensing. Internal calibration is crystal controlled for both frequency and magnitude and an auxiliary power inverter allows for use under extreme environments encountered in the field. This instrument is ideal for character signature measurements of critical machinery for maintenance and repair decision making. In addition, fault location within a mechanism can be easly ascertained. The uses for this instrument range from the evaluation of design and maintenance analysis of tape recorder mechanisms, to oil, gas or water well drilling systems, to steam, air or gas turbine systems for power generation.

MODEL 2415/2450 V F TRANSPONDER & CLOCK/TIMING GENERATOR



These instruments are building blocks for use within echo-sounding systems for atmospheric measurements of range and velocity of various turbulent conditions. The Model 2415 is operated as a tracking receiver while the 2450 provides synchronous transmission information as well as control of receiver parameters and clock/calender data for recording purposes. A complete minimal system consists of these instruments in in combination with a T/R switch (Model 2473), power amplifier and acoustic coupler. All data derived from both instruments may be processed immediately or recorded conveniently for future analysis and correlation with data from other similar systems.

SERIES 2400 TELEMETRY STATION TEST SETS

The 2400 series Telemetry Station Test Set verifies the performance characteristics of both central and remote units of a digital serial format, half-duplex, data telemetry system. The test set has the capability of generating and receiving up to 16 words of BCH parity checked data and displaying in binary form any one or all of the received words. The test set may operate in originate/answer mode for simulating either a central station or remote station. The data rate is selectably 150, 600 or 1200 bits/sec with stabilities of 0.01%. The interface is short circuit protected and meets the requirements of EIA RS-232C. Various plug-in units are available for formulating the transmit data in binary bit or hexadecimal form. Various test cables, transit case and FSK options are also available.

Quan-Tech is a professionally oriented organization devoted to the solution of unusual technical test and measurement problems in low frequency electrical, electronic and mechanical engineering.
A few of the areas of capability are:

A. Low, medium and high frequency noise characteristics of components and systems.
B. Signal analysis techniques at low and medium frequency on the spectral and probablistic level.
C. Mechanical device measurements in mechanical impedance and vibration studies (linear & torsional)
D. Digital systems testing-telemetry data communications error rate.
E. Acoustics emission and detection-atmospheric echo sounding, speech and hearing.

INSTRUMENTATION DIVISION

Since 1922

AC/DC Voltage, Current and Power Standard

Model 829G

Model 829G	Measure & Deliver
Full-scale ranges	AC/DC Volts 0.01 — 1400 V AC/DC Current 10 $_{\mu}$A-14A Ohms 0.1-10 meg.
Accuracies of reading	±0.05% DC ±0.08% AC ±0.06%Ohms
AC Frequencies	50, 60, 400, 1000 Hz

Model 5058A

Model 5058A Wattmeter Calibration Module for use with two Model 829G's. For calibration of wattmeters ranging from 0.05 watt to 14,000 watts.

Digital Watt/Var/Vector Power Meter

Series 6200 measures single or polyphase power. Ten current ranges, 0.01-10.0A; nine potential ranges, 5-300VAC; 90 range-combinations, 50 mW-3kW. Direct reading; automatic captions and decimal points. Five-digit, 7-segment display; 0.01% resolution. Accuracy ± (0.02 ± 1 digit).

Magnet Chargers and Treaters

Model 747

High energy magnet charger covers full range of charging applications, from the lowest to the highest coercive forces, in all configurations.
Available in five separate energy-storage capacity levels from 2,000 to 10,000 watt-seconds.

Model 107A

Saturates most medium size and instrument magnets, including core types, using variety of fixtures. Two output ranges: Maximum 18-watt-seconds. Booster unit also available.

Model 1500

Produces 225 watt-seconds for large Alnico meter magnets plus cobalt platinum and barium ferrite materials. Wire-wound fixtures plug into front panel through safety interlocks.

Model 2470-350

Variable output voltage with energies up to 440 watt-seconds for saturating up to 4 lbs. of Alnico V using wire-wound fixture. Bench or rack mounting available. Accessory Booster available for doubling output.

Model 2470-700R

With variable voltage outputs and energies up to 880 watt-seconds. Will saturate Alnico V up to 5½ pounds, as well as many core-type indicating meters completely assembled and encased. Rack mounting only.

Model 942

Saturate Alnico magnets to 34 lbs. and high coercive force barium ferrite compounds of any shape or number of poles. Outputs to 3,600 watt-seconds. Safety interlocked.

MAGNETREATER 990

Magnetreater® Model 990

Completely solid-state demagnetizer for stabilization of permanent magnets. Power continuously variable from less than 1 VA to in excess of 80,000 VA. Resolution 0.1%. Can be programmed for automatic or semiautomatic operation.

Magnetreater®/Charger Model 580

Combination Magnet Charger and Magnetreater capable of charging and stabilizing permanent magnet materials and assemblies. Completely solid-state, providing high reliability. Energy storage for the charging mode is 105 watt-seconds; Magnetreater mode is 54 watt-seconds. Can be combined with RFL Gaussmeter for automatic or semi-automatic operation.

Gaussmeters

Model 505

Model 505, a low cost unit ranging from 5 gauss to 50 kilogauss in 7 full-scale ranges. Measures permanent magnet, DC and AC fields to 20 kHz. Built in probe calibration and zero center mode for determining polarity. Accuracy: ±3%.

Model 750A, sensitive wide-range device for analog measurement of 0.10 gauss to 50 kilogauss in 18 full-scale ranges. Measures permanent magnetic fields, DC and AC, to 400Hz. Polarity sensitive, self-calibrating. Nominal accuracy ±1%.

Model 750D, sensitive high-range device for digital measurement of 10 gauss to 100 kilogauss in five full-scale ranges. Measures permanent magnetic fields, DC and AC, to 400 Hz. 3½-digit panel meter. Polarity sensitive. Self-calibrating. Nominal accuracy ±0.2%.

Probes — Are InAs elements for temperature stability. Choice of flat, axial or tangential in various sizes to fit most gaps. Flat ranges from .015" thick x .080" wide x .309" long.

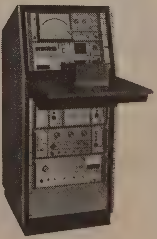
Reference Magnets — Traceable to NBS with 50 gauss to 20K gauss fields and gaps from .040" to .343" are standards for probe calibration.

Magnetometer

Model 101

Solid state low level magnetic flux density measurements from 1 gamma to 100,000 gamma (1 oersted). Temperature compensation is provided to enable virtual drift-free operation.

Automagnetic® Systems

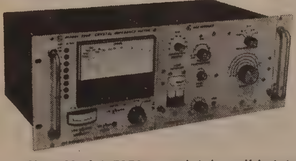


A combination of RFL standard magnetizing, measuring and demagnetizing equipment permits interconnection for semi-automatic and completely automatic systems designed for individual requirements. Processing includes TWT, BAR and C shaped magnets, DC meters, Torque motors, accelerometers and other designs embodying permanent magnets.

Crystal Impedance Meters

Model	Frequency Range	Impedance Range
459B	800kHz-15MHz	0-9,900 ohms
531	10-140MHz	10-150 ohms
541C	2.5-1100kHz	200 ohms-0.5 megohms
1207	75-200 MHz	10-125 ohms

Reference standards for measuring resonance and anti-resonance of quartz crystals in determination of capacitance, inductance and performance index. Meet U.S. MIL-C-3098E/Amd. 1 and U.K. Defense DEF-5271 A.



New Model 5950 completely solid-state CIM measures semi-automatically. Consists of a main-frame and two interchangeable RF modules covering a frequency range of 2.5kHz to 60MHz.

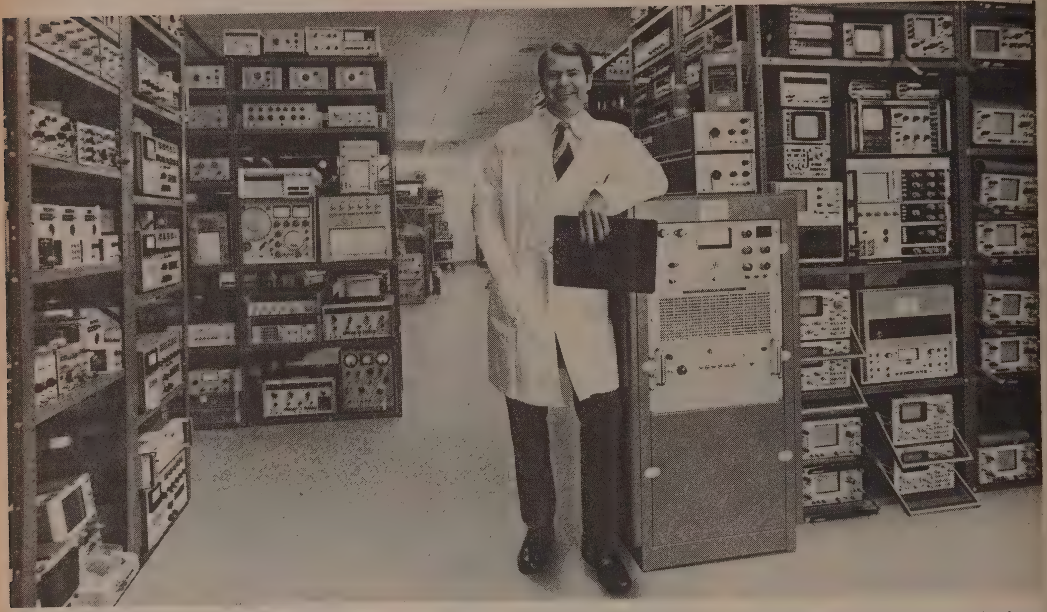
Here's why REI can rent you what you want when you want it



Our inventory. It's the biggest in the industry, with over 8,000 items of electronic test equipment in stock and ready to go. And it's getting better all the time, because we add more state-of-the-art equipment every month. This means we can deliver one special instrument . . . or a dozen . . . within hours of the time you place your order.

Now, more than ever, renting makes sense ... to stretch your equipment budget, to fill temporary needs, and to avoid the long delivery lead times associated with purchasing. And renting from REI makes even more sense . . . because we're better equipped to fill your needs than any other rental company.

REI is backed by the tremendous resources of the PepsiCo organization, which gives us the financial strength to keep on hand whatever test equipment you may need. And renting from us helps *your* financial strength, too. Since you pay only for the time you have your instruments, you'll never have to spend your money on idle equipment.

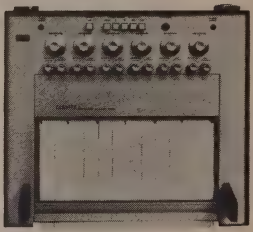
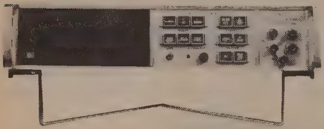
Power Range: 10, 30, 100, and 300 μW, 1, 3, and 10 mW; −20 dbm to +10 dbm in 5 db steps; Accuracy: ±1% of full scale, all ranges; Thermistor Mounts: 486A, 478A, and 8478B series. Price does not include mount................................**Sale Price $575.00**



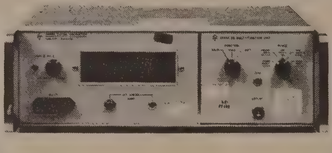
BRUSH MARK "260" PRESSURIZED INK RECORDER

Numbers of Channels: 4 standard event, 6 analog; Range: 1 mV to 500 VDC; Response: DC to 40 Hz at 50 div., DC to 100 Hz at 10 div.; Speeds: 1, 5, 15, 125 mm/sec., 1, 5, 15, 125 mm/min.; Sensitivity: 1 mV/div...**Sale Price $3750.00**



HP: "3450A" DIGITAL MULTI-FUNCTION METER

Voltage Range Display: ±100 mV to ±1000 V in 5 range settings. Range Selection: Manual or automatic. Accuracy 1 V thru 1000 V ±.003% of reading +.001% of range. DC Voltage Ratio: 100 mV to 1000 V. Input Resistance: 10 MegΩ; Display: 6 digit in line. Added measurement capability is achieved by the addition of plug-in options. Price does not include options............................**Sale Price $1895.00**



HP: "3440A" DIGITAL PLUG-IN VOLTMETER

DC voltages up to ±999.9 volts of either polarity are displayed in 4 digits with accuracy of 0.05 percent of reading ±1 digit. Sample rate, HOLD and variable 1/s to 5/s. Price does not include plug-ins **Sale Price $475.00**

BELL & HOWELL: "VR3360" MAGNETIC TAPE RECORDER/REPRODUCER

Tape Speeds: Six, 1-7/8 through 60 ips; Reels Accommodated: 10½ inch diameter with EIA hub, ½ in. or 1 in. tape; Direct Record/Reproduce System: Input Level—1 VRMS nominal: Output Level—1 VRMS; FM Record/Reproduce System: Input level—1 VRMS nominal; Output level—1 VRMS. **Price based on configuration desired.**

USED—BUT BY WHOM AND HOW?

All equipment offered for sale was originally bought brand new from the manufacturer by REI. It is a well-maintained instrument that you can rely on with a money-back guarantee. As the largest renter of test equipment in the nation, Rental Electronics, Inc. is continually adding the latest and most popular instruments to its inventory. As a result, REI Sales Company has been established to market some of the instruments on the REI shelves to keep making room for the latest equipment. The top quality, late model, brand name instruments that you'll find listed here are immediately available, tested to manufacturers specifications and at sale prices you can fit in your budget.

If you don't see an item that you've been needing, call us anyway at (617) 273-2777. We may have just added it to our stock.

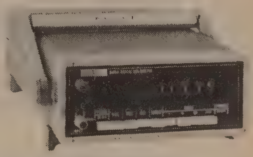
EVERYTHING'S LIKE NEW EXCEPT THE PRICE!

HP: "1707B/20" DUAL TRACE PORTABLE OSCILLOSCOPE

Bandwidth: DC to 75 MHz; Risetime: 4.7 ns; Deflection Factor: 10 mV/div to 5 V/div; Time Base: 0.0 μsec/div to 2 sec/div; Delayed Time Base: 0.1 μsec/div to 0.2 sec/div. Option "20" (1) External Horizontal Input. (2) Channel "A" Output.
Sale Price $1000.00

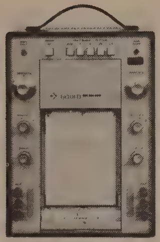
GENERAL RADIO: "1565A" PORTABLE SOUND LEVEL METER

Sound Level Range: 40 dbm to 140 dbm; Freq. Range: 20 Hz to 20 kHz; Output: 1.5 V/20 kΩ Input impedance: 13 meg Ω/25 pF; Power Internal battery. **Sale Price $210.00**



FLUKE: "8100A" DIGITAL MULTIMETER

Voltage Ranges DC: 1 V, 10 V, 100 V, 1000 V; Accuracy ±0.05% of reading plus 0.01% of range; Voltage Ranges AC: 1 V, 10 V, 100 V, 1000 V; Ω Ranges: 1 k, 10 k, 100 k, 1 M, 10 M; Display: 4 digits plus 20% overrange. .... **Sale Price $425.00**

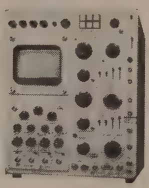


BRUSH MARK "220" PRESSURIZED INK RECORDER

Number of Channels: 2 standard event, 2 analog; Range: 1 mV to 500 VDC; Response: DC to 40 Hz at 50 div., DC to 100 Hz at 10 div.; Sensitivity: 1 mV/div.; Speeds: 1, 5, 15, 125 mm/sec. and 1, 5, 15, 125 mm/min. .... **Sale Price $1100.00**

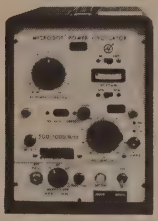
GR: "1551C" SOUND LEVEL METER

Sound Level Range: From 24 db to 150 db; Freq. Range: 20 Hz to 20 kHz amplifier response; Cal. Accuracy: ±1 db at 500 Hz; Input Impedance: 25 mΩ/parallel to 50 pF .... **Sale Price $425.00**



TEKTRONIX: "549" SPLIT SCREEN STORAGE OSCILLOSCOPE

Horizontal Time Base: 0.1 μsec/cm to 5 sec/cm; X5 Magnifier; Sweep Delay: 2 μsec to 10 sec; Storage CRT; Display Screen: 6 x 10 cm; Split Screen Storage; Viewing Time: Up to one hour; Erase Time: 150 ms; Writing Specs: 0.5 cm/μsec, 5 cm/μsec with enchantment. Price does not include plug-in units. .... **Sale Price $1450.00**

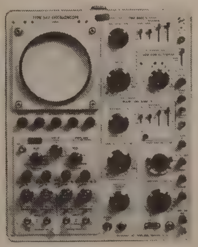


MICRODOT: "445" POWER OSCILLATOR

Freq. Range: Determined by RF Plug-in Unit; Modulation; Internal 1 kHz ±10% adjustable; Tuning; Single Control; Power: Stability: ±0.002" for 10 min. after 2 hours. Stabilization at constant power and frequency. Price does not include RF Plug-In unit.
Sale Price $1050.00

FLUKE: "8120A" DIGITAL MULTIMETER

Voltage Ranges DC: 100 mV, 1 V, 10 V, 100 V, 1000 V; Input Impedance: 10 MΩ; Voltage Ranges AC: 100 mV, 1 V, 10 V, 100 V, 1000 V; Ranges: 1 k, 10 k, 100 k, 1 M, 10 M: Current Ranges DC: 100 μA, 1 mA, 10 mA, 1000 mA; Current Ranges AC: 100 μA, 1 mA, 10 mA, 100 mA; Display: 4 digital plus 20% overrange. .... **Sale Price $525.00**



TEKTRONIX: "547" AUTOMATIC DISPLAY OSCILLOSCOPE

Vertical Bandwidth: DC to 50 MHz; Deflection: All 1-Series and Letter Series Plug-Ins; Horizontal Cal. Time Base: 0.1 μsec/cm to 5 sec/cm; Sweep Magnifier: X2, X5, X10; Cal Sweep Delay: 0.1 μsec to 50 sec. .... **Sale Price $1000.00**

ALL EQUIPMENT OFFERED IS SUBJECT TO PRIOR SALE.

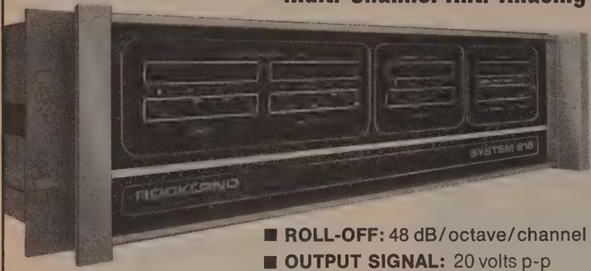
ANALOG FILTERS

- **HI** PERFORMANCE/ **LO** COST
- **WIDE RANGE**—CUT-OFF FREQUENCIES FROM 0.001 Hz to 1.1 MHz
- **DIGITAL TUNING**—INSTANT RESETTABILITY
- **FLEXIBILITY:** **Modes:** Low pass, high pass, band pass, band reject, notch.
  Roll-Offs: 24, 48, & 96 dB/octave
  Responses: Butterworth, Bessel, Linear Phase, RC
  Passband Gains: 0, 20 dB
- **REMOTE PROGRAMMABILITY**—*A ROCKLAND EXCLUSIVE!*

Multi-Channel Anti-Aliasing Filter: System 816



- ■ **FOR AUTOMATED DATA ACQUISITION AND SIGNAL ANALYSIS SYSTEMS**
- ■ **DIRECT INTERFACE WITH COMPUTER, PROGRAMMER OR SWITCH CLOSURES**
- ■ **PLUG-IN CARDS PROVIDE UP TO 16 INDEPENDENT FILTER CHANNELS IN 5¼″ HIGH PANEL**
- ■ **LOCAL, REMOTE, AND ON-CARD PROGRAMMING OF CUTOFF FREQUENCY**
- ■ **CUTOFF FREQUENCY RANGE:** 01 Hz to 150 KHz
- ■ **FUNCTIONS:** Low pass, high pass, bandpass, band reject
- ■ **RESPONSES:** Butterworth and Bessel
- ■ **ROLL-OFF:** 48 dB/octave/channel
- ■ **OUTPUT SIGNAL:** 20 volts p-p
- ■ **PASSBAND GAIN:** 0 dB
- ■ **IMPEDANCES:** 1 Meg input, 50 ohm output
- ■ **DYNAMIC RANGE:** 80 dB

New! Higher Performance, Lower Cost!

DUAL HI/LO: Models 452 and 852

Frequency Range: 0.01 Hz to 111 KHz
Roll-Off: 24 dB/octave/channel (452) 48 dB/octave/channel (852)
(Cascading channels doubles roll-off)
Responses: Butterworth, Linear Phase
Passband Gains: Selectable 0, 20 dB.

VARIABLE ANALOG: Models 1100 and 1200

Frequency Range: 10 Hz to 1.1 MHz **Roll-Off:** 24 dB /octave
Responses: Butterworth and Bessel **Passband Gain:** 0 dB.

PROGRAMMABLE DUAL HI/LO: Series 1500

Frequency Range: 0.001 Hz to 111 KHz
Roll-Off: 24 dB/octave/channel (Cascading channels doubles roll-off)
Passband Gain: 0, 20 dB. **Responses:** Butterworth, RC.
Programming: Local and/or Remote of all Functions
Programming options: 02; 1-2-4-8 BCD positive logic,
03; 1-2-2-4 BCD positive logic.

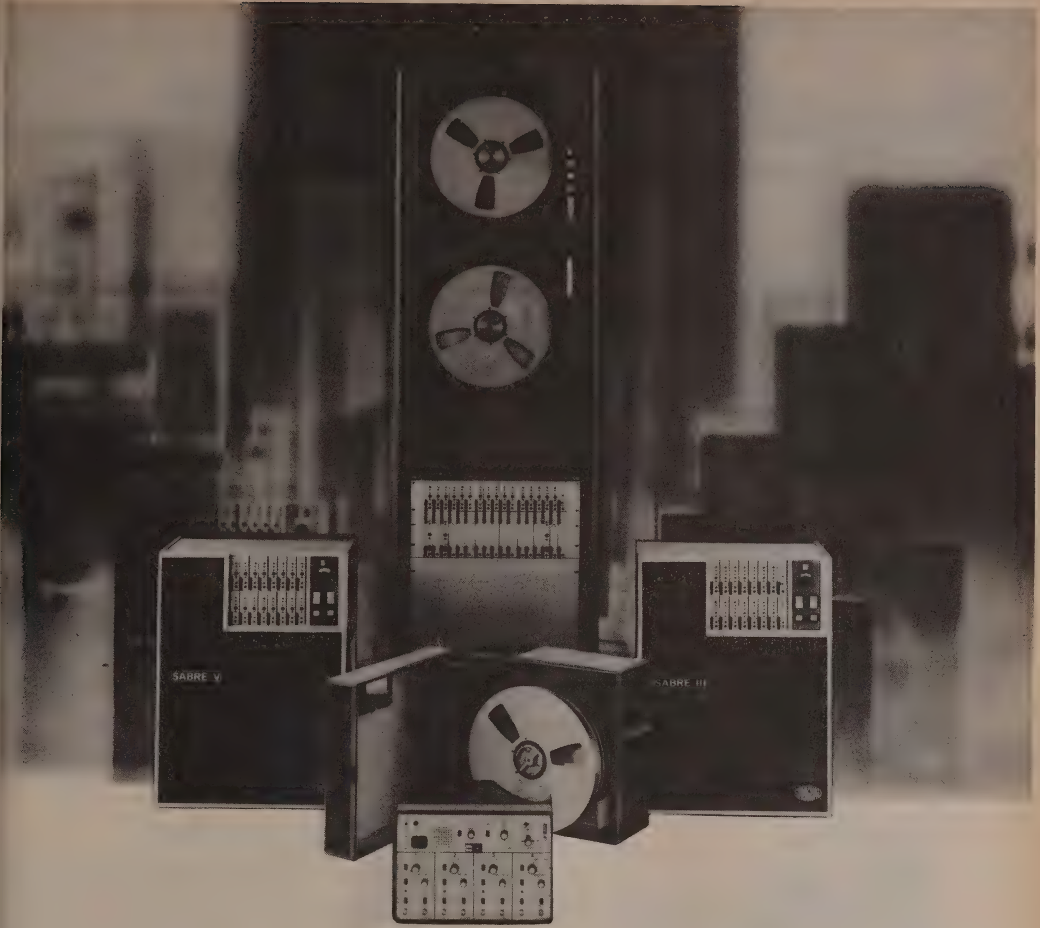
Rockland Systems Corporation 230 W. Nyack Road, West Nyack, New York • (914) 623-6666 • TWX 710-575-2631

The 70-lb. Sabre VI: It's a giant leap beyond any other small, high performance IRIG analog tape recorder/reproducer. Records at 8 electrically selectable speeds: 120 ips through 15/16 ips; reproduces at any 3 electrically selectable speeds; records from 15.3 minutes at the highest speed to 32.8 hours at the slowest on 14" reels. Remote speed selection and LED footage counter. LED bar data monitor. Let us give you full details.

SANGAMO RECORDERS

THE INNOVATORS IN TAPE INSTRUMENTATION
Sangamo Electric Company
Data Systems
P.O. Box 3347 • Springfield, Illinois 62714
(217) 544-6411

Introducing the carry-in recorder reproducer that will carry-on for 32.8 hours!



We haven't discovered how many recorder/reproducers are in our line of 5!

The ultimate number seems unlimited because each of our recorder/reproducers is designed and built to adapt to an amazing variety of functions. The basic five range from the 25 lb. Tandberg TIR series to the only IRIG all-band portable tape recorder on the market to the 48 channel Sabre IV. Each is designed and built to exceed industry standards for accuracy—and to meet challenges. Don't ask what a Sangamo recorder does—just say what you want it to do.

For information write: Sangamo Electric Company, Data Systems, P.O. Box 3347, Springfield, Illinois 62714,(217) 544-6411. Telex 406-421. Sales and service representatives world wide.

SANGAMO RECORDERS

Simpson®

INSTRUMENTS THAT STAY ACCURATE

TEST EQUIPMENT

260® SERIES 6 VOM

Fast, accurate measurements of 27 popular ranges. Direct dial reading of Amp-Clamp ranges. External access battery and fuse compartment. Multi-purpose test leads with combination probe and alligator clips. Two batteries supplied — one 9V, NEDA 1604 and one 1.5V "D" cell, NEDA 13F. Rugged taut band movement, varistor protected. Complete with batteries, test leads and manual **$75.50**

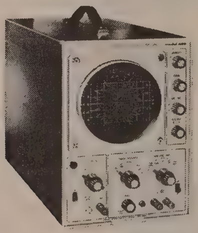
260 SERIES 6P VOM Circuit overload protected. Reset pushbutton releases when overload exists. Will not reset until overload is eliminated. With batteries, test leads and manual **$115.00**

260 SERIES 6M With mirror scale **$78.50**

260 SERIES 6XL VOM

For the special needs of the solid-state electronics industry. 33 ranges with extra voltage, current, resistance and low-power ohms functions. Extra shock and drop resistant construction. High impact, custom-molded panel and case. Extra large viewing area with color-keyed scales. **Plus,** all the features of the 260 Series 6. Complete with batteries, test leads and manual **$90.00**

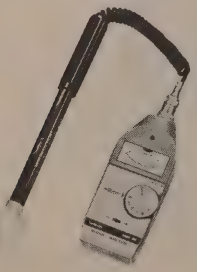
260 SERIES 6XLP Circuit overload protected — same as 260-6XL. With batteries, test leads and manual **$125.00**



MODEL 455 OSCILLOSCOPE

General purpose 5″ scope. DC coupled to 10 MHz. For color TV servicing and industrial applications. Amp/VECTOR display . .. R-Y, B-Y inputs. 10 mV/cm to 5 V/cm vertical sensitivity — 300 mV/cm horizontal sensitivity. Accepts scope camera and light hood. Low parallax, high contrast graticule. 1 kHz square wave calibration signal. High linearity sweep with automatic sync and retrace blanking — 15.75 kHz for TV work. Supplied complete with all front and rear controls, shielded input cable, 5-foot line cord and manual **$325.00**

Low capacitance 10 to 1 probe, Catalog No. 07548 .... **$17.50**



MODEL 380 MICROWAVE LEAKAGE TESTER

Direct reading, battery-operated, portable instrument for accurate measurement of potentially dangerous radiated microwave energy leakage. Complies with HEW standards in Federal Register, Vol. 35, Oct. 1970. Compact, completely self-contained. Probe attaches to top of instrument. High torque indicating movement with shock resistant, taut band suspension moving coil system. Easily accessible battery compartment. Built-in tripod mount. Rugged, high-impact carrying case supplied — holds Model 380 and all accessories. Complete with case, probe, foam spacer, two 9V batteries and manual **$195.00**

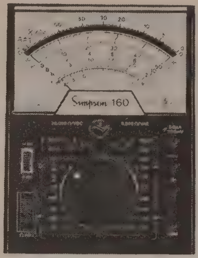
TEST EQUIPMENT

Simpson®

INSTRUMENTS THAT STAY ACCURATE

MODEL 160 HANDI-VOM



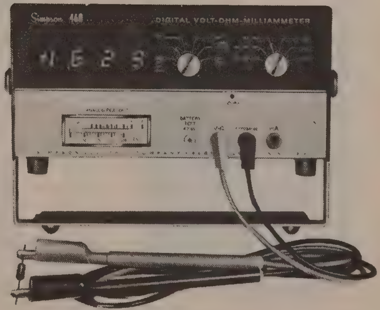
Drop and shock resistant case and meter. ±2% DC and ±3% AC accuracies. 3$\frac{5}{16}$" wide and only 12 ounces in weight, yet has the accuracy and sensitivity of a full size VOM. Taut band movement features outstanding repeatability and freedom from stray magnetic fields. Movement varistor protected against 2,000 times overloads. Built for today's VOM needs, including solid-state circuit testing, the 160 has 0.25 DCV range. Complete with test leads, batteries and manual.. **$65.00**

MODEL 360 DIGITAL VOM

Portable — AC line or self-contained battery operation. 3½ digit, non-blinking, auto-polarity, 0.33" LED display. 29 popular ranges including low-power ohms. Measures AC/DC voltage, current and resistance. Analog indicator scans nulls and peaks. Analog output permits monitoring input signal with chart recorder. Solid state IC design provides compactness with high reliability and low power dissipation. Complete with test leads, AC line cord and manual (less batteries).. **$325.00**

30 KV DC Probe, Catalog No. 00167 .... **$29.00**

MODEL 460-2 PORTABLE DMM



Unbeatable portability and range coverage. Highly accurate, compact, lightweight, multi-use VOM for lab, in field or general testing. 0.1% accuracies for DCV measurements. 3½ digit, non-blinking, auto-polarity 0.43" LED display. Automatic blanking on non-significant zeros. 26 popular ranges. Analog display with both linear and dB markings. AC line or self-contained battery operation. A single digital LSI module achieves high reliability, low power dissipation and compactness. Complete with test leads and manual (less batteries) **$395.00**
30 KV DC Probe, Catalog No. 00159 .... **$29.00**

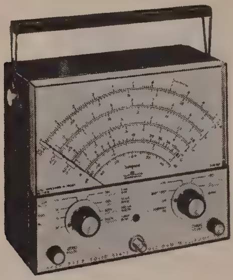
TEST EQUIPMENT

MODEL 314 SOLID-STATE FET VOM

Battery operated. Completely portable. Measures low power and conventional ohms. Voltage ranges have 10 MΩ and 100 MΩ input impedances. AC and DC ranges from 10 μA F.S. 58 ranges available. 7-inch anti-parallax mirror scale provides exceptional readability. Complete with X1, X10 (AC/DC/Ohms) probe #00194, a $33.00 value, batteries and manual **$220.00**

30 KV DC Probe, Catalog No. 00196 .... **$22.00**

RF Probe (10 kHz - 250 MHz, ±1 dB) Catalog No. 00193 .... **$13.75**



MODEL 313 SOLID-STATE FET VOM

11 MΩ DC input. Battery operated. Extra high impedance: 10 MΩ AC and DC. Operates 300 hours on a single set of batteries. All voltage ranges fully overload protected. Large, easy-to-read 7" scale. Built-in "battery check" switch. Self-shielding movement. Complete with AC/DC probe, batteries and manual **$155.00**

30 KV DC Probe, Catalog No. 00192 .... **$22.00**

RF Probe, Catalog No. 00193 .... **$13.75**

MODEL 303-3XL SOLID-STATE FET VOM

For field and factory electronic servicing as well as for design and components testing. FET, IC and LED are coordinated in an all solid-state circuitry to achieve high input impedance, high sensitivity and drift-free performance. High impact, shock resistant case. Conventional and low-power ohms selection. Automatic LED polarity and power-on indication. AC line or battery operation. 120-220V AC charger supplied. Complete with probe, test leads, battery, charger and manual **$165.00**

30 KV DC Probe, Catalog No. 00074 .... **$23.25**

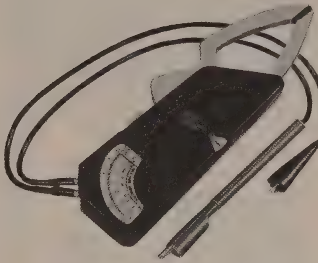
INSTRUMENTS THAT STAY ACCURATE

AMP-CLAMP® MODELS 294, 295, 296



For faster, easier locating of grounds and shorts in motors, relays, transformers and control circuits. Load balance tests and AC current measurements are made with Amp-Clamps without equipment shut-down or power line interruption.

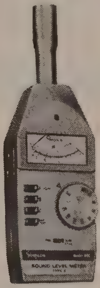
Model 294 Ammeter measures AC current, complete with manual **$43.00**

Model 295 Volt-Ammeter measures AC current and voltage. Complete with test leads and manual **$50.00**

Model 296 Volt-Ohm-Ammeter measures AC current, voltage and resistance. Complete with test leads, one 1.5V AAA alkaline battery, ¼-Amp Type 8AG fuse and spare and manual **$71.50**

Model 151 Line-Splitter with 2-ft. line cord, 3-prong plug and manual, Catalog No. 00534 .... **$7.15**

MODEL 886 SOUND LEVEL METER TYPE 2



Quickly, accurately measures noise and sound levels in factories, offices, stores, theaters, auditoriums, construction sites, studios. Simple, easy to operate. Helps you meet stringent OSHA and Walsh-Healy specifications for noise control. Meets the requirements for IEC 123 and ANSI specifications S1.4-1971 for Type 2 General Purpose Sound Level Meters. Rugged, all solid-state reliability, battery operated. Full coverage 40 to 140 dB, with special 85 to 115 dB, fast or slow OSHA range with standard A, B, C weightings selection. High impact case. Omnidirectional microphone. Complete with batteries and manual **$250.00**

MODEL 884 SOUND LEVEL METER TYPE S2A

50 to 130 dB range. Conforms to ANSI S1.4-1971 Type S2A. Rugged, high impact case. Solid-state construction. Complete with batteries and manual.... **$195.00**

MODEL 890 CALIBRATOR

For calibrating Simpson Models 884 and 886 Sound Level Meters and other microphone-instrument systems. Hand-size, self-contained, single switch control, built-in LED battery test indicator **$100.00**

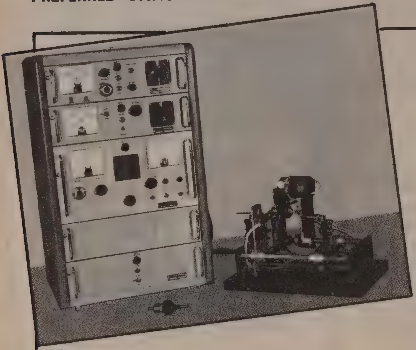
TWX 910-830-6972



AUTOMATIC ARMATURE TESTERS — Series 930 equipment is high-speed fixed program self-sequencing equipment, particularly useful for in-line test stations. Test program includes low-level resistance tests, particularly effective for detection of poor connections and opens; high-level surge tests for detection of internal insulation weaknesses and shorts; and Hi-Pot tests. Systems intended for testing double-insulated armatures can also be used on single-insulated parts. Hi-Pot test levels on double-insulated systems are independently adjustable for iron/shaft and iron/com tests. Consequential tests from com to shaft is sum of voltages applied from iron-to-com and iron-to-shaft. Alternately operative dual-fixture systems provide maximum production rates as idle fixture can be unloaded and loaded while opposite fixture is testing.

Series 920 Analytical Type Equipment also available. Incorporates growler tests as well as the above tests. Contact factory for information.

By substituting the proper fixtures, Automatic Armature Testers can be used for testing motor fields. When used in this manner, poor connections and opens will be detected, as will be internal insulation weaknesses, reversed coils (but not reverse polarity on entire field) and grounds.

STK. #AAT-21 SERIES 930 EQUIPMENT
0/2000 VAC HI-POT TEST
0/1500 VP SURGE TEST
FOR SINGLE-INSULATED PARTS
SINGLE-FIXTURE
SYSTEM $4,844.00

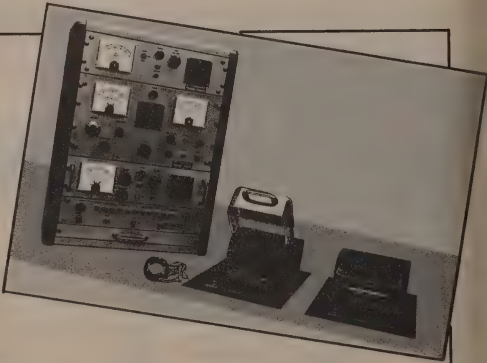
STK. #AAT-22 SERIES 930 EQUIPMENT
0/2000 VAC HI-POT TEST
0/1500 VP SURGE TEST
FOR SINGLE-INSULATED PARTS
DUAL-FIXTURE STYLE ... $6,625.00

STK. #AAT-31 SERIES 930 EQUIPMENT
0/2000 VAC HI-POT TEST
0/1500 VP SURGE TEST
FOR DOUBLE-INSULATED ARMS.
SINGLE-FIXTURE
EQUIPMENT $5,117.00

STK. #AAT-32 SERIES 930 EQUIPMENT
0/2000 VAC HI-POT TEST
0/1500 VP SURGE TEST
FOR DOUBLE-INSULATED ARMS.
DOUBLE-FIXTURE
STYLE $6,898.00

AUTOMATIC STATOR TESTERS — Series 910 Systems are applicable to all types of wound stators from salient-pole portable tool types through split-phase and 3-phase fractional horsepower types. Program includes dual voltage Hi-Pot; winding resistance, programmable for two different values; winding polarity; and surge test.

Series 930 is fixed-program, self-sequencing equipment intended primarily for the testing of salient-pole stators of the type used in portable tools, mixers and similar appliances. These systems apply Hi-Pot tests to ground; resistance test; and surge test. The surge test will detect internal insulation weaknesses and reversed coils. However, it will not detect reverse polarity on the entire stator.



STK. #AST-01 SERIES 910
0/2000 VAC HI-POT TEST
0.1/1,111-OHM RESISTANCE TEST
POLARITY (ROTATION) TEST
0/1500 VP SURGE TEST
SINGLE-FIXTURE SYSTEM ...$9,021.00

STK. #AST-02 SERIES 910
0/2000 VAC HI-POT TEST
0.1/1,111-OHM RESISTANCE TEST
POLARITY (ROTATION) TEST
0/1500 VP SURGE TEST
DUAL-FIXTURE SYSTEM $11,056.00

STK. #AST-31 SERIES 930
0/2000 VAC HI-POT TEST
0.1/1,111-OHM RESISTANCE TEST
0/1500 VP SURGE TEST
SINGLE-FIXTURE SYSTEMS .$5,310.00

STK. #AST-32 SERIES 930
0/2000 VAC HI-POT TEST
0.1/1,111-OHM RESISTANCE TEST
0/1500 VP SURGE TEST
DUAL-FIXTURE SYSTEMS $7,354.00

Prices listed here include guarded fixtures, but do not include tooling. Interchangeable tooling for stators up to 7″ diameter will be quoted on request. Optional features available in the above equipment include turns count test and high or low-level continuity test. Contact factory for information.

SPRAGUE TEST EQUIPMENT

TO-6A TEL-OHMIKE® CAPACITOR ANALYZER

The TO-6A TEL-OHMIKE capacitor analyzer is a must for checking all capacitors. It is a moderately priced instrument with laboratory quality and accuracy — the highest accuracy of any instrument of its type available!

- **CAPACITANCE BRIDGE** measures up to 2000 μF. Five overlapping ranges include exclusive 1 pF to 100 pF range. Special shielded transformer for bridge voltage. Extremely low AC voltage; 1.35 volts for electrolytic capacitors, 2.85 for all others, permits safe testing of all low voltage capacitors.
- **INSULATION RESISTANCE** of paper, ceramic, and mica capacitors rated 25V and higher directly read on large meter. No guessing with neon lamps. Dual range—to 10KMΩ@ 25V for low voltage units . . . to 50KMΩ@ 150V for higher voltage components. Fast charge feature speeds testing of high capacitance units.

- **LEAKAGE CURRENT** of electrolytics measured directly on meter. Four ranges; .06, .6, 6, and 60mA. Three ranges of DC voltage (continuously variable within each range) permit testing capacitors at exact rated voltage up to 600 volts.
- **POWER FACTOR** of electrolytics, up to 50% measured by Wien Bridge.
- **METER PROTECTOR** of solid-state design allows severe accidental over-loads without burn-outs.
- **MAGIC-EYE TUBE** simplifies bridge balancing for capacitance and power factor measurements. High gain amplifier provides greatly improved sensitivity.
- **PUSH-BUTTONS** color-keyed for instant range selection.
- **MODERN CASE:** Silver-grey hammertone finish, panel is charcoal grey with highly contrasting white designations. Measures 8⅞" high, 14⅝" wide, 6⅛" deep. Weight only 13 pounds.

MODEL TO-6A .... **115 VAC/50-60 cy**
MODEL TO-6AS.......... **115-230V/50 cy**

Call Your Sprague Distributor for Current Prices

TEL-OHMIKES FOR RACK MOUNTING

Electrically identical to TO-6A and TO-6AS. These models have a standard 19"w. x 10½"h. panel so that it can be mounted in standard relay racks.

MODEL TO-6ARM..........**115 VAC/50-60 cy**
MODEL TO-6ASRM..........**115-230 V/50 cy**

Call Your Sprague Distributor for Current Prices

M-3 MIKE-O-METER® MOTOR CAPACITOR ANALYZER

- **ACCURATELY MEASURES** capacitance and power factor of any motor-starting, motor-running capacitor or any other capacitor within the range of .1 μF to 1000 μF. Uses the highly reliable Wien Bridge method.
- **SIMPLIFIES** capacitor testing for the air conditioning, refrigeration, and electric motor technician.
- **DIRECT READINGS** on highly visible, calibrated scales.
- **MAGIC EYE** tube makes bridge-balancing easy.
- **SAFE OPERATION** is assured by the automatic discharge of the capacitor when test switch is released. The M-3 is transformer operated. Instrument case is isolated from AC line.
- **BUILT FOR SERVICE** and a long dependable life, whether in your shop, or on the job in the field.
- **COMPONENTS IN THE M-3** were selected to provide reliability. Highest quality capacitors and resistors are used. The power transformer is specially treated to resist moisture.
- **ELECTRON TUBES** resistant to shock and vibration were chosen for the M-3. They can be obtained from any electronic parts distributor.
- **ALSO CHECKS** capacitors for open, shorted, or intermittent conditions.
- **SLOPING PANEL** and recessed eye designed to improve visibility, especially when working in lighted areas.
- **STEEL CASE** measures 9 inches high, 6 inches wide and 5¾ inches deep. Has folding metal carrying handle. Weighs only 6 pounds.
- **ATTRACTIVELY FINISHED** in blue hammerloid. Panel is light grey with black markings.

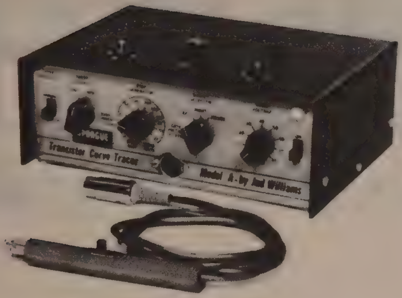
SPRAGUE TEST EQUIPMENT

MODEL A TRANSISTOR CURVE TRACER



SPECIFICATIONS

V_{CE} (voltage, collector-to-emitter): Variable from 0-80V peak. Full wave rectified pulsating DC @ 120Hz.

I_B (base current): Six steps displayed simultaneously. Variable from 10μA/step to 1mA/step (5mA max.) in a 1-2-5 sequence.

V_{GS} (gate-source voltage): Six voltages displayed simultaneously with ranges of 0.2V/step, 0.5V/step, and 1/Vstep.

Dissipation limiting: Collector current limited by 2200Ω load resistor.

Collector current sensing resistor: 100Ω.

Staircase generator: Six steps, 1V/step.

Bias adjustment: Staircase generator offset control establishes zero base line location for bipolar transistors and identifies pinch-off voltage of FETs. Variable over a range of 5V.

Power: 105-125V, 50/60Hz.

Size: 8+″ W. x 3½″ H. x 6½″ D.

Weight: 3 lbs. 5 oz. (shipping wt. 4 lbs.)

. . . tests semiconductors on-board!

One of the best solutions to the problem of transistor and/or printed wiring board damage while removing and re-soldering transistors for test purposes is on-board testing by using **Signatory Pattern™** techniques.

WHAT IS A SIGNATURE PATTERN™? It is a scope readout of the dynamic impedance of a transistor. This unique method eliminates the uncertainties inherent in conventional test methods. With the Model A, the transistor under test is actually turned on, not merely made to oscillate as with most test techniques. The "Signature Pattern" method provides the user with these definite advantages: (1) Quick, decisive, "good-or-bad" tests of suspect transistors; (2) Indication of defective components within transistor circuits even when transistors are good; (3) Elimination of damage to transistors and other components during test; (4) Safe testing with system power removed.

QUICK, SAFE, ACCURATE TESTS. Connect the Model A to any general-purpose oscilloscope and you have the most complete semiconductor testing facility possible at a budget price. You can determine at a glance such parameters as gain, linearity, saturation, avalanche point, and leakage. No zeroing or balancing is necessary. The Model A also performs the all-important breakdown voltage test. It will identify a transistor type as either silicon or germanium. In addition, it will analyze a field-effect transistor as either junction-type or insulated gate, as well as determine the pinch-off voltage.

SIMPLE, EASY-TO-USE. All tests made with the Model A are non-destructive, even if performed incorrectly. You cannot damage a transistor – even if it is plugged in backward! The Model A is short-circuit-proof, is generally immune to external effects, and supplies its own test signals. Controls are designed for easy interpretation, and extensive knowledge of semiconductors is not required in order to use the instrument effectively. Working with the Model A is an education in itself.

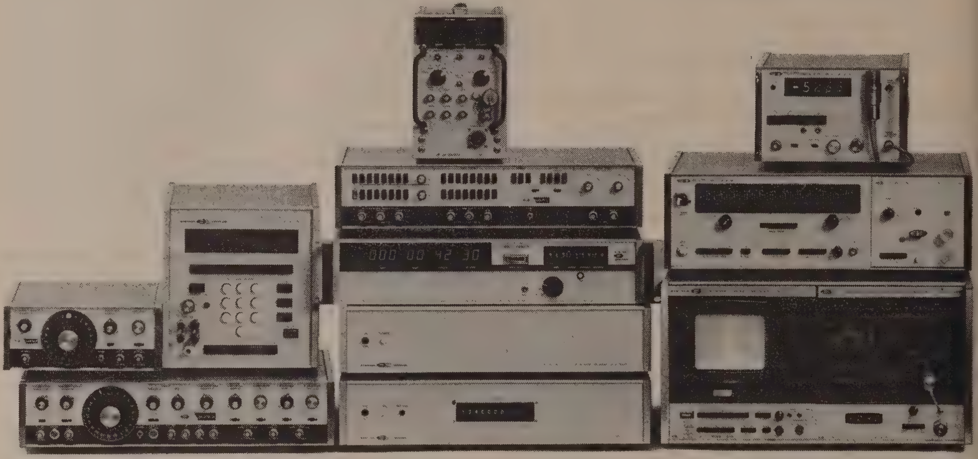
SYSTRON -DONNER



Systron-Donner manufactures one of the industry's broadest ranges of electronic instrumentation, systems and components. This year an exceptional number of new products will be introduced by S-D's various divisions. All of these high performance products are described in meticulous detail in our 1975/76 general instrument catalog . . . free for the asking. In addition, supplemental catalogs on certain product lines and descriptive brochures on all product lines may be requested.

S-D's 256-page Instrument Catalog covers:

MEASUREMENT. Counters, low frequency to microwave; DVM/Multimeters, 3½ digit to 5½ digit for bench, field and systems; digital power meter; digital L-C meter; NMR and Hall effect gaussmeters.

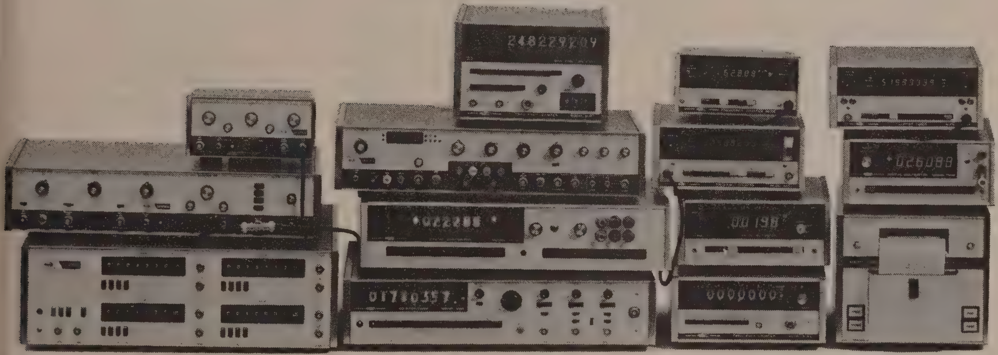
SIGNAL SOURCES. Pulse generators; data generators, function generators, sweep generators, microwave frequency synthesizers, time interval generators.

TESTERS. VERSATESTER™, a multi-function "test lab" in one self-contained low cost unit; CATSystems, computer-automated test systems for PC boards and instruments. Digital transitional redundancy tester (TRT).

TIMING. Time code generators, readers, tape search and control units, digital clocks. For a more detailed description of time code products, request catalog.

1975:

Year of the new product



ANALYZERS. Spectrum analyzers, audio to microwave, waveform analyzers.

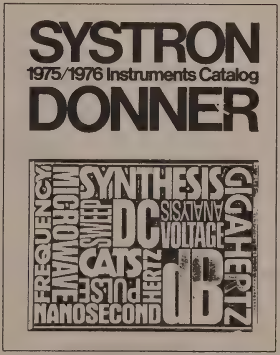
VOLTAGE STANDARDS. Precision digital voltage sources.

POWER SUPPLIES. DC laboratory, bench and OEM designs (request separate "Power Supply" catalog).

PRINTERS. General purpose digital printers.

COMPUTERS. Analog; hybrid simulators, DFG's and computing modules.

MICROWAVE COMPONENTS. A wide selection of waveguide and coax items covering DC to 140 GHz. Request separate 112-page catalog.



SYSTRON
1975/1976 Instruments Catalog
DONNER

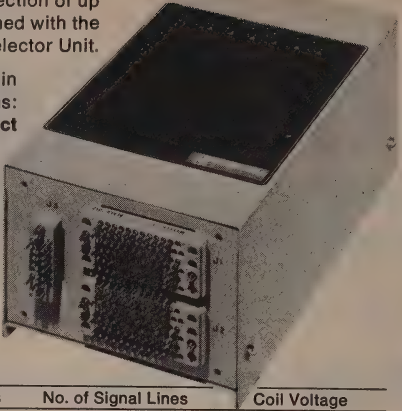
Abroad, contact Systron-Donner GmbH, Munich; Systron-Donner Ltd., Leamington Spa, U.K.; Systron-Donner S.A., Paris (Le Port Marly); Systron-Donner Pty., Melbourne.

SYSTRON DONNER

2900 Series Tbar® Automatic Selector Units

Both random and sequential selection of up to 128 positions is accomplished with the Series 2900 Automatic Selector Unit.

The Series 2900 is available in two basic configurations:
1. TREEselect **2. NORselect**



Configurations

No. of Trunk Lines	No. of Signal Lines	Coil Voltage
1 or 2*	16, 32, 64 or 128**	6, 12, 24, 28, 48, 110 VDC*** and 115 VAC

*Selector units with two trunk lines can be specified with twisted pair wiring.
**128 signal line units are available with single trunk lines only.
***Magnetic latching units are available with DC voltages only.

1.0 Mechanical Specifications
- 1.1 **Construction:** The unit consists of a group of T-Bar Relays that are mounted on a common frame, wired together and to input-output connector(s). Each relay has its own T-Bar connectors for ease of maintenance.
- 1.2 **Contact Material:**
  - 1.2.1 **800 Series** Fine silver goldplated 50 millionths min. (bright finish)
  - 1.2.2 **900 Series** Movable contact (common). Fine silver button goldplated, bright silver diffusion bond. Then 5 millionths rhodium plate, then gold, 80 millionths min. Bright finish. Fixed contact (N. C. and N. O.) bifurcated: goldplated 200 millionths min.
- 1.3 **Mechanical Life:** 30,000,000 operations @ 20 cycles per min.
- 1.4 **Finish:** Painted gray per MIL-E-15090B
- 1.5 **Identification:** Pin identification and part number located on enclosure.

2.0 Electrical Specifications:
- 2.1 **Relay Coil Voltage:** 6, 12, 24, 28, 48, 110VDC or 115VAC. All continuous duty.
- 2.2 **Relay Coil Power:** Consult factory.
- 2.3 **Contact Rating:** Microvolts to 600VDC; Resistive load 3 amps @ 115VDC or 28VDC make or break. Consult factory for higher ratings and low level ratings. 1000VDC units available.
- 2.4 **Operate time:** 30 milliseconds max. to set up any relay. (for shorter operate time consult factory)
- 2.5 **Release time:** 10 milliseconds max. to release all relays. With diode suppression release time is 40 milliseconds max.
- 2.6 **Insulation Resistance:** 1000 megohms min. @ 30°C tested between circuits at 500VDC (up to 10,000 megohms min. available, on request).
- 2.7 **Contact Life:** @ 20CPM (derate 50% for relay or solenoid coil loads)
  - 2.7.1 @ 100 ma: 20,000,000 cycles
  - 2.7.2 @ 150 watts, 3 amps resistive: 200,000 cycles
  - 2.7.3 @ 3 amps, 115VAC Resistive: 100,000 cycles
- 2.8 **Dielectric Withstanding Voltage:** 1000 VAC between circuits and any circuit to enclosure.
- 2.9 **Relay Coil Overvoltage:** 120% of rated voltage continuous duty.

3.0 Available on Special Order:
- 3.1 For extra low level switching applications refer to factory.
- 3.2 **Magnetic Latching**
- 3.3 **Extra High Insulation Resistance:** 10,000 megohms min. Consult factory.
- 3.4 **Other coil voltages available:** Consult factory.
- 3.5 **Lock up circuit:** Consult factory.
- 3.6 **Drivers:** Transistorized or TTL compatible.
- 3.7 **Transient Suppression:** Diode suppression available.
- 3.8 **1000 VDC contact rating**
- 3.9 **Self scan capability**

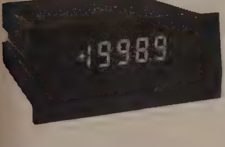
LIQUID CRYSTAL DISPLAY DIGITAL PANEL METERS

All of these high performance DPMs have been designed around the most advanced and reliable display ever developed! "Field Effect" Liquid Crystal displays have bigger, more readable numbers and indicators, and only one "active" element — the liquid crystal material itself — to completely eliminate any catastrophic failure modes that can cause the loss of any single element in the display! **There are no filaments or "gas discharge" tubes to burn out!** Complementary custom designed MOS circuitry provides balanced AC drive voltages to extend the life expectancy to over **five years!**

Model TA 310 4½ DIGITS 6 Voltage Ranges 8 Current Ranges



The TA 310 offers full 4½ digit performance and reliability at a price you would expect to pay for a lesser quality 3½ digit unit. Now you can upgrade your instrument performance and actually lower the cost. The Model TA 310 is ideally suited to systems and display-only applications where exceptional accuracy and resolution are required.

Model TA 305 3½ DIGITS 6 Voltage Ranges 8 Current Ranges

Compare the exceptional performance, quality and price of this 3½ digit DPM. With an impressive repertoire of standard and optional features, there's surely a configuration that will precisely match the requirements of your application. The TA 305 will enhance the quality appearance of your product, substantially reduce your initial investment and lower the service cost to you and your customer. Try it. There isn't a better value in 3½ digit DPMs available anywhere.

OPTIONS

Other AC Power Supplies: 220 VAC (Option A1), 240 VAC (Option A2), 100 VAC (Option A3), 125 VAC (Option A4), +5 VDC (Option A5).

A low voltage AC Power Supply that operates from 10.5 VAC, 50-60 Hz is also available for use where UL requirements apply. Contact factory for availability and specifications.

40 Millisecond Measurement Time — Used with 50 Hz power (Option A6)

Input Filter — adds 20 db Noise Rejection. (Option A7)

Fully Isolated Parallel BCD — (Option A8)

Behind-the-Panel Mounting — (Option A9)

Screw Terminal Input/Output — (Option A10)

Reflective Display — Reduces power requirements (Option A11)

Colored Display Characters — (Option A12)

Special Reading Rates — (specify) (Option A13)

GENERAL SPECIFICATIONS

Analog Input
Configuration — Two wire floating input
Polarity — Bipolar, automatic

Display
Type — Field Effect transmissive liquid crystal, single plane, non-blinking, 7-segment. (For reflective display, see Option A11)
Digits — 4½ (±19999) digits, .5″ high (Model TA 310)
3½ (±1999) digits, .5″ high (Model TA 305)
Decimal Point — 4 selectable locations
Color — White on black background (For colored numerals, see Option A12)
Overflow Indication — All display segments flash

A-D Conversion
Type — **Poly-Tek™** Conversion System
Measurement Period — 33.3 milliseconds (see Option A6)
Reading Rate — 2 readings/second or by external read command (For faster rates, see Option A13)

Noise Rejection
Common Mode Rejection — Greater than 80 db, DC to 60 Hz
Common Mode Voltage: 220 V RMS relative to Earth Ground (or digital low with Option A8)
Normal Mode Rejection — 40 db at line frequency (60 db with input filter Option A7)

Response Time — 10 ms to 0.1% for full scale step input

Calibration — Zero and Full Scale Screwdriver adjustments accessible from front by removing snap-on bezel

Outputs
BCD Data — Serial, non-isolated. Includes Data, Polarity and Overflow (For isolated parallel outputs, see Option A8)
Clock — 600 KHz, non-isolated (500 KHz with Option A6)

Controls
Decimal Point — Selectable at input connector
External Hold-Read — Holds previous reading until new reading is initiated. Single reading may be triggered

Environmental
Operating — 0°C to +55°C, 80% relative humidity
Storage — 40°C to +85°C

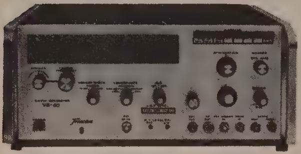
Power — 117 VAC ±10%, 60 Hz, 1.5 watts nominal. With reflective display (Option A11) power reduced to .95 watts nominal (See Options A1, A2, A3, A4 and A5)

Mechanical
Size — 3.880″W (98.55mm) x 1.670″H (42.41mm) x 4.280″D (108.71mm) behind panel, including connector protrusion
Panel Cutout — 3.890″W x 1.682″H ±.010″ (98.80mm W x 42.72mm H ±.25mm)
Case Material — All metal case with high-impact plastic decorative bezel

Mating Connectors (optional accessories)
Standard — Cinch Type 251-15-30-160 or TEKELEC P/N 211002802
For Parallel BCD (Option A8) — Cinch Type 251-18-30-160 or TEKELEC P/N 211002801

Sweep Generators. Spectrum Analyzers. Oscil

Texscan was incorporated on May 10, 1965 to engage in the design and manufacture of instruments and components for the electronic industry. The original line was limited to only a few of the products presently produced and consisted principally of sweep signal generators, display oscilloscopes and various coaxial and microwave components. Today, Texscan offers a complete line from a single source.



VS SERIES - SWEEP/SIGNAL GENERATORS

The VS series sweep/signal generators are completely solid state, low distortion, wide sweep instruments containing sufficient features for wide application in the industry. These include variable sweep rate capability, excellent linearity, with attenuated outputs and have extensive marker capability. The unit shown is the VS-60, and its controls are typical. Controls may be deleted or rearranged on other units. This line includes instruments with extensive tuning range.

Model	Frequency Range
VS-20	500 Hz to 25 MHz
VS-30A	300 kHz to 100 MHz
VS-40A	1 MHz to 300 MHz
VS-50A	5 MHz to 500 MHz
VS-60B	5 MHz to 1000 MHz
VS-80	1 MHz to 1200 MHz
VS-80DH	0.5 MHz to 1200 MHz
VS-90B	5 MHz to 2350 MHz
VS-340	3.6 GHz to 4.3 GHz 5.8 GHz to 6.5 GHz

WB SERIES - SWEEP/SIGNAL GENERATORS

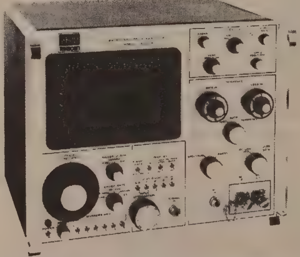
The WB series sweep signal generators are designed to make swept measurements at relatively low cost. They cover the frequency range of DC to 960 MHz in four units: DC to 32 MHz, 4 to 400 MHz, 1 to 500 MHz and 1 to 960 MHz. The unit covering 1 to 960 MHz is a two band unit. The bands are 1 to 500 MHz and 450 to 960 MHz. The instruments are less than one-half rack unit width, approximately 4-3/16 inches high and 12-5/8 inches deep.

SS SERIES - HIGH POWER SWEEP/SIGNAL GENERATORS - 5 WATTS

The SS series utilizes solid state power amplifier output devices. This combination eliminates the costly replacements previously associated with high power tube-type sweep/signal generators. These units produce 5 watts into 50 Ω and are VSWR protected. Frequency range is 1 to 1000 MHz.

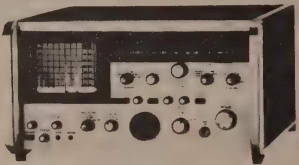
HS SERIES - HIGH POWER SWEEP/SIGNAL GENERATORS 4-10 WATTS

The two units in the HS series are high power, line rate, "hybrid" sweep/signal generators. Both have records of long, reliable service under extreme conditions. These instruments may be operated in either sweep or CW mode. Where special power or frequencies are required, modified HS units are available.



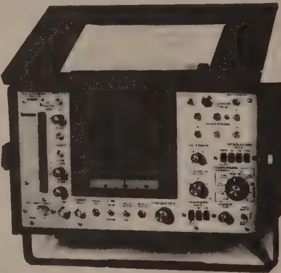
The Model 9650 tracking sweep spectrum analyzer makes possible dynamic measurements of over 100 dB. This technique provides rapid observation of many band pass — band reject responses previously available only on a point-to-point basis. This unique instrument combines the features of a sweep generator, spectrum analyzer, display section, reflection bridge and associated 1 dB step attenuators.

The Ultima 9000 Series and related products mark Texscan's entry into the realm of TV tuner and chassis testing. TV industry sweep instruments are by nature custom designed and the Texscan 9000 Series is fully flexible to meet user requirements.



SPECTRUM ANALYZER AL-60

1 MHz to 3 GHz, solid state,–110 to +30 dBm. Texscan's line of lab spectrum analyzers consists of two models, the AL-40, 1 to 300 MHz, the AL-60, 1 MHz to 3 GHz. Both are designed for maximum reliability and maintainability, accurate frequency and amplitude identification.



PORTABLE SPECTRUM ANALYZERS

The AL-50 family of portable spectrum analyzers provides the user with a rugged instrument for making RF measurements both in the lab and in the field. There are three units in the series — the AL-50, single resolution 4-300 MHz, AL-51 selectable resolution and phase lock, 4-1000 MHz, and the AL-55, 4-350 MHz, with crystal markers and special hum modulation measurement circuitry. These units will operate from an internal 12V rechargeable battery, an AC power converter or 12V vehicular systems. Weighing less than 25 lbs., they are provided with a protective cover and rugged field carrying case with handle.

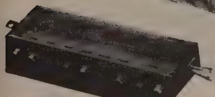
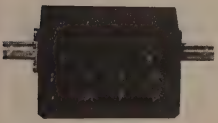
lators. Attenuators. Filters and R.F. Components

DU SERIES OSCILLOSCOPES

Texscan oscilloscopes are sensitive, large screen, solid state, X-Y display units designed to satisfy the particular needs of a production or laboratory testing system using sweep generator techniques. These display units are complete with cathode ray tube, vertical and horizontal deflection amplifiers, video (Z axis) amplifier, and high and low voltage supplies.

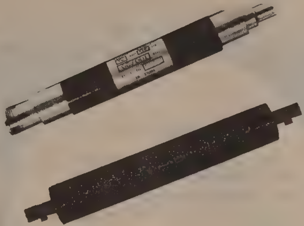




Attenuators — RA Series — Rotary — DC — 4000 MHz, direct reading in dB, 8 attenuation ranges up to 120 dB, 50 to 75 ohm. Texscan offers a complete range of attenuators with steps of 0.1, 1.0 and 10.0 dB, covering attenuation ranges of 1.0, 10.0 and 120.0 dB. Wide selection of connector choices available.

FP Series — Fixed Coaxial — DC — 18 GHz, 2 watt average power, values up to 50 dB.

PA Series — Digitally Programmable — DC — 1250 MHz, 6 millisecond switching speed. Three different units cover 0 — 127 dB in 1.0 dB steps. Each pad represents a single binary digit for easy mating to a digital system.



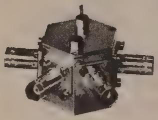
Filters — Tunable Bandpass — 48 MHz to 4 GHz, 3 dB BW, 1% to 10%, 3 and 5 sections. Any single model covers more than an octave.

Bandpass/Lowpass — 10 MHz to 13 GHz. Five different types available, each with its own unique characteristics. Choice of connector style as well as special mechanical designs to fit your packaging requirements, 48 hour delivery.

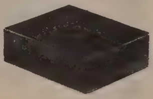
Lumped Component — 5 MHz to 100 MHz, 3 to 8 sections. Miniature size provides freedom in circuit layout, reducing overall package volume. Available in bandpass and lowpass designs.

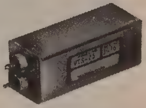
Cavity Bandpass — 30 MHz to 3000 MHz, 2 to 6 sections, 0.2 to 3%, 3 dB BW. Designed to provide low insertion loss at narrow bandwidths.

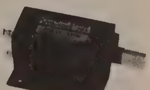
Waveguide — 4 GHz to 18 GHz Bandpass. Custom designs from 0.25 to 10% bandwidths.



RF COMPONENTS	FREQUENCY RANGE
Detectors	100 KHz – 4000 MHz
Minimum Loss Pads	DC – 1000 MHz
Reflection Coefficient Bridges	500 KHz – 2.5 GHz
Terminations	DC – 1000 MHz
RF Coax Switches	DC – 2000 MHz
Voltage Monitors	500 KHz – 4 GHz
Mismatches	DC – 2.5 GHz







Solid State Oscillators — Texscan's seven lines of solid state RF sources span between them 2.5 MHz to 20 GHz and supply RF power up to one watt. Both electronically and mechanically tuned devices are offered. Custom engineered models in all series can be supplied with integral pulse modulators or ovens for crystal stability.

SOLID STATE OSCILLATORS

Frequency Range	Series	Tuning	Tuning Range	Power Range
2.5 MHz - 2 GHz	VTS	Elect.	Up to an octave	200 - 1000 mW
1 GHz - 8 GHz	VTO	Elect.	Up to an octave	20 - 150 mW
10 MHz - 4 GHz	MTO	Mech.	Up to an octave	10 - 1000 mW
4 GHz - 20 GHz	GTO	Mech.	Up to 65%	5 - 1000 mW
4 GHz - 18 GHz	ETO	Elect.	Up to 2500 MHz	10 - 100 mW
32 MHz - 1 GHz	LTO	Elect.	Up to 3 octaves	
VHF - 18 GHz	PMO	Mech.	Up to an octave	0.1 - 500 mW Peak

MAGNETIC INSTRUMENTS

DESIGNED BY THOMAS & SKINNER, INC.

. . . a rugged, sensitive and growing line of magnetic equipment perfect for magnetizing, demagnetizing, measuring and stabilizing permanent magnets in both production and laboratory situations . . .

GAUSSMETERS

The wide line of Thomas & Skinner Gaussmeters shares the following features:

- Magnetic field measurements from 1 Gauss to 100,000 Gauss.
- Output voltage accurate to 10X over range.
- Simple setup and operation with front panel controls.
- Accurate internal calibration.
- Wide range of high linearity Hall probes.

MODEL 7303 - HALL EFFECT

MODEL 7310 - PEAK READING MEMORY

MODEL 7315 - DIGITAL READ-OUT

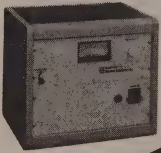
MODEL 7330 - 3-LEVEL COMPARATOR
(MODEL 7320
2-LEVEL COMPARATOR also available)

MAGNETIZERS

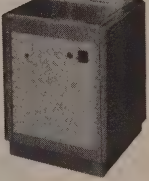
The Thomas & Skinner IMPULSE Magnetizer line features the following:

- High speed production operation.
- Energy levels from 300 to 5400 Joules.
- Low voltage — 425 volts maximum.
- Saturation of all ALNICO-BARIUM FERRITE-RARE EARTH COBALT magnetic materials.
- Continuous meter readout of capacitor voltage.
- Wide variety of fixtures — multi-pole fixtures.
- Control prevents firing below preset level.

Also ½ CYCLE Magnetizers for 110/220/440 v.



MODEL 7515



MODEL 7500

INTEGRATING FLUXMETERS

Fluxmeters by Thomas & Skinner provide:

- Very low drift rate.
- Push button or remote electronic zeroing.
- Up scale and down scale push button drive.
- Simple setup and operation with front panel controls.
- Solid state circuit design.

MODEL 7381

MODEL 7385

(not pictured) provides a digital readout in place of the 5½" taut-band mirror scale meter.
2- and 3-LEVEL COMPARATORS also available.

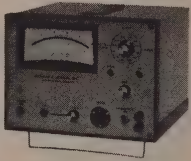
INDUSTRIAL MAGNETIC PROCESSING EQUIPMENT

This innovative Thomas & Skinner line provides magnetizing, measuring, stabilizing and demagnetizing systems built to NEMA 12/JIC specifications. These systems, including automatic parts feeding, are designed to customer specs.

7100 SERIES

MAGLAB

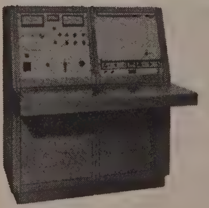
Thomas & Skinner's perfect answer for a dual-purpose test instrument for use where an Integrating Fluxmeter and a Hall Effect Gaussmeter are needed . . . but not simultaneously.



MODEL ML-40

MAGNETIC BRIDGE RECORDING PERMEAMETER

Designed by Thomas & Skinner to serve as one of the most versatile and accurate magnetic measuring instruments in the field, using a balanced magnetic bridge yoke system.



MODEL PR1000

When it comes to MAGNETIC INSTRUMENTATION, Thomas & Skinner can meet your every need from a flexible range of existing designs, modified designs, custom designs . . . just for you.

Since 1901
specialists in the manufacture of ALNICO PERMANENT MAGNETS and EI TRANSFORMER LAMINATIONS

MAGNETIC INSTRUMENTS

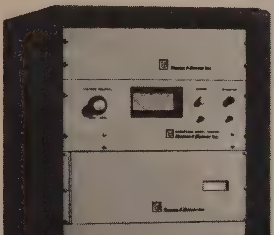
DESIGNED BY THOMAS & SKINNER, INC.

. . . a rugged, sensitive and growing line of magnetic equipment perfect for magnetizing, demagnetizing, measuring and stabilizing permanent magnets in both production and laboratory situations . . .

HIGH ENERGY MAGNETIZER

Designed for saturation of RARE EARTH COBALT MAGNETS.

- Energy level — 12000 Joules.
- 10-second recycle time.
- Continuous voltage control from 50 to 900 volts.
- Wide variety of fixtures.
- Safety interlocks.



MODEL 7500/900

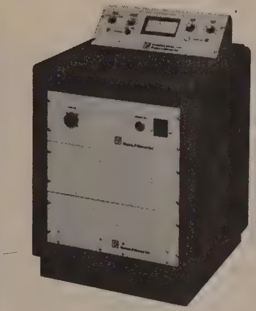
Since 1901

specialists in the manufacture of ALNICO PERMANENT MAGNETS and EI TRANSFORMER LAMINATIONS

HIGH ENERGY STABILIZER

Designed for stabilization/calibration of RARE EARTH COBALT MAGNETS.

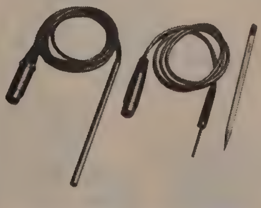
- Energy levels from 300 to 5400 Joules.
- Recycle rates from 2 pulses per second.
- Automatic ramping.
- Used with the Model 7330 Gaussmeter for automatic calibration.



MODEL 7161

HALL EFFECT PROBES

- Linearities from 0.1%.
- Transverse probes from 0.012 inch thick.
- Axial probes from 0.065 inch diameter.
- Hall elements from 0.040 x 0.060 inch.
- Special measurement fixtures and probes available.



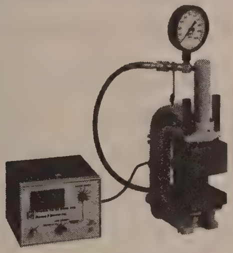
TRANSVERSE / AXIAL PROBES

EI TRANSFORMER LAMINATIONS

- Orthosil® 4-mil, 6-mil and 29 GA.
- Radio 3, 4, 6 non-oriented Laminations, 26 and 29 guage.
- 3 Phase Laminations EI ¼ through EI 3.600.
- Wide Window™ Laminations.
- Cruciform Laminations.
- Shunt and I Laminations.
- Single Phase Laminations EI ⅜ through EI 5.
- Centra-Gap™ Laminations.
- Vari-Gap™ System.

FRANKLIN TESTER

The Model 7105 Franklin Tester provides a means of testing single strips or punchings of flat rolled electrical steel for surface insulation resistance under predetermined conditions of voltage and pressure.



MODEL 7105

ALNICO PERMANENT MAGNETS

Thomas & Skinner is one of the largest manufacturers of high energy Alnico Permanent Magnets in the country. It is also the first manufacturer to develop and offer Alnico 9. Permanent Magnets are currently available in Sintered Alnico 2, 5 and 8, and Cast Alnico 2, 5, 6, 8C, 8HC, 8HE, 9A, 9C and 9Nb for applications that include simple holding and lifting devices, sophisticated current generating and electron beam focusing devices, motors and other rotating devices. Industries which are utilizing T & S Permanent Magnets include microwave, geophysical and aerospace, ample proof of the quality and performance of Thomas & Skinner's superior Permanent Magnet products.

Thomas & Skinner, Inc.

1120 EAST 23RD ST., INDIANAPOLIS, IN. 46205 • PHONE: 317-923-2501

TRIPLETT, for more than 70 years, has been a manufacturer of high quality, reliable instrumentation. The product line includes both panel instruments for OEM use and test equipment (V-O-M's) for OEM and general purpose electrical/electronic testing.

Both the panel instruments and test equipment is available in "off-the-shelf" standard designs or they can be "custom" designed for any size, style or type of measurement capabilities required to meet your specifications.

If the standard instruments on the following pages do not satisfy your requirements please contact the Triplett Representative nearest you (see the EEM yellow pages) or contact Triplett Corporation (419) 358-5015, for assistance from our Instrument or Tester Designers/Engineers who'll help you analyze the problem and suggest the optimum cost/result solution.

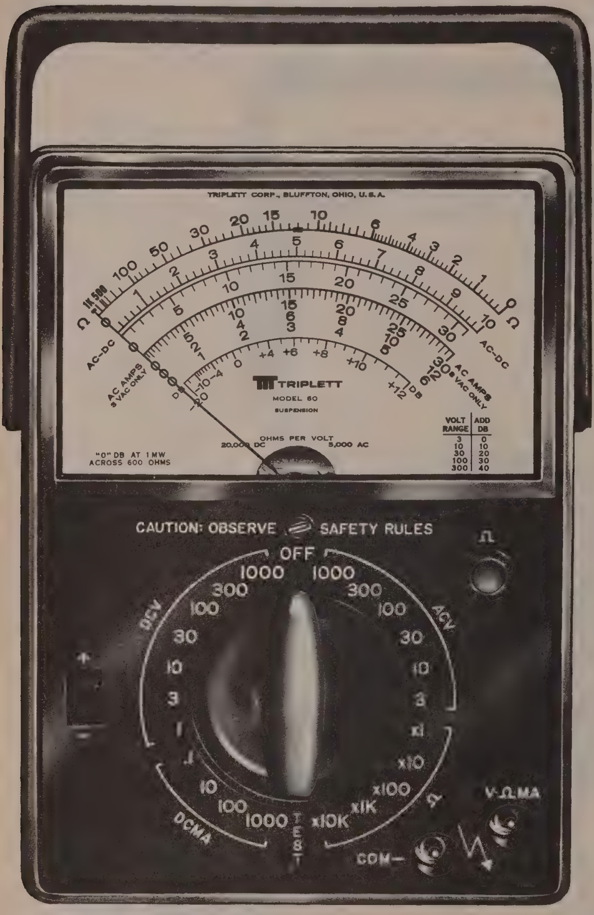
NEW MODEL 60 V-O-M



NEW MODEL 60 **$90**

1. **DROP-PROOF**—Virtually indestructible for an accidental drop up to a five foot height with deviation from stated accuracy not exceeding ±4%.
2. **BURNOUT-PROOF**—Protected by diodes and unusual three fuse arrangement, including ⅛ Amp, 1 Amp and 2 Amp/1000V fuses, up to maximum protection level provided by the 2 Amp/1000V (20kW) fuse.
3. **SUPER-SAFE**—Designed to most rigid safety standards to prevent explosive arcs in high energy circuits, up to the 2 Amp/1000V (20kW) fuse capacity; completely insulated unit with newly designed safety leads.

DROP-PROOF
BURNOUT-PROOF
SUPER-SAFE

Some inside information about V-O-M's:

V-O-M's are the most useful and popular devices for multi-function testing and measuring of electrical circuits. What happens when a user inadvertently attemps to measure voltage with the tester switched to measure resisance? Years ago, the meter movement, resistors, and perhaps the range switch would be burned. In high energy circuits a dangerous arc or explosion could also occur.

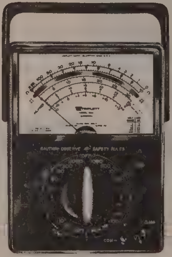
More recently some V-O-M's began utilizing a diode device to protect the meter movement and a fuse to protect the remaining components. These additions improved the protection for selected misuse conditions only. Damages both to the tester and the user are still a potential hazard. The Triplett Model 60 has closed these gaps to provide the last word in protection. While accidents can never be totally prevented, the Model 60 V-O-M has been extensively tested and where the conventionally fused V-O-M was damaged and where a hazardous condition was created for the operator, the Model 60 presented no hazard with total damage being confined to blown fuses.

Ropp Triplett, *President*

LABORATORY ACCURACY

A 60 Series V-O-M with greater accuracy is also available. The Model 60-A adds a mirror scale and ±1½% DC accuracy to all the other benefits of the Model 60. If your work requires the mirror scale and greater accuracy, the Model 60-A is the tester for you to buy.

Model 60-A Cat. No. 3148 .... **$100.00**



TRIPLETT TEL: (419) 358-5015 TWX 810-490-2400
CORPORATION, BLUFFTON, OHIO 45817

NEW MODEL 60 V-O-M

APPLICATION DATA

Triplett is introducing the all new Model 60—a multi-range V-O-M for general electrical and electronic trouble shooting and measurement. It has been specifically developed to satisfy the need for a quality instrument which will stand up under the hard usage of the industrial and maintenance environment. A combination of unique design and selection of materials permits the instrument to withstand over 90% of the costly in-field and at-workbench misuses of V-O-M's. This Drop-Proof, Burnout-Proof, and Super-Safe V-O-M will provide accurate, reliable long life and virtually maintenance free service for use in the laboratory, vocational and trade schools, inspection department and manufacturing quality control and for the service technician.

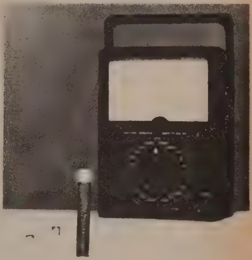
The single range selector switch helps reduce incorrect settings and enables you to easily select any of the 28 ranges without any inconvenient lead changes or other set-ups. The simplified scale includes markings for direct reading when using the optional Clamp-on AC Ammeter. The Model 60 has a special "Confidence-Test" feature built into the new test instrument for periodic reassurance checks of its meter. While not intended as a comprehensive test of the instrument it does permit a high level of confidence in the instrument meter if the pointer indicates within the area of the test symbol. Modular construction permits it to be easily and quickly serviced in the field or service station. The removal of eight screws completely disassembles the new Model 60. The independent meter module permits quick service or replacement, when needed.

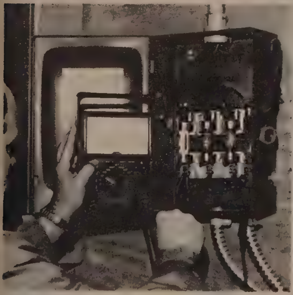
DROP-PROOF

The Model 60 has a rugged case molded of black, high impact thermoplastic material which combined with a rugged suspension meter provides a V-O-M that is virtually indestructible for an accidental drop up to a five foot height with deviation from stated accuracy not exceeding ±4%. This combination of unique design and material selection protects against those normal accidents of dropping and rough handling occurring in hard day to day use, providing long term, reliable and expense free service.

BURNOUT-PROOF

The Model 60 V-O-M has been engineered to virtually eliminate costly repairs and down time due to accidental burnout of meter movements and components. The V-O-M saves you from parts burn out due to inadvertent range or test function settings. The meter movement is protected by a diode module. The ⅛ Amp and 1 Amp fuses are used for normal overload conditions. Protection is provided for high energy fault currents beyond the capability of the instrument fuses up to the capacity of the 2 Amp/1000V (20kW) fuse. Spare ⅛ Amp and 1 Amp fuses are included in the tester.





SUPER-SAFE

One of the prime design goals for the Model 60, was to produce a rugged, new, quality V-O-M that would provide the greatest possible safety to the user. Experienced engineers respect the danger of explosive arcs created when attempting to measure voltages in high energy circuits with a tester inadvertently set on the Ohms function. Now the Model 60, for the first time, provides a specially engineered internal electrical system to prevent explosive arcs in high energy circuits up to the 2 Amp/1000V (20kW) fuse capacity. In addition, the Model 60 has no exposed metal parts, providing complete insulation of the instrument for maximum protection from electrical shock. Newly engineered test leads connecting to the front panel by especially designed recessed safety connectors and a large imprinted label spelling out safety precautions to observe when using the V-O-M are additional safety features.

MODEL 60-K MAINTENANCE KIT

To extend the usefulness of the Model 60, it is also available in kit form—Model 60-K. The kit will be particularly valuable for individuals who also need to measure AC Amperes and who sometimes need to isolate one conductor of a two conductor cable. The Model 60-K comes complete with Model 60, Model 10, Model 101, Model 10 attachment lead, leather case, 48" safety test leads, insulated alligator clips, batteries, spare 1/8A and 1A fuses, Instruction Manual and one year warranty. If you need to use these accessories, buy the complete kit.

Model 60-K Cat. No. 3150 .... **$150.00**

CORPORATION, BLUFFTON, OHIO 45817

NEW MODEL 60 V-O-M

SPECIFICATIONS

DC VOLTS

Ranges: 0-0.3-1-3-10-30-100-300-1000 (Approx. 20,000 Ohms Per Volt).
Accuracy: ±2% of full scale all ranges.

AC VOLTS

Ranges: 0-3-10-30-100-300-1000 (Approx. 5,000 Ohms Per Volt).
Accuracy: ±3% of full scale all ranges.

OHMS

Ranges: 0-1k-10k-100k-1MΩ-10MΩ. (12 Ohms center scale on low range).
Accuracy: ±2% of arc length.
Open Circuit Voltage: 1.7V (10MΩ 10.2V).
Maximum power applied to device under test (low range): 60.4 mW. All other ranges, power is correspondingly less.

DC MILLIAMMETERS

Ranges: 0-0.1-10-100-1000 (Approx. 320 mV).
Accuracy: ±2% of full scale all ranges.

DECIBELS

Ranges: —20dB to +52dB.
Accuracy: ±2% of full scale all ranges.
Scale, lower arc, lettered —20 to +12.
"0" dB is equal to .775 ACV across 600 Ohms.

OUTPUT VOLTS (AC) (Requires external capacitor)

Ranges: 0-3-10-30-100-300 (Approx. 5,000 Ohms Per Volt).
Accuracy: ±3% of full scale all ranges.

AC AMPERES (Requires accessory Model 10 Adapter)

Ranges: 0-6-12-30-60-120-300.

TESTER CONSTRUCTION

Meter: 45μA ruggedized suspension movement, easily replaced integral module.
Polarity Switch: V-Ω-mA jack polarity changed from + to —.
Scale length: Approx. 4½".
Overload Protection: Meter movement protected by a diode module, 1/8A/250V, 1A/250V and 2A/1000V (20kW on DC/30kVA on AC) fuses.
Confidence Test: Reassurance check of instrument meter.
Case: Molded, black, high impact thermoplastic with new non-slip "finger-tread" surface finish; easy external access to sealed battery and fuse compartment; molded plastic handle can be used to place instrument on approx. 30° angle; dimensions approx. 5¼"W x 7¼"H x 3¼"D.
Weight: approx. 2½ lbs. with batteries.

BATTERIES

1-9V NEDA 1604; 1-1½V D Cell

Model 60, complete with one year warranty, with 48" safety test leads, insulated alligator clips, batteries, spare 1/8A and 1A fuses and Instruction Manual. Cat. No. 3145 .... **$ 90.00**

Model 60-A, similar to Model 60 with mirror scale and ±1½% DC accuracy. Cat. No. 3148 ....**$100.00**

Model 60-K, includes complete Model 60, Model 10, Model 101, Model 10 attachment lead and leather case. Cat. No. 3150 ....**$150.00**

OPTIONAL ACCESSORIES

Leather Carrying Case	Cat. No. 10-2739	**$22.90**
High Voltage Probe—30 kVDC	Cat. No. 79-357	**24.50**

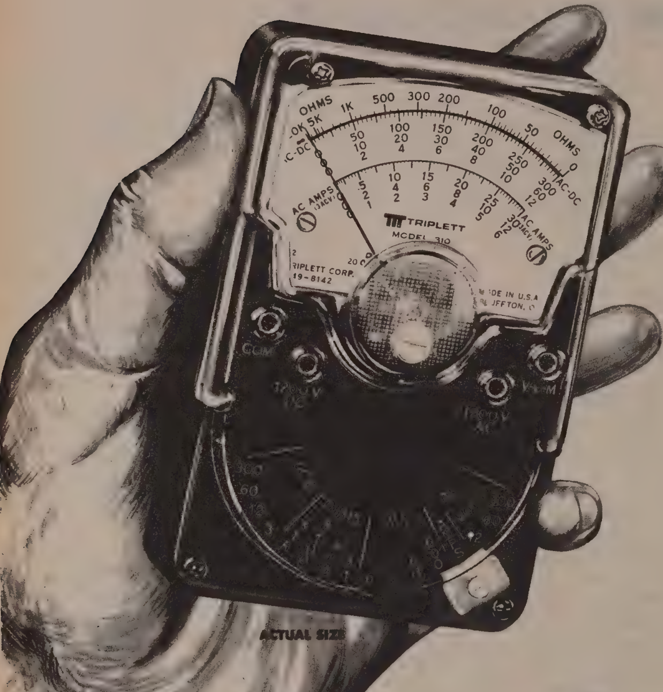
MODEL 310 TYPE 3



New DROP RESISTANT

1. **Drop-resistant, hand-size V-O-M with high-impact thermoplastic case.**
2. **20,000 Ohms per volt DC and 5,000 Ohms per volt AC; diode overload protection with fused Rx1 Ohms range.**
3. **Single range switch; direct reading AC Amp range to facilitate clamp-on AC Ammeter usage.**

SPECIFICATIONS

DC VOLTS
Ranges: 0-3-12-60-300-1,200 (20,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

AC VOLTS
Ranges: 0-3-12-60-300-1,200 (5,000 Ohms per Volt).
Accuracy: ±4% of full scale all ranges.

OHMS
Ranges: 0-20k-200k-2MΩ-20MΩ (200 Ohm center scale on low range).
Accuracy: ±3% of full scale all ranges.
RX1 Ohms circuit fuse protected.

DC MICROAMPERES
Ranges: 0-600 at 250 mV.
Accuracy: ±3% of full scale.

DC MILLIAMPERES
Ranges: 0-6-60-600 at 250 mV.
Accuracy: ±3% of full scale all ranges.

TESTER CONSTRUCTION
Meter: Self-shielding, extra rugged, high torque, 50 μA movement with diode overload protection and spring-back instrument jewels; meter movement brackets and pointer feature new rugged design.
Scale Length: approx. 2⅛".
Case: Molded, black, high impact polycarbonate thermoplastic; with new non-slip "finger tread" surface finish; simple slide-latch cover for access to batteries and fuse; newly designed lead jacks and Model 10 jack; 2¾" w X 1$\frac{5}{16}$" d X 4¼" h.
Weight: approx. 8 oz. with batteries.

BATTERIES
1-15V NEDA 220; 1-1½V NEDA 910-F.

MODEL 310, complete with 42" leads, alligator clips, batteries and instruction manual. Cat. No. 3018 .... $49.00

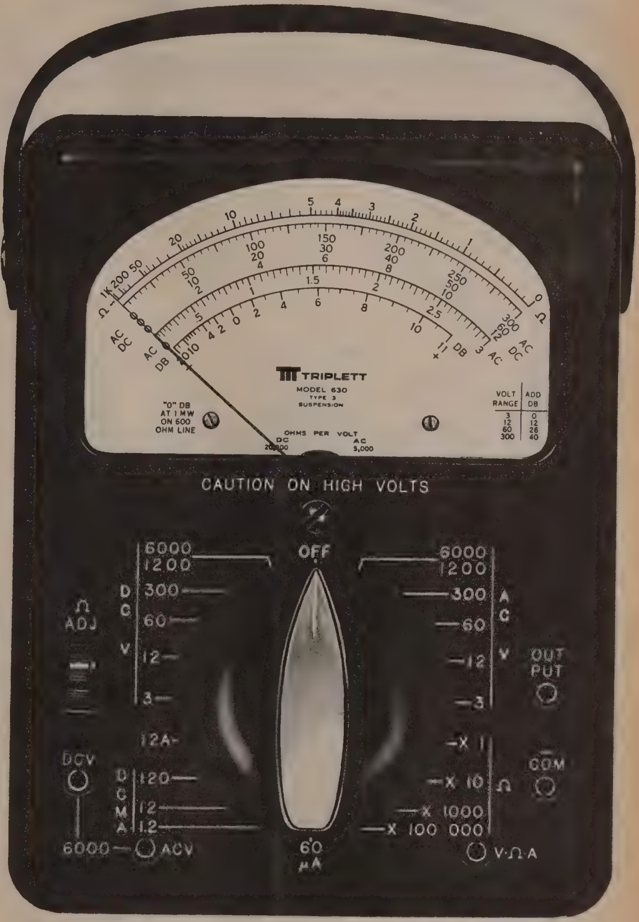
CORPORATION, BLUFFTON, OHIO 45817

MODEL 630

1. **Diode overload-protected suspension movement V-O-M; single range switch minimizes error.**
2. **4 ohmmeter ranges with 4.4 Ohms center scale.**
3. **Simplified scale—only 4 arcs for all 27 ranges.**



GENERAL DESCRIPTION

The Model 630, popular for its reliability, is a compact, rugged portable volt-ohm-milliammeter. The single range selection switch and 4⅜" scale length, with only four arcs for all 27 ranges, enables you to make fast, accurate measurements. Protection for the suspension meter movement is provided by a silicon diode network with fuse protection for the ohms circuit.

The voltage and resistance ranges of the Model 630 have made this unit particularly desired for the classroom and for electrical and electronic maintenance use.

SPECIFICATIONS

DC VOLTS
Ranges: 0-3-12-60-300-1,200-6,000 (20,000 Ohms per Volt).
Accuracy: ±2% of full scale all ranges except 6,000, 4%.

AC VOLTS
Ranges: 0-3-12-60-300-1,200-6,000 (5,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges except 6,000, 5%.

OHMS
Ranges: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).
Accuracy: ±2% of full scale all ranges.
Ohms circuit protected with one ampere fuse (spare fuse included).

DC MICROAMPERES
Ranges: 0-60 at 250 mV.
Accuracy: ±2% of full scale.

DC MILLIAMPERES
Ranges: 0-1.2-12-120 at 250 mV.
Accuracy: ±2% of full scale all ranges.

DC AMPERES
Ranges: 01.2-112-120 at 250 mV.
Accuracy: ±2% of full scale.

DECIBELS
Ranges: −20 to +51 ("0" dB at 1 mW on 600 Ohm line).
Accuracy: ±2% of full scale all ranges.
Scale: Lower arc lettered −20 to +11 dB.

OUTPUT VOLTS (AC)
Ranges: 0-3-12-60-300 (5,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

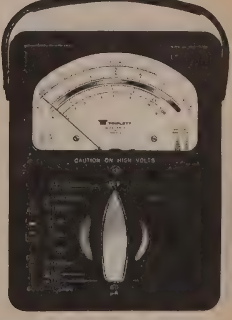
TESTER CONSTRUCTION
Meter: 50 µA suspension movement with diode overload protection.
Scale Length: approx. 4⅜".
Case: Molded, black plastic with removable black leather strap; dimensions 5½" w X 3-11/32" d X 7½" h.
Weight: approx. 3 lbs. with batteries.

BATTERIES
1-30V NEDA 210; 1-1½V NEDA 13F.

MODEL 630, complete with 48" leads, alligator clips, batteries and instruction manual.
Cat. No. 3030 .... **$76.00**

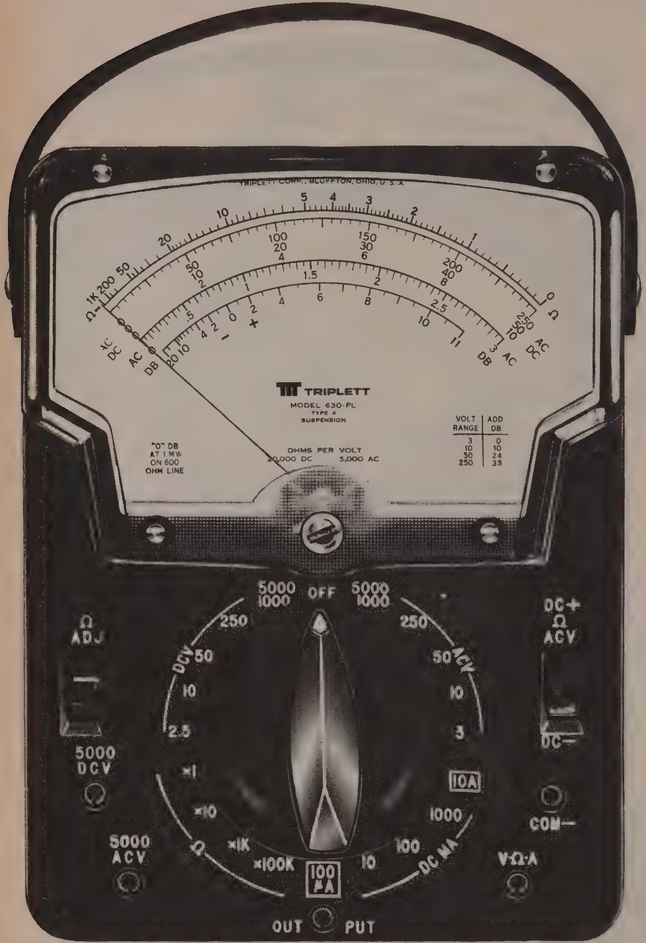
Model 630-A

A laboratory type volt-ohm-milliammeter with mirrored scale and greater accuracy made possible through the use of ½% resistors. Ranges and other features same as Model 630 except for accuracy of ±1½% DC and ±3% AC.
Model 630-A, complete with 48" leads, alligator clips, batteries and instruction manual. Cat. No. 3034 .... **$89.00**



TRIPLETT TEL: (419) 358-5015 TWX 810-490-2400
CORPORATION, BLUFFTON, OHIO 45817

MODEL 630-PL



1. 27-range V-O-M with single range switch minimizes error; DC polarity reversing switch.

2. 5" suspension meter with diode overload protection.

3. 4 ohmmeter ranges with 4.4 Ohms center scale.

GENERAL DESCRIPTION

The Model 630-PL is popular for its reliability and wide vision unbreakable plastic window. Convenience items such as DC polarity-reversing switch and 4½" scale, with only four arcs for all 27 ranges, simplifies and speeds up your measurement capabilities. The single range switch minimizes chances of incorrect function selection and resulting burnout. Additional durability is provided by diode overload protection for the suspension meter movement and fuse protection for the ohms circuit.

The voltage and resistance ranges of the Model 630-PL have been particularly useful for those of you in the construction industry and for the electrical and electronic maintenance service.

SPECIFICATIONS

DC VOLTS
Ranges: 0-2.5-10-50-250-1,000-5,000 (20,000 Ohms per Volt); 0-0.25 at 100 μA.
Accuracy: ±2% of full scale all ranges except 5,000, 4%.

AC VOLTS
Ranges: 0-3-10-50-250-1,000-5,000 (5,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges except 5,000, 5%.

OHMS
Ranges: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).
Accuracy: ±2% of full scale on all ranges.
Ohms circuit protected with one ampere fuse (spare fuse included).

DC MICROAMPERES
Ranges: 0-100 at 250 mV.
Accuracy: ±2% of full scale.

DC MILLIAMPERES
Ranges: 0-10-100 at 250 mV; 0-1,000 at 400 mV.
Accuracy ±2% of full scale all ranges.

DC AMPERES
Ranges: 0-10 at 600 mV.
Accuracy: ±2% of full scale.

DECIBELS
Ranges: −20 to +49 ("0" dB at 1 mW on 600 Ohm line).
Accuracy: ±2% of full scale all ranges.
Scale: Lower arc lettered −20 to +11 dB.

GENERAL DESCRIPTION

The Model 630-PLK volt-ohm-milliammeter, with its patented solid-state switching circuit, provides complete protection from accidental overload and burnouts. Added protection for the suspension meter movement is provided by a silicon diode network and for the 1 and 10 ampere ranges by 3 and 10 ampere fuses respectively. For measurement ease, this V-O-M also includes the single range switch, DC polarity-reversing and a 4½" scale with only four arcs for all 27 ranges.

The overload feature has made the Model 630-PLK extremely popular for the educational classroom as well as for electrical and electronic maintenance.

SPECIFICATIONS

DC VOLTS
Ranges: 0-2.5-10-50-250-1,000-5,000 (20,000 Ohms per Volt); 0-0.25 at 100 μA.
Accuracy: ±2% of full scale all ranges except 5,000, 4%.

AC VOLTS
Ranges: 0-3-10-50-250-1,000-5,000 (5,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges except 5,000, 5%.

OHMS
Ranges: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).

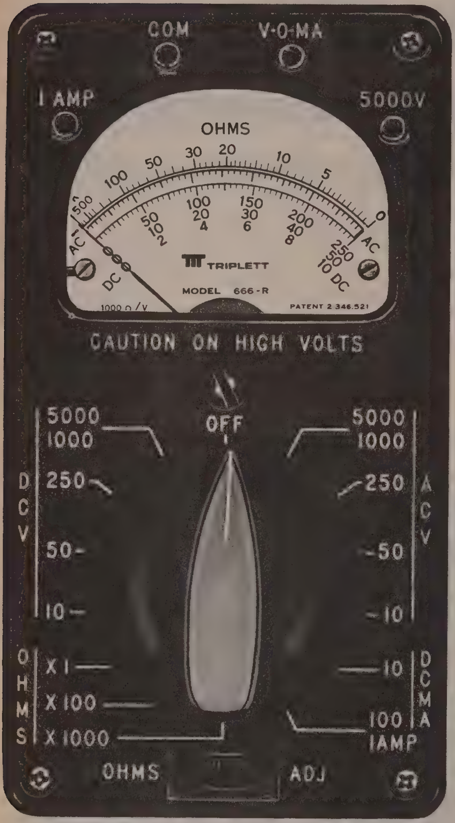
MODEL 666-R



1. Rugged 16-range V-O-M; single range switch minimizes error.
2. 3 ohmmeter ranges reading to 3 megohms.
3. AC and DC voltage ranges from 10 to 5000 volts.

GENERAL DESCRIPTION

The Model 666-R is a simply designed, hand-size volt-ohm-milliammeter ideal for electrical work. Its convenience and size fit the hand, its design and ruggedness fit the tool box and its ranges and accuracy fit the job.

The on-the-job toughness and through-the-years reliability has made the Model 666-R famous among construction and electrical, electronic communications and installation and maintenance men.

SPECIFICATIONS

DC VOLTS

Ranges: 0-10-50-250-1,000-5,000 (1,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

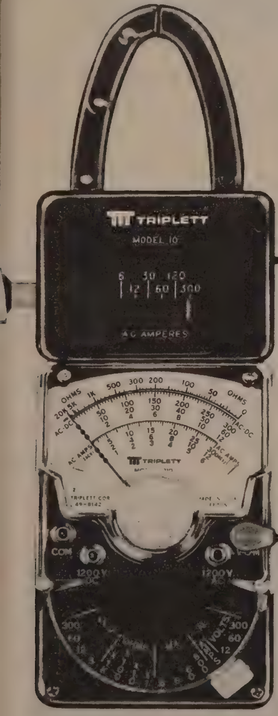
Cat. No. 3013 ....**$130.00**

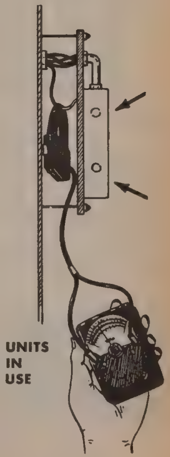


INDIVIDUAL COMPONENTS

MODEL 10 CLAMP-ON AC AMMETER

Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switching. Model 10 Clamp-On Adapter AC Ammeter ranges: 0-6-12-30-60-120-300. Clips around single wire to read A.C. Amperes direct. Used with Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC V-O-M only. The only change is to remove the lead plug from the Model 310 V-O-M jack and insert it in the jack provided in the Model 10 housing. Case black molded plastic.

Model 10 (310, 310-FET) Cat. No. 60-211 ....**$24.00**
Model 10-C (310-C) Cat. No. 60-210 ....**$24.00**

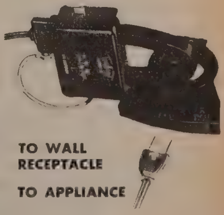


MODEL 101 LINE SEPARATOR

Plugs into AC outlet to divide instantly two-conductor cords. Increases ammeter sensitivity 10X and 20X. Use up to 30 AC amperes from 0.3 to 30 in eight steps.

Ranges: Divide by 20X—0-0.3-0.6-1.5-3-6 AC Amperes.
Direct—0-6-12-30 AC Amperes.
Divide by 10X—0-0.6-1.2-3-6-12 AC Amperes.
Case, black molded plastic with engraved markings.

Model 101 Cat. No. 60-218 ....**$10.00**



NO. 311 LEADS

42" long lead to separate Model 10 from 310 unit for easy reading in awkward spots.

No. 311 Leads. Cat. No. 79-161 ....**$4.50**

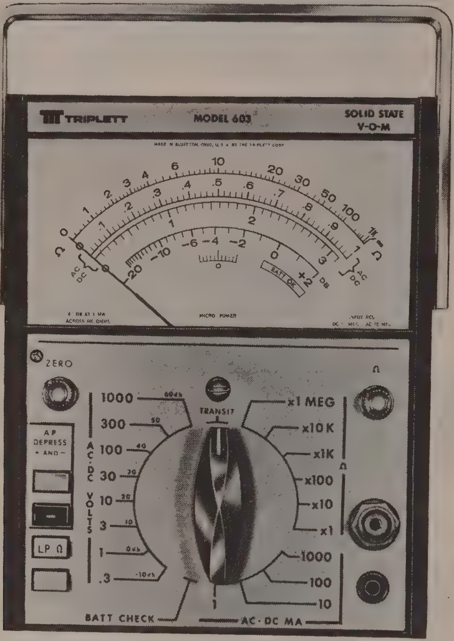
MODEL 603 FET V-O-M



1. Exclusive TRIPLETT MICRO POWER — TMP™ provides battery life in excess of a year for carbon batteries.
2. LOW-POWER OHMS — LPΩ™ — 6 ranges with 70 mV power source for in-circuit measurements without component damage.
3. FET V-O-M WITH AUTO POLARITY — convenient and time saving, always reads up scale.

SPECIFICATIONS

DC VOLTS

Ranges: 0-0.3-1-3-10-30-100-300-1000.
Accuracy: ±3% of full scale all ranges.
Input Resistance All Ranges: 11.12 megohm (1.12 megohm resistor in probe tip).
Auto Polarity: Pointer indicates up scale for either polarity.
Polarity Determination: Push button + or −.

AC VOLTS

Ranges: 0-0.3-1-3-10-30-100-300-1000.
Accuracy: ±3% of full scale all ranges.
Input Impedance All Ranges: 10 megohm.
Frequency Range: 20 Hz to 10 kHz, all ranges except 300 and 1000V.
Detection: Average calibrated in RMS.

OHMS — LOW POWER

Ranges: 0-1k-10k-100k-1MΩ-10MΩ-1000MΩ.
Accuracy: ±3% of DCV arc on all ranges.
Open Circuit Voltage: 70mV.
Maximum power applied to device under test (low range): 123 μW.
All other ranges, power is correspondingly less.
10 Ohm center scale on low range.

OHMS — CONVENTIONAL

Ranges: 0-1k-10k-100k-1MΩ-10MΩ-1000MΩ.
Accuracy: ±3% of DCV arc on all ranges.
Open Circuit Voltage: 1.5 V.
Maximum power applied to device under test (low range): 56 mW.
All other ranges, power is correspondingly less.
10 Ohm center scale on low range.

AC AND DC MILLIAMPERES

Ranges: 0-1-10-100-1000 at 316 mV.
Accuracy: ±4% full scale all ranges.
Auto Polarity: Pointer indicates up scale for either positive or negative current flow.
Polarity Determination: Push button + or −.

DECIBELS

Ranges: −30 to +62.
Accuracy: ±3% of full scale all ranges.
Scale, lower arc, lettered −20 to +2.
"0" dB is equal to .776 V.

TESTER CONSTRUCTION

Meter: 20 μA suspension movement with approx. 4½" scale length.
Case: Shielded, black, molded high impact plastic with metal handle that can be used to place instrument on approx. 25° angle; anodized aluminum panel; dimensions 5⅛" w x 6½" h x 3³⁄₁₆" d.
Weight: Approx. 2½ lbs. with batteries.

BATTERIES

2 — 9V NEDA 1604; 1 — 1½V D Cell. TMP™ circuit provides battery life of one year or more with continuous use.
Model 603 with LPΩ™ and TMP™, complete with 48" leads, alligator clips, batteries and instruction manual.
Cat. No. 3037 .... **$173.00**

OPTIONAL ACCESSORIES

Leather Carrying Case: Model 639-OS — Cat. No. 10-1793	**$20.10**
High Voltage Probe: 30 kVDC — Cat. No. 79-270	**$34.50**
RF Detector Probe: 250 mHz/20V — Cat. No. 79-330	**$12.50**
Replacement Test Lead: 48" long — Cat. No. 79-288	**$17.90**
Replacement Ground Lead: 48" long (Black) — Cat. No. 79-261	**$ 3.20**

MODEL 310-C

1. Hand-size V-O-M with diode overload-protected suspension movement.
2. 20,000 Ohms per volt DC and 15,000 Ohms per volt AC.
3. Single, enclosed range switch minimizes error; DC polarity reversing switch.

HAND-SIZE SUSPENSION MOVEMENT

SPECIFICATIONS

DC VOLTS
Ranges: 0-3-12-60-300-600 (20,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

AC VOLTS
Ranges: 0-3-12-60-300-600 (15,000 Ohms per Volt).
Accuracy: ±4% of full scale all ranges.

OHMS
Ranges: 0-20k-200k-2MΩ-20MΩ (200 Ohms center scale on low range).
Accuracy: ±3% of full scale all ranges.

DC MICROAMPERES
Ranges: 0-600 at 250 mV.
Accuracy: ±3% of full scale.

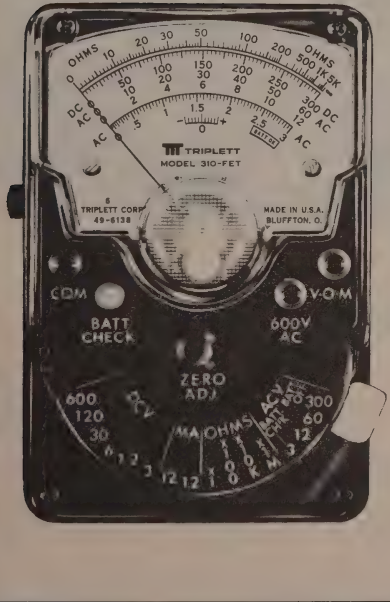
DC MILLIAMPERES
Ranges: 0-6-60-600 at 250 mV.
Accuracy: ±3% of full scale all ranges.

TESTER CONSTRUCTION
Meter: 50 μA suspension movement with diode overload protection.
Scale Length: Approx. 2⅛".
Switch: single enclosed range switch; DC polarity reversing switch.
Case: Molded, black plastic; dimensions 2¾" w X 1$\frac{5}{16}$" d X 4¼" h.
Weight: Approx. 8 oz. with batteries.

BATTERIES
1-15V NEDA 220; 1-1½V NEDA 910-F.

MODEL 310-C, complete with 42" leads, alligator clips, batteries and instruction manual. Cat. No. 3022 .... **$65.00**

MODEL 310-FET



1. Hand-size FET V-O-M with 10 megohn DC input resistance and diode overload-protected suspension movement.
2. Low voltage range of 300 mV DC; X1 megohm range.
3. Single range switch; DC polarity-reversing switch.

HAND-SIZE SOLID STATE

SPECIFICATIONS

DC VOLTS
Ranges: 0-0.3-1.2-6-30-120-600.
Accuracy: ±3% of full scale all ranges.
Input resistance all ranges—10 megohms.
Polarity reversing switch.

AC VOLTS
Ranges: 0-3-12-60-300-600.
Accuracy: ±4% of full scale on all ranges.
5,000 Ohms per Volt.

OHMS
Employs a 1½ Volt power source.
Ranges: 0-5k-500k-50MΩ-5,000MΩ.
50 Ohm center scale on low range.
Maximum power applied to device under test on low range—11 Milliwatts.
Accuracy: ±3% of DC V arc on all ranges.
Polarity reversing switch.

DC MILLIAMPERES
Ranges: 0-0.12-1.2 at 300 mV.
Accuracy: ±3% of full scale on all ranges.

TESTER CONSTRUCTION
Meter: 50 μA self-shielded suspension movement.
Scale Length: approx. 2⅛".
Case: Molded black high-impact plastic; dimensions 2¾" w X 1$\frac{5}{16}$" d X 4¼" h.
Weight: Approx. 14 oz.

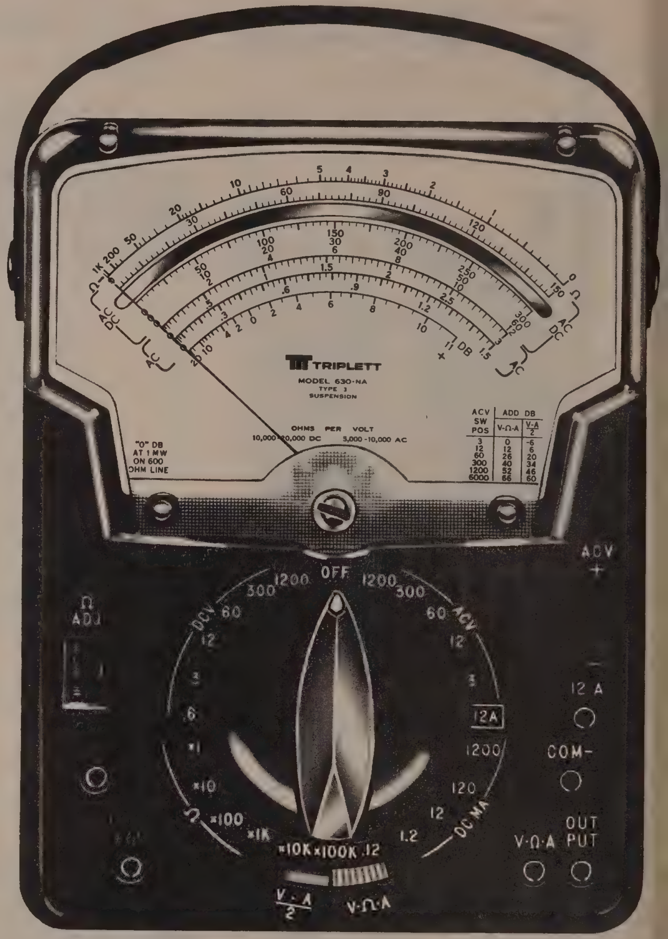
BATTERIES
1-7 V NEDA 1501M; 1-1½ V NEDA 910A.
Battery Check Position: Reads by touching lead to BATT. CHECK button on tester and reading BATT. OK area on dial.

MODEL 310-FET, complete with 42" leads, alligator clips, batteries and instruction manual. Cat. No. 3027 .... **$88.00**

TRIPLETT CORPORATION, BLUFFTON, OHIO 45817
TEL: (419) 358-5015 TWX 810-490-2400

MODEL 630-NA

1. 70-range V-O-M with single range switch and DC polarity-reversing switch.
2. Accuracy 1½% DC and 3% AC; mirrored scale.
3. Diode overload-protected suspension movement; temperature compensation.



MODEL 630-NA

$112

SPECIFICATIONS

DC VOLTS
Ranges: 0-0.6-3-12-60-300-1,200-6,000 (10,000 Ohms per Volt).
0-0.3-1.5-6-30-150-600-3,000 (20,000 Ohms per Volt).
0-0.120 at 60 microamperes; 0-0.240 at 120 microamperes.
Accuracy: ±1½% of full scale all ranges except 3,000 and 6,000, ±3½%.

AC VOLTS
Ranges: 0-3-12-60-300-1,200-6,000 (5,000 Ohms per Volt).
0-1.5-6-30-150-600-3,000 (10,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges except 3,000 and 6,000, ±5%.

OHMS
Ranges: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ (4.4 Ohm center scale on low range).
Accuracy: ±1½% of full scale all ranges.
Ohms circuit protected with one ampere fuse (spare fuse included).

DC MICROAMPERES
Ranges: 0-60-600 at 120 mV; 0-120 at 240 mV.
Accuracy: ±1½% of full scale all ranges.

DC MILLIAMPERES
Ranges: 0-6-60-600 at 120 mV; 0-1.2-12-120-1,200 at 240 mV.
Accuracy: ±1½% of full scale all ranges.

DC AMPERES
Ranges: 0-6 at 120 mV; 0-12 at 240 mV.
Accuracy: ±1½% of full scale all ranges.

DECIBELS
Ranges: −26 to +51 ("0" dB at 1mW on 600 ohm line).
Scale: Lower arc lettered −20 to +11 dB.

OUTPUT VOLTS (AC)
Ranges: 0-3-12-60-300 (5,000 Ohms per Volt. 0-1.5-6-30-150) (10,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

TESTER CONSTRUCTION
Meter: 40μA suspension movement with diode overload protection, mirror scale, ½% resistors.
Scale Length: Approx. 4½".
Switch: DC polarity reversing switch; slide switch for doubling range selection.
Case: Molded, black plastic with removable black leather strap; dimension 5½" w x 3-11/32" d x 7½" h.
Weight: Approx. 4 lbs. with batteries.

BATTERIES
1—30V NEDA 210; 1—1½V NEDA 13F.

MODEL 630-NA, complete with 48" leads, alligator clips, batteries and instruction manual.
Cat. No. 3042 .... **$112.00**

TRIPLETT TEL: (419) 358-5015 TWX 810-490-2400
CORPORATION, BLUFFTON, OHIO 45817

MODEL 630-NS

1. V-O-M with 200,000 Ohms per volt DC and 20,000 Ohms per volt AC; accuracy 1½% DC and 3% AC.
2. 5μA suspension movement with diode overload protection; mirrored scale.
3. 62 ranges with single range switch and DC polarity reversing switch.

SPECIFICATIONS

DC VOLTS
Ranges: 0-0.6-3-12-60-300-1,200 (100,000 Ohms per Volt).
0-0.3-1.5-6-30-150-600 (200,000 Ohms per Volt).
0-0.15 at 60 microamperes.
Accuracy: ±1½% of full scale all ranges.

AC VOLTS
Ranges: 0-3-12-60-300-1,200 (10,000 Ohms per Volt).
0-1.5-6-30-150-600 (20,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges.

OHMS
Ranges: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ (4.4 Ohm center scale on low range).
Accuracy: ±2% of full scale all ranges.
Ohms circuit protected with one ampere fuse (spare fuse included).

DC MICROAMPERES
Ranges: 0-60-600 at 150 mV; 0-5-120 at 300 mV.
Accuracy: ±1½% of full scale all ranges.

DC MILLIAMPERES
Ranges: 0-6-60-600 at 150 mV; 0-1.2-12-120-1,200 at 300 mV.
Accuracy: ±1½% of full scale all ranges.

DC AMPERES
Ranges: 0-6 at 150 mV; 0-12 at 300 mV.
Accuracy: ±1½% of full scale all ranges.

DECIBELS
Ranges: —26 to +51 ("0" dB at 1 mW on 600 Ohm line).
Scale: Lower arc lettered —20 to +11 dB.

OUTPUT VOLTS (AC)
Ranges: 0-3-12-60-300 (10,000 Ohms per Volt). 0-1.5-6-30-150 (20,000 Ohms per Volt).
Accuracy: ±3% of full scale all ranges:

TESTER CONSTRUCTION
Meter: 5μA suspension movement with diode overload protection; minor scale, ½% resistors.
Scale Length: Approx. 4½".
Switch: DC polarity reversing switch; slide switch for doubling range selection.
Case: Molded, black plastic with removable black leather strap; dimensions 5½" w x 3-11/32" d x 7½" h.
Weight: Approx. 4 lbs. with batteries.

BATTERIES
1—1½V NEDA 15A; 1—1½V NEDA 13F.

MODEL 630-NS, complete with 48" leads, alligator clips, batteries and instruction manual.

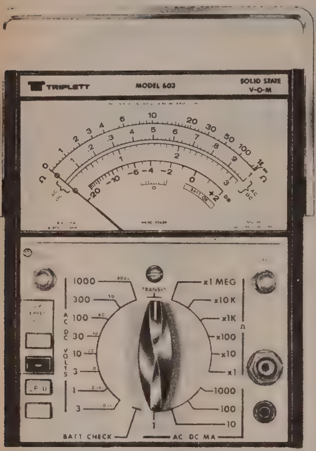
FET V-O-M WITH MICRO POWER, LOW POWER OHMS, AND AUTO-POLARITY

MODEL 603—TYPE 1



1. **Exclusive TRIPLETT MICRO POWER—TMP™ provides battery life in excess of a year fo carbon batteries.**
2. **LOW-POWER OHMS—LPΩ™—6 ranges with 70 mV power source for in-circuit measurements without component damage.**
3. **FET V-O-M WITH AUTO-POLARITY—convenient and time saving, always reads up scale.**

RANGES

DC Volts: 0-0.3-1-3-10-100-300-1,000. Input resistance 11.12 megohms with 1.12 Meg in Probe.

AC Volts: 0-0.3-1-3-10-100-300-1,000. Input impedance 10 megohms. Frequency range 20 Hz to 10 kHz.

Ohms—Low Power: 0-1k-10k-100k-1MΩ-10MΩ-1000MΩ. (70 mV open circuit voltage, 123 µW maximum power applied to device under test, 10 Ohm center scale on low range).

Ohms—Conventional: 0-1k-10k-100k-1MΩ-10MΩ-1000MΩ. (1.5V open circuit voltage, 56 mW maximum power applied to device under test, 10 Ohm center scale on low range).

AC and DC Milliamperes: 0-1-10-100-1000 at 316 mV.

Decibels: −30 to +62 ("0" dB is equal to .776V).

Accuracy: ±3% all Voltage and Ohms ranges, ±4% all Current ranges.

Scale Length: 4⅛".

Meter: Diode overload protected suspension movement.

Case: Shielded, molded, black, 5⅛" w X $3\frac{3}{16}$" d X 6½" h.

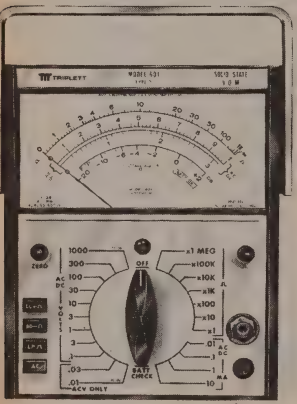
Batteries: NEDA 9V 1604 (2), 1½V 13F (1).

Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.

Model 603 Cat. No. 3037 .... **$173.00**

FET V-O-M WITH LOW POWER OHMS

MODEL 601—TYPE 2



1. **LOW-POWER OHMS—LPΩ™—7 ranges with 75 mV power source.**
2. **High sensitivity—10 mV AC full scale at 10 megohm input impedance; 100 mV DC at 11 megohm input resistance.**
3. **Simplified scale—only 4 arcs for all 53 ranges.**

RANGES

DC Volts: 0-0.1-0.3-1-3-10-30-100-300-1,000. Input resistance 11 megohms with 690k series resistor in probe tip. Includes 40 dB 60 Hz rejection.

AC Volts: 0-0.01-0.03-0.1-0.3-1-3-10-30-100-300-1,000. Input impedance 10 megohms. Frequency range 50 Hz to 50 kHz. Capacitance at input jack 60 mm fd max.

Ohms—Low-power: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ-1,000MΩ (75 Mv open circuit voltage, 100 µW maximum power applied to device under test, 10 Ohm center scale on low range).

Ohms—Conventional: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ-1,000MΩ (1.5V open circuit voltage, 56 mW maximum power applied to device under test, 10 Ohm center scale on low range).

AC and DC Milliamperes: 0-0.01-0.1-1-10 at 100 mV.

Decibels: −60 to +62 ("0" dB is equal to .775V).

Accuracy: DC ±2% Voltage, ±3% Current; AC ±3% Voltage, ±4% Current.

Scale Length: 4⅛".

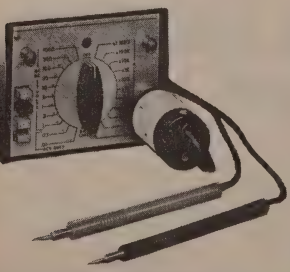
Meter: Diode overload protected suspension movement.

Case: Shielded, molded, black, 5⅛" w X $3\frac{3}{16}$" d X 6½" h.

Batteries: NEDA 1½V 15A (10).

Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.

Model 601 Cat. No. 3033 .... **$205.00**



AC CURRENT LEAKAGE ADAPTER

Adapter used with new or existing Model 601 V-O-M's for testing appliances, motors, hand tools, industrial equipment and machines, etc. for AC current leakage. Meets proposed ANSI Standard C101.1 for commercial appliance AC Current Leakage tests.

Leakage Readings: 7 ranges, 10µA f.s. to 30 mA f.s.

Resolution: .2µA on lowest V-O-M range.

Accuracy: ±4% of full scale.

Frequency Response: Approximates the C.F. Dalziel's "50 Percentile threshold of Perception Curve, within ±1.0dB"

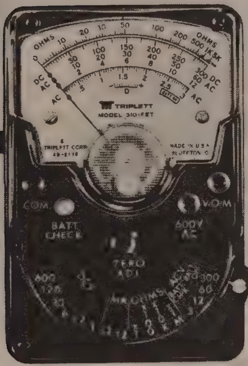
Input Impedance: 1500Ω test load.

Leakage Adapter for Model 601
Cat. No. 60-407 .... **$31.10**

TRIPLETT TEL: (419) 358-5015 TWX 810-490-2400
CORPORATION, BLUFFTON, OHIO 45817

HANDSIZE FET V-O-M

MODEL 310-FET—TYPE 1



1. **Hand-size FET V-O-M with 10 megohm DC input resistance and diode overload-protected suspension movement.**
2. **Low voltage range of 300 mV DC; X1 megohm range.**
3. **Single range switch; DC polarity-reversing switch.**

RANGES

DC Volts: 0-0.3-1.2-6-30-120-600. Input resistance 10 megohms.

AC Volts: 0-3-12-60-300-600 (5,000 Ohms per Volt).

Ohms: 0-5k-500k-50MΩ-5,000MΩ (50 Ohm center scale on low range).

DC Milliamperes: 0-0.12-1.2 at 300 mV.

Accuracy: ±3% DC; ±4% AC.

Scale Length: 2⅛".

Meter: Self-shielded, diode overload protected suspension movement; DC polarity-reversing switch.

Case: Molded, black, 2¾" w X 1 5⁄16" d X 4¼" h.

Batteries: NEDA 7V 1501M (1), 1½V 910A (1).

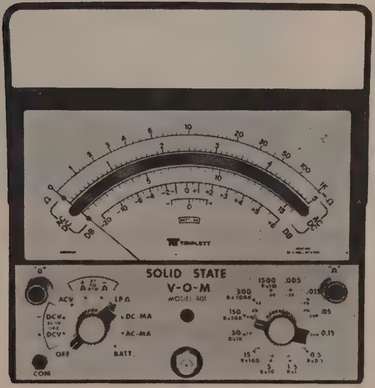
Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 2 lbs.

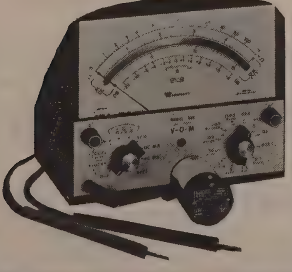
Model 310-FET Cat. No. 3027	**$88.00**
Model 100-FET Cat. No. 3013	**$130.00**

FET V-O-M WITH LOW POWER OHMS

MODEL 801—TYPE 2

1. **LOW-POWER OHMS—LPΩ™—8 ranges with 35 mV power source and 1 Ohm center scale.**
2. **High sensitivity—5 mV AC full scale at 10 megohm input impedance; 50 mV DC at 11 megohm input resistance.**
3. **Simplified scale—8" meter with only 4 arcs for all 73 ranges.**





RANGES

DC Volts: 0-0.05-0.15-0.5-1.5-5-15-50-150-500-1,500. Input resistance 11 megohms with 1 megohm series resistor in probe tip. Includes 40 dB 60 Hz rejection.

AC Volts: 0-0.005-0.015-0.05-0.15-0.5-1.5-5-15-50-150-500-1,500. Input impedance 10 megohms. Frequency range 50 Hz to 50 kHz. Capacitance at input jack 60 mm fd max.

Ohms—Low-power: 0-100-1k-10k-100k-1MΩ-10MΩ-100MΩ-1,000MΩ (35 mV open circuit voltage, 35 μW maximum power applied to device under test, and 1 Ohm center scale on low range).

Ohms—Conventional: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ-1,000MΩ (1.5 open circuit voltage, 56mW maximum power applied to device under test, and 10 Ohm center scale on low range).

AC and DC Microamperes: 0-5-15-50-150-500 at 45 mV.

AC and DC Milliamperes: 0-1.5-5-15-50-150-500 at 45 mV.

AC and DC Amperes: 0-1.5 at 45 mV (Optional external shunt for 0-15A measurements).

Decibels: −70 to +66 ("0" dB is equal to .775 V).

Accuracy: DC ±2% Voltage, ±3% Current; AC ±3% Voltage, ±4% Current.

Scale Length: 6¾".

Meter: Diode overload protected suspension movement.

Case: Shielded, molded, black, 8" w X 5" d X 7" h.

Batteries: NEDA 9V 1604 (3), 1½V 13F (1).

Complete with 48" shielded probe, 36" grd. lead, alligator clips, batteries and instruction manual. Shpg. Wt. 10½ lbs.

Model 801 Cat. No. 3071	**$255.00**

AC CURRENT LEAKAGE ADAPTER

Adapter used with new or existing Model 801 FET V-O-M's permits AC current leakage measurement checks for either medical or commercial appliance applications. Meets NFPA and AAMI Standards for Type A Medical AC Current Leakage tests and proposed ANSI Standard C101.1 for commercial Appliance AC Current Leakage tests.

Leakage Readings: 8 ranges, 10 μA f.s. to 30 mA f.s.

Resolution: .2μA on lowest V-O-M range.

Accuracy: ±4% of full scale.

Frequency Response: Approximates the C. F. Dalziel's "50 Percentile threshold of Perception Curve, within ± 1.0 dB".

Input Impedance: Switch selection for Medical or Commercial Appliance leakage measurements.
Medical—500 Ω test load,
Commercial Appliance—1500 Ω test load.

Leakage Adapter for Model 801 Cat. No. 60-413	**$37.30**

TRIPLETT CORPORATION, BLUFFTON, OHIO 45817

LABORATORY ACCURACY V-O-Ms

MODEL 630-A V-O-M TYPE 3

1. **Diode overload protected V-O-M with suspension movement; accuracy 1½% DC and 3% AC.**
2. **4 ohmmeter ranges with 4.4 Ohms center scale.**
3. **Simplified mirrored scale; only 4 arcs for all 27 ranges.**

RANGES

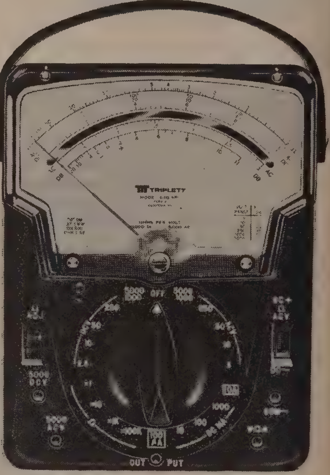
DC Volts: 0-3-12-60-300-1,200-6,000 (20,000 Ohms per Volt).
AC Volts: 0-3-12-60-300-1,200-6,000 (5,000 Ohms per Volt).
Ohms: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).
DC Microamperes: 0-60 at 250 mV.
DC Milliamperes: 0-1.2-12-120 at 250 mV.
DC Amperes: 0-12 at 250 mV.
Decibels: —20 to +51 ("0" dB at 1 mW on 600 Ohm line).
Output Volts (AC): 0-3-12-60-300 (5,000 Ohms per Volt).
Accuracy: ±1½% DC, ±3% AC.
Scale Length: 4⅜".
Meter: Diode overload protected suspension movement, mirror scale, ½% resistors.
Case: Molded, black, 5½" w X 3-11/32" d X 7½" h.
Batteries: NEDA 30V 210 (1), 1½V 13F (1). Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.
Model 630-A Cat. No. 3034 .... **$89.00**

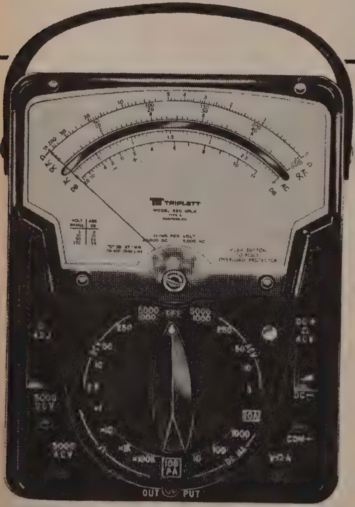
MODEL 630-APL V-O-M TYPE 4

1. **Accuracy 1½% DC and 3% AC; mirrored scale; diode overload-protected suspension movement.**
2. **27 range V-O-M with single range switch minimizes error; DC polarity reversing switch.**
3. **4 ohmmeter ranges with 4.4 Ohms center scale.**

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000 (20,000 Ohms per Volt); 0-0.25 at 100 µA.
AC Volts: 0-3-10-50-250-1,000-5,000 (5,000 Ohms per Volt). Frequency range 10 Hz to 500 kHz.
Ohms: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).
DC Microamperes: 0-100 at 250 mV.
DC Milliamperes: 0-10-100-1,000 at 250 mV.
DC Amperes: 0-10 at 250 mV.
Decibels: —20 to +49 ("0" dB at 1 mW on 600 Ohm line).
Output Volts (AC): 0-3-10-50-250 (5,000 Ohms per Volt).
Accuracy: ±1½% DC, ±3% AC.
Scale Length: 4½".
Meter: Diode overload protected suspension movement, DC polarity reversing switch, mirror scale, ½% resistors.
Case: Molded, black, 5½" w X 3-11/32" d X 7½" h.
Batteries: NEDA 30V 210 (1), 1½V 13F (1). Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. wt. 5 lbs.
Model 630-APL Cat. No. 3038 ...... **$91.00**





MODEL 630-APLK V-O-M TYPE 3

1. **Burnout-proof solid-state overload protection; accuracy 1½% DC and 3% AC; mirrored scale.**
2. **Single range switch minimizes error; DC polarity-reversing switch.**
3. **4 ohmmeter ranges with 4.4 Ohms center scale.**

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000 (20,000 Ohms per Volt); 0-0.25 at 100 µA.
AC Volts: 0-3-10-50-250-1,000-5,000 (5,000 Ohms per Volt).
Ohms: 0-1k-10k-1MΩ-100MΩ (4.4 Ohm center scale on low range).
DC Microamperes: 0-100 at 250 mV.
DC Milliamperes: 0-10-100-1,000 at 250 mV.
DC Amperes: 0-10 at 250 mV.
Decibels: —20 to +49 ("0" dB at 1 mW on 600 Ohm line).
Output Volts (AC): 0-3-10-50-250 (5,000 Ohms per Volt).
Accuracy: ±1½% DC, ±3% AC.
Scale Length: 4½".
Meter: Diode overload protected suspension movement, DC polarity reversing switch, mirror scale, ½% resistors.
Overload Protection: Complete tester protected with solid-state switching circuit.
Case: Molded, black, 5½" w X 3-11/32" d X 7½" h.
Batteries: NEDA 30V 210 (1), 1½V 13F (1). Complete with 48" leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.
Model 630-APLK Cat. No. 3120 ... **$135.00**

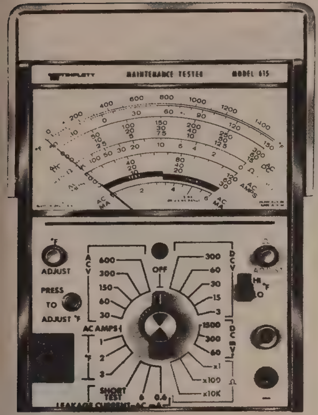
SPECIAL FEATURE V-O-Ms

MODEL 615 MAINTENANCE TESTER



1. **Maintenance tester . . . measures AC/DC Volts, Ohms, temperature and AC current leakage.**
2. **Two electrically compensated temperature ranges with switch selection for up to three temperature probes; ideal for air-conditioning, refrigeration maintenance.**
3. **Low millivolt ranges for thermocouple circuit touble-shooting; special scale for direct reading of AC Amps with clamp-on adapter accessory.**

RANGES

DC Volts: 0-.06-.3-1.5-3-15-30-60-300 (20,000 ohms/volt).

AC Volts: 0-3-30-60-150-300-600 (5,000 ohms/volt).

Ohms: 0-1K-100K-1MΩ. 10 ohm center scale on low range.

AC Amperes: (requires accessory Model 20-A Adapter) 0-6-12-30-60-120.

Temperature: −50°F to +150°F; −50°F to +1500°F.

AC Current Leakage: (through a network that simulates the human body. Short test and 0-0.6-6mA AC for ANSI C101.1—1971 commercial appliance AC Current Leakage Tests.

Accuracy: ±2% DC Voltage and Ohms ranges: ±3% AC Voltage and temperature ranges, ±4% AC Current Leakage ranges, ±8% AC Ampere ranges (basic VOM ±3%, Adapter ±5%).

Scale Length: 4½".

Meter: Diode overload protected suspension movement.

Case: Black, molded high impact plastic, 5⅛" W x 3$\frac{1}{16}$" D x 6½" H.

Batteries: NEDA 9V 1604 (2), 1½V 13F (1). Complete with 48" leads, 6' thermocouple probe, alligator clips, batteries and instruction manual.

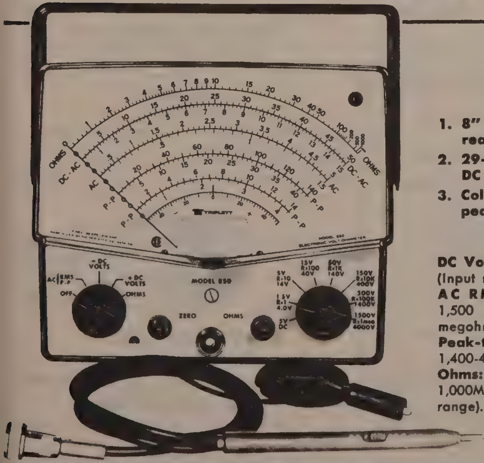
MAINTENANCE TESTER KIT

Model 615-K, complete with Model 615, Model 20-A, Model 101, black molded case, 48" leads, 6' thermocouple probe, alligator clips, batteries and instruction manual.
Cat. No. 3128 .... **$207.00**



MODEL 850

1. **8" meter with six scales for easy readability.**
2. **29-range VTVM with 11 megohm DC input resistance.**
3. **Color-coded scales for peak-to-peak measurements.**

RANGES

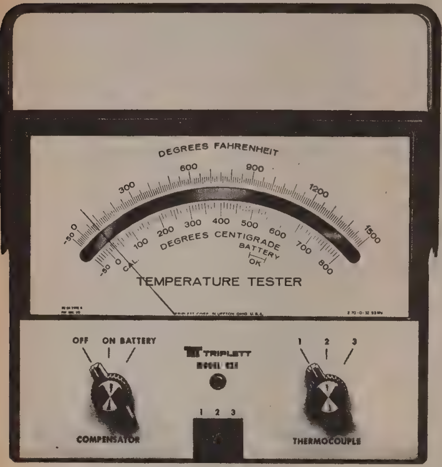
DC Volts: 0-0.5-1.5-5-15-50-150-500-1,500 (Input resistance 11 megohms).
AC RMS Volts: 0-1.5-5-15-50-150-500-1,500 (Input impedance minimum 0.83 megohms).
Peak-to-Peak Volts: 0-4-14-40-140-400-1,400-4,000.
Ohms: 0-1k-10k-100k-1MΩ-10MΩ-100MΩ-1,000MΩ (10 Ohm center scale on low range).

Accuracy: ±3% DC, ±3% AC.
Scale Length: 7".
Meter: Rugged spring-backed instrument jewels, DC polarity reversing switch.
Frequency Range: 15 Hz to 3 MHz (Optional accessory diode probe for 0-250 MHz measurements).
Tube Complement: 1—12AU7, 1—6AL5.
Case: Molded, black, 7⅝" w X 3¾" d X 6$\frac{7}{16}$" h.
Power: 115 Volts AC 50-60 Hz.
Battery: NEDA 1½V 14F.
Complete with 48" leads, alligator clips, battery and instruction manual. Shpg. Wt. 7 lbs.
Model 850 Cat. No. 3074 .... **$131.00**
Model 850 (Export—220V, 50 to 60 Hz)
Cat. No. 3075 .... **$137.00**

TRIPLETT CORPORATION, BLUFFTON, OHIO 45817

TEL: (419) 358-5015 TWX 810-490-2400

TEMPERATURE TESTER



MODEL 825 TYPE 1

1. **Measures −50°F to +1500°F and −50°C to +800°C.**
2. **Large easy to read 8" dial with mirror scale.**
3. **Electrical Compensation for Ambient temperature.**

Range: −50°F to +1500°F; −50°C to +800°C.
Sensor Type: Thermocouple, type K (Chromel-Alumel*), 5Ω (±1%) resistance.
Compensation Type: Electrical.
Accuracy: Accuracy of Model 825 (including probe) operated in horizontal position at ambient temperature of 77°F is ±1¼% of full scale reading. Operated at ambient temperatures other than 77°F results in greater error; i.e., at extremes of 50°F to 120°F, an additional error of ±½% would result. Specific accuracy for other situations provided upon request.

TESTER CONSTRUCTION
Meter: Suspension movement.
Scale Length: 6¾".
Inputs: 3—switch selected inputs.
Case: Molded, black, 7⅝" w X 4¼" d X 6¾" h.
Battery: NEDA 1½V 13F (1).
Complete with 10′ thermocouple probe, alligator clips, battery and instruction manual. Shpg. Wt. 4½ lbs.
Model 825 Cat. No. 3119 .... **$126.00**

*Trademark of Hoskins Mfg. Co.

ACCESSORIES

Thermocouple probe, 10′.	Cat. No. 79-311	**$15.60**
Leather case lined with ⅜" sponge rubber.	10-2649	**$40.50**

ACCESSORIES

HIGH VOLTAGE PROBES

Completely insulated polystyrene test probe with guard-type handle. Probe is 11¾" long, with 48" hi-voltage wire lead with banana plug at tester end.

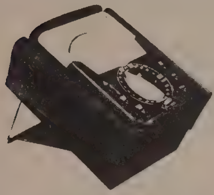
ACCESSORIES

QUALITY LEATHER CASES

For Model 630 Series (630, 630-A, 630-APL, 630-APLK, 630-L, 630-M, 630-NA, 630-NS, 630-PL, 630-PLK, 631)

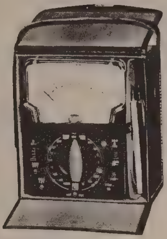


Model 639-N
Cat. No. 10-1189 **$17.30**
Center-cover flaps snap back allowing full view of scales and permitting complete access to instrument without removal from case. Tester stand included at no extra cost.

Model 639
Cat. No. 10-823 **$17.30**

Model 639-P
Cat. No. 10-921 **$24.50**
Lined with ⅜'' sponge rubber.

For Models 601, 602, 603, Model 630 Series, 615 & 6028



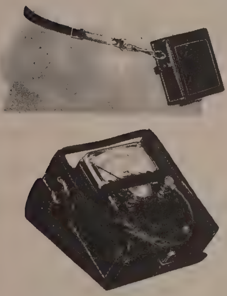
Model 639-OS
Cat. No. 10-1793 **$20.10**
Flaps open to permit use of tester in case. Accessory compartment, built-in stand on back.

For Model 666-R

Model 669-OS
Cat. No. 10-1792 **$12.50**
Flaps open to permit use of tester in case. Accessory compartment, built-in stand on back.

Model 669
Cat. No. 5616 ..... **$11.50**
Similar to 639 on left.

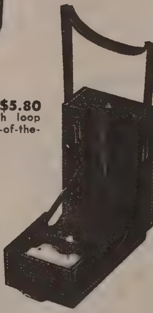
For Models 310, 310-C, 310-FET



Model 369-S
Cat. No. 10-1791 **$13.70**
Flaps fold back to form handy stand. Contains a retractable hook for hanging from nails, pipes, etc., freeing both hands, removable shoulder strap. Test leads store in case and remain plugged in.

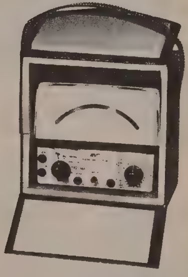
Model 379
Cat. No. 10-1456 **$11.00**
Has pocket for 101 and accommodates 310—10 in combination.

Model 369
Cat. No. 10-1258 ..**$5.80**
Trouser belt slips through loop on back of case for out-of-the-way carrying.



Model 369-T
Cat. No. 10-1608 **$13.10**
Neck strap carrying case.

For Models 800, 801, 825 & 850



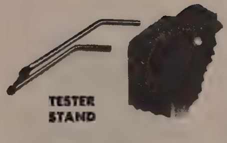
Flaps open to permit use of tester without removal from case. Built-in stand on back. Lined with ⅜'' sponge rubber.

For Models 800, 850
Cat. No. 10-1669 ....**$31.80**
859-OP Case

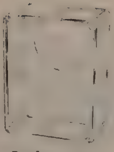
For Model 801
Cat. No. 10-2467 .... **$40.50**

For Model 825
Cat. No. 10-2649 ....**$40.50**

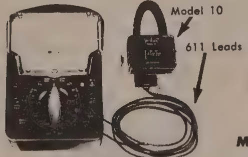
MODEL 630 SERIES ACCESSORIES



Cat. No. 255-35 ....**$2.80**
Metal stand holds tester in approximately 45° angle; enabling you to make easier readings.



Lucite Back
Cat. No. 10-1398 ..**$7.50**
Transparent back for classroom or industrial use.



No. 611 Leads
Cat. No. 79-160 ....**$4.50**
For use of Model 10 Clamp-On AC Ammeter with Model 630 Series. Leads 6' long.

Model 10
Cat. No. 60-211 ..**$24.00**
AC AMPERES. Range: 0-6-12-30-60-120-300. Accuracy: ±5% (including V-O-M ±8%.)
The Model 10 is used with the Model 630 Series by means of 611 leads to measure AC current flowing in a circuit without breaking the conductors or insulation of that circuit. It has a split yoke that can be opened and clamped around one wire of the circuit.

Model 101
Cat. No. 60-218 **$10.00**
AC RANGES. Direct Range: Ampere 0-6-12-30. Divide by 10: Milliampere 0-600-1200. Amperes 0-1.2-3-6-12. Divide by 20: Milliamperes 0-300-600-1500. Amperes 0-1.5-3-6.
The Model 101 is used to separate one conductor of a two-conductor cable from the other conductor so that the Model 10 can be used on a circuit having a two-conductor cable. The Model 101 also extends the range of the Model 10 to low AC currents.

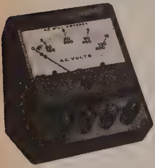
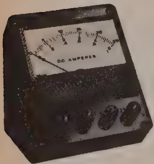
G/P PORTABLES

MODEL 320 G/P SERIES

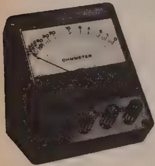
DC Volts



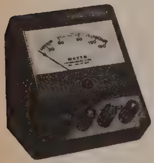
AC Volts



DC Amperes



Ohmmeter



Watts

Temperature

1. **Wide clear view plastic meter, with Bar-Ring DC movements.**
2. **Overload protection on all models. (Diodes on DC, Fused AC)**
3. **Unbreakable molded black plastic cases with aluminum panels.**

- 59 Standard ranges available on 29 units.
- ±2% accuracy on DC and AC Iron Vane Type.
- ±3% accuracy on AC Rectifier Type and Ohms.
- ±3% or better accuracy on temperature.
- Wide clear view plastic 3½" Model 320-G panel instrument.
- Bar-Ring construction in DC movements assures self-shielding.
- Five-way binding posts; three switch selected inputs on temperature unit.
- Knife-edge pointers; approx. 3" scale length.
- Diodes protect against instantaneous overloads on DC movements.
- AC movements are fuse protected.
- Temperature unit electrically compensated; thermocouple, type J, sensor.
- Unbreakable molded black plastic case 3⅞" w X 4¼" d X 4¼" h.

RANGES AND PRICES

Range	Ohms Res.	Cat. No.	Price
DC TYPE 320-G/P			
0-1-5-25 Volts (1000 Ω/V)		3500	$39.20
0-25-100-500 Volts (1000 Ω/V)		3501	40.10
0-6-60-600 Volts (1000 Ω/V)		3502	40.10
0-50 μA	2300	3503	37.00
500-25-0-25-500 μA	6250	3504	41.30

OHMS TYPE 320-G/P			
0-1K-100K (10-1000 at center scale) Includes 1.5 V battery & test leads		3560	$43.40
0-1 Meg-100 Meg (5K-500K at center scale) Includes 30 V battery & test leads		3561	50.10

Range	Ohms Res.	Cat. No.	Price
RF VOLTS TYPE 340-G/P			
0-2.5 Volts (240 Ω/V)		3570	$60.30
WATTS TYPE 360-G/P			
0-150 Watts (150 V, 2A. Max.)		3580	64.00

Note: The 0-50-100-250 DC mV model may be used with any of several standard switchboard shunts to extend range into higher current areas.

TEMPERATURE TYPE 320-G/P

Range		Cat. No.	Price
−150°F to +250°F −100°C to +120°C	(suspension)	3590	$70.00
−100°F to +300°F −75°C to +150°C	(suspension)	3594	70.00
0°F to +500°F −20°C to +260°C	(suspension)	3591	70.00
0°F to +750°F −20°C to +400°C	(suspension)	3592	70.00
0°F to +1000°F −20°C to +540°C	(suspension)	3593	70.00

Includes 5′ thermocouple probe, 1.5V C battery and instruction manual.

SPECIAL RANGES

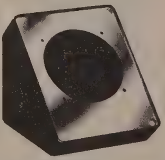
Special ranges to customer requirements on request. Special charges will apply.

OPTIONAL ACCESSORIES

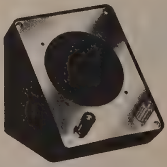
Item	Cat. No.	Price
Test leads for G/P Series (except temperature G/P)	79-127	$ 4.50
5′ thermocouple probe (temperature G/P)	79-310	10.60

PORTABLE INSTRUMENT KIT

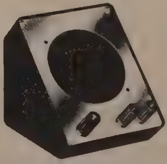
- Design your own portable instrument. Case styles with five-way binding posts available for single, double or triple range meters.
- Case assembly for mounting a 3½" square meter to meet specific needs.
- Permits greater flexibility in meter range selection. See Triplett Panel Instrument Catalog for nearly 250 3½" meters from which to choose.
- Accepts the 320-G and 327-T series meters.
- Easily assembled, ready to connect to panel instrument.



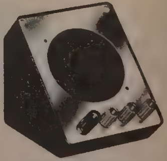
Case with panel.
Cat. No. 10-2192 $5.50



Case with panel,
1 black and 1 red post.
Cat. No. 10-2191 $7.30



Case with panel,
1 black and 2 red posts.
Cat. No. 10-2190 $8.30



Case with panel,
1 black and 3 red posts.
Cat. No. 10-2189 $9.10

Test leads for use with G/P Kit Cat. No. 79-127 $4.50

Triplett, manufacturer of the World's most complete line of V-O-M's, is ready, willing and able to design and manufacture special testers of virtually any size, style or type to meet your specifications.

Tester A (above) was designed to give auto mechanics a simple, rugged tester for "go/no go" tests that would otherwise be measured in electrical units unfamiliar to them.

Tester B is a modification of a standard Triplett tester incorporating only the specific ranges needed by the field service engineers for whom it was designed.

Tester C has special ranges and special input connectors and cables to permit a single-point connection for trouble-shooting and servicing all the circuits of a complex business machine.

Several other buyers of standard Triplett test equipment request their company name on the dial to personalize their testers.

If you think a custom tester may solve some problems for you, contact your Triplett representative. He'll put you in touch with the Tester Designers and Engineers at Triplett who'll help you analyze the problem and suggest the optimum cost/result solution. Triplett Corporation, Bluffton, Ohio 45817

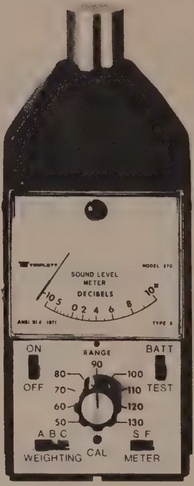
CORPORATION, BLUFFTON, OHIO 45817

A better way to see sound.

MODEL 370 SOUND LEVEL METER—TYPE 3



MEASURING RANGE: 40 dB to 140 dB (ref. .0002 Microbar) in 10 dB increments.
WEIGHTING NETWORKS: A, B, and C weighting in accordance with ANSI Standard S1.4-1971 for Type 3 meters.
MICROPHONE: Lead-Zirconate-Titanate Ceramic Unit, 15/16" O.D.
ACCURACY: Exceeds ANSI Standard S1.4-1971 for Type 3 Sound Level Meters.
OUTPUT (full scale): Approximately 100mV RMS into a 10K ohm load for a full scale meter reading. Output impedance is less than 10 ohm.
METER: Quasi RMS response, with fast and slow meter speeds in accordance with ANSI S1.4-1971 Type 3.
OVERLOAD: With the indicating instrument replaced by an equivalent impedance the output of the Model 370 will not overload for input levels up to 8 dB above maximum scale reading for frequencies from 63Hz to 8000 Hz on any range or weighting.
CALIBRATION: The Model 370 can be acoustically calibrated at frequencies from 125 Hz to 2000 Hz with either Triplett Model 371 or 372 Calibrator or any other calibrator fixtured to accept a .936 diameter microphone.
A. C. OUTPUT PROVISION: Output Jack supplies an analog output signal of approximately 100mV RMS capable of being fed into external magnetic tape recorders, octave band analyzers or other similar analytical equipment.
OPERATING TEMPERATURE RANGE: 20°F to 125°F (−7°C to 50°C); temperature coefficient is +.02dB/°F (+.036dB/°C).
STORAGE TEMPERATURE RANGE: 0°F to 150°F (−18°C to 65°C) with battery removed.
OPERATING HUMIDITY RANGE: 5% to 85% relative humidity.
MAGNETIC FIELD: 1-Orsted field of 50 or 60 Hz has no measurable effect on the Model 370.
TESTER CONSTRUCTION: Meter—Suspension movement with 1.5" dial length.
Case—Flat black aluminum with high impact plastic cone; 7¼" long x 2" deep x 3" wide.
Weight—1 lb. with batteries.
BATTERIES: 2-9V NEDA 1604: life is approximately 40 hours with typical intermittent operation.
MODEL 370 (Type 3) complete with batteries and instruction manual.
Cat. No. 3130 .... $250.00

MODEL 375 (Type 2) similar to Model 370 above except meets all ANSI S1.4-1971 requirements for Type 2 Sound Level Meters. Complete with batteries and instruction manual.
Cat. No. 3131 .... $325.00

MODEL 371 SOUND CALIBRATOR

MODEL 371
MODEL 372

ACOUSTIC OUTPUT: Frequencies—1000 Hz ±3%.
Sound Pressure Level—114 dB (ref. .0002 Microbar).
Accuracy—±0.5 dB at 73.5°F (23°C) and 760 mm Hg.
Temperature Coefficient—Between 0 and −.006 dB/°F (−.01 dB/°C).
Pressure Correction—Chart supplied.
OPERATING ENVIRONMENT: Temperature—32°F to 125°F (0°C to 50°C).
Humidity—5-85% relative humidity.
CALIBRATOR CONSTRUCTION: Controls—Single pushbutton simultaneously operates output signal and battery check light.
Microphone sizes—for 1" and ½" outside diameters.
Case—Aluminum.
Dimensions—4⅝" long x 2" diameter.
Weight—1 pound with battery.
BATTERIES: 1—9V NEDA 1600.
MODEL 371, complete with battery, adapter for ½" microphone, and instruction manual.
Cat. No. 60-454 .... $125.00

MODEL 372 SOUND LEVEL CALIBRATOR

ACOUSTIC OUTPUT: Frequencies—125, 250, 500, 1000 and 2000 Hz ±3%.
Sound Pressure Level—100 dB or 114 dB (ref. .0002 Microbar) selected by two-position toggle switch.
Accuracy—±0.3 dB—500 Hz, ±0.5 dB—other frequencies at 73.5°F (23°C) and 760 mm Hg.
Output Jack—Electrical signal output of 1 volt RMS provided for tests on instruments without microphones.
Temperature Coefficient—Between 0 and −.006 dB/°F (−.01 dB/°C).
Pressure Correction—Chart supplied.
OPERATING ENVIRONMENT: Temperature—32°F to 125°F (0°C to 50°C).
Humidity—5-85% relative humidity.
CALIBRATOR CONSTRUCTION: Controls—Frequency level switch permits selection from five frequency levels or off position. Three-position toggle switch selects between two sound pressure levels and battery check function.
Microphone Sizes—for 1" and ½" outside diameters.
Case—Aluminum.
Dimensions—5¾" long x 2¼" diameter.
Weight—1 pound with battery.
BATTERIES: 1—9V NEDA 1600.
MODEL 372, complete with battery, adapter for ½" microphone and instruction manual.
Cat. No. 60-455 .... $240.00
OPTIONAL ACCESSORIES: Carrying Case.
Cat. No. 10-2695 .... $6.30

ACCESSORIES:

Leather Carrying Case for 370/375 (Includes Neck Strap), Cat. No. 10-2693	$10.50
Leather Carrying Case for 371, Cat. No. 10-2694	5.70

SOUND LEVEL KITS

MODEL 370-K1 Sound Level Kit: Includes Model 370 Sound Level Meter—Type 3, Model 371 Acoustic Calibrator—1 Frequency with adapter for ½" microphone, Neck Strap for Model 370, Foam Wind Screen, Molded Plastic Case, batteries and instruction manuals.
Cat. No. 3134 .... $397.00

MODEL 370-K2 Sound Level Kit: Includes Model 370 Sound Level Meter—Type 3, Model 372 Acoustic Calibrator—5 frequencies with adapter for ½" microphone, Neck Strap for Model 370, Foam Wind Screen, Molded Plastic Case, batteries and instruction manuals.
Cat. No. 3135 .... $512.00

MODEL 375-K1 Sound Level Kit: Includes Model 375 Sound Level Meter Type 2, Model 371 Acoustic Calibrator—1 frequency with adapter for ½" microphone, Neck Strap for Model 375, Foam Wind Screen, Molded Plastic Case, batteries and instruction manuals.
Cat. No. 3136 .... $472.00

MODEL 375-K2 Sound Level Kit: Includes Model 375 Sound Level Meter—Type 2, Model 372 Acoustic Calibrator—5 frequencies with adapter for ½" microphone, Neck Strap for Model 375, Foam Wind Screen, Molded Plastic Case, batteries and instruction manuals.
Cat. No. 3137 .... $587.00

To control noise, you must first determine its source and intensity. That's what the Triplett instruments are designed to do. Once this is determined, you can take remedial steps. You also can use these instruments in preventive maintenance. Deteriorating equipment shifts to higher frequencies, so sound measuring instruments can catch this and permit correction at minimal expense and downtime.

The equipment is simple to use. Unskilled personnel can quickly learn to obtain accurate results, and Triplett offers both single and multi-frequency calibrators for fast, foolproof "on-site" calibration. Accuracy is assured, easily, quickly.

For nearly three quarters of a century, Triplett has manufactured high quality test instruments and panel meters for industry. Now it offers a better way to see sound.

WALSH-HEALEY NOISE PROVISIONS

The Walsh-Healey Public Contracts Act was modified in May 1970 to include safety standards aimed at protecting employees from hearing losses caused by long-term exposure to excessive noise levels.

Permissible Noise Exposures

Duration per day, hours	Sound level dBA slow response
8	90
6	92
4	95
3	97
2	100
1½	102
1	105
½	110
¼ or less	115

DECIBEL CHART

	dB	Source
EXTREME DANGER	155	Rifle blast; close-up jet engine; nearby siren
	140	Shotgun blast (to shooter); drag strip (near starting line); nearby jet engine
	120	Jet airport; some electronic music; rock-drill
PROBABLE PERMANENT HEARING LOSS AT THESE LEVELS	115-125	Drop hammers; chipping hammers
	110-115	Planers; routers; sheet metal speed hammers
	90-100	Subway; weaving mill; paper-making machine
	90- 95	Screw machines; punch press; riveter; cut-off saw
POSSIBLE DAMAGE	80- 95	Spinners; looms; lathes
	80	Heavy traffic; plate mill
	65- 75	Stenographic room; noisy typewriter
	70	Busy street
	60	Normal speech
	50	Average office
	45- 50	Low conversation
	20- 30	Quiet city apartment; whisper; comfortable sleeping limit
	15	Average threshold of acuity; leaf rustling
	0	Threshold of acute hearing (0 dB is 0.0002 dynes per sq. cm.)

Sustained exposure to dB above the upper levels may cause vibration of cranial bones, blurred vision, even weakening of body muscular structure. Frequencies of 500-2,000 Hz are most critical to noise-induced hearing loss.

Buy Triplett's designed-for-you Panel Instruments

Although we stock some 1369 different styles, sizes and types of standard panel instruments, a very large proportion of our customers buy custom instruments.

Because they need:

Custom Dials. Reading in such units as pH, roentgens, mm Hg, rpm, %, inches. **Custom Cases.** Square, round, rectangular, edgewise (horizontal and vertical), wide, narrow, shallow. **Custom Ranges.** 0-28.4, 25-0-75, 80-220, 75-0 or virtually any electrical range not listed in catalog. **Custom Accuracy.** To within ½% with mirror scales and knife-edge pointers. **Custom Tracking.** To match the specific needs of existing or new instrument designs. **Custom Resistance.** For low circuit loading with tolerances as low as ±1%. **Custom Damping.** To meet stringent electrical and vibration requirements. What custom panel instrument specifications do you need to make your product more reliable, more accurate, more rugged and — in the long run — less expensive? For quick, dependable delivery of small quantities of Triplett's "designed-for-you" panel instruments, contact your Triplett Sales/Service/Modification Center. For prototypes or production quantities, contact your Triplett representative. He'll put you in touch with our Instrument Designers/Engineers who'll help you analyze the problem and suggest the optimum cost/result solution.

MODEL PS940A

This dual-trace mini-portable oscilloscope serves as a high performance, battery operated visual trouble-shooting tool for use in servicing today's technology—in the plant or in the field. It includes all of the basic features and quality of a laboratory oscilloscope, yet it adds a new dimension to portable scope applications because of its small size, light weight and battery operation capability. Full dual-trace switching is included, and computerized triggering guarantees a stable CRT presentation at all times.

PS940A	Mini-Portable Oscilloscope	$1,145
PS9008	10:1 Probe Kit	$ 35
PS9010	Battery Pack	$ 50
PS9011	Viewing Hood	$ 10
PS9012	Rack Mount Kit	$ 25
PS9013	Extender Card	$ 25
PS9015	Accessory Pouch	$ 20
PS9016	Rear Panel Stand	$ 15

- DC — 20 MHz BANDWIDTH
- COMPUTERIZED TRIGGERING
- 10 mV/div SENSITIVITY
- 21 SWEEP RANGES TO 100 nsec/div
- DELAY LINE
- 18 nsec RISETIME
- WEIGHS ONLY 9.5 lbs
- FITS IN A TOOL KIT OR BRIEF CASE
- BATTERY, AC OR DC POWERED

MODEL PS910B

- DC — 20 MHz BANDWIDTH
- 10 mV/div SENSITIVITY
- 18 nsec RISETIME
- SWEEP RATES TO 100 nsec/div
- AUTOMATIC OR MANUAL TRIGGERED SWEEP
- FITS IN A TOOL KIT OR BRIEF CASE
- WEIGHS ONLY 5.5 lbs
- BATTERY OR AC POWERED

PS910B	Mini-Portable Oscilloscope	$645
PS910B(R)	Rack Mount Mini-Portable Oscilloscope	$645
PS9001	Nickel-Cadmium Batteries	$ 50
PS9003	207V-253V AC Line Operation	No Charge
PS9005	Rack Mount Kit for PS910B	$ 25
PS9007	P-7 Phosphor	$ 25
PS9008	10:1 Probe Kit	$ 35
PS9009	Viewing Hood	$ 10

This "mini-scope" brings laboratory quality and performance to "on-site" DC - 20 MHz oscilloscope test and measurement applications. It serves as a low to high frequency visual trouble-shooting tool for use in meeting both analog and digital service requirements —at the plant or in the field. Recharging circuitry is included, and standard "C" size battery cells can be used.

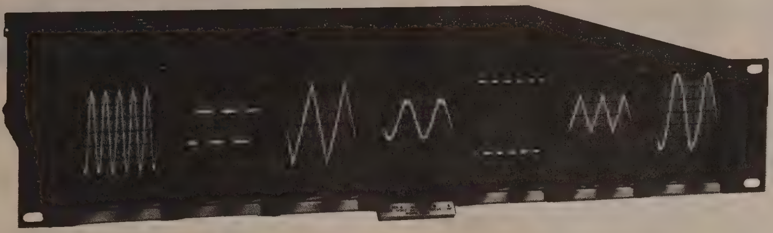
PRODUCT SUMMARY

MONITOR OSCILLOSCOPES

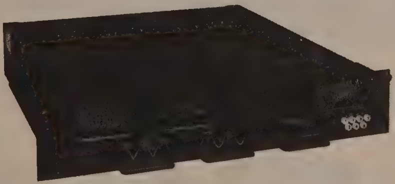


SERIES 1200

The multi-channel, "in-line" display capability offered by each Model 1200B Monitor Oscilloscope makes it ideally suited for real-time monitor applications where simultaneous display of several signals is desirable to guarantee optimum performance or to facilitate analysis. The self-contained vertical and horizontal control circuitry associated with each plug-in scope module allows a given signal to be analyzed without disturbing the display of the remaining signals. Model 1200B(R) is configured for instrumentation magnetic tape recorder applications. It facilitates setup of record/reproduce electronics and guards against data loss by providing record/reproduce monitor during recorder operation. A special attenuator allows each signal in a REC/REP input pair to be independently normalized for full scale display.

- **UP TO 7 PLUG-IN DC-5 MHz OSCILLOSCOPES**
- **2" DISPLAY HEIGHT**
- **"IN-LINE" CRT PRESENTATION**
- **ALL CONTROLS ON FRONT PANEL**
- **SELECTABLE DUAL INPUTS PER CHANNEL**
- **INDIVIDUAL ATTENUATOR AND SWEEP RATE CONTROLS**

1200B	Standard Monitor Oscilloscope	$2,895
1200B(R)	Recorder Monitor Oscilloscope	$2,895
12002	Extender Cable Assembly	$ 50
12004	Chassis Slides	$ 50



SERIES MS200

Similar to the Series 1200 Monitor Scopes, these units offer 10 MHz bandwidth and a broader horizontal display width. Standard scope and tape recorder monitor units are available, as well as X-Y display, biomedical and master/slave versions. Both these and the Series 1200 units are ideally suited for tape recorder or real-time monitor applications where simultaneous display of several signals is desirable to guarantee optimum performance or to facilitate comparison.

MS200A	Standard Monitor Oscilloscope	$3,145
MS200A(R)	Recorder Monitor Oscilloscope	$3,145
MS200A(B)	Biomedical Monitor Oscilloscope	$3,425
MS200A(S)	Master/Slave Monitor Oscilloscope	$3,245
MS200A(X)	X-Y Monitor Oscilloscope	$3,645
MS2002	Extender Cable Assembly	$ 50

SERIES MS700

The multi-channel input and selective dual display capability offered by these oscilloscopes makes them ideal for use in applications where the analysis of more than one signal is paramount to achieving successful results. Model MS700A includes standard scope controls, while providing a DC-10MHz bandwidth and a 0.1 μsec/div - 10 msec/div sweep rate. Another unit offers a slower sweep rate and greater vertical sensitivity, while a third unit is specially configured for tape recorder monitor. Up to 14 input signals can be selected for display. Panel height is only 1¾".

MS700A	Standard Monitor Oscilloscope	$1,795
MS700A(R)	Recorder Monitor Oscilloscope	$1,795
MS700A(B)	Biomedical Monitor Oscilloscope	$1,875
MS2002	Extender Cable Assembly	$ 50

PRODUCT SUMMARY

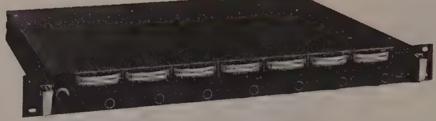
ADDITIONAL ITEMS

VU-DATA CORPORATION

MODEL VU600A TAPE RECORDER MONITOR METER

This precision Monitor Meter provides an off-the-shelf answer to the V.U. meter requirements of instrumentation magnetic tape recorder users. The combination of selectable RMS or PEAK modes, 3 inputs per channel and 3 full scale voltage ranges driven by self-contained, decoupled feedback amplifiers is unmatched by any other instrument of this type. Three basic functions are served in instrumentation magnetic tape recorder applications:

1. Facilitates setup of record/reproduce electronics to assure proper recording.
2. Provides monitor of all input data channels during the record phase to alert the operator to signal loss.
3. During the reproduce phase, provides simultaneous monitor of all data channels for analysis and verification.



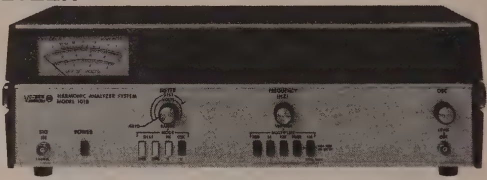
- RMS AND PEAK READING MODES — SELECTABLE
- DC TO 10 MHz BANDWIDTH
- 3 SELECTABLE INPUTS FOR EACH OF 7 CHANNELS
- ONLY 1¾" PANEL HEIGHT
- 100 mV, 1 V AND 10 V FULL SCALE RANGES

VU600A Monitor Meter	$850	VU6001 Chassis Slides	$50

MODEL 101B TAPE RECORDER ANALYZER

Model 101B is comprised of three instruments which are fundamental to total analog circuit analysis: (1) Sine Wave Oscillator, (2) RMS Voltmeter and (3) Wave Analyzer. The unique combination of these instruments in a single 5¼" high, rack mountable chassis provides a test and measurement system that not even an entire rack full of equipment can equal. These three separate instruments can be interfaced with each other, as well as with the recorder under test, by simple pushbutton control and the use of only two BNC cables. This simplicity eliminates complicated cabling and signal patching, thus reducing the chance for operator error and affording more time for the measurement task at hand. Complete end-to-end calibration of direct recorder system electronics can be achieved by this single, light weight device. It is ideal for use both in the field or during production test. Specifications include: Wave Analyzer - 100 Hz—1 MHz fundamental frequency range; Oscillator - 100 Hz—5 MHz output frequency at 100 mV—2V rms; RMS Voltmeter - 8 full scale ranges from 3 mV to 10 V rms.

101B Tape Recorder Analyzer	$3,495	1015 DC Source	$ 125
1012 Square Wave Output	$ 135	1016 Automatic S/N Ratio	$ 500
1013 DC Monitor Output	$ 125	1017 Front/Rear Panel Connectors	$ 75
1014 Rack Mount Brackets	$ 10		



- INCLUDES WAVE ANALYZER, SINE WAVE OSCILLATOR AND RMS VOLTMETER
- SIMPLIFIES MAGNETIC TAPE RECORDER CALIBRATION AND TEST
- PUSHBUTTON SELECTION AND DISPLAY OF 2ND AND 3RD HARMONIC DISTORTION
- MEASURES FREQUENCY RESPONSE AND S/N RATIO
- AUTOMATIC HARMONIC TRACKING, INPUT LEVELING AND RANGING

OSCILLOSCOPE CAMERAS

SCOPE MATE® (uses POLAROID Color Pack Land Camera)

SC02	(includes Shoot N' View Hood with Electronic Shutter Speed Control)	$185
SC03	(includes POLAROID CR-9 Land Camera with Shoot N' View Hood)	$200
LS01	Ultra Violet Light Source (SC02 only)	$ 75

POLAROID CR-9

33-1	CR-9 Land Camera with Hood	$175
33-1	CR-9 Land Camera without Hood	$153
33-6, 33-9, 33-10, 33-11, 33-12, 33-15, 33-16, or 33-18 Hood		$ 22

These SCOPE MATE® and POLAROID CR-9 oscilloscope cameras have given oscilloscope photography a new dimension—"portability." They are not only useful in the laboratory as a design aid, but also in the field as a quality control and inspection tool. Hard copy prints of various CRT trace displays can be obtained after only a few minutes familiarization by even the most inexperienced camera operator. Applications include the recording of transmission signal levels for verification and record purposes, and the gathering of vibration data for use in maintenance routines. A wide selection of hoods is available to fit almost any oscilloscope.

SIGNAL CONDITIONING AMPLIFIERS
D22 SERIES

The D22 Series provides charge amp signal conditioning for all piezoelectric transducers. Some models also provide for strain gage operation. This series features all integrated circuit design with superior low noise characteristics, in a rugged modular construction. The basic Model D22PM includes the capability of operating with a remote preamp, and includes a meter. This and other standard models are shown below. The wide range of optional features available for addition to most models, is listed below.

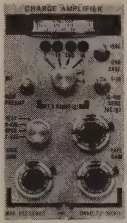
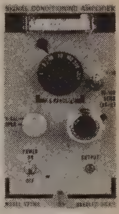
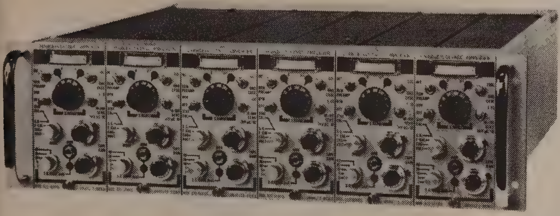
D22PMA



D22PMGA

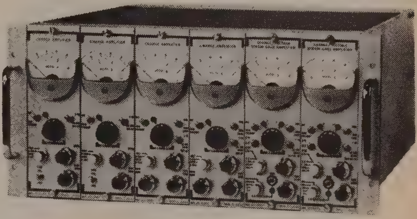


P22MS



Model 22RA

The Model 22RA Rack Adapter accepts six 22 Series modules in the standard 5¼ inch panel height. Also accepts the Model TF11 Tracking Filter.

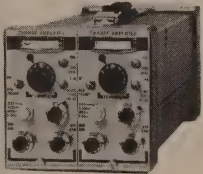


Model 22RA-8

Rack mounted D22's with the "–8" large meter option require the 22RA-8 Rack Adapter with 8¾ inch panel height. Each 19 inch adaptor accepts six "–8" modules.

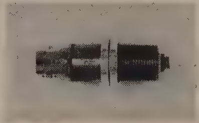
Model D22PM-8

Models D22PM and D22-PMR are available with the "–8" option which provides a 2½ inch meter scale for easier readout.



Model 22P2

The Model 22P2 Dual Channel Portable Adapter accepts two channels of 22 Series instruments.



Model 11PA-2

The Model 11PA-2 is a two-wire Remote Voltage Preamp designed for use with any of the 22 Series instruments.

Model 22CA-2

The Model 22CA-2 Remote Charge Preamp may be used with any of the 22 Series instruments shown above, and is a companion unit to the Model P22MS. Optional Model 22CA-2T is available for operation to 160°F.

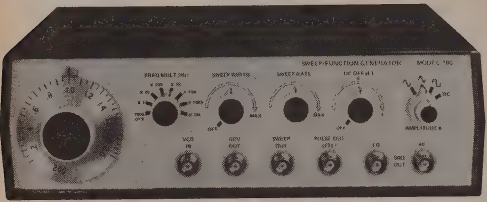
FUNCTION GENERATORS

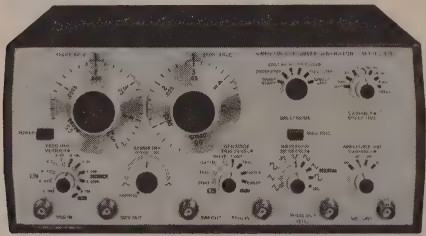
Wavetek function generators are high purity sources of various waveforms, including sine, square and triangle, with frequencies ranging from a low of 2μ Hz—a period of 135 hours—to 30 MHz. They are of rugged construction and have simultaneous output capability and can be operated on battery power supplies for line-free operation and portability.

Most models offer voltage control of generator frequency (VCG) and some also have voltage controlled amplitude (VCA) making possible FM and AM operation, as well as sweeping via external commands. Several models have internal sweep capability as well, with some offering logarithmic as well as linear sweep. Triggered and gated operation is available on many models.

Testing with repeatable noise can be carried out using the Model 132, which offers both digital and analog pseudo-random noise. The pseudo-random sequence length, clock rates and band-width are selectable.

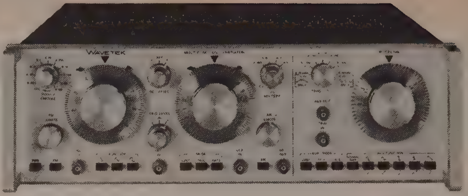


The new 180 Series consists of five high-performance low-cost generators. Despite their low prices, they offer such features as full sweep, continuous, triggered and gated operation, plus discrete step sweeping. Sweep widths go up to 100,000:1.



The 180 Series also introduces a brand new Wavetek capability—XCG. XCG stands for crystal-controlled-generator, and it stands for accuracy never before obtainable from a function generator. By phase-locking the generator output to a crystal at twenty-five discrete points on the dial, Models 181 and 183 can produce waveform frequencies accurate to within .01% of dial setting.

The 140 Series function generators have variable symmetry control. With this useful feature, the triangle wave can be modified to a ramp output with variable rise/fall ratios. The square duty cycle wave can be adjusted from a normal 50% to duty cycle ratios of 1:19 to 19:1 for variable pulse outputs.



The Models 162 and 164 provide signal generation of sine, square, triangle, positive and negative pulses over a frequency range of 30 μHz to 30MHz. In addition to the wide frequency coverage, the Model 164 has an integral ramp/step generator that can be used to sweep, sweep burst, or step the frequency of the main generator. In this mode of operation the sweep range is divided into ten steps and can be selected for auto or manual stepping. Other features include rise and fall time adjustments by means of an independent slope, width and symmetry controls. Different rise and fall times may be selected to suit testing or triggering requirements.

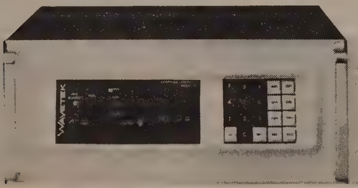
PROGRAMMABLE FUNCTION GENERATORS

Wavetek offers the most complete selection of programmable signal sources available. Models 158 and 159, greatly extend the utility of programmables. The 159 gives local and remote control, while the 158 is remote only. Model 159 features keyboard data entry with digital display. Both have sine, triangle, square, and ramp waveforms, simple ASCII programming, programmable dc offset, triggered and gated operation, and a 3 MHz top frequency.

For increased versatility, the Model 154 offers 10 MHz top frequency, amplitude and frequency modulation, programmable dc offset, as well as dc volts and triggered and gated operation.

If the requirement is greater precision, the Model 157 Waveform Synthesizer is the solution. Covering frequencies from 100μHz to 1 MHz with accuracies of 0.01%, the 157 meets the critical demands of most automatic test systems. Other features include frequency lock to an external source, precision amplitude attenuation, and triggered and gated operation.



A recent addition to the line, the Model 152 Variphase Generator, can output 1 to 4 channels of waveforms and control the phase between all four from 0° to 360°. Other features include 0.1° phase control, 0.05% harmonic distortion for the sine wave, external phase lock, sine/cosine output, sine, triangle, and square wave output and a top frequency of 100 kHz. The Model 152 also features keyboard data entry with digital display and remote control.

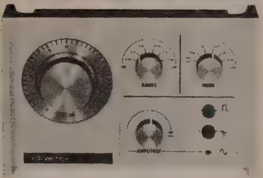
PORTABLE FUNCTION GENERATOR



The battery-operated Wavetek Model 30 Function Generator is a self-sweeping audio function generator . . . a complete audio signal source in an extremely compact, portable package. Three frequency ranges give an overall capability of 2 Hz to 200 kHz.

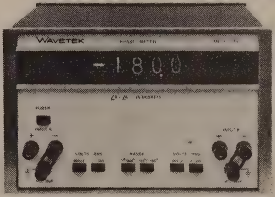
Operating modes are dial control of frequency, external voltage control of generator frequency (VCG) and fast, medium and slow frequency sweep modes, either linear or logarithmic.

Outputs include sine, square, and triangle waves, sweep sync, generator sync, and horizontal drive (linear and log ramp).

The supplied battery powers the Model 30 for approximately one 8-hour day. A battery charger and rechargeable battery are available.

Model	30
Price	$149.95

PHASE METERS



Wavetek Phase Meters accurately measure the phase angle between any two ac signals with amplitudes between 1 mV and 300 V within the 10 Hz to 2 MHz range. They have excellent sensitivity, broad dynamic range, wide bandwidth and 0.1 degree resolution.

Model 740 has a taut band meter readout and 360-degree phase offset capability. The digital Model 750 has a four digit readout. Its automatic operation eliminates the need for amplitude matching, frequency tuning, and output filtering.

Model 755 is completely programmable for automatic phase measurement in systems applications.

Model	740	750	755

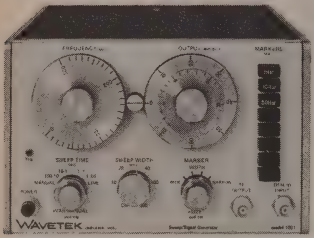
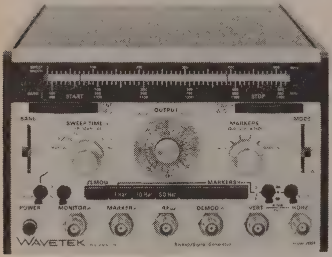
SWEEP/SIGNAL GENERATORS



Wavetek Sweep/Signal Generators are solid-state instruments that cover the frequency range from 0.5 MHz to 1.4 GHz. The 1000 Series (Models 1001A, 1002, 1004, 1005) are general purpose sweepers. All are useable as signal generators, with such features as AM and FM modulation, excellent dial accuracy and resolution, and calibrated output. Each is a completely programmable signal source.



Models 2000 and 2001 Sweep/Signal Generators offer versatility and an exceptionally wide frequency range (1 MHz to 1400 MHz). These instruments can be used in engineering laboratories and for production testing. Complete remote programming and external AM or FM modulation is possible through the use of electronic tuning and PIN diode leveling and attenuation.

The three frequency bands (1 MHz to 500 MHz, 450 MHz to 950 MHz and 900 MHz to 1400 MHz) are PIN diode switched and may be swept from CW to full 500 MHz sweep width. The units may be line locked or swept at rates of 50 sweeps per second to one sweep every 100 seconds. Manual and triggered modes are also provided.

The Model 2001 provides three operational modes. In the start/stop mode, the START dial sets the start-sweep frequency and the STOP dial sets the stop-sweep frequency. In the ΔF mode, the START dial sets the center frequency and the STOP dial sets the sweep width (from 200 kHz to 500 MHz). In the CW mode, the START dial sets the center frequency and the STOP dial is disabled. A 100% duty cycle is provided in the CW mode by removing the oscillator blanking. The Model 2000 provides for ΔF and CW operation only.

Both Models include a complete crystal-controlled birdy marker system with provisions for a combination of up to six plug-in marker modules.

Frequency Range	Model	Maximum Sweep Width	Output Amplitude	Price
Single Band				
0.5MHz–300MHz	1001A	300MHz	+13dBm	$1100
1.0MHz–500MHz	1002	500MHz	+13dBm	1150
500MHz–1000MHz	1004	500MHz	+10dBm	1100
700MHz–1400MHz	1005	700MHz	+10dBm	1100
Multi-Band				
1MHz–1400MHz	2000	500MHz	+10dBm	1450
1MHz–1400MHz	2001	500MHz	+10dBm	1850

SIGNAL GENERATOR

The Model 3000 Signal Generator is a rugged, solid-state signal source in the VHF frequency range (11 MHz to 520 MHz) with frequency accuracy of 0.001% and 1 kHz resolution. Internal and external AM and FM modes of operation and a calibrated output from +13 dBm to –137 dBm further increase the instrument's versatility.

The accuracy of 0.001% results from internally phase locking the voltage-controlled oscillators to various reference frequencies that are in turn referenced to a precision crystal-controlled oscillator.

Frequency is set with 1 kHz resolution via six front panel indicator switches, or it can be remotely programmed by digital input.

The Model 3000's accuracy, stability, dynamic range, and AM/FM capability can only be duplicated by instruments costing two to three times as much.

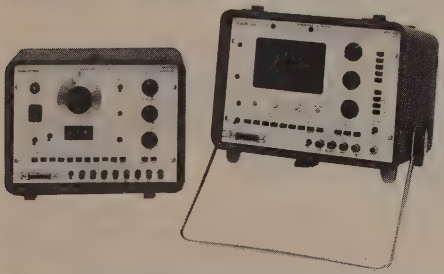
ECONOMICAL SWEEP GENERATOR

The Model 1050 Sweep Generator is a general-purpose broadband instrument covering the VHF range of 1 to 400 MHz. It has a maximum sweep width of 400 MHz, output amplitude of + 10 dBm, output flatness of ±0.25 dB, with spurious signals 30 dB below output. Its performance and price qualify it for use as production and maintenance test equipment as well as in engineering laboratories. The specifications and features also make it an ideal instrument for use in educational institutions.

Model	1050
Price	$495

TRANSMISSION TEST EQUIPMENT



These portable, battery-powered transmission test sets combine many functions for faster check-outs.

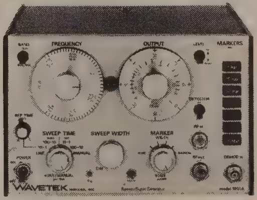
The Model 420 is a swept-frequency transmission test set allowing level and impedance measurements across the voice and program frequency ranges from 50 Hz to 15 kHz. Level versus frequency is displayed on a CRT. This allows a single visual inspection of the transmission characteristics of the facility under test across the entire frequency range.

The Model 430 transmission Multimeter is a 15-pound, easy-to-use instrument that does the job of five separate units: a frequency counter, dB meter, noise meter, capacitance bridge and decade box, and a DVM. All measurements are expressed on a digital readout. Push button controls for simple operation.

Model	420	430
Price	$1995	$1395

CATV TEST EQUIPMENT

The Model 1850/1860 Cable Sweep System is an economical maintenance tool that permits continuous monitoring of CATV system performance. It has built-in test point and drop cable compensation and a tuned RF trigger circuit. Frequency range is 5 to 350 MHz with transmitter flatness of ±0.25 dB, receiver flatness of ±0.5 dB, and sweep linearity of 1%. Simo sweep time is adjustable between 1 and 10 ms, with repetition time of 2 to 20 seconds.



Model 1801A is a sweep generator with features and options ideally suited for the manufacturer, installer or operator of CATV systems. The standard frequency range of 1 MHz to 500 MHz, and optional 450 MHz to 950 MHz, covers the bands now being used as well as those of the future. The ultra-flat 75-ohm output system is calibrated from + 57 dBmv to –33 dBmv, with 20 dB being controlled by a continuously variable PIN diode attenuator. Other features include built-in RF detector, internal and external leveling and a crystal-controlled birdy marker system. A special sweep rate facilitates testing operating CATV systems with minimum subscriber interference.

Model	1850	1860	1801A
Price	$675	$1049	$1350

WAVETEK®

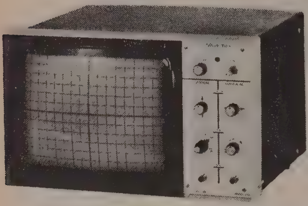
X-Y DISPLAY OSCILLOSCOPES



The Wavetek Model 1901A solid-state X-Y Display Oscilloscope incorporates an extremely stable, low noise, vertical amplifier with sensitivities from 1 mV per division, making it ideal for measuring frequency response in conjunction with available sweep/signal generators.

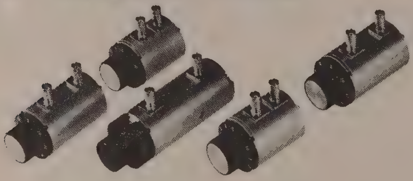
The 9 kV accelerating potential provides a bright, well focused, narrow trace on the large, easy to read, 12-inch cathode ray tube. Two intensity controls are provided, one for the beam itself and one for an intensity marker.

Standard units have P1 phosphor tubes and molded graticuled faceplates to minimize parallax. P4 or P7 phosphor tubes with clear faceplates are available.

The Model 1910 is a dual-trace version having features and specifications similar to the 1901A.

Model	1901A	1910
Price	$475	$595

ATTENUATORS



Series 5000 and 7500 Attenuators are miniature turret type units that operate over wide frequency ranges, making them equally suitable for bench setups, field use, or incorporation into test instruments. All units are direct reading, ruggedly constructed and have provisions for panel mounting.

Model	Frequency Range	Total Attenuation	Steps	Price
5001	to 2000 MHz	1 dB	0.1 dB	$ 90
5010	to 2000 MHz	10 dB	1.0 dB	90
5070	to 2000 MHz	70 dB	10.0 dB	90
5080	to 2000 MHz	80 dB	1.0 dB	190
7501	to 1000 MHz	1 dB	0.1 dB	90
7510	to 1000 MHz	10 dB	1.0 dB	90
7570	to 1000 MHz	70 dB	10.0 dB	90
7580	to 1000 MHz	80 dB	1.0 dB	190

RF DETECTORS

Series 150 and 170 detectors are designed for applications requiring low VSWR and flat frequency response across broad operating ranges. Models D151 and D152 are 50 ohm units with typical VSWR's of 1.2 at 1000 MHz. The D151 has a 1000 MHz upper limit and the D152 can be operated up to 2 GHz. Model D171 is a 75 ohm detector that operates over the frequency range of 200 kHz to 1000 MHz with a response of ±0.3 dB and a return loss greater than 23 dB. Model M151 is a three port, high impedance detector designed to obtain amplitude versus frequency response of an RF circuit with minimum circuit disturbance. It may also be used as an external monitor to level the sweep signal at the input junction of any device under test.

Model	D151	D152	D171	M151
Price	$60	$80	$60	$80

GENERATOR MODULES

Wavetek 120 Generator Modules offer a wide range of signal generation capabilities in convenient modular form for systems applications. The modules can be used as voltage-to-frequency converters, fixed frequency oscillators, voltage controlled oscillators, sawtooth and swept sine wave generators, and triggered and tone burst signal sources to 100 kHz. They can be directly integrated into various systems or supplied on a single assembled printed circuit card.

Prices available on request.

ACCESSORIES

Most Wavetek instruments can be ordered with factory-installed panels for single or dual (side by side) rack mounting. Rack adapter kits are also available.

SIGNAL GENERATOR

For $1,975 you have no right to expect a signal generator like this.

For $1,975 you should have to settle for tubes, or for a non-phase-locked generator.

But here's the Wavetek 3000, so you can toss your expectations out the window. This solid state signal generator is not only phase-locked and accurate (±0.001%), it's programmable as well. And it covers the entire range from 1 to 520 MHz in a single band. Yet once we've received your order, you can expect a signal generator like this one right away . . . for just $1,975.

That may not be right, but it sure is reasonable.

SPECIFICATIONS
Frequency Range: 1–520 MHz
Frequency Accuracy: ±0.001%
Resolution: 1 kHz
Stability: Less than 0.2 ppm per hour
Output Range: +13 dBm to −137 dBm
Flatness: ±0.75 dB
AM Modulation Range: 0–90%
FM Deviation: 0–5 kHz and 0–500 kHz
Internal Modulation Rates:
400 Hz and 1 kHz
Dimensions:
12″ wide x 5½″ high x 13¾″ deep
Price: $1,975

For years, we've been bullish on high-priced sweepers. Sure, there were plenty of low-priced offerings, if you wanted to speculate with hobbyist quality. But if you really wanted to make a clean sweep, you looked to the blue chips—and to spending about a grand. But now Wavetek has issued the Model 1050, an instrument that everyone can afford (even those in a tight capital equipment spending predicament). It sweeps from 1 MHz to 400 MHz with the signal quality needed for both lab and production use. The instrument features ±0.25 dB output flatness, 2% display linearity, spurious signals 30 dB below output, and a maximum amplitude of +10 dBm. It's available in 50-ohm and 75-ohm versions, and the price for either is just $495. In our opinion, this is the time to buy. Write or call us for a complete statement of the Model 1050's performance. Wavetek Indiana, Inc., P.O. Box 190, Beech Grove, Indiana 46107. Tel. (317) 783-3221. TWX 810-341-3226.

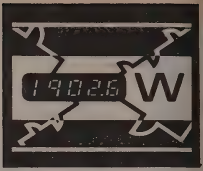
YEW Power & RMS Measurement

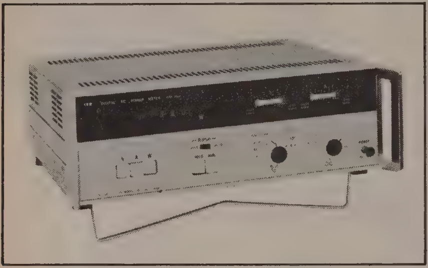


2504 DIGITAL AC METER

The Model 2504 is designed for use in single phase circuits for measuring TRUE RMS voltage, current and watts in the following ranges: 0-300 VAC, 0-10A and 0-3 kW (optional higher ranges are also available). 0.25% accuracy and a maximum resolution of 0.01% are maintained throughout these ranges. Interchangable plug-in modules and printed circuit boards allow the selection of a variety of functions to meet specific requirements. Thus, the initial cost of the instrument can be kept to a minimum while later expansion is possible through the purchase of additional plug-ins or p-c boards.

Simultaneous analog outputs for Voltage, Current and Watts are provided in the standard unit. A BCD output, compatible with TTL logic is also available as an option as is remote control of the measuring function. Frequency range of the 2504 is up to 2 kHz for Volts and Amps, and up to 1.2 kHz for Watts.

The basic principle of operation of the 2504 is through YEW's patented "Time Division Multiplier" technique which has been long proven in the power measuring field by such instruments as the YEW 0.02% Model 2885 Standard Wattmeter and the Model 2503 Digital AC Meter. Price: From $1,590.00



2503 AC POWER METER

The Model 2503 is a more comprehensive version of the 2504 described above with improved accuracy, more ranges and additional features. The accuracy of the Model 2503 is 0.1% on all voltage, current and watt ranges. Ranges are up to 600 VAC and up to 30A.

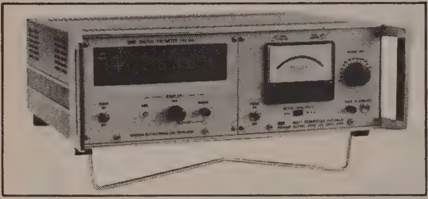
Unlike conventional thermocouple and dynamometer type wattmeters for RMS measurements, the Model 2503 offers exceptional spike and overload protection, negligably small instrument losses, long term stability and a direct capability for interface with data acquisition systems.

The primary applications for this instrument are found in power and True RMS measurement of distorted and low power factor waveforms. With an accuracy of 0.1%, the instrument can also meet the requirements of calibration laboratories and may be used to set quality control standards in both the lab and production facility.

BCD and analog outputs, isolated by photocouplers, are available as an option. Units for 3 Phase application are also available.

YEW's patented "Time Division Multiplier Technique" and "Steepest Descent Method" provide the basic operating principles of the instrument.

Price: From $3,995.00 (Single Phase)



2885 STANDARD WATTMETER

The Model 2885 Standard Wattmeter Series provides the very best precision wattmeter capability available and is utilized internationally by major calibration laboratories, institutes and industries as a calibration and inspection standard. The superior accuracy (0.02%) of the 2885 is a result a YEW-developed "Time Division Multiplier" technique combined with recent pulse technology developments and an extensive developmental engineering effort by YEW.

The accuracy of the 2885 watt transducer is 0.02% at 60 Hz and 0.03% with digital readout and direct reading switch. These combined units provide a complete digital wattmeter. Measuring ranges are up to 300 VAC and up to 20 A with 1 and 5 VDC outputs and/or 5 digit display. Frequency range is from 20 Hz to 10 kHz. The unit may also be used as an AC-DC transfer standard when used with an associated AC/DC shunt.

Price:		
	2885-11 Watt Transducer	$2,590.00
	2885-15,16 Digital Wattmeter	From $4,320.00

2041 PORTABLE WATTMETER

The Model 2041 Portable Wattmeter is of the electro-dynamometer type with a caut band suspension system to provide accurate and reliable performance. It is designed for use in laboratories or production facilities where accurate measurement of power at DC and AC to 1,000 Hz is required. The instrument also features an internal permalloy shield for protection against external magnetic fields.

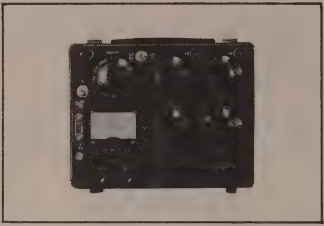
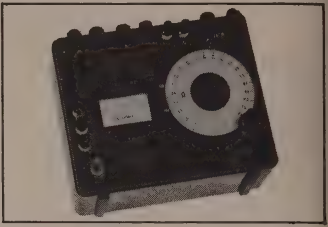
The 2607 is a photo tachometer which has a single lens and is capable of measuring from 200 rpm to 20,000rpm F.S. It is unaffected by the angle of the light beam. **Price:** $187.00



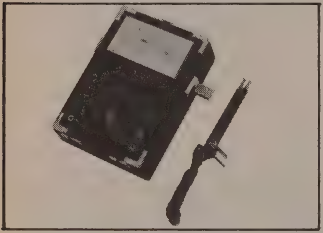
2755 PORTABLE WHEATSTONE BRIDGE

Suitable for general resistance measurement from 10 to 10MΩ. Has 0.1% accuracy on 100Ω to 100KΩ. Shock-proof with the high impact case and tautband meter. **Price:** $249.00



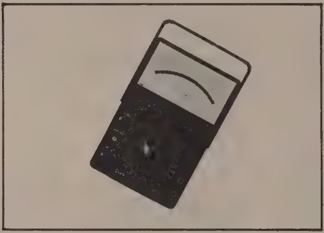
2769 PORTABLE DOUBLE BRIDGE

The 2769 is a Kelvin double bridge for measuring low resistance from 0.1mΩ to 110Ω. Features high-sensitivity electronic galvanometer, high-impact case and built-in battery. **Price:** $349.00



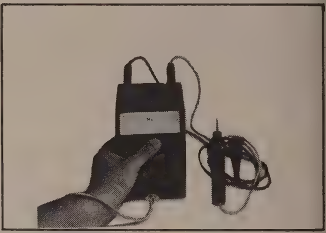
3201 TAUT-BAND V-O-M

The 3201 is rated as JIS "class A" which means that it meets the most severe government test requirements. Features 100KΩ/V for DC voltage and 12 microampere FS for DC current. **Price:** $73.00



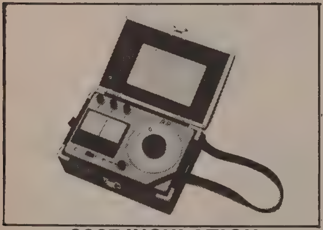
3223 ELECTRONIC V-O-M

With highly reliable discreet DC amplifier, 3223 offers high input impedance of 11 M for DC voltage. Uses a shock-proof tautband mechanism and is housed in a high impact case. **Price:** $128.00



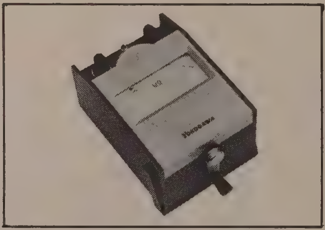
3213 INSULATION TESTER

The 3213 offers the exact same performance as 3221 Crank-type Insulation Tester. Ranges available are 100V/20M to 1000V/2,000M. **Price:** From $105.00



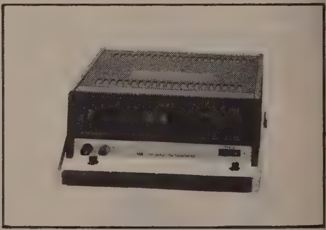
3207 INSULATION POLYTESTER

3207 is a universal field tester, capable of measuring insulation resistance, earth resistance, earth voltage, AC voltage and current. Ideal for all-round plant maintenance. **Price:** $320.00



3221 INSULATION TESTER

3221 is a solid state crank-type insulation tester which does not use critical mechanical parts such as a governor. **Price:** $124.00



2809 DIGITAL THERMOMETER

The 2809 is designed to accept five different thermocouples. Display is long-life LED. Analog output provided as standard. **Price:** From $890.00

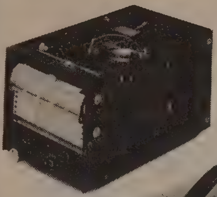
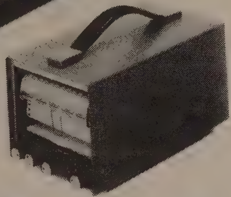
data technology

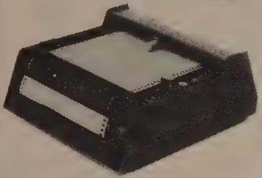
STRIP CHART RECORDERS



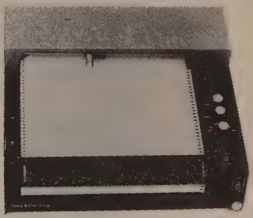
Model 704 OEM Recorder
Small size, lowest cost systems recorder; fixed single speed, single span, 4 inch chart width.



Model 714 Field/Factory Recorder
Small size, rugged case design for tough environments; 4 inch chart width, 5 selectable spans, 12 selectable speeds.



Model 705, 725 Laboratory Recorders
5 inch chart width; flat bed design. Available in either the fixed single span, single speed version (705) or the variable span, variable speed (725).
High accuracy, low cost, make these instruments the most popular recorders available.



Model 7210, 7212
High Resolution Recorders
10 inch chart width flat bed recorders; variable chart speed, variable full scale input span.
Model 7210 is a single pen design; Model 7212 is a dual pen design. Both models feature remote on/off control, 0.5% accuracy and event markers.

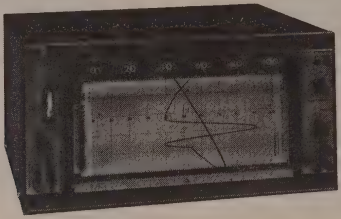
ESTERLINE ANGUS
A UNIT OF ESTERLINE CORPORATION

Data Recording Instruments

Eight different kinds of high performance recorders to track processes, power, experiments, tests and pollution. Save time, money, and data reduction with graphic and digital recorders up to 248 channels. The line includes servo, direct writing, and event recorders; miniature recorders, data acquisition systems and top performance X-Y recorders.

Servo recorders



Speed Servo® II recorders

Bulletin F700

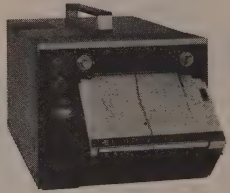
Description: 10" (254 mm) recorders with single, two pen crossover, or two pens side-by-side are available for a wide variety of lab uses or stripped down for dedicated or OEM use. Speed Servo II offers 0.3 sec. linear servo motor response, one moving part, wireless feedback pot, no-mess ink cartridge system or inkless writing. **Features:** Writing system and wiper contact integral parts of linear servo armature system: position of motor armature, feedback potentiometer and pen permanently locked. Armature assembly is the only moving part. Wireless potentiometer eliminates hunting, hysteresis, pot noise, contact and strip wear. Unlimited pot life. Stylus and ink are a single disposable unit. Available single or double channels, single, 2, 4, 5, 10 or PIP chart speed drives. Accessible front controls, sloped writing surface, 0.5 mV to 100 VDC input spans, and thermocouple compatible. Chart tear-off and mechanical pen lifter standard. Controls adjustable while unit operating. Price for single-channel model (L1101S) approx. $1,000. **Thermocouple:** Compensation available for ISA types E, J, K, R, S, T. **Event pen:** Available for left and right chart margins. Single ratings of 6, 12, or 24 VDC or 120 V, 50 or 60 Hz. **Alarms:** Two front set alarms/channel. SPDT contact rating, 5 amps, 125-250 VAC. Rear connections provided.

Quick specs: Single channel (L1101S), two-channel (L1102S), and two pens side-by-side (L11S2S). **Input.** Floating, guarded, front and rear terminals (thermocouple terminals rear only).

Electronics. Solid state with MOSFET chopper. **Dead band.** 0.1% of span. **Chart.** 11" (279 mm) overall, 10" (254 mm) calibrated, 120' (38.9 m) long. **Step response.** 0.3 seconds or better overall, 10" span. **Accuracy.** ±0.25% of span or 3.5 μV.

Chart drives: Chart drive power is provided by an interchangeable gear train and three motor choices: 1, 10 and 60 rpm. Available English or metric in ranges of ¼ in./hr. to 1 in./sec. or 6.25 mm/hr. to 25 mm/sec. **Single-speed:** Dedicated single speed motor. Choice of 18 speeds. **Two-speed:** Two gears in train, removable and reversible, ½, 2, 4, 8 x basic speeds available. Total speeds—88. **Four-speed:** Same as two-speed but with switch to select 10:1 and 60:1 jumps. Total speeds—120. **Five-speed:** Five position thumbwheel sets 1, 2, 4, 8 and 16 x basic speeds. Total speeds—140. **Ten-speed:** Ten position thumb-wheel sets 1, 2, 4, 8, 10, 16 and 60 x basic speed. Total speeds—300. **PIP drive option:** Provides variable chart speed proportional to a pulse input or a variable DC voltage and other inputs. **Span/Zero offset controls:** Six span arrangements (plug-in span cards, calibrated multi-span selector switch, or factory set) and two zero offset arrangements (uncalibrated and calibrated) offer eight basic control choices.

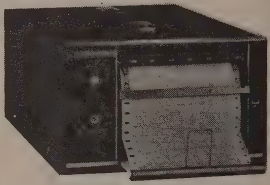
Mountings: Benchmount (shown) rack or panel mount available with or without trim, trim and door or trim and door lock. Can be illuminated.



Speed Servo® 4½" recorder

Bulletin F710

Single moving part linear servo motor. 1/8 sec. response. Takes 4 Hz signals without significant attenuation. High source impedance (100,000 ohms max.). Adjustable zero and span or multirange (0–1, 5, 10, 50, 100, 500 mV; 0–1, 5, 10, 50, 100V). 14 immediate-adjust mm speeds. Disposable ink writing system. **Quick specs:** Single 4½" (114 mm) channel (S 601S). Wireless feedback pot. **Amplifier.** Solid state (except one input tube), modular. **Accuracy.** ±0.5% of span. **Dead band.** 0.25% of span. **Zero adjust.** Full scale standard. Approx. $1,100.



Battery or AC operated Miniservo® recorder

Bulletin F613

Stock model S-22243 is a portable internal battery (8 hr. operation) Miniservo for field applications. Accurate to ±1% span with input impedance potentiometric to 1 V. Adapts to AC (120 V, 60 Hz). 11 input spans (1 mV to 100 VDC) are switch selectable. Eight chart speeds from 15 to 3000 mm/hr. **For 72 hour delivery,** order Stock S-22243 at $725.

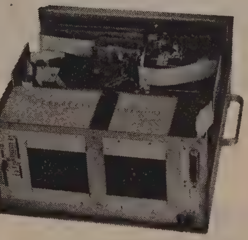
PD-2064

Bulletin B 110

Description: New self-contained system gathers data from 8 to 248 channels with control through an 11-function keyboard and microprocessor setup. Simplifies analog and digital data gathering in the field, laboratory, and plant, saves from 20% to 80% of the cost of any alternative hard wired system. At the heart of this standardized data acquisition system is a microprocessor—a solid state integrated circuit computer—combined with RAMs, ROMs and PROMs. Optional special ROM programs such as ratios, rate of change, accumulation, math functions, dedicated initialization ROM with keyboard override allows optimum versatility. Functions include signal conditioning, I/O, crystal controlled clocking, measurement intervals as fast as 25 channels/second, engineering units, optional high/low alarms. **Easy setup:** Programming by keyboard makes this a true GENERAL PURPOSE data system that easily adapts to specific experiments, tests, and dedicated applications. Seven red keys control the overall system, and seven black keys set up the system constants. Channel functions are selected through ten gray keys after the channel or channel pair is selected. Numeric keyboard for integer or fixed decimal entry of channel numbers, codes, or data sends keyed numeric values to memory after each program operation. **Measurement accuracy:** The PD-2064 will function with low level signals amid adverse power line and noise environments that would bomb out many other data systems. This is done through floating 3-wire guard shielding throughout, high common mode rejection and automatic circuit zero and open circuit check that assures integrity in the total input signal loop, multiplex relay, and wiring connections. Also, optical isolation between logic signals and multiplex relay drive coils is designed to end common mode problems. **Logical, simple programming:** Learn to program in a matter of an hour or two with the Programming Guide (shown below). Pick up is quick after months away from the PD-2064 because of the logical progression of programming: establish overall system variables, set channel or channel pair variables. Refresh your memory, and then program in virtually **any** order. Flexible heirarchy of operations allows quick debugging, permits changes in individual channel variables or the system as a whole at any time. Won't accept invalid commands or data (no autodestruct). Optional program printout allows quick dump of system settings.

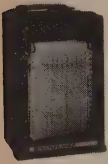
Outputs: A standard PD-2064 feeds data to any two output devices (three devices optional). Any two of the following may be ordered key-selected: On-board Seiko digital printer allows direct printing in engineering units; ASR33 Teletype and compatible devices allows computer compatibility; Mag tape recorder for recording large quantities of data; Paper tape perforator for rugged environmental conditions; Data telemetry interface, RS-232-C compatible, permits the PD-2064 to be used with a variety of receivers and transmitters.

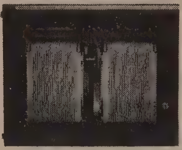
Guarded inputs: Sub-millivolt signals are noise-protected on each analog channel by a three-wire relay switch energized prior to each scan. Guarding is further provided by a metal shielding enclosure that may float above ground, tied to the guard wire. Solder terminals are standard. **Options:** Custom initialization, program printout (dump), memory save during power outage, self-calibration, integrator, special functions, thermocouple linearizing (4 types mixed), and individual channel alarms are all features available in internal or external housings. Base price approx. $3,700.



Box 24000, Indianapolis, Indiana 46224 / (317) 244-7611

Direct Writing and Event Recorders





Series "A" recorders

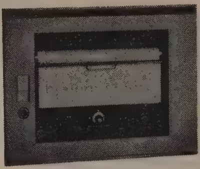
Bulletin C200

Electrodynamometer or permanent magnet-moving coil Series "A" case recorder with 6" (152 mm) wide curved coordinate chart, 4½" (114 mm) active width. Record µA, mA, A, mV, V, W, vars, kVA, frequency, pF, pressure, vacuum, speed, position. Four chart drives, chart speeds from ¾"/hr. to 3"/sec. or 12½ mm/hr. to 100 mm/sec. From $560.

Series "A" RectiGraph® recorder: four drive types, same chart speeds as curvilinear. Price approximately $750.

Two channel Series "A" recorder with two 2" (51 mm) channels also available with same chart speeds as above. Price approximately $850.

Series "A" event recorders with 5, 10, 15 or 20 channels for ink writing or 10 or 20 channels inkless available in portable, flush or front switchboard, wall mounted or twin mounted. Base price approximately $515. **See Bulletin D300.**



Series "E" RectiGraph® and event recorders

Bulletins DWC 271 and D300

RectiGraph models include two channel or four channel recording with independent side-by-side straight coordinate permanent magnet-moving coil elements. Measure µA, mA, A, mV, V (W, vars, pF, frequency, phase angle—with transducers). 15, 10 or 5 speed automatic drives; 10 or 5 speed manual drives. Chart speeds: ½"/hr. to 8"/sec. or 12.5 mm/hr. to 200 mm/sec. Two 4½" (114 mm) channels approx. $1,350. Four 2-3/16" (56 mm) channels approx. $2,100.

Series "E" event recorders have 40 channels, use ink or inkless writing. Flush or bench mount cases. Automatic or manual chart drives same as single and two channel models. Approx. $1,450.

Series "S" direct writing and event recorders

Bulletins DWC 271 and D300

Single 4½" (114 mm) or two 2-3/16" (56 mm) channel RectiGraph. 8" x 8" (203 x 203 mm) case. Records same parameters as Series "E". Single to 14 automatic speeds. Price from $710.

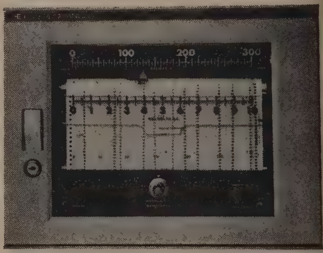
Event ink recorders available 5 to 20 channels, 10 or 20 inkless. Approx. $600.

Multipoint Recorders

Thermal printing

Bulletin F720

Gather analog data from four, six, eight, 12 or 24 points with a thermal printing Multipoint. A simple solid-state semiconductor printing device provides three basic readout combinations by thermally branding on the chart: dots for all channels, a dot plus number for all channels, or an Identaline pattern. Identaline, a number and dot combination, allows accurate curve analysis and channel identification of complex overlapped signals—at slow economical chart speeds. **Uses:** Two basic thermal multipoint models (L1112S, L1124S) with varying standard features can meet the exacting needs required by research labs, processing plants and a variety of OEM applications. **Features** include standard linear servo motor for smoother, quicker response, and a time/identification feature to enable a four-digit time or identification number to be printed on the hour, minute, or on command. **Options:** Selective or non-selective alarms; automatic dual range to record one of two preselected ranges; and programmed printing (print/skip) to allow deletion of any point or points. **Quick specs: Print rate.** as fast as 1 sec/point full scale with accuracy within 0.25% of any mV span or 5 microvolts, whichever is greater. **Type of inputs.** 0.5 to 100 mVDC, 0.1 to 100 VDC or thermocouple types E, J, K, R, S, and T. **Input impedance.** Spans of 100 mV or lower are potentiometric with input impedance of 100 megohms minimum. **Manual point advance.** Standard. **Scale.** 10" (254 mm) calibrated. **Chart drives.** Single-, two- or four-speed synchronous or 12-speed stepper for English or metric increments. Price approx. $1,600.



Ink printing

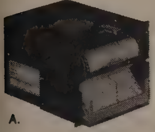
Bulletin F600

Model E1124E is a 2 to 24 point rotary servo recorder with print rates as fast as 1½ sec./point. **Features:** Manual point advance; slide-switch programming of preselected points; change gears to increase printing rate 4 times. Universal input common for all types of thermocouple or millivolt inputs. Five or ten speed manual or dial set chart speed selection available. 95 automatic drive speeds or 70 manual speeds. Base price approximately $1,650.

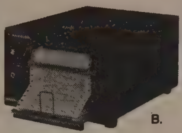
Esterline Angus Instrument Corporation / A Unit of Esterline Corporation

ESTERLINE ANGUS
A UNIT OF ESTERLINE CORPORATION

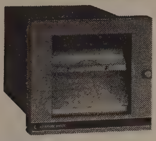
Miniservo® Recorders



A.



B.



C.

A. OEM

Bulletin F612

For dedicated OEM applications at a low price, this stripped down basic unit is ready to fit your product. Sensitive to 100 mV span, response is 0.5 sec. full scale, accuracy of ±0.5% span. Single speed chart drive on 100 mm active width. Basic unit MS401E starts at $300.

B. Benchmount

Bulletin F610

Stock model S-22087 is the single best value servo recorder available. Packed with special lab options and features, such as 8 chart speeds (15, 30, 60, 150, 300, 1500 and 3000 mm/hr), roll or Z-fold chart, and input signal ranges from zero to 10, 50, 100, 500 mV, and 1 VDC with full scale zero adjust. If you need a specific range, thermocouple or thermistor type, Esterline Angus has it too. **For 72 hour shipment,** order Stock S-22087 at $525.

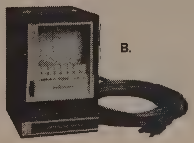
C. Panel or rack mount

Bulletin F611

The lowest cost precision servo is available to fit your permanent installation or product. Basic model MS401C provides a single speed, single span input of 100 mVDC with right-hand zero and 100-0 scale. Accepts Z-fold or roll chart. A ±10% electrical adjustment is provided on zero and span. All Miniservos use disposable ink cartridge with stylus. Options include adaptor rack, trim, door assembly, and a choice of ranges and speeds. Starts under $400.

Minigraph Recorders

A.



B.

C.

Lic. under US Patent No. 3,048,848
Mfg. under US Patent No. 3,717,881

A. Single channel

Bulletin C230

Records millivolt, volt, microampere or ampere input by series of inkless dots. A time share option accepts two inputs. Single 2-1/8" (54 mm) channel. 70 speeds 1/32—480 ipm, 0.7 mm to 12.2 mpm. Five event marker options. Price approx. $115. Two-channel available to record independently side-by-side. Price approximately $150.

B. Event

Bulletin D330

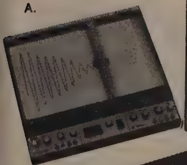
Four or eight channels. Designed for any on/off or yes/no application in 6-48 VDC range. 120 or 240 V/50 or 60 Hz ranges available with optional power converters. 70 chart speeds (1/32—480 ipm, or .08 mm/min.—12.2 m/min.). Price approximately $120.

C. Temperature

Bulletin C231

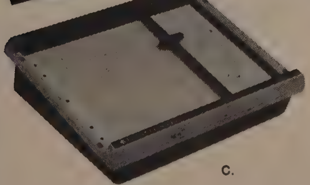
Thermocouple or thermistor probes sense temperature. Inkless stylus creates dot record on 2-1/8" (54 mm) active width chart. 70 chart speeds. ±2% accuracy. 5 event marker options. Snap-out label makes unit ideal for OEM/private label use. 3-5/8" W x 5-5/8" H x 4" D (92 x 143 x 111 mm), 6" deep (152 mm) with thermistor. Records 0-500° F to 0-2000°F. Room ambient 50° to 100° F or 20° to 130° F outdoors. Price approx. $160 with J or K thermocouple.

X-Y Recorders



A.

B.



C.

A. Model XY 530

Bulletin E500

For medical, lab and industrial applications. This XY records low level signals from any source, whether grounded or floating. Plots Cartesian coordinate graphs, showing the relationship between two functions represented by DC or slowly changing AC voltages, or one function as it varies with respect to time. Quiet vacuum holddown; high speed; differential input of 1 mV sensitivity; ±0.2% of full scale accuracy; 11" x 17" or 8½" x 11" paper. Price approx. $1,450. Model XY 560 records signals as low as 1 μV. **See Bulletin E500.** Price approx. $2,400.

B. Model XYY' 540

Bulletin E500

Two pens simultaneously plot two separate vertical (Y and Y' axis) input signals in relation to a simple horizontal (X axis) signal. Priced approximately $2,650.

C. Model XY 575

Bulletin E510

Stripped down for OEM use with sensitivities from 1mV to 10V/in. (0.5mV to 5V/cm), delivers value and performance. Approx $900.

For lab use, multi-range, time-base and other options available, including expanded capability module. Approx. $1,100.

Box 24000, Indianapolis, Indiana 46224 / (317) 244-7611

gulton

Miniature Rustrak Chart Recorders

Rustrak miniature chart recorders generally measure 5-5/8″ high x 3-5/8″ wide x 4-1/8″ deep, and offer a wide range of sensitivities, writing and chart speeds. Accuracy is typically ±2% of full scale and response time is 0.8 to 1.0 seconds. The recorders operate in both chart rewind and tear-off modes. Chart width of single channel recorders is 2-5/16″, dual channels 1″ each.

PSI
Rustrak

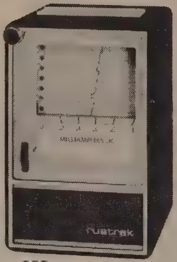
2162

Pressure Recorder.

Single channel pressure recording of most liquids and gases using a C-type Bourdon tube. Standard ranges 0-15, 0-30, 0-50, 0-100, 0-200, 0-300 and 0-500 psi. Many special offset ranges available.

Single Channel DC Recorder.

Basic recorder in the Rustrak line. Ranges from 0-10 microamperes to 0-5 amperes DC; 0-10 millivolts to 0-500 VDC. Multipliers and shunts available. Chart speeds 1/32″ to 480″ per hour. Many available options, features and accessories. AC models also available.



288

MICROAMPERES DC
Rustrak

291

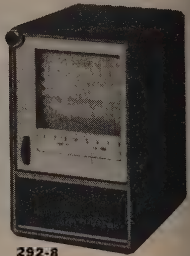
Dual Channel DC Recorder

Same as basic Model 288 except dual channel with two galvanometers. Available in combinations of current and voltage or different ranges each channel. Usable chart width, 1″ per channel. AC models also available.

One Microampere DC Recorder.

Solid state with full-scale sensitivity of 1 microampere, range of 0 to 10 millivolts DC and input impedance of 10,000 ohms. For use as temperature bridge and strain gage readout or as a recorder accessory for laboratory and process instruments.

2194



292-8

Event Recorders, Models 292-4, 292-8, & 392-16.

Four or eight channels. Records worktime, productivity of machines and personnel; provides data for time study, cost analysis, security control. Chart speeds to 50 inches per minute with definition of up to 16 events per second.

DEGREES FAHRENHEIT
Rustrak

2122

Temperature Recorders.

Wide variety of temperature recorders using thermocouples, thermistors or nickel wire sensors. Ranges from −100° F. to +2400° F. and custom spans as narrow as 25° F. Also available in °C. and in single or dual channels.

400

Potentiometric Recorder.

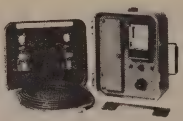
100 mV direct writing recorder offers 1 megohm input impedance and solid-state amplifier. Series of plug-in modules available for increased sensitivity to 1 mV full-scale. Other plug-ins with cold junction compensation and for special applications.

Recording-Controller Feature.

ON-OFF solid state controller feature available as option on most Rustrak recorders. Controls up to 5 amps resistive load at 30 VDC or 115 VAC. Set points continuously adjustable over entire chart range. Option price added to cost of companion recorder. Not available separately.

DEGREES FAHRENHEIT

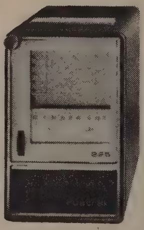
2133/F204AB



192

Dissolved Oxygen/Temperature Recorder.

Simultaneously records dissolved oxygen and temperature. Temp. range, 0 to 40° C. Operates unattended for about four weeks from two inexpensive batteries. Chart speed regulation, ±0.5%. For surveys in water pollution control programs.



225

RH/TEMP Recorder

Electronically monitors relative humidity from 10% to 90% and temperature from 60° to 90°F on a single chart. Chart lasts 2 months, continuous operation. No ink to add or messy cartridges to change. Sensors included. Ideal for computer room, clean rooms, or offices.

Series 300: Recorders

300

Available in many configurations combining functions of most other recorders. Event markers, controller feature, time-sharing also available. Case size is 6-5/8″ W, 6-1/2″ D, 5-5/8″ H. Accuracy ±2% of full scale. Useable chart width, 2-5/16″ per channel on basic recorder, 1″ per channel on four channel model.

2 WEEKS DELIVERY!

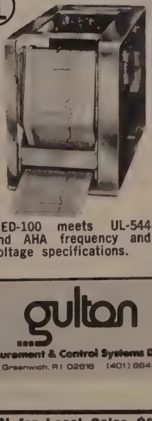
ON GULTON'S 2, 4, 6 AND 8 CHANNEL RECORDERS WITH OUR OFF-THE-SHELF PLUG-IN SIGNAL CONDITIONERS . . . THESE ARE THE SMALLEST, LIGHTEST, MOST VERSATILE PORTABLE RECORDERS AVAILABLE

COMPARE THESE FEATURES WITH ANY OTHER RECORDER'S:

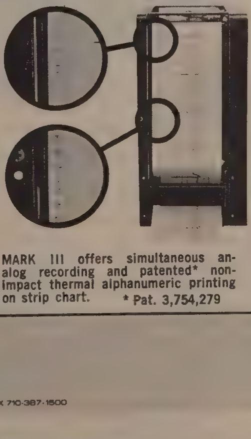
- True portability: for example, our 8 channel recorder weighs only 65 lbs. and measures 17½" x 19" x 6". Our 2-channel is only 30 lbs.
- Frequency response: 100 Hz (-3dB) for 2, 4, and 6-channel recorders, 125 Hz (-3dB) for 8-channel recorder.
- Interchangeable signal conditioners provide recording of temperature (thermocouple and thermistor), ac and dc strain, volts, millivolts, microvolts (down to 20 microvolts/div.), ac to dc, frequency to dc, EKG, and log to dc.
- Electrically selectable chart speeds from 0.5 to 100 mm/sec.
- Inkless writing by reliable heated stylus on rectilinear chart paper.

OEM RECORDER BUILDING BLOCKS

Standard building blocks available in 1 through 8 channels.



MED-100 meets UL-544 and AHA frequency and voltage specifications.



MARK III offers simultaneous analog recording and patented* non-impact thermal alphanumeric printing on strip chart. * Pat. 3,754,279

- 9 pushbotton speeds from 20 to 0.05 in/min
- ± 0.2% accuracy
- 30 in/sec slewing speed (with 40 in/sec available)
- English/Metric scaling at the flick of a switch
- Snap-in disposable pen
- Electric pen lift

Plug-in modules include:

Type 0 Customizing
Type 1 DC Coupler
Type 2 Ranging
Type 3 Switching
Type 4 Switching /Time Base
Type 5 Precision Attenuator
Type 6 Precision Attenuator /Time Base
Type 7 Pre-Amp Attenuator
Type 8 Pre-Amp Attenuator /Time Base
Type 9 Precision Ranging
Type 12 Precision Attenuator /Offset
Type 14 Log Convertor
Type 15 Two Channel
Type 16/17 Point Plotter
Type 26/17 Point Plotter

Control modules:

Type 50 Chart Drive
Type 51 Chart Drive
Type 52 Chart Drive
Type 53 Chart Drive
Type 100 Control
Type 200 Control

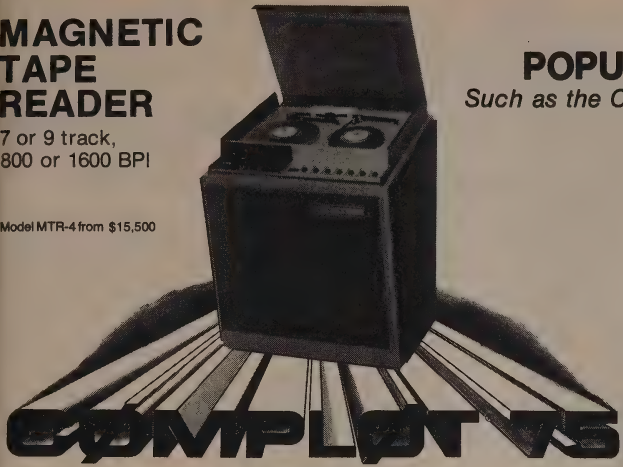
State of the art; yet least expensive

MAGNETIC TAPE READER

7 or 9 track,
800 or 1600 BPI

Model MTR-4 from $15,500

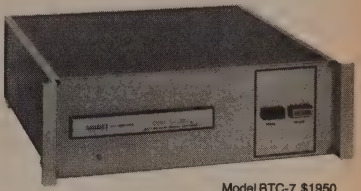


- Automatic block search—forward and reverse.
- Hardware vector generator—cuts computer time significantly.
- Buffered plot data records.

New from The Recorder Company, the model MTR-4, a fourth generation offline CØMPLØT magnetic tape reader with features found only in much higher priced competitive models.

BATCH TERMINAL CONTROLLER FOR POPULAR USER TERMINALS

Such as the CDC 200, Mohawk 2400 and Data 100



Model BTC-7 $1950

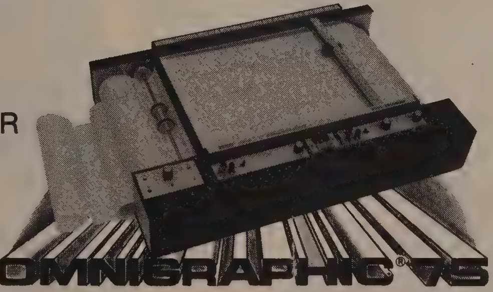
- Adds graphic output to the CDC, Mohawk, and Data 100 user terminals
- Field installable in less than 1 hour
- Completely automatic plotting at speeds from 300 steps per second
- Free housekeeping software may be loaded from the terminal

The BTC-7 controller plus plotter enables a 200 terminal user to produce fast reproducible records of graphs, charts and drawings, annotated with alphanumerics. Flexibility is limited only by programming imagination. CØMPLØT plotters use a bi-directional Z-fold (fan fold) paper mechanism, offering many advantages over conventional roll chart techniques.

NEW NEW NEW
STRIP CHART ADAPTER FOR X-Y RECORDER

NEW VERSATILITY
FOR YOUR
2000 X-Y RECORDER

Model 2000
Recorder
$890
plus modules



Model SCA-1
Strip Chart
Adapter
$765

- Converts any Omnigraphic 2000 X-Y into a Strip Chart Recorder.
- Provides single sheet advance (local or remote control) thus eliminating manual single sheet changing.
- Bi-directional chart drive
- Easily installed in the field
- Adapter only $765 complete

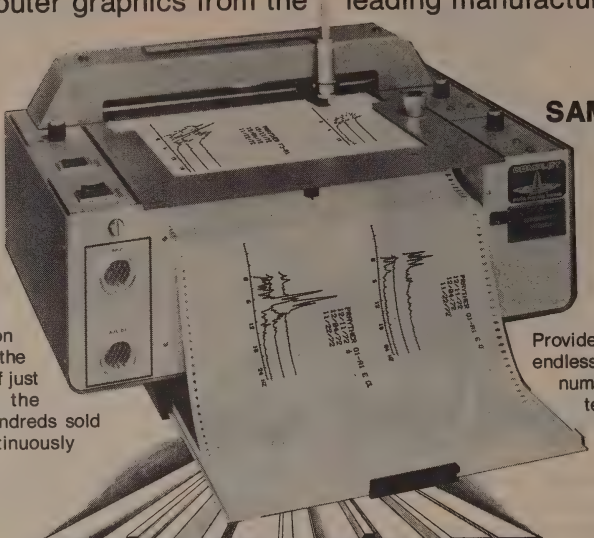
Up-to-date computer graphics from the leading manufacturer of



NEW SPECS 50% FASTER

Here's a reliable, popular Digital Plotter now updated to provide 50% more plotting speed at the same old price! Now you get up to 450 steps per second on an 11″ x 144′ chart for the inflation fighting price of just $3550. Eight years in the field. Hundreds and hundreds sold and still in use. Continuously updated.

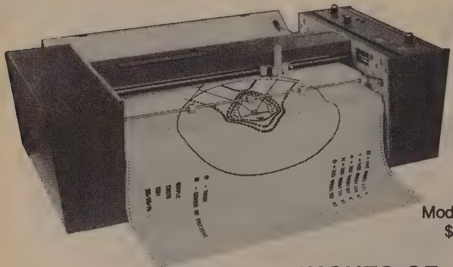
SAME OLD PRICE $3550

Model DP-1

Operates online, offline, remote batch or in time share mode. Interfaces to just about any intelligent data source. Provides a drawing in place of endless columns and rows of numbers. It's the most plotter for the money on the market today!

CØMPLØT® 75

DIGITAL PLOTTERS



Model DP-3
$5150

A FULL 22 INCHES OF PLOTTING POWER

Modern computer graphics methods turn pages of numbers into meaningful graphs, charts, maps and diagrams — by means of a wonderful new machine, the DP-3 Digital Plotter. Accepts input direct from a computer, magnetic tape reader, remote batch terminal or in a time sharing mode. Works efficiently in any application: mechanical or civil engineering, medical technology, geophysical studies, N/C tape verification, and hundreds of others. For details on how you can put this 400 step per second, 22 inch wide drafting machine to work for you.

Model DP-7
$13,500

FOR ONLINE, OFFLINE OR REMOTE BATCH PLOTTING

In any plotting application from drawing contour maps to plotting radiation therapy isodose distributions, CØMPLØT model DP- 7 Digital Plotter gives you more performance for less cost. Provides 1800 steps per second plus a full 36.5″ wide chart surface (150′ long) and three automatically selectable pens. Write today for details, brochure.

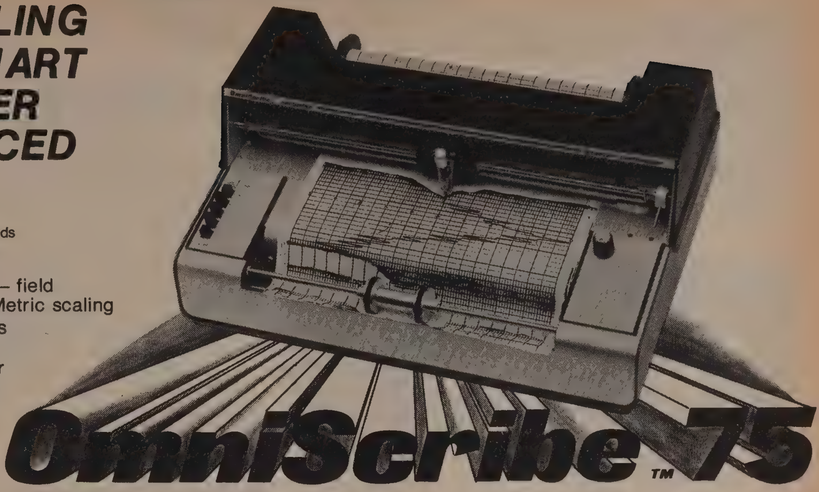
TOP SELLING STRIP CHART RECORDER LOW PRICED

Model 9112-1
Single Pen Recorder with
1, 2, 5, 10 in/min. chart speeds
and 10 mv fixed input span.

- Multi-speed chart drive — field adjustable for English / Metric scaling
- Self-aligning sprocketless paper drive
- New patented transducer eliminates troublesome slide wire
- Two-pen models available
- Off scale signal suppression

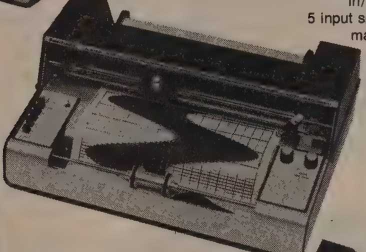


Model 9110-2 single pen recorder with 2.2, 5, 10, 20 cm/min. chart speeds and 5 input spans of 10 mv up.

Here's America's number one strip chart recorder for 1975! And for a rock bottom price in an age of inflation.

Pick a winner for 1975!

Model 9132-2 single pen recorder with 1, 2, 5, 10 in/min. chart speeds, 5 input spans of 10 mv up, event marker and electric pen lift.



NEW FEATURES!

- Overrange signal suppression
  - Quiet operation
  - Extended recorder life
- Second generation pen drive
  - One piece re-balance element
  - Wear compensated

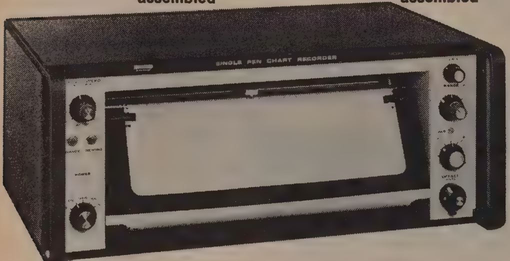
™ trademark of Houston Instrument

With Heath recorders, you don't pay extra for the extras.

The SR-204 has research-quality performance at low cost...only $395.00*

Precision lab recorders with all the performance you'll ever need

Single pen... $995.00* assembled **Dual pen... $1395.00*** assembled



DUAL PEN CHART RECORDER

Like all of our strip chart recorders, the SR-204 has many standard features that are available only as extra-cost options with other manufacturers. Features like pushbutton selection of 10 mV, 100 mV, 1 V and 10 V full scale spans. Variable span control allows expansion to 100 V full scale. Ten chart speeds of 10, 5, 2, 1, 0.5, 0.2, 0.1, 0.05, 0.02, and 0.01 in/min are instantly selectable. Overall error is less than ±0.5% of full scale. Balance time is only ½ second. The floating input provides better than 10^7 megohms input impedance with less than 10 nA bias current to minimize source loading. Standard equipment includes complete remote control capability (including electric pen lift), rack mount and easy metric conversion. Its versatility and ease of operation will make this 10" recorder the most-used instrument in your lab. (Shipping weight 20 lbs.)

Heath has engineered precision and performance into two new recorders that are probably all the lab recorder you will *ever* need. Each recorder is a complete system — there are no extras to buy. The price includes remote programming capability, events markers, electric pen lift, pushbutton paper advance and reroll, necessary hardware for rack mount and easy conversion to metric operation.

The single-pen SR-205 and dual-pen SR-206 use easily replaced, disposable nylon-tip pens for a distinct, continuous trace. Balance time is only 250 msec for accurate response to fast-changing signals. Maximum error is ±0.2% of full scale.

Front panel zero controls permit each pen to be set anywhere on the full 10" chart width with zero input. Full scale input ranges are 1, 2, 5, 10, 20, 50, 100, 200 and 500 mV *or* volts. A calibrated variable control allows full scale to be set anywhere between 1 mV and 500 V. The SR-205 has a built-in calibrated offset to provide positive or negative 0-10 mV, 0-100 mV, 0-1 V or 0-10 V input signal suppression. Twelve chart speeds range from 50 in/min to 0.01 in/min in a 1-2-5 sequence.

Chart drive is quartz crystal controlled for stable chart operation regardless of line frequency. Chart paper may be automatically rolled up or fed out of the recorder and conveniently torn off for examination or filing.

Remote control by TTL-level signals for pen lift, chart drive, events marker and servo mute is possible through a connector on the rear panel (mating connector supplied).

Dependability and low maintenance have been designed into both recorders. An enclosed conductive plastic slidewire is used for long life without periodic cleaning. The low inertia, ball-bearing motor provides rapid pen acceleration. Pen motor current limiting circuitry allows the pen to be driven continuously off scale with no audible noise and no possibility of damage to the recorder. (Shipping weights: SR-205, 28 lbs.: SR-206, 32 lbs.)

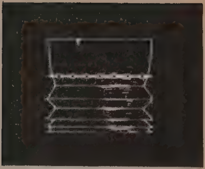
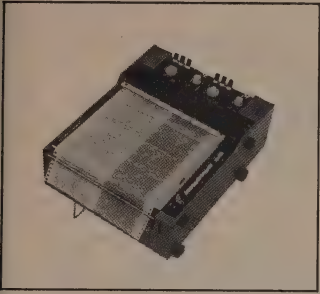
YEW Oscillographs & Recorders





3050 SERIES FLAT BED RECORDERS

The Model 3050 is a plug-in type single and dual pen strip chart recorder with a self-balancing potentiometric mechanism. A wide selection of plug-in modules make this recorder particularly suited for a variety of applications. Exceptionally well shielded and guarded input circuits provide a high degree of noise immunity such that extremely stable recordings are assured even under the most severe noise conditions.

Recorder functions can be further expanded through such options as remote control of chart speed, bi-directional paper feeding, remote control of pen lift, re-transmitting slide wire, alarm circuits, time markers, etc.

SPECIFICATIONS

Number of channels: Single pen (Type 3051) and Dual pen (Type 3052)

Accuracy: ±0.3%

Chart: 250 mm(10") wide, 15 m (45 feet) long, z-fold or Roll chart

Position of use: any angle from horizontal to vertical.

Rack mount type available.

Chart speed: single speed or 8-speed available

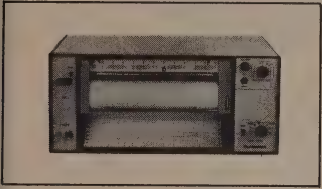
Plug-in modules

3053-11:	DC 0.5mV to 5V/cm (13 ranges)
3053-12:	DC 25μV to 5V/cm (17 ranges)
3053-13:	DC 5μV to 5V/cm (9 ranges)
3053-31:	AC 2.5/5/10V/cm (3 ranges)
3053-41:	DC OFF-SET UNIT

Price:

3051: Start @ $795.00, 3052: Start @ $1,295.00

Plug-in modules: Start @ $59.00



3040 SERIES LABORATORY RECORDER

The 3040 Series Laboratory Recorders are selfbalancing potentiometric recorders with either a single pen or dual pens. It uses a high-frequency modulated DC amplifier for high noise rejection and stable recording. These recorders have a maximum sensitivity of 200μV/200mm and an accuracy of ±0.3%.

SPECIFICATIONS

Accuracy: ±0.3%

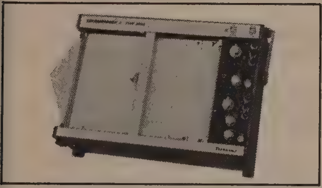
Chart: 250mm (10") wide, 15m (45 feet) long z-fold chart used.

Input range: 0.5mV to 100V/200mm (17 ranges)

Price:

3046 (single pen): Starts @ $850.00 (single input)

3047 (dual pen): Starts @ $1,295.00 (single input)



3083 SERIES X-Y RECORDER

The Model 3083 is a plug-in type single pen X-Y recorder with an 8½ x 11" chart (DIN and JIS Size A-4). Both rool chart and sheet are available. With the optional Paper Take-Up Unit, this X-Y Recorder may be used as a continuous recording strip chart recorder. The pen holder supplied permits the use of a standard commercial felt-tip pen, ball-point pen or pencil in addition to the unit's ink writing system.

SPECIFICATIONS

Accuracy: ±0.3%

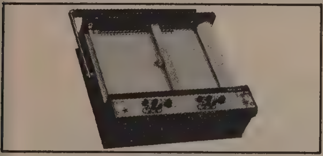
Pen speed: Approx. 0.7 seconds for 200mm

Plug-in-modules

Interchangeable with plug-ins for 3050 series Flat Bed Recorder except 3053-42 Time Base Unit with DC ranges of 0.5mV to 5V/cm (10 ranges) 3085 Paper Take-Up Unit

Price

3083: $1,190.00, Plug-ins: Starts @ $59.00



3070 SERIES X-Y RECORDER

The Models 3077 and 3078 are single pen and dual pen X-Y Recorders respectively with a DC servo system. DC measuring ranges are from 100 μV to 10V/cm (16 ranges) for applications requiring wide ranges. A time base is built-in as standard. Common mode rejection is high 160 dB at DC and 140dB at 60Hz. Desk-top, portable and rack mounting are available.

SPECIFICATIONS

Accuracy: ±0.3%

Recording area: 250 x 250 mm (10" x 10")

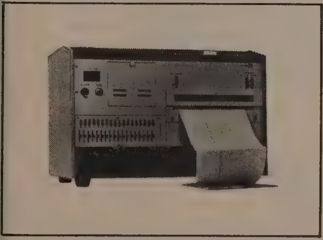
Pen speed: Approx. 1 second for full scale.

Input impedance: 1 MΩ constant

Price:

3077: $1,750.00 (1 pen)

3078: $2,490.00 (2 pen)



2900 SERIES LIGHT BEAM OSCILLOGRAPH

This series consists of photographic recorders which use light sensitive paper. Since these units respond to very high frequencies they are most suitable for recording waveforms which change at very high speeds. Three models, 6-channel, 9-channel and 18-channel, are available. The long optical arm (450mm) which is common to all models, provides high-accuracy recordings with minimum arc distortion.

SPECIFICATIONS

Model: Type 2901 6 channels, portable
Type 2924 9 channels, desk-top or rack mount available
Type 2925 18 channels, desk-top or rack mount available

Frequency: DC to 3,500Hz, depending on galvanometers used

Sensitivity: Approx. 3.3 μA/mm to 2.8mmA/mm, depending on galvanometers used.

Recording width: 127mm for 2901, 178mm for 2924 and 2925

Light source: High tension mercury arc lamp

Paper speed: Up to 200mm per second

Price:

2901: $1,990.00, 2924: $2,490.00

2925: $3,100.00, 2916 Galvanometers: Start @ $69.00

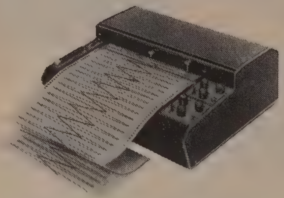
2100 SERIES

POTENTIOMETRIC STRIP CHART RECORDER



FEATURES

- Laboratory or Dedicated OEM Application
- Electronic Off-Scale Protection
- Single or Two Crossover Pens
- Versatile Chart Drive
- Z-Fold and Roll Chart
- Die-Cast Construction
- Convenient Paper Loading
- English or Metric Calibration
- Disposable Fibre Tip Pens — Four Colors
- Sealed Maintenance Free Follow-up Potentiometer

Z-FOLD PAPER

Z-fold paper stacks conveniently in front of the recorder. The folded perforated pack of 200 six-inch numbered sheets allows for instant data retrieval and provides a convenient indication of loaded paper remaining. Any number of consecutive or out-of-sequence sheets can be bound as is in a notebook.

SEALED CONDUCTIVE PLASTIC FOLLOW-UP ELEMENT

This exclusive conductive plastic follow-up element contributes infinite resolution, extended life, and noise-free performance to the servo system.

Unlike any other contact or non-contact transducer in the industry today, the 2100 element is completely sealed requiring no cleaning or lubrication.

DISPOSABLE FIBRE-TIP PENS

Writing is accomplished by disposable fiber-tip pens. The rugged nylon composition tips and fast-drying ink (available in black, red, blue, and green) provide a sharp consistent line for over 3200 feet of trace. The same pens used in analog and event marker channels can be snapped in in less than ten seconds without switching power off or externally disconnecting signal inputs.

IMMEDIATE DATA ACCESS

The positive sprocket chart drive and tear bar are located in close proximity to the pens. Traces, once written, can be accessed immediately and torn off cleanly.

GENERAL PURPOSE LABORATORY AND DEDICATED OEM CONFIGURATIONS

The 2100 Series of potentiometric flatbed stripchart recorders provides single and two-pen recorders in two configurations. The 2115B single pen and 2125B two-pen recorders (2115M ad 2125M — metric calibration) are general purpose laboratory instruments offering five calibrated spans and ten pushbutton selected chartspeeds.

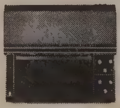
The 2100B single pen and 2120B two-pen recorders (2110M and 2120M — metric calibration) are dedicated single span instruments for OEM applications. An extremely wide range of options exists for span and chartspeed selection so that a dedicated model can be exactly tailored to fit a specific application.

OPTION FLEXIBILITY

A wide variety of options for every 2100 Series model is available to meet the requirements of special applications:

- Up to two optional event markers actuated by external contact closure can be installed.
- An electric penlift option operated by an external contact closure supplements the standard front panel manual penlift. Each pen is actuated independently in two-pen models.
- A proportional chart drive option provides for stepper-motor-driven chart advance actuated by an external TTL pulse train.
- The alarm circuit option has two setpoints adjustable over the entire chart width with a choice of either relay or solid state switching, each for normally open or normally closed circuits.

GENERAL PURPOSE LABORATORY MODELS



2120B

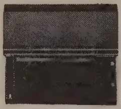
The 2115B/M and 2125B/M general purpose laboratory recorders provide the following standard features:

- Five calibrated spans of 1, 10, 100 mv; 1, 10 V fullscale with a continuous inter-span variable control.
- 10 pushbutton-select chartspeeds of 1, 2, 5, 10, 20 in./hr; 1, 2, 5, 10, 20 in./min. (English) or 2, 4, 10, 20, 40 cm/hr.; or 2, 4, 10, 20, 40 cm/min. (Metric)
- 110-120/220-240 VAC switchable 50-400 Hz power.

Model		Description	Price
English	Metric		
2115B	2115M	Single pen Multi-Span	$ 875*
2125B	2125M	Two pen Multi-Span	$1295*

*OEM Discounts Available—Consult factory

DEDICATED MODELS



2125B

The 2110B/M and 2120B/M dedicated recorders provide the following standard features:

- A single calibrated and fixed span of 1 V fullscale.
- A single chart speed of 6 in./min. (English), or 12 cm/min. (Metric)
- 110-120/220-240 VAC switchable 50-400 Hz power.

Model		Description	Price
English	Metric		
2110B	2110M	Single pen Single-Span	$ 595*
2120B	2120M	Two pen Single-Span	$ 875*

*OEM Discounts Available—Consult factory

Request 2100 Series Technical Data & Price List for full list of options available.

GENERAL SPECIFICATIONS

Response Time: 0.5 sec. for fullscale excursion.

Accuracy: ±0.2% fullscale.

Input Configuration: Floating and guarded.

Input Impedance: 1 Meg Ohm at DC, all spans.

Input Protection: Protected to 200VDC or peak AC normal mode at any span.

Common Mode Tolerance: 500VDC or peak AC from any input terminal to ground.

Temperature Stability: Less than ±0.25% fullscale, 10-40°C after 15 minute warmup, including zero shift.

Common Mode Rejection: Greater than 140 db DC-400 Hz.

Linearity: ±0.1% of fullscale

Deadband: 0.1% of fullscale.

Chart: 11.5 in. width; 10 in grid (English); 25 cm grid (Metric); 120 ft. roll; 100 ft. Z-fold, 6 in. repeats (English); 15 cm repeats (Metric).

Writing Technique: Disposable fibre tip pen.

Power Consumption: 40 watts, peak (single pen) 60 watts, peak (two-pen).

Weight: 25 lbs.; 28 lbs. shipping weight.

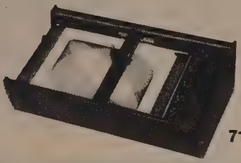
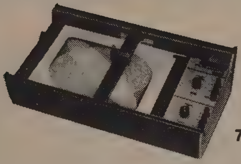
X-Y PLOTAMATIC RECORDERS

HIGH PERFORMANCE AT LOW COST

700 SERIES • 8½ in. by 11 in. (DIN A-4)



715 GENERAL PURPOSE



705 DEDICATED OEM

700 Series Recorders with Pad/Load®

The 700 Series recorders, while low in cost, still meet or exceed the performance specifications of many higher priced recorders. The new "PAD/LOAD®" paper handling system, operates three times faster than those available on conventional single sheet machines. A 50-sheet pad of paper is loaded into the recorder, and as each page is consumed, the operator simply tears off the used sheet, exposing a new sheet.

All 700 Series PLOTAMATICS have:

- I/C Circuitry
- No Mechanical or Photo Choppers
- Clean Fibre-tip Pens
- Electronic Overdrive Protection
- Operation from Switchable 115/230 V, 50-400 Hz Power
- Buffered Feedback Potentiometers for Noise Immunity
- ±0.2% F.S. Accuracy
- Differential Guarded Inputs with 140 dB CMR
- Constant 1 Megohm Input Impedance
- No Servo Gain Adjustments

Model No.		Application	Range	Slewing Speed	Price

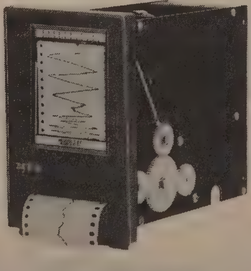
MINI STRIP CHART RECORDER



FEATURES

- 5 Hz Frequency Response
- Inkless Thermal Recording
- Continuous Rectilinear Trace
- Chart Reroll or Feed Out
- Quiet Operation
- Chart Paper Capacity of 70 Feet
- Rugged Construction
- Compact: 5½″ H x 3⅝″ W x 6½″ D
- Portable or Rack Mounting
- Lightweight 3.5 Pounds
- Wide Range of Chart Speeds From ½ in./hr. to 6 in./min.
- Cartridge Paper Loading

CHART SPEEDS

½ in./hr. 1 in./hr. 2 in./hr. 3 in./hr. 4 in./hr.	5 in./hr. 6 in./hr. 8 in./hr. 10 in./hr.	15 in./hr. 20 in./hr. 30 in./hr. 1 in./min.	2 in./min. 3 in./min. 4 in./min. 5 in./min. 6 in./min.

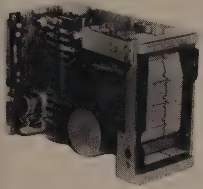
STRIP CHART RECORDERS

1-8 CHANNEL OEM RECORDER MODULES



FEATURES

- Inkless Thermal Recording
- Rectilinear Coordinates
- All Solid State
- Modular Construction
- Compact-Lightweight
- Portable or Rack Mount
- Low Power Consumption
- Simple Paper Loading
- Multiple Chart Speeds
- Paper Take-up
- Plug In Amplifiers
- Event Markers
- Controls Supplied
  Gain Heat Position

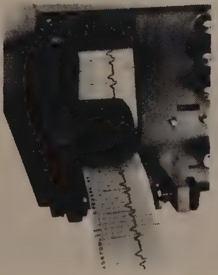
DIGITAL PRINTER ACCESSORY



DESCRIPTION

Model ADP Digital Printer Accessory is designed to be compatible with any MFE Single or Multi-channel high speed recorder. The system provides the capability to print quietly a continuous line of alpha-numeric or special characters from a set of 12 characters. Printing is accomplished without interruption of the analog recorder. Digital information is printed in the left margin of the chart at a maximum rate of 4½ characters per second while the paper is moving at speeds of up to 50 mm/sec.

The ADP consists of a print mechanism mounted externally on the recorder carriage and an electronic module mounted conveniently to the rear of an MFE analog recorder module or in any other available space within the system.

Data input is by standard 8-4-2-1 BCD at TTL IC logic levels. Control is accomplished by a simple print enable input and timing output.

APPLICATIONS

The ADP Series has been designed for application in medical intensive care monitoring to display ECG or other physiological data in conjunction with time, date, and patient identification. Applications also include industrial batch process identification, analytical instrumentation, geophysical survey work, quality control, seismographic monitoring, noise and sound detectors, and many others.

So extensive is our line of standard and custom hybrid microcircuits that we're the second largest user of semiconductor chips in the nation. Standard hybrids are available off-the-shelf from voltage regulators to DACs and ADCs, and ladder networks, or perhaps your need is for hybrid power amplifiers, or telephone tone receiver products . . . you'll find them all in Beckman's standard hybrid product line. And if a standard doesn't suit your need, try our custom capability. In custom hybrids, for example, we build to customer design and specifications, or we supply the design help when needed.

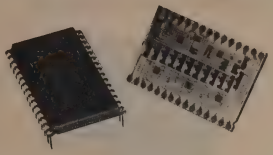
DAC/ADC PRODUCTS

Series 872 CMOS Compatible DAC

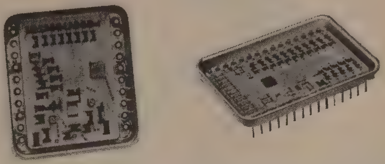


Series 872 Digital-To-Analog Converter is a medium speed, parallel input converter featuring:

- CMOS logic inputs (4,000 or 74C)
- 12-Bit resolution
- Very low power dissipation
- Preset/adjustable zero offset
- Preset full scale (0 to 10V or −10V to +10V)
- Internal + 10V precision reference

Price (1-9) . . . . $66.00 to $88.00
depending on accuracy code

Models 849 and 877-69 Multiplying DACs



Models 849 and 877-69 are 13-bit resolution binary four-quadrant multiplying D-to-A converters that accept an external ac or dc reference.

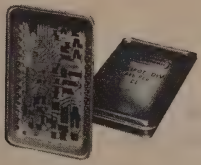
Model 849 utilizes serial data input (high threshold MOS) and provides 2 analog output phases (0 and 180° for ac references to 2.5 KHz).

Price (1-9) . . . . $155.00 to $185.00
depending on accuracy code

Model 877-69 accepts parallel DTL/TTL input data and reference frequencies to 10 KHz.

Price (1-9) . . . . $190.00 to $250.00
depending on accuracy code

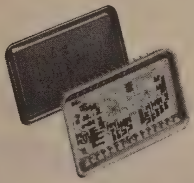
Series 848 11-Bit DACs



Series 848 is a complete 11-bit binary digital-to-analog converter with guaranteed monotonicity and accuracy levels. It offers 4 preset output ranges (0 to +5V, 0 to +10V, −5 to +5V and −10 to +10V), and features a slew rate of 4.0V/μsec min, and settling time of 0.25 μsec/volt +2 μsec. It is packaged in a hermetically sealed Kovar case and meets MIL-STD-883 requirements.

Price (1-9) . . . . $105.00 to $170.00
depending on accuracy code.

Series 876 11-Bit ADCs



Series 876 is an 11-bit DTL/TTL compatible, successive approximation A-to-D converter including the reference, ladder, comparator, and sequencing register. Series 876 provides serial and parallel output data corresponding to 4 preset input ranges (0 to +5V, 0 to +10V, −5 to +5V, and −10 to +10V), and operates with clock frequencies to 1 MHz.

Price (1-9) . . . . $176.00 to $300.00
depending on accuracy code.

Ladder Networks

Beckman Ladder Networks are miniature binary and BCD devices for use in digital to analog conversion applications requiring high accuracy and fast switching over a wide temperature range.

Model No.	Resolution	Standard "R" Values	Rsw Compensation	Best Standard Accuracy	Pricing 1-9
811 (Binary)	12-bit	5K, 10K, 20K	5Ω Bits 1-4	±122 ppm −55°C to +125°C	811-B12 $40.00
812 (Binary)	12-bit	50K, 100K	500Ω All Bits	±122 ppm −55°C to +125°C	812-B12 40.00

POWER AMPLIFIERS | ACTIVE FILTERS

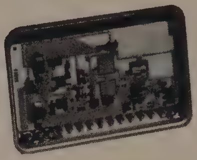
Models 821, 822, 823 and 866 Unity Gain Power Amplifiers

Model	±Supply Range	Output Max. Range	Minimum Load Resistance	Price (1-9)
821	10 - 20V	±16V	100Ω	$33.00
822	10 - 20V	±16V	50Ω	$38.50
823	10 - 30V	±26V	$\frac{30\ (E_O \text{ max.})}{E_{CC}-E_O \text{ max.}-1}$	$9.85
866	10 - 20V	±16V	50Ω	$44.00

Model 824 Gain-of-Three Power Amplifier

Model	±Supply Range	Output Max. Range	Minimum Load Resistance	Price (1-9)
824	18 - 30V	±27V	140Ω	$40.00

Model 825 High Speed, FET Input Op-Amp



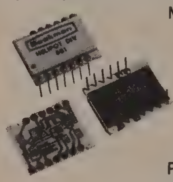
Model 825 is a high performance FET input, wideband operational amplifier featuring:

- 1,000 V/μs minimum slew rate
- 100 ns settling time (to 0.1%)
- 35 MHz SSBW (−6 dB/octave rolloff)
- 10 MHz full power BW
- $10^{11}\ \Omega \| 5$ pF input impedance
- ±100 mA output drive capability
- Complete thermal stability
- Hermetically sealed Kovar® package
- MIL-STD-883 environmental specifications

Price (1-9) $140.00

Model 881 Universal Active Filters

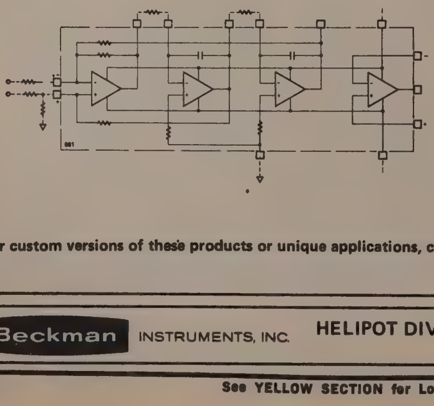
Model 881 is a two-pole, audio-frequency filter that can be used as a basic building block to generate virtually any complex filter function.



Model 881 features:

- Simultaneous high-pass, low-pass, and band-pass outputs
- Inverting, non-inverting or differential operation
- 10 KHz maximum operating frequency
- 0.5 to 50 adjustable Q range

Price (1-9) $20.00



Model 882 Touch-Tone* Frequency Band-Pass Active Filters

Beckman Series 882 Active Filters are pretuned, band-pass filters designed specifically for tone receiver applications where compatibility with standard Touch-Tone* frequencies is required. Series 882 Active Filters feature:

- Standard model Touch-Tone frequency settings of 697, 770, 852, 941, 1209, 1336, 1477, and 1633.
- ±0.5% f_o tolerance.
- ±0.01%/°C f_o temperature coefficient.
- Preset Q = 18 ±10% (6% BW).
- Filter design tunable over f_o range of 500 to 2,000 Hz, and Q range of 10 to 30.
- High input impedance and low output impedance.

Price (1-9) $12.00

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

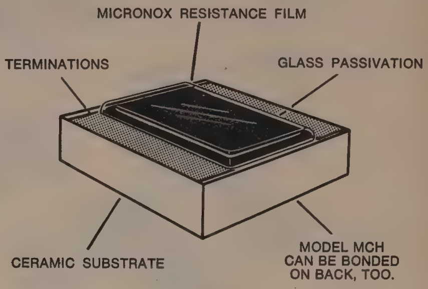
Type MC Precision Chip Resistors and High Resistance Precision Chip Resistors

Caddock introduces the Type MC Precision Chip Resistors — a new and complete line of precision chip resistors that meet the most stringent requirements of all types of hybrid circuits.

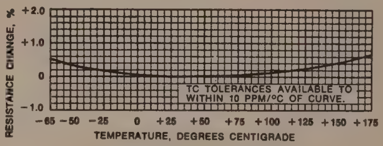
The latest advance in Caddock's 12 years of experience in the development and production of high performance film resistors, the Type MC Precision Chip Resistors utilize Micronox* complex oxide resistance films to provide all of these advantages:

- **Extended Resistance Range.**
  1 Megohm resistance values are now available in even the smallest of these chips, and the Model MCV Multi-Megohm Chip Resistors include resistance values up to 500 Megohms!
- **Precision Resistance Tolerances.**
  The standard resistance tolerance for all models and values is ±1%!
- **Higher Operating Temperatures.**
  +175°C maximum operating temperature is the standard specification for every model and all Type MC resistors can be operated without derating at +125°C!
- **Lower Temperature Coefficients.**
  TCs of 50 PPM/°C and 80 PPM/°C are standard over a 120°C operating temperature range.
- **Matched Temperature Coefficients.**
  TC tracking between any two chip resistors of any type, model and resistance value will stay within 40 PPM/°C over the temperature range from −15°C to +105°C.
- **Exceptional Stability.**
  The high stability of Caddock Micronox* resistance films keeps resistance shifts to a minimum under all thermal and environmental conditions.

There are four basic models to choose from, including chips for wire-bonding, solder reflow and a solderable design with wrap-around tinned terminals.



The typical TC curve shown in this graph illustrates the dish-shaped temperature characteristic of Micronox* resistance films. While the shape of this curve will vary slightly with the resistivity of the film, these resistance films provide a nearly 'zero' TC over a limited temperature range — a feature that can be the source of additional improvements in the stability of many electronic circuits.



For information on price and delivery of both production and evaluation quantities of any of the Type MC Precision Chip Resistors, contact the high performance film resistor specialists at Caddock.

Type MC Precision Chip Resistors are produced under carefully controlled manufacturing and test procedures.

Manufacturing Control.
Type MC Precision Chip Resistors, like all other Caddock High Performance Film Resistors, are produced under strict manufacturing controls with processes which include power conditioning, overvoltage conditioning and maximum temperature conditioning.

Quality Control.
Type MC Resistors receive quality surveillance which reaches from incoming raw materials to your packaged resistors in the shipping area. And our QC system has been approved for conformance to the requirements of NASA NPC200-3 and MIL-I-45208.

SPECIFICATIONS

All Type MC Precision Chip Resistors

Resistance Tolerance: ±1% standard. Tolerances to ±0.1% on special order. (Tolerances less than ±1% will have organic passivation.)

Operating Temperature: −55°C to maximum specified temperature.

TC Tracking: 40 PPM/°C maximum between any resistor model and any resistance value. (Ref. 25°C, ΔR taken over range from −15°C and +105°C)

Short Time Overload: 5 times rated power or 1.5 times maximum allowable working voltage, whichever gives the lower power, for 5 seconds. Maximum ΔR .5%.

High Temperature Exposure: R Shift .5% max.*

Resistance to Bonding or Solder Exposure: R Shift .25% max.*

Moisture Resistance: R Shift .5% max.*

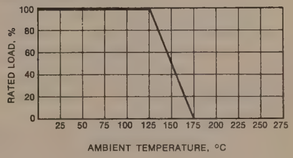
1000 Hour Load Life: R Shift .5% max. when mounted on a heat sink which maintains surface temperature within maximum range.

†Temperature Coefficient: Referenced to 25°C, ΔR taken at −15°C and +105°C.

♦ Dimension does not include thickness of solder deposit.

* Test parameters per applicable portions of Mil-R-55342

DERATING CURVE



Complete information on all types of Caddock High Performance Film Resistors is included on pages 2•1428 through 2•1443 of Volume 2 of EEM.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

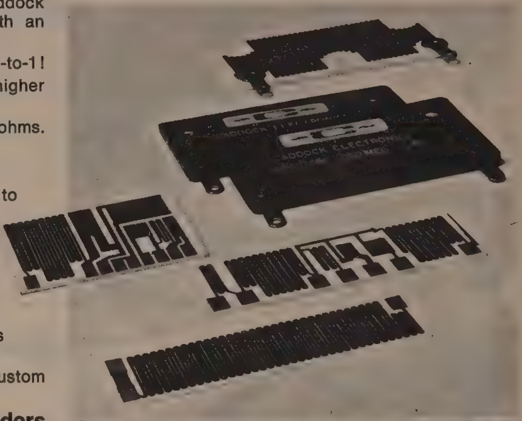
Custom Resistive Devices

For the ultimate in resistor network performance, Caddock produces many types of custom resistive networks with an unsurpassed combination of advantages:

- **High Resistance Ratios**—from 1-to-1 up to 1,000,000-to-1!
- **High Transient Handling Capability**—up to 100 times higher than the rated power level!
- **Extended Resistance Range**—from 1 ohm to 5000 Megohms.
- **Tight Resistance Tolerances**—to 0.05%.
- **Tight Ratio Tolerances**—to 0.025%.
- **Close Ratio Tracking** — to 5 PPM/°C from −15°C to +105°C.
- **Exceptional Resistor Stability** — as close as 0.01% per 1000 hours in extended life.

This combination of advantages in one resistor network often provides a practical — **and immediate** — means for improving the performance and specifications of electronic circuitry and equipment without any changes in the design!

Here are examples of the many high performance custom resistive networks available from Caddock Electronics:



Multimeter and Oscilloscope Input Signal Dividers

Precision voltage dividers with ratios as high as 1,000,000-to-1 are often required for range switching at the input of laboratory instruments. For these applications, Caddock produces single-chip networks with resistance ratios accurate to 0.025% and with the temperature coefficients matched to within 5 PPM/°C over the normal operating temperature range.

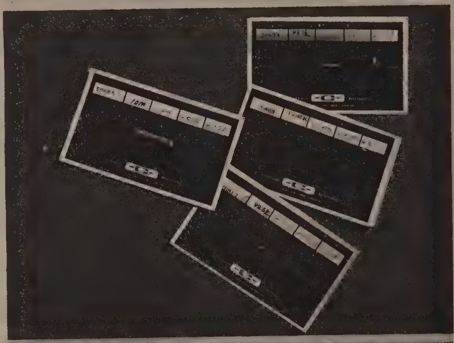
R-C Networks

A wide range of capacitance values can be combined with our precision resistors on a single chip. These high stability capacitors may be isolated from the other components on the chip or combined in R-C functions to meet your requirements.

Matched Resistor Sets

Sets of matched resistors with ratios held as close as 0.05% over the range of ratios from 1:1 to 1:100,000 provide solutions to the toughest accuracy problems in voltage dividers, reference networks, feedback networks, current summing networks, and high voltage divider networks. Virtually **all** of the various types of Caddock Film Resistors can be matched in discrete resistor sets for both tight ratio tolerances and TC tracking — some as tight as 2 PPM/°C over specific temperature ranges — making it practical to select **and intermix** the particular type of resistors needed to meet other important performance requirements.

These matched sets and networks can also be assembled in molded packages or DIP configurations, and in special shapes to meet your design requirements.



DAC Ladder Networks

Networks with resolution up to 12 binary bits can be produced, and the superior long-term stability of Micronox™ resistance films keeps accuracy higher for longer, more error-free operation of advanced digital systems.

Precision High Voltage Divider Networks

Special packages are available for discrete resistor sets, and flat ceramic substrates provide low profile configurations with integral mounting holes.

TC 'tracking' as close as 2 PPM/°C can be provided, and special encapsulation techniques meet rugged environmental limits.

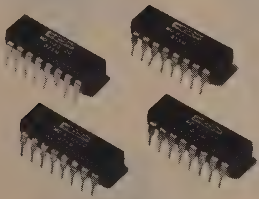
Precision Resistor Networks in DIP and SIP Packages

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

The exceptionally high performance of Caddock Micronox* resistance films is now available in many standard DIP and SIP resistor packages that provide a unique combination of advantages:

- Tight Tolerances.
- Tight Resistance Ratios.
- Lower Temperature Coefficients.
- Matched TC Ratios.
- Extended Resistance Range.
- Excellent Transient Handling Capability.
- Outstanding Load-Life Stability.

These advantages make Caddock DIP and SIP Precision Resistor Networks the ideal choice for many high accuracy analog and digital circuits, including —

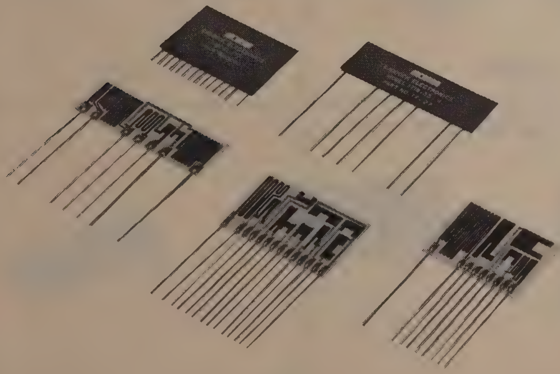


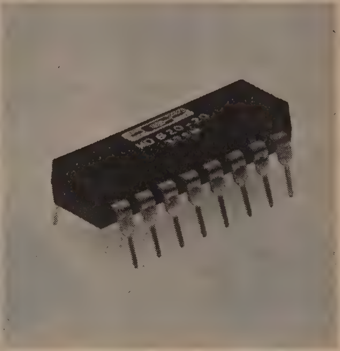
- Precision voltage dividers for multi-range instruments.
- Precision resistor ratios for accurate amplifier gain control.
- Feedback networks for precision power supplies.
- Custom ladder networks for precision D/A and A/D conversion circuits.

The DIP packages are available in all of the standard 14, 16 and 18 pin configurations. SIP packages are available in a wide variety of shapes and sizes to fit the requirements of each application, with standard or custom lead spacings and lengths.

For complete information on the high performance precision resistor network for your application, please call or write directly to the applications engineers at Caddock Electronics.

*Micronox is a registered trademark of Caddock Electronics, Inc.





14, 16 and 18 Pin DIP Packages and Standard and Custom SIP Packages

Resistance Range: 10 ohms to 10 Megohms in standard DIP packages. 1 ohm to 50 Megohms in SIP packages.

Number of Resistors per Package: Up to 36 resistors, depending upon interconnections.

Tolerance: ±0.5% and ±1.0% (Tolerances to ±0.1% on special order.)

Absolute Temperature Coefficient: ±50 PPM/°C for values up to 1 Megohm.§ ±80 PPM/°C for values above 1 Megohm.§

Ratio Tolerance: ±0.1%, ±0.25% or ±0.5%, as specified.

Ratio Temperature Coefficient: 40 PPM/°C.§ Special TCs to 5 PPM/°C.§

Power Rating: Up to 1 watt per resistor. Up to 2 watts per package.

Overload: 2.5 times rated voltage for 5 seconds. R shift .25% max.

Voltage Coefficient: To 0.1 PPM/volt when required.

Voltage Rating: 150 volts per resistor or 150 volts between adjacent pins.

Mechanical Configurations: DIP packages are molded of flame-proof high temperature materials and conform to mechanical outline requirements of Mil-R-83401B.

SIP packages include molded or conformal encapsulation and provide lead spacings of .100″, .125″, .150″ and .172″ as specified.

SIP package height is typically .300″ or .500″.

§ Temperature Coefficient: Referenced to 25°C, ΔR taken at −15°C and +105°C.

CUSTOM, HIGH PERFORMANCE MOS

Low-voltage CMOS and high-speed PMOS. Built by the people who introduced ion implantation to MOS processing technology.

CMOS

- Low operating voltage—down to one volt.
- Complex, high density circuits—no channel stoppers.
- Low, matched and selectible threshold voltages—as low as 0.5 volts on both N and P channels.
- Tight threshold voltage control—within ±0.2 volts.

PMOS

- High-speed at low power—low capacitance through zero gate overlap—example, 10 MHz shift register at 200 μW per bit.
- Single power supply—operating voltage as low as 3 volts with ion implanted resistors.
- High circuit density—advanced photolithographic technology.

PLUS...

- Full silicon nitride passivation plus overglass protection.
- TTL/DTL compatibility.
- Full MIL STD temperature range.
- 100% screening to MIL STD 883.

If our custom capability can serve your high performance requirements, contact us at the following address:

Thinking custom hybrids? Hybrid Systems offers the packaging expertise and engineering know-how that put it all together.

We specialize in the design and manufacture of custom hybrids that combine reliability and temperature stability with real savings in cost, size and weight. This means fewer interconnections and reductions in parasitic reactances. And it means products manufactured to the requirements of MIL-STD-883, Class A & B, and other exacting standards of quality.

Hybrid Systems' custom hybrid assemblies come in encapsulated modules, dual-in-line plastic and ceramic packages, hermetic TO cans, flat-packs, platform cases, and other packages suitable for chip and wire technology. Our work in functional modules has produced a library of proven designs for all types of custom circuits.

State-of-the-art thin and thick-film processes, thermal compression, ultrasonic, epoxy and eutectic bonding techniques and many package sealing methods are utilized. Depending upon the required performance and packaging, these circuits use thin-film nickel-chromium resistor networks deposited on silicon which have excellent TCR (better than 50PPM/°C), tracking (1PPM/°C typical), stability (0.1% @ 125°C), and appropriate power ratings. Tantalum nitride resistor films of similarly high quality and reliability are available.

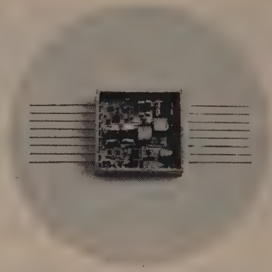
Thick-film capabilities include fine line conductor patterns with very low resistance; multilayers; and resistor patterns compatible with such assembly processes as eutectic or epoxy semiconductor bonding, capacitor brazing or soldering, gold or aluminum wire bonding, and lead frame attachments. Resistors feature absolute TCR (better than 100PPM/°C), tracking (15PPM/°C), stability (0.3% @ 125°C) and tolerance (up to 0.2%).

Rigid quality control programs are maintained to assure components are made to high-reliability standards and specifications at all phases of production. Hybrid Systems' is qualified to meet the requirements of MIL-STD-883, Class A and B, MIL-M-38510A, MIL-Q-9858A, NPC-200-3, and MIL-E-5400N.

It all adds up to the best, most efficient, most economical custom hybrid packaging available anywhere. You just supply the input and the output: we'll do the rest.

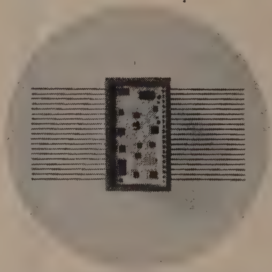
SEE OTHER HYBRID SYSTEMS LISTINGS IN SECTIONS 2000 AND 4700.

Multipower Regulator



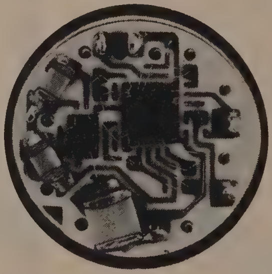
Actively trimmed power source performs voltage regulation, current limiting and filtering.

Multichannel Preamplifier



Low-noise precision amplifier in a high density package for high reliability airborne applications.

Oscillator



A combination of thin-film/thick-film components with discrete semiconductor and capacitor chips.

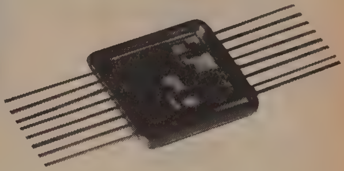
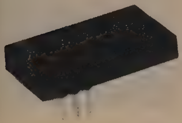
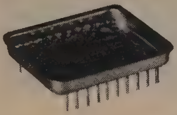
CUSTOM THICK FILM HYBRIDS

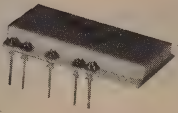


Broad capability in commercial, industrial, and military applications offering:

- Total design services
- Processing per MIL-STD-883 and MIL-M-38510
- Multi-layer capability
- Full range of packaging methods





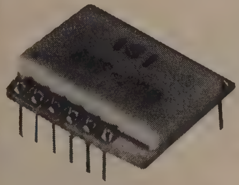


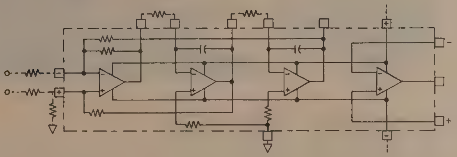
Specific experience in:

- Power conversion and regulator devices
- Active filters
- Amplifiers and preamplifiers
- Signal conditioning electronics
- Sample and hold circuits
- D/A converters
- Timing devices
- Digital devices

MODEL SVF 200
STATE VARIABLE ACTIVE FILTER

Model SVF 200 is a two-pole audio-frequency filter that can be used as a basic building block to generate virtually any complex filter function. The SVF 200 may be adjusted using external resistors, to provide Butterworth, Chebyshev, Cauer parameter and other functions.





MODEL SVF 200 FEATURES:

- Short circuit output current limiting
- Simultaneous bandpass, lowpass, and highpass outputs.
- Independent bandwidth, frequency, and gain adjustments.
- Constant bandwidth and constant Q tuning modes.
- Additional 'free' compensated amplifier for odd pole isolation, gain or feed forward element.

Price (1-9) $24.00

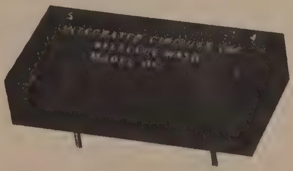
DC-DC CONVERTERS

GENERAL DESCRIPTION:

ICI's Model DC-200 series are dual output 6.0 watt high efficiency DC to DC converters designed to provide isolated positive and negative DC voltage outputs at current ratings of 200 milliamperes from each output. The devices are also capable of single ended outputs equal to twice the nominal dual output.

- 6.0 watts output over full operating temperature range.
- 200 ma. from each output.
- Input/output isolation — 100 meg. Ω min. at 500 VDC.
- Operates in non-saturating switching mode.
- No additional heat sinking required.
- High efficiency — typically 83% at rated load.

Price (1-9) $42.00



STANDARD 6.0 WATT CONVERTER MODEL AVAILABLE

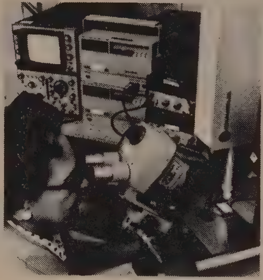
CUSTOM HYBRIDS

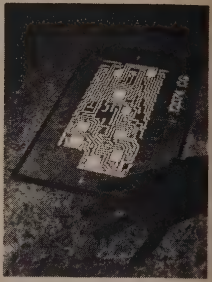
CAPABILITIES

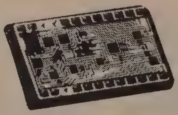
NEC Microsystems designs, develops and produces custom thick film hybrid microcircuits for many different customers and for a great variety of applications. This Division of North Electric is totally dedicated to serving the hybrid marketplace and has more than five years experience in this technology.

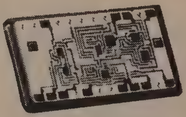
Although greatest emphasis is in telecommunications applications (telephony, "pocket pager" radios, etc.) current products range from simple relay drivers to pulse generators for demand cardiac pacemakers. The division is experienced in commercial and military applications.

Producing a custom hybrid from a conventional (discrete component) design should be a smooth, orderly transition. Cooperation between customer and vendor will assure a successful program. NEC Microsystems provides full cooperation and open communication in striving to make each new development a success.









FACILITIES

Modern and fully equipped design and development facilities are located in Fort Lauderdale, Florida. All phases of circuit design, photoreduction, screen fabrication, thick film substrate production, circuit assembly and packaging are performed at this plant. Assembly areas are air-conditioned and humidity controlled. The following types of equipment are utilized:

Photoreduction	Borrowdale Future Foto Camera 20 to 1 capability
Screen Fabrication	NuArc Platemaker, Precision Screen Frames
Thick Film Production	One AMI, One Presco, Three Weltek Precision Screen Printers One Thermco, Two BTU Belt Furnaces
Resistor Trim	One Teradyne, One Micronetics Computer Controlled High Speed Laser Trimmer One Apollo Laser Active Trim Station One S. S. White Air Abrasive Trimmer
Die Attach	K & S Eutectic Bonders Ewald Eutectic Bonders Laurier Silver Epoxy Bonders
Wire Bond	K & S Ultrasonic Machines, Aluminum and Gold Wire
Pin Swaging	Presco Swaging Machines
Lead Frame Attach	Unitek Solder Reflow Machines and Solder Dip Equipment
Capacitor Attach	Laurier Silver Epoxy Attach; Solder Reflow (Unitek, Ewald)
Substrate Solder Repair	Custom Made Hot Air Reflow Machines
Sealing	One Taylor-Winfield 75 KVA, One Taylor-Winfield 100 KVA Welder. Dry Line, Moisture Monitor, Bakeout, Backfill Capability
Encapsulation	Various Custom Plastic Shells, Dispensers, Curing Ovens, Plastic Coating Baths, Etc.
Leak Test	VEECO MS9AB Helium Tracer
Circuit Test	Substrate Probers, Special Test Interface Boxes. Bircher Tester, Many Standard Laboratory Oscilloscopes, DVM's, Power Supplies, Counters, Waveform Generators, Distortion Analyzers, Etc.
Wafer Scribe	Tempress Scriber
Die Probe	Siliconix Prober
Inspection	Metallurgical and Standard Binocular Microscopes
Environmental	Four Statham Hot/Cold Chambers. Other Environmental Testing Subcontracted
Pull Test (Wirebonds)	Microtech Calibrated Pull Tester

OFFSHORE FACILITY

Competitive pricing is always an important criterion in any production contract. In order to assure low costs, NEC Microsystems has carefully developed an offshore production facility which is capable of high volume, high quality assembly. After circuit development is complete and initial production has been stabilized in Fort Lauderdale's pilot line, detailed processing instructions and component parts are furnished to the offshore facility. Finished circuits are returned to the U. S. for final inspection, testing and branding. A system of checks and balances, as well as supervision and training by U. S. personnel, assures continued high quality. The facility is staffed with professional, technical, and supervisory personnel and is equipped with modern assembly equipment of U. S. manufacture.

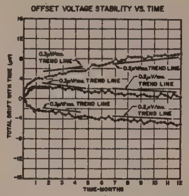
PRECISION OPERATIONAL AMPLIFIERS & VOLTAGE COMPARATORS

monoOP-07 ULTRA-LOW OFFSET VOLTAGE OP AMPS



CHOPPER PERFORMANCE AT BIPOLAR PRICES!

- NO CHOPPERS OR CHOPPER NOISE
- ULTRA-LOW Vos 10μV
- ULTRA STABLE vs TIME 0.2μV/MONTH
- ELIMINATES NEED FOR ADJUSTMENT POTS
- TRUE DIFFERENTIAL INPUT ....CMRR 126dB
- NO EXTERNAL COMPONENTS REQUIRED
- FITS 725, 108A/308A, 741 SOCKETS

	Temp Range (°C)	Max Vos (μV)	Max TC V_{os} (μV/°C)	I_B Max (na)	Min CMRR (dB)	Min Gain (×10³)	Max TCI_B (PA/°C)

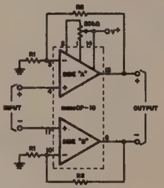
8 Pin TO -99 Package: add suffix J; 14 Pin Hermetic Dip: add suffix Y; 10 Pin Flatpack: add suffix L.

monoOP-10 — DUAL MATCHED INSTRUMENT OP AMPS

HIGH INPUT IMPEDANCE
DIFFERENTIAL-IN
DIFFERENTIAL-OUT
AMPLIFIER



DUAL OP AMPS WITH FANTASTIC MATCHING!

- EXCEPTIONAL ΔVos MATCHING
- EXCELLENT TCΔVos TRACKING OVER TEMP
- MATCHED CMRR FOR BEST COMMON MODE REJECTION
- MATCHED Ios+, Ios−, PSRR
- PERFECT FOR INSTRUMENT AMPLIFIERS
- INDIVIDUAL DEVICES SIMILAR TO monoOP-05 TYPES
- SAVES COST AND SPACE OVER INDIVIDUAL AMPS — 14 PIN DIP

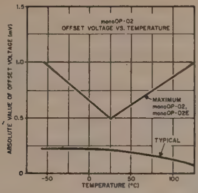
monoOP-02 — HIGH PERFORMANCE GENERAL PURPOSE OP AMP



DRAMATIC IMPROVEMENT OVER STANDARD 741 TYPES!

- LOW COST ELIMINATES COSTLY SELECTED TYPES
- LOW OFFSET VOLTAGE ....0.5mV MAX
- LOW OFFSET AND BIAS CURRENTS
- GUARANTEED DRIFT ....5.0μV/°C MAX
- LOW NOISE VOLTAGE ....LOW NOISE CURRENT
- COMPLETE FREEDOM FROM "POPCORN" NOISE
- GUARANTEED SLEW RATE — 0.5 V/μsec MIN

	Temp Range (°C)	Max Vos (mV)	Max TCVos (μV/°C)	Max Ios (nA)	Max Ib (nA)	Min CMRR (dB)	Min PSRR (dB)	Min Gain (×1000)

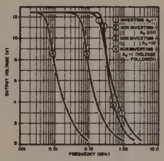
8 PIN TO-99; Add Suffix J; 14 PIN DIP: Add suffix "Y"; CONSULT FACTORY FOR AVAILABILITY OF 8 PIN MINIDIP AND FLATPACK TYPES.

monoOP-01 — LOW COST HIGH SPEED OP AMP



HIGH SPEED PERFORMANCE AT LOW COST!

- FAST SETTLING TIME ....700 nsec to 0.1%
- HIGH SLEW RATE 18V/μsec
- WIDE POWER BANDWIDTH 250kHz
- WIDE SMALL SIGNAL BANDWIDTH 2.5MHz
- INTERNALLY COMPENSATED
- LOW POWER CONSUMPTION 40mW
- EXCELLENT D.C. SPECIFICATIONS

	Temp Range (°C)	Max Settling Time 0.1%, 5V (μs)	Max Vos (mV)	Max Ios (nA)	Max IB (nA)	Min Gain (x10³)	Max Pd (mW)

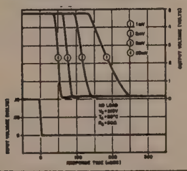
8 PIN TO-99: Add Suffix "J"; 14 PIN DIP: Add suffix "Y"; 10 PIN FLATPACK: Add Suffix "L".

monoCMP-01/monoCMP-02 — FAST PRECISION COMPARATORS

RESPONSE TIME FOR 100mV STEP AND VARIOUS INPUT OVERDRIVES



MOST ACCURATE VOLTAGE COMPARATORS AVAILABLE!

- monoCMP-01 ....90nsec RESPONSE TIME
- monoCMP-02 ....50nA MAX BIAS CURRENT
- LOW OFFSET VOLTAGE AND DRIFT
- ±5 TO ±18V OR SINGLE +5V OPERATION
- DRIVES TTL WITHOUT PULL-UP
- HIGH GAIN WITHOUT OSCILLATIONS
- IDEAL FOR A/D CONVERTERS, PRECISION APPLICATIONS

	Temp Range (°/C)	tr 5mV Overdrive (ns)	Max IB (nA)	Max Vos (mV)	TCVos (μV/°C)	Max Ios (nA)	Min Gain (× 1000)

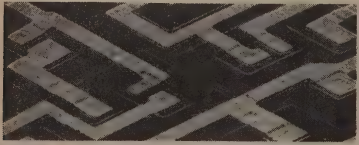
HIGH YIELD MONOLITHIC CHIPS



SAVE MONEY THROUGH INCREASED YIELDS!

The superior performance of Precision Monolithics products is available to the hybrid designer — all chips are 100% electrically tested for all guaranteed DC parameters at 25°C and are 100% visually inspected to 2010.1B. Each chip is protected with our exclusive "Triple-Passivation" process for maximum assembly yield and long-term reliability, then carefully packaged for protection during shipment.

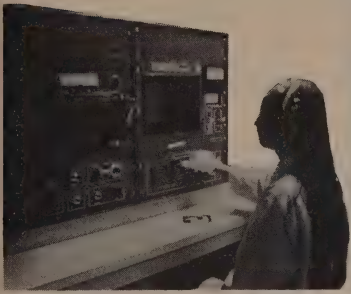
...delivering tomorrow's linear technology today!

PRECISION MONOLITHICS brings to the marketplace a superior monolithic process and the talents of an outstanding circuit design team capable of exploiting the monolithic and hybrid circuit art to its maximum potential. These advanced capabilities have been applied to produce state-of-the-art linear and A/D/A conversion circuits of exceptional performance, manufactured in volume at low cost to satisfy the exacting requirements of the Process Control, Instrumentation, Communication and Military/Aerospace Industries. Our ultra-modern Santa Clara facility has recently been expanded to over four times PMI's original capacity, further enhancing PMI's dedication to **delivering tomorrow's linear technology today!**



QUALITY CONTROL/RELIABILITY

Precision Monolithics believes that Quality and Reliability must be **built into** the product; no amount of testing can replace these inherent properties.

Precision Monolithics products are built in accordance with the requirements of MIL-STD 883 and 38510 with many exclusive processes and controls added to improve the outgoing quality and reliability. Proof of conformance is provided by continuous Q. A. sampling of outgoing lots; the customer return rate is among the lowest in the industry. Processes are thoroughly documented and a well-equipped failure analysis laboratory including the latest **Scanning Electron Microscope** equipment is maintained as a research and yield-improvement tool and as an aid to our customers. **Complete facilities are available for processing and qualification to all levels of MIL-STD/38510/883.** We are proud to be the supplier of devices to the highest reliability space programs, including the Viking and Mariner/Mars deep space probes.

TRIPLE PASSIVATION

Triple Passivation is an exclusive three-step process which provides superior reliability and protection for all Precision Monolithics active integrated circuits. First, a specially treated thermal silicon dioxide layer is grown. This protects the junctions and also attracts any residual ionic impurities to the top surface of the oxide, where they are held fixed. Next, a layer of silicon nitride is applied to prevent the entry of any potential contamination or impurities. The third step is the thick glass overcoat layer which leaves only the bonding pads exposed. This "glassivation" protects the chip from damage during assembly and is especially important in minimizing yield loss during shipment and assembly of chips for hybrid circuits.

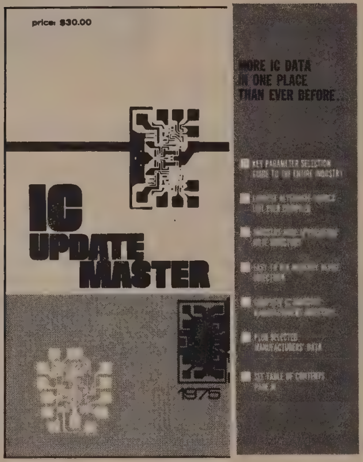
ATT: IC USERS

NOW YOU CAN GET AN OVERVIEW OF EVERY IC AVAILABLE WITHOUT GOING THROUGH DOZENS OF SEPARATE CATALOG



price: $30.00
MORE IC DATA IN ONE PLACE THAN EVER BEFORE...
IC UPDATE MASTER
KEY PARAMETER SELECTION GUIDE TO THE ENTIRE INDUSTRY
PLUS SELECTED MANUFACTURERS' DATA
1975

Here's something you've been wanting for years . . . and it's finally here. United Technical Publication, the publishers of Electronic Products Magazine and Electronic Engineers Master (EEM) has worked for two years putting together the most comprehensive IC catalog/directory ever published . . . it's called IC Update Master.

The heart of this invaluable reference book is a Master Function Index. It allows you to survey the **entire** IC industry . . . it gives you an overview of what's available by device number and manufacturer . . . you no longer have to thumb through dozens of manufacturers' catalogs to find the device you need.

IC Update Master also contains the most useful Alternate Source Directory in the industry. It is the only place you can go to find a listing of **all** manufacturers that make a pin-for-pin functional equivalent device.

And there's a lot more in its over 1000 pages for you...

Part Number Construction... listing each IC manufacturer's standard part numbers, with prefixes and their meanings.

Application Note Directory... containing current IC application notes arranged by subject matter and cross-referenced by device number.

Military Parts Directory... with functional cross-reference to QPL (Qualified Product List) devices.

Manufacturers and Distributors Directory... listing the IC manufacturers' field sales offices, representatives and distributors.

Manufacturers' IC Catalog Data... additional IC manufacturer data arranged alphabetically.

And just to make sure you keep right on top of things all year long, we publish quarterly supplements with all the modifications and new products and developments in the IC industry.

When you get the IC Update Master you'll wonder how you've gotten along without it.

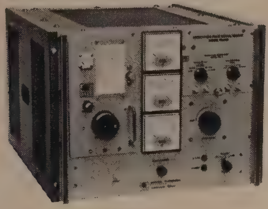
PULSE SIGNAL SOURCES



MODEL PH40K

the highest pulse power available in a single generator

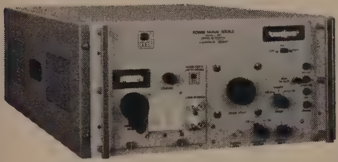
Covering the range from 150 to 6100 MHz, tuneable plug-in oscillator heads provide guaranteed minimum powers as high as 40 kW. Magnetron plug-ins further extend the upper limit to 16,500 MHz. Pulses are continuously variable in width from 0.4 to 25 μs and in repetition rate from 10 to 10,000 pps. Available also in pulse modulator configuration (MH250). Frequency ranges and power levels of oscillator heads are detailed on next two pages.

MODEL PG5KB

wide range, medium power unit

With guaranteed minimum powers as high as 5 kW, the Model PG5KB covers 150 to 6100 MHz with plug-in heads. Magnetron plug-ins further extend the upper limit to 16,500 MHz. Pulses are continuously variable in width from 0.3 to 50 μs and in repetition rate from 20 to 25,000 pps. Frequency ranges and power levels of oscillator heads are detailed on next two pages.

CW SIGNAL SOURCE

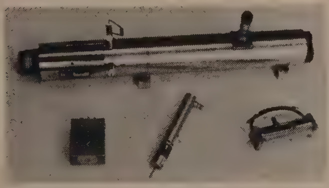


MODEL C203

the highest CW power available in a single instrument

Covering the range from 10 to 6100 MHz with plug-in heads, the Model C203 provides full power modulation at 0.5 duty cycle with internal 1000 Hz square wave generator or from an external pulse source. Frequency ranges and power levels of oscillator heads are detailed on next two pages.

CAVITY OSCILLATORS AND AMPLIFIERS



Standard oscillator models for CW or pulse applications in a variety of configurations cover selected frequency bands from 150 to 6100 MHz. Cavity amplifiers from 150 to 3000 MHz, CW and pulse, for applications in TACAN, DME, and similar requirements. Some special oscillator designs that have become standard:

Model 519	40 kW peak power, UHF.
Model 505	Conduction-cooled, high power, C-band.
Model 428	Wide tuning, CW for local oscillator applications.
Model 498	High power, duty cycle, and stability; wide pulse.

PEAK POWER CALIBRATION SYSTEM

A secondary standard for calibrating TACAN, DME, DABS, ATC, IFF and other accuracy-demanding systems in the 925 to 1225 MHz frequency range. Power accuracy of ±0.3 dB is directly traceable to the National Bureau of Standards. Peak power of 5 kW. Direct readout of pulse power, pulse width, PRF, and operating frequency. Pulse duration from 0.35 to 5 microseconds. Automatic sequencing. Sync output. Accepts internal/external trigger.

Minimum Power

Sometimes more... never less.

That's what you get with our signal sources and oscillators — the rated power as an absolute minimum throughout the frequency band of the plug-in head in use. In fact, we're so confident we can deliver that power, we've hung a guarantee tag on each and every oscillator we sell.

In a model to suit your needs up to 100 watts CW or 40 kilowatts pulsed. Guaranteed. You can depend on it.

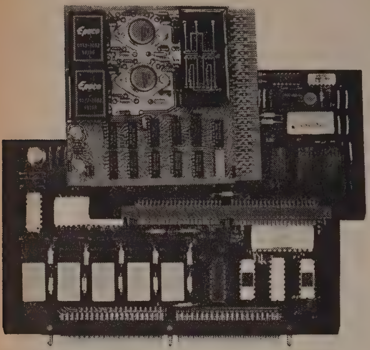
CONVERTER SYSTEMS



The Model 1010 Digital-to-Synchro Converter combines high accuracy (±6 minutes of arc) and high resolution (0.17°) in a low impedance unit designed to drive 50 ohms. Applications include navigation displays and remote operation of industrial controls.

The Model 1020 is a complete data acquisition system in one module. Includes a 16 channel multiplexer with buffer amplifier, a 12 bit successive approximation A/D converter, both serial and parallel output data transfer and five active low-pass filter signal conditioners capable of receiving high level differential signals up to ±10 volts.

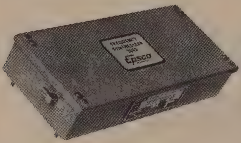
The Model 1030 Triple 12-Bit D/A Converter Module is designed specifically for interface with on-board avionic computer-controlled equipment. It contains three separate converters with individual storage registers. Completely qualified to MIL-E-5400/Class 3 requirements.

Other configurations available.

TACAN SIMULATORS

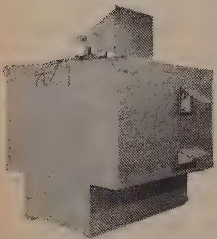
The Model 2010 TACAN Beacon Simulator Test Set is a digital, programmable depot/intermediate level instrument designed for continuous use under military service conditions in the checkout and alignment of all airborne TACAN receivers. The instrument is compatible with all standard A/B TACAN and CNI airborne systems including X-mode, Y-mode, and air-to-air operations. Standard values may be preset. Error detection circuits prevent incorrect parameter combination. Plug-in cards are functionally isolated for ease of maintenance.

FREQUENCY SYNTHESIZERS

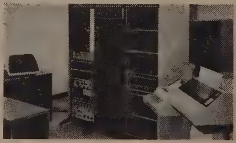


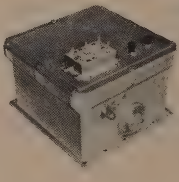
Typical of the line of synthesizers is the Model 2013, a digitally programmable unit with frequency increments as small as 10 kHz in the 100 to 200 MHz range. This reliable MIL-SPEC frequency synthesizer has a spurious output better than -70 dB. The small lightweight unit is suitable for airborne applications as well as for use with computer-controlled test equipment and computer peripherals. Custom configurations available.

CUSTOM PRODUCTS



The same high performance and reliability characteristics that distinguish our standard models are also evident in the custom product designed to your specifications. In single units or production quantities. Our extensive experience covers the spectrum from the smallest high-performance cavity to large transmitter systems in environmentally controlled transportable shelters. Automatic test systems can now be supplied for a variety of test applications. Of particular interest are the specialized applications for test of synchro conversion devices and RF components and subsystems. Our experience with testing these devices will often save a customer valuable time and effort in satisfying production test requirements.





Call or write for complete data package.

ere's something you've een wanting for years . . . nd it's finally here. United echnical Publication, the ublishers of Electronic roducts Magazine and lectronic Engineers aster (EEM) has worked r two years putting together the most comprehensive IC catalog/ irectory ever published . . . it's called IC pdate Master.

he heart of this invaluable reference book is Master Function Index. It allows you to survey the **entire** IC industry . . . it gives you an overview of what's available by device number and manufacturer . . . you no longer have to thumb through dozens of manufacturers' catalogs to find the device you need.

IC Update Master also contains the most useful Alternate Source Directory in the industry. It is the only place you can go to find a listing of **all** manufacturers that make a pin-for-pin functional equivalent device.

nd there's a lot more in its over 1000 pages for you...

t Number Construction . . . listing each IC manufacturer's standpart numbers, with prefixes and their meanings.

lication Note Directory . . . containing current IC application notes anged by subject matter and cross-referenced by device number.

itary Parts Directory . . . with functional cross-reference to QPL alified Product List) devices.

nufacturers and Distributors Directory . . . listing the IC manufacers' field sales offices, representatives and distributors.

nufacturers' IC Catalog Data . . . additional IC manufacturer data anged alphabetically.

And just to make sure you keep right on top of things all year long, we publish quarterly supplements with all the modifications and new products and developments in the IC industry.

When you get the IC Update Master you'll wonder how you've gotten along without it.

COBER MEANS HIGH POWER MICROWAVE!

COBER CAPABILITY

Cober Electronics, the company that has earned the reputation as "the high power people," specializes in high power systems for research, testing, communications and industrial processing. Cober's unique capability, coupled with one of the finest engineering teams, produces some of today's most advanced electronics equipment.

This technology is implemented in a product line of instruments, sub-systems and systems that encompass a capability in the areas of high power pulse, high power microwave and high power industrial microwave ovens.

HIGH POWER PULSE

Cober's capability in the generation of high power pulses is reflected in a line of production high power pulse generators and unique pulse modulators, plus pulsed microwave generators and amplifiers. Cober's pulse generators are characterized by their high pulse fidelity and flexibility. They are all at high power with rise times measured in nanoseconds, rep rates from a single shot up to a megahertz and pulse widths going to DC. Various models contain built-in bias supplies and high voltage isolation to allow convenient use as a microwave tube grid pulser. Cober's pulse modulators include units to drive virtually every high power pulsed microwave tube. Power levels range to over 100 megawatts. Plus, Cober is a specialist in generating state of the art rise times and high rep rates with sophisticated pulse shapes. Both soft tube and hard tube units are furnished for laboratories, particle accelerator facilities and for industrial applications, while full MIL spec requirements are supplied for systems uses.

HIGH POWER MICROWAVE

Cober has a unique capability in high power microwaves. In communications, Cober power amplifiers are the heart of troposcatter and satellite communications transmitters. Tropo amplifiers cover the "L", "S" and "C" bands at powers from 1 Kw to 75 Kw. For satellite communications, Cober has P.A.'s at the new 14 GHz Satcom frequency and a complete line of TWT and klystron amplifiers at 5.9 - 6.4 GHz and 7.9 - 8.4 GHz at power levels of 300 watts to more than 8 Kw.

Cober's Kilowatt Microwave Signal Generators and Laboratory Microwave Amplifiers are available in CW or Pulse versions. Some models have a dual mode capability. They are used for component testing, antenna pattern measurements and to power plasma tubes. Cober's experience with every type of microwave tube and inventory of basic power supply and modulator designs insures the perfect marriage of tube and supply. The result is delivery of a unit exactly right for your application.

HIGH POWER INDUSTRIAL MICROWAVE OVENS

The unique properties of microwave energy are applied by Cober as important new tools for industrial processing and research. There, the microwave energy is used for heating, drying and cooking. With Cober industrial microwave ovens, particular materials can be heated and processed at speeds, efficiencies and economies that cannot be realized by conventional means. The use of microwaves saves energy, avoids pollution problems, and does not require the use of scarce natural gas. Machines operating at 915 MHz and 2450 MHz are offered.

HIGH POWER PULSE

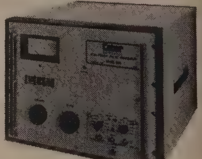
HIGH POWER PULSE GENERATORS

Cober's pulse generators are unique for high power applications. They drive plasma tubes, pulse lasers and flash lamps, and operate gridded power tubes and magnetrons. They are ideal for pulse testing of magnetic components, driving transducers and optic modulators, for pulse simulation in nuclear research and non-destructive testing — wherever big power is needed quickly and economically. Cober's pulse generators have peak powers of 9 Kw to over 31 Kw. The output pulse shape is exceptional with fast rise time, low ripple and virtually no droop. All of these generators use the Cober exclusive "floating deck" circuitry that permits operation at both positive or negative polarity and 5 Kv D.C. pulse isolation. Also, this reversible polarity and isolated pulse capability, permits the pulse generators to be connected in series and in parallel to give twice the current or twice the voltage or alternating positive and negative pulses.

This broad line is available from stock with pulse widths from 50 nanoseconds to D.C. at rep rates up to a megahertz. Standard plug-in accessories can extend the voltage to 30 Kv and current to more than 750 amperes.

Below are specification highlights for two of Cober's pulse generators. Please call us for information about our other pulse generators or for applications assistance.

	Model 606	**Model 605-P**
Peak Voltage:	0-2,500 Volts	0-2,200 Volts
Peak Current:	0-12.5 Amperes	0-11 Amperes
Duty Factor at Full Power:	1.5%	1.5%
Pulse Polarity (Selectable by Operator):	+ or −	+ or −
Rise Time:	20 ns	20 ns
Pulse Width: (microseconds)		
at full power	0.05-3000	0.05-1,000
at reduced power	0.05-10,000	0.05-10,000
Pulse Repetition Rate:	one shot — 1 MHz	one shot — 1 MHz
Floating Output Insulation:	5 KV D.C.	5 KV D.C.
Input Power:	115/230 Volts, 50/60 Hz, 1 ϕ, 10 A.	115/230Volts, 50/60 Hz, 1 ϕ, 8 A.
Size:	19″ W x 22¼″ D x 14″ H	19″ W x 22¼″ D x 14″ H



Model 606 generates 31 Kw pulses, 2500 Volts at 12.5 Amps.

HIGH POWER PULSE MODULATORS

When it comes to special high power pulse applications, our custom pulse modulators go from a few kilowatts to more than 100 megawatts. We specialize in the generation of state of the art nanosecond rise times and high rep rates. Hard tube designs for versatility and soft tube modulators for low cost and small size are in our store house of models and designs for economical and quick delivery of exactly the modulator for your application

Model 2004 Pulse Modulator drives modulating anodes of high power TWTs. Output is 30 KV with wide pulse range of 2-5,000 microseconds.

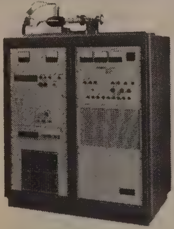
PULSE-GENERATORS/MODULATORS MICROWAVE-AMPLIFIERS/TRANSMITTERS/GENERATORS INDUSTRIAL MICROWAVE PROCESSING SYSTEMS

HIGH POWER MICROWAVE

KILOWATT MICROWAVE SIGNAL GENERATORS

Cober's High-Power R.F. Sources provide microwave frequency energy for use in antenna-pattern studies, EMI susceptibility measurements, and in testing microwave components, such as filters, circulators, and pin diodes. In ground support equipment stations, Cober units are the basic source of high-power, microwave test frequencies. These units use Klystrons, Magnetrons, TWT's and other suitable microwave tubes, selected for power output, frequency, or bandwidth required. Units are available from L-Band to millimeter frequencies, for C.W. or pulse operation, and at power levels of from several hundred watts to the megawatt region.



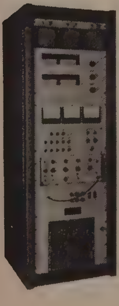
Series 1326 is typical of Cober Generators. With available R.F. heads, generates test frequencies from 350 MHz to 10,475 MHz at power levels up to 500 watts C.W. and 1.8 kw peak. The 1326 provides pulses variable from 1 to 10,000 microseconds at repetition rates from 10 to 100,000 p.p.s. with a maximum duty of 6.25.

MICROWAVE COMMUNICATIONS POWER AMPLIFIERS

Cober's Microwave Transmitters and Power Amplifiers are used in satellite and troposcatter communication systems. Frequencies between 1 and 14 GHz at power levels above 1 Kw are featured.

Model 2000, 1.25 kw Klystron Power Amplifier operates at new 14 to 14.3 GHz satellite communications frequency band. It transmits data, voice and TV and can be supplied for local or remote operation.

LABORATORY MICROWAVE AMPLIFIERS, CW AND PULSE



Cober produces TWT, klystron and CFA amplifier systems from 10 watts to over 100 Kw. Some units are available from stock with a full year warranty on equipment and tube. Series GP, provide 1 Kw, pulse output from 2 - 18 GHz for broad band ECM simulation.

Model 1977 is 3-band, TWTA, providing 1 kw from 2-12 GHz. Pulse width is variable from 0.5-10 microseconds and is used as ECM simulator.

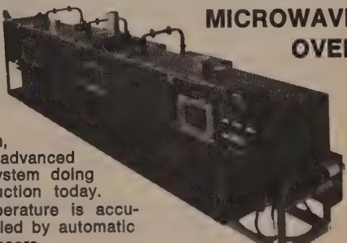
HIGH POWER OVENS

The efficiency and energy savings of Cober Industrial Microwave Ovens makes them the ideal tool for today's processes. Machines operating at 915 MHz and 2450 MHz with power levels from 2.5 Kw to over 100 Kw are supplied to the food, rubber, foundry, chemical, and research industries. The product line includes both batch and continuous systems.

MODEL BPH 2.5 INDUSTRIAL MICROWAVE OVEN

This unit has large heating chamber, extremely uniform fields, and plenty of power. Built in instrumentation helps you analyze microwave heating of your products.

15 KW CONTINUOUS MICROWAVE OVEN



Featuring an auxiliary hot air system, it is the most advanced microwave system doing on-line production today. Product temperature is accurately controlled by automatic electronic sensors.

STANDARD COBER INDUSTRIAL MICROWAVE HEATING POWER PACKS

Model Number	Frequency	Power Output (watts)
S1	2450 MHz	1,000
S2	2450 MHz	2,500
S5	2450 MHz	5,000
S30	2450 MHz	30,000
L2	915 MHz	2,000
L30	915 MHz	30,000

Semi/Dyne Series A500, A600

The Semi/Dyne Traveling Wave Tube Amplifiers comprise the most complete product line available from one manufacturer. These compact, solid state units cover the frequency range from 0.45 to 18.0 GHz offering CW power outputs from 0.5 to 600 watts and peak pulse power up to 2 kw.

The amplifiers utilize integrated circuit power supplies and PPM Traveling Wave Tubes in their most efficient configurations. They are packaged for ease of maintenance and long equipment life.

Each TWT is protected by helix current and voltage sensors, filament surge limiting and thermal overload sensors. The high power amplifiers (A500 and A600 series) offer remote monitoring and control as standard features.

Options are available for military and commercial system applications including airborne and communication systems. The amplifiers are available under G.S.A. Contract.

Semi/Dyne Series	Frequency Range (GHz)	Power Output Min (Watts)	Gain Min (dB)	N.F. Max (dB)
A100	1.0 to 18.0	1	30	30

MCL INC LA GRANGE ILL

MICROWAVE...

CAVITIES COMPONENTS SYSTEMS AND SUB SYSTEMS

The following pages reflect the results of over a decade of effort devoted to the design and development of microwave components and systems.

Dealing successfully, during that time frame, with almost every conceivable problem associated with cavity and system design has given us the confidence to boastfully exclaim "If we can't satisfy your microwave equipment requirements it can't be done"!

MCL/INC has designed and developed over 300 systems and subsystems, approximately 200 microwave accessories and over 400 different cavities, many of which are depicted in this catalog.

Browse through our microwave market place, assured that if you can't find the equipment to meet your needs, MCL can readily alter an existing unit or custom design to your exact specifications.

PRODUCT WARRANTY

Under recommended use and service, all MCL products are warranteed against defects in material and workmanship for nine (9) months from the date of original shipment. Material returned after 90 days of the original shipping date will be repaired on a pro-rata basis. MCL's obligation is limited to repairing or replacing, at our plant, products which prove to be defective during the warranty period. Tubes, transistors, and other solid state devices are covered by the respective manufacturer's warranty which applies from the date of shipment of the unit from MCL.

MCL is not liable for consequential damage resulting from the use of MCL equipment.

There will be no charge for repair of units under warranty except non-authorized shipping charges. In the event that responsibility for repair lies with the customer, customer will be charged for the cost of re-testing, repair and shipment. Estimates of charges will be supplied before work begins.

CLAIM FOR DAMAGE IN SHIPMENT
Your unit should be inspected and tested as soon as it is received. Claims for damage should be filed with carrier.

SHIPPING
Upon receipt of shipping instructions, forward the unit to the destination indicated. For non-warranty service, the unit must be shipped prepaid.

MICROWAVE SYSTEMS

TWT CW AMPLIFIERS

10, 20, 100 AND 200 WATTS

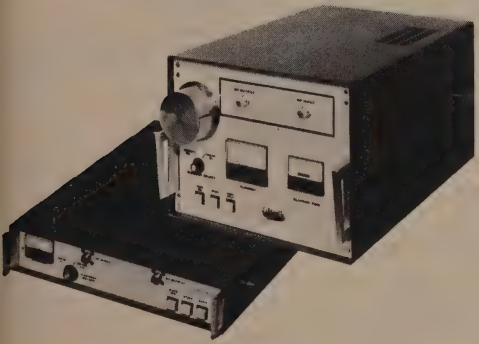
STOCKED (LESS TUBES) FOR IMMEDIATE SHIPMENT

The Industry's most advanced Traveling Wave Tube Amplifiers have broadband microwave amplifying capabilities and supply stable and powerful signals for calibration testing and other high power applications.

The power supplies are designed to maintain excellent regulation with a line input voltage variation of ±10%. The filament voltage is a regulated DC voltage supply. The helix voltage is maintained with ±0.1% with a ripple of less than .05%. The collector voltage for 10/20 watt units is regulated to ±.5% with .2% ripple. The 100/200 watt units use an unregulated collector for increased power supply efficiency. These characteristics result in superior spectral purity of the output signal.

Interlocks, overheat and overcurrent protective circuitry deactivate high power circuits should there be a fault. Metering is also included to provide performance verification and ease of maintenance.

In addition to the standard 10 to 200 watt amplifiers described in this catalog, custom modifications and designs are available on special order. MCL offers the following accessories on most models.



OPTIONS:

- VSWR PROTECTION (CIRCULATOR)
- OUTPUT POWER MONITORING
- SLIDES FOR 19" RACK MOUNTING
- GAIN CONTROL (SOME MODELS)

Rated power output does not include losses in option package. Consult factory for loss allowance.

GENERAL SPECIFICATIONS

Circuitry:	Solid State, except for series regulator and TWT tubes
Protection:	Time delay (filament warmup) Beam/Helix overcurrent protect Service interlocks Thermal cutout Power lines fused or circuit breakers
Controls:	Power on Standby Operate Beam/Helix current switch
Indicators:	Illuminated power controls Beam current/Helix current meter Elapsed time meter (100/200 Models)
RF Connectors:	On 10/20 watt: Wave Guide or TNC front panel mounted. On 100/200 watt: Wave Guide rear panel mounted. Type N front panel mounted.
Cooling:	Air
Input/Output Impedance:	50 ohms (nominal)
Input/Output VSWR:	< 1.3:1 (< 1.5:1 on 10 w units)
Load VSWR:	< 2.5:1
Operating Temperature:	0°C to +50°C
Storage Temperature:	−20°C to +70°C

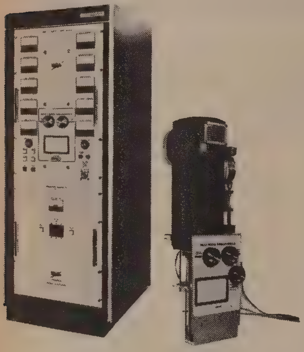
MICROWAVE SYSTEMS

1000-WATT RF, CW POWER AMPLIFIER SYSTEM 50 TO 1100 MHZ* COVERAGE IN ONE PACKAGE WITH BANDCHANGE CAVITIES

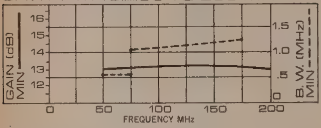
ALL UNITS STOCKED FOR IMMEDIATE SHIPMENT

- FRONT PANEL DIAL TUNING OF EACH RF CAVITY.
- FRONT PANEL DIAL VS. FREQUENCY CALIBRATION CHARTS ON EACH CAVITY.
- FRONT PANEL METERING OF PLATE, SCREEN, GRID AND FILAMENT CIRCUITS AND FORWARD AND REFLECTED POWER OF INPUT AND OUTPUT CIRCUITS.
- ELAPSED TIME INDICATOR.

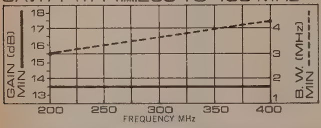
Model 10270 is the ultimate in RF power amplifier design... affording maximum utility in commercial, military and similar installations where space must be budgeted. Its modular cavity bandchange feature provides users with a high degree of flexibility, high power efficiency and extreme economy in one quality constructed package.



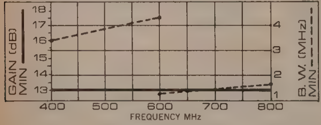
CAVITY 11143.....50 TO 200 MHz



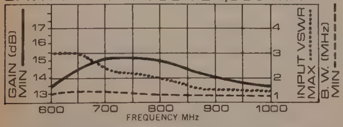
CAVITY 11144.....200 TO 400 MHz



CAVITY 11145.....400 TO 800 MHz



CAVITY *11104.....600 TO 1,000 MHz



*11104 cavity is available with a frequency range of 800 to 1100 MHz with a power output of 500 watts

FEATURES AND SPECIFICATIONS

Power output: 1.0 kilowatt*

Operation: Class B. (Other operating modes supplied upon special order.)

Maximum Input VSWR: 2:1 (3:1 from 600-800 MHz on M/N 11104 only).

Nominal Impedances: 50 ohms, input and output. Terminated in standard military connectors — Type "N" input, Type "LC" output.
Amplifier drawer assembly equipped with tilt-out sliderails to facilitate cavity changing, and servicing. Sliderails will fit any standard relay rack cabinet.
All solid state power supplies.
Filament, grid and screen supplies regulated for maximum stability.

Primary Power Requirements: 208/120 Y three-phase, four-wire 60 Hz or 240 VAC three phase, optional 208/120 VAC three-phase, four-wire 400 Hz. 50 Hz also available upon special request.

Cooling: Air is drawn in through top louver and exits through rear louver.

Dimensions (In Cabinet): 61½ High x 24 Wide x 26 Deep.

Weight (In Cabinet): 475 lbs.
Individual Cavity Weighs 40 to 75 lbs.

PROTECTIVE DEVICES

Operator:
High voltage chassis interlocks.
High voltage points shielded for safety.

Amplifier:
Excessive plate current trip-out relay.
Excessive screen current trip-out relay.
Screen voltage interlocked with plate voltage.
Screen and plate voltages interlocked with grid voltage.
Cooling failure trip-out.
Primary circuit breaker for short-circuit protection.
Time delay relay for filament warm-up.
Delayed blower turn-off cycle. (Blower continues running for 3 minutes after circuit breaker turns power off.)
VSWR protection (optional).

HOW TO ORDER

To order a complete amplifier system (in cabinet) specify model number according to frequency range desired.

Example: MODEL 10270 — 11143 (50-200 MHz)
MODEL 10270 — 11144 (200-400 MHz)
MODEL 10270 — 11145 (400-800 MHz)
MODEL 10270 — 11104 (600-1000 MHz)

To order separate, modular RF bandchange cavities specify cavity model number according to desired frequency range.

Example: CAVITY MODEL NUMBER 11045 (400 TO 800 MHz)
Cavities are equipped with tube and all accessories for band changing.

Note: System is shipped complete with cabinet as shown unless otherwise specified.

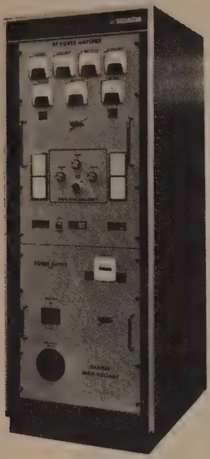
MCL INC LA GRANGE ILL

MICROWAVE SYSTEMS

500-2000-WATT KLYSTRON CW AMPLIFIER SYSTEMS

STOCKED (LESS TUBES) FOR IMMEDIATE SHIPMENT



An exclusive MCL achievement in design and development of self-contained, rack-mounted Klystron cavity amplifier-power supply systems that eliminates clutter and contributes to work area efficiency.

Suggested applications include biological research, factory test-source.
This series includes 8 individual systems, each embodying highly desirable features such as high power capability, broad frequency range. (Any of these systems can be custom modified.) Each system is engineered conservatively and quality built, affording users maximum reliability and economy.

- **RACK-MOUNTED, COMPLETELY SELF-CONTAINED**
- **1700 to 18,000 MHz COVERAGE**
- Individual front panel cavity tuning dials and dial vs frequency calibration charts.
- Front panel metering of beam voltage and current, body current, filament voltage and current, forward and reflected power of input and output circuits.
- Elapsed time indicator.
- Fault and Control Panel — indicates equipments operational status and fault status.
- Front panel high voltage control.

GENERAL FEATURES AND SPECIFICATIONS
PROTECTIVE DEVICES

Operator:
- High voltage chassis interlocks.
- High voltage points shielded for safety.

Amplifier:
- Adjustable time delay — beam voltage.
- Excessive beam current — Fault Trip.
- Excessive body current — Fault Trip.
- Low filament voltage — Fault Trip.
- Power supply — open interlock fault.
- Excessive VSWR — Fault Trip.
- Primary circuit breaker for short-circuit protection.

WEIGHT: 700 lbs.

DIMENSIONS: (IN CABINET)
61½ HIGH x 24 WIDE x 26 DEEP

- **Cooling:** Air is drawn in through rear and exits through top.
- Cooling failure trip-out.
- **Operation:** High gain, high efficiency or broad band tuning modes.
- Delayed blower turn-off cycle. (Blower continues running for at least three minutes after circuit breaker turns power off.)
- **VSWR:** 2:1, maximum — output load; 1.1:1, maximum — input circuit.
- **Nominal impedance:** 50 ohms, input and output through individual, directional couplers. Input connector — Type "N."
- Arc detection circuitry available on special order.
- Solid state high voltage supply unregulated.
- Front panel high voltage control.
- Regulated filament supply.
- **Main power requirements:** 208 Y/120, 4 wire, 60 Hz. 50 Hz operation available upon special order.

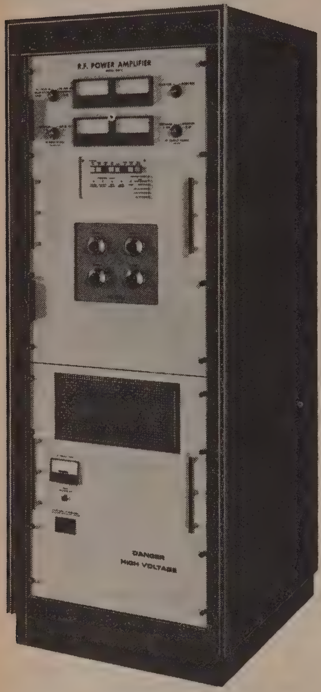
MICROWAVE SYSTEMS

HIGH POWER KLYSTRON AMPLIFIERS



This line of high Power Klystron amplifiers is designed for up-link satellite service in the tropo bands. The equipment consists of a klystron and the necessary power supplies, control-monitoring and protective circuitry to insure safe operation for equipment and personnel.

The amplifier uses Klystrons specifically designed to provide the performance in communication service. The supplies are conservatively designed to insure maximum reliability and are well regulated and filtered to minimize residual modulation.

Controls, fault indicators and meters are provided on the panel to permit ease of operation. Should a transitory fault occur the unit will automatically recycle and return to full service.

The circuitry is contained in slide out drawers or slide out shelves to permit complete maintenance from the front panel. In addition, test points are placed throughout at crucial circuit locations.

FEATURES

- Two bay configuration (some models).
- Front panel maintenance access.
- Electronic regulation of beam.
- Highly filtered supplies.

GENERAL SPECIFICATIONS

ENVIRONMENTAL

Temperature: −10°C to +50°C.

Relative Humidity: 95%.

Primary Power: 208/120 ±10%, 4 wire.

RF Connections: See Chart.

Dimensions: (45½″ w, 26¼″ d, 70″ h).

Weight: 1500 lb. (typical).

OPTIONS

- Alternate primary power.
- Harmonic output filter.
- Dummy load and switch.
- Driver amplifier to increase gain.
- Input/output switching for redundant operation.
- Channel selection remote/local (some models).
- Arc detector.

OPERATIONAL

- Automatic turn-on sequencing.
- Automatic recycling.
- Fault detection & status indicators.
    - Excessive reflected power.
    - Excessive beam current.
    - Excessive body current.
    - Insufficient filament warm-up.
    - Loss of cooling.
- High voltage chassis interlock & status indicator.
- High voltage shunting switches.

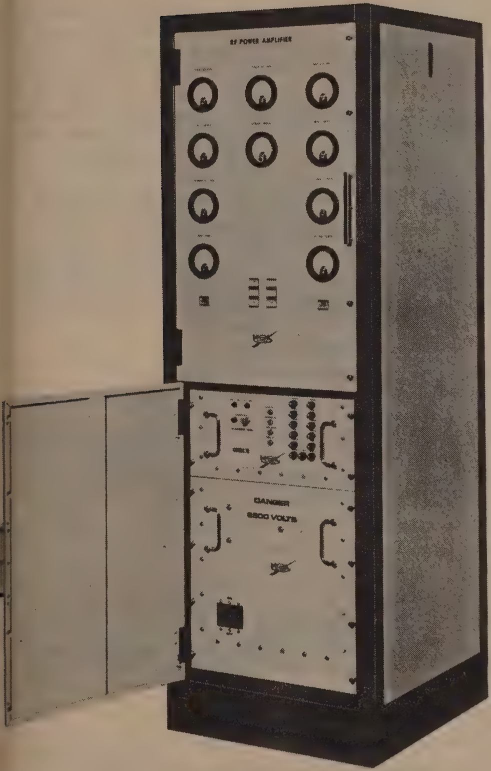
MICROWAVE SYSTEMS

COMMUNICATION AMPLIFIERS



MODEL 10581
225-400 MHZ

This line of high power amplifiers was designed specifically to fill the need for high power linear amplification to extend the communication range of existing AM transmitters. The amplifiers are also useful in Class B television or Class C FM service. The amplifiers are a complete package providing metering, safety features, and support circuitry. These versatile quality constructed units provide a simple and convenient means of obtaining increased power.

- Front panel dial tuning. Some models available with servo/local remote tuning.
- Individual front panel metering of plate, screen, grid and filament circuits, plus input, and output, RF power, forward and reflected.
- Elapsed time indicator.

PROTECTIVE DEVICES

Operator:

High voltage chassis interlocks.
High voltage points shielded for safety

Amplifier:

Excessive plate current trip-out relay.
Excessive screen current trip-out relay.
Screen voltage interlocked with plate voltage.
Screen and plate voltages interlocked with grid voltage.
Cooling failure trip-out.
Primary circuit breaker for short-circuit protection.
Time delay relay for filament warm-up.
Delayed blower turn-off cycle. (Blower continues running for 3 minutes after circuit breaker turns power off.)

OPTIONS:

The following items are available as options on most models:

Automatic tuning
Harmonic Filters
Antenna Transfer Relay and Control
Antenna tuner
Dummy load
VSWR fault trip circuit

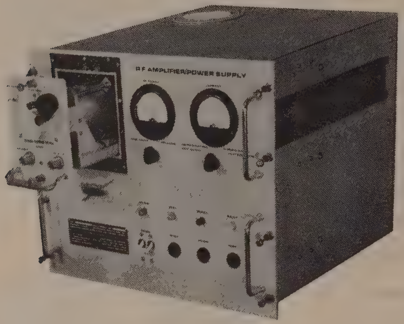
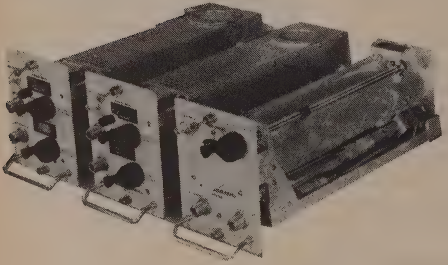
MICROWAVE SYSTEMS

200 WATT CW AMPLIFIER
MODEL 10358
PLUG-IN—10 TO 1000 MEGAHERTZ





Frequency MHz	Gain db (Min.)	Bandwidth at 3.0 db	Plug-In Cavity Drawer Nos.
10-50	11	.2- .9 MHz	10359
50-200	11	.5-1.9 MHz	10363
200-500	13	1.0-1.8 MHz	10364
500-1000	9	4.0-8.0 MHz	10365
3 Head Storage Drawer			10362

The 10358 is a versatile amplifier system which offers the user a high degree of flexibility. The choice of five plug-in amplifier cavities provides continuous frequency coverage from 10 MHz to 1000 MHz. The amplifier can be used to drive higher power amplifiers or as a final amplifier driven by a lower power source. The equipment is available in a commercial version or a military version under FSN 4931 - 130 - 5378.

GENERAL FEATURES AND SPECIFICATIONS

Power Output: 200 Watts (cavity 10365 100W)

Operation: Class C

Maximum Input VSWR: 2:1

Nominal Impedances: 50 ohm input and output terminated in standard type "N" connectors.

RFI: Shielded to meet MIL STD 461.

Solid State: Solid state except for amplifier tube.

Regulation: Filament, grid screen supply regulated for maximum stability.

Mounting: Designed for 19″ relay rack mounting or bench top use.

Input Power Requirements: 105/125 VAC, 50/60 Hz or 220 VAC, 50/60 Hz optional.

Dimensions: $15\frac{23}{32}$″ H x 19″ W x 18″ D.

Weight: 225 lbs. with cavity amplifier.

Cooling: Forced air.

Protective Devices:

Operator: High voltage chassis interlocks.

Amplifier: Sequential turn-on control; cooling failure trip-out; primary power circuit breakers.

ADDITIONAL FEATURES

- Front panel dial tuning of each plug in head.
- Front panel metering of plate and screen currents.
- Front panel metering of forward and reflected power of input and output circuits.
- Direct dial frequency read out.

19″ rack mounting storage drawer available for storage of any three of the above plug-in cavities.

Size: 7″ High x 19″ Wide x 20″ Deep.

ORDERING INFORMATION

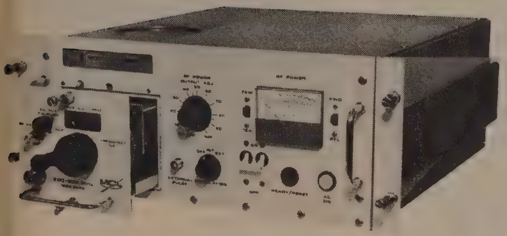
Complete amplifier system — specify model number 10358 which designates the main frame. Each head desired to be specified by model number indicated in chart ie, 10 - 50 MHz Model 10359, etc. Specify desired input voltage.

MCL INC LA GRANGE ILL

MICROWAVE SYSTEMS

MODEL 15022
65 WATT 10 TO 2,500 MHZ CW SIGNAL GENERATOR

ALL UNITS STOCKED FOR IMMEDIATE SHIPMENT

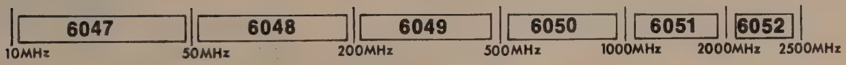


The Model 15022 is a compact high power signal generator which is completely solid state except for the long life vacuum tube used in the cavity oscillator. This highly reliable generator covers the 10 to 2500 MHz band with six plug-in cavity oscillator heads. A version which meets or exceeds MIL-STD-462 (RFI) and MIL-STD-810 (environmental) is widely used by the military in calibration laboratories and has been assigned a Federal Stock Number which is FSN 4931-152-1774 (MCL Model Number 15009).

This modern generator design provides the convenience of one knob frequency tuning which will permit frequency settings within ±1%, and front panel metering is provided to read forward or reflected power. Additional features include internal or external amplitude and pulse modulation. AM modulation is variable from 0 to 90%, 150 Hz to 10 KHz with an external source of 18 V across 16 Ohms. Amplitude level adjustment and a decoupled RF output sample port are also provided.

Regulated power supplies, conservative design, all solid-state (except oscillator) provides reliability and stability. Frequency stability of ±.003% after 10 minutes and power stability of ±.2db after one hour are minimum performance characteristics.

Plug-in cavity oscillator is protected against mismatch or loss of load. Other protection includes time delay sequenced turn-on and turn-off to insure adequate filament heating and adequate cooling at shut-down. These features make the 15022 an ideal laboratory tool.



DESCRIPTION

	Power Output	Model Number
10-50 MHz plug-in Oscillator	65 watts *	6047
50-200 MHz plug-in Oscillator	65 watts *	6048
200-500 MHz plug-in Oscillator	65 watts *	6049
500-1000 MHz plug-in Oscillator	65 watts *	6050
1000-2000 MHz plug-in Oscillator	45 watts *	6051
2000-2500 MHz plug-in Oscillator	35 watts *	6052

*Power Output is adjustable down to 50 MW.

ACCESSORIES

Rack mount storage drawer which accommodates three plug-in heads. Specify storage drawer model #15026.

Need rack and slide mounting?? Please **specify!** All units are shipped **without** 19″ panel adaptors and slides unless specified.

GENERAL SPECIFICATIONS

• Weight	Less than 50 pounds, without plug-in head.
• Dimensions	16½″ W. x 7″ H. x 18″ D. (19″ W. with panel adaptors)
• Output Impedance	50 ohms
• Primary Power	115 volts ±10V, 5 amps, 50/60 Hz 220V 50 Hz, specify M/N 15055
• Spurious Output	>30 db down (20-2500 MHz) >25 db down (10-20 MHz)
• RF Sample Output	30 db down

ORDERING INFORMATION

Models #15022 indicates mainframe (generator less plug-in head). Please specify model number according to frequency range. Example: 15022-6047 (10-50 MHz).

PULSE SYSTEMS

MCL has designed a number of high power pulse systems for special applications. The systems listed are but a few of the many designed and have been selected since they typify the broad capability of MCL. These equipments are complete assemblies and include the necessary power supplies, protective circuits and control circuitry to provide turn-key operation. The applications vary from ground and airborne radar to laboratory test instrumentation.

The capability and expertise represented by this array of systems are available to solve your system problems.

MICROWAVE SYSTEMS

SERIES 10299C HIGH POWER PULSE MODULATORS

This versatile instrument offers virtually unlimited usage in laboratory or field. It is designed as a companion unit to MCL's popular Series "E" pulsed oscillators. Also interfaces readily with other plate pulsed oscillator cavities, beacon type magnetrons, experimental laser circuitry and low power microwave tubes.

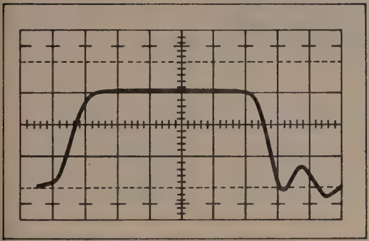
SYNC OUT



Output Load: 1,000 ohms, paralleled by 100 Pf capacitor.

Note: Series 10299C pulse modulators are available as integral units with MCL Series "E" RF Power Oscillator test instruments.

Designed to fulfill the diversified and sophisticated demands of contemporary test equipment users, this unit embodies many "look ahead" features:

- Selection of three standard voltage ranges and accompanying sets of parameters:
- Duty cycle readout: .001 to .008, with 3.0% accuracy.
- Overload cut-off: adjustable from .001 to .01, via front panel. Protects external equipment from damage.

FEATURES AND SPECIFICATIONS

- Max. duty cycle at max. output .0075.
- Output pulse polarity: positive or negative.
- Internal or external triggering. (External: +2.0 V into 75 ohms.)
- Input power: 115 VAC, 50/60 Hz @ 300 watts.
- Conservative dimensions: 14" L x 8½" H x 11" W, permit ready usage on lab bench or in crowded areas.
- Built-in, floating, 6.3 VAC, 3.0 ampere filament supply for external tubes and tube cavity combinations.
- Weight: 35 pounds, approx.

Model No.	Adjustable Output Voltages	Peak Output Current	Rise Time	Fall Time	Droop @ 10 μsec Pulse Width	Overshoot at Full Rated Output
16072	0-1.5 KV	6.0 amp.	170 NS	200 NS	8.0%	12%
16073	0-3.0 KV	3.0 amp.	170 NS	200 NS	8.0%	10%
16074	0-6.0 KV	1.5 amp.	400 NS	400 NS	8.0%	8.0%

- Pulse repetition rate: adjustable, 100 Hz to 10 kHz, via front panel step switch and vernier control.
- Pulse width: adjustable, 0.5 to 10 microseconds, via front panel step switch and vernier control. Switch accuracy, 2.0%.

EXTENDED RANGE PULSE CAVITIES

Coverage: 150 to 4000 MHz (VHF, P. L. S. and C Bands) Extended tuning ranges combined with overall frequency coverage and power output make these cavities readily applicable to a broad variety of industrial, military and scientific requirements.

Frequency Range MHz	Minimum Power Output KW	Dimensions	Model Number
200-400 (P Band)	1.5	3" dia. x 22" L.	8021
250-500 (P Band)	1.5	3" dia. x 22" L.	8026
300-600 (L Band)	1.5	3" dia. x 22" L.	8018
400-800 (L Band)	1.5	3" dia. x 17" L.	8022
500-1000 (L Band)	1.5	3" dia. x 17" L.	8024
600-1200 (L Band)	1.0	2¼" dia. x 15" L.	8019
1000-1500 (L Band)	1.0	3" dia. x 22" L.	8028
1450-2000 (S Band)	1.0	3" dia. x 19½" L.	8029
2000-3000 (S Band)	1.0	2¼" dia. x 17¾" L.	8027
3000-4000 (C Band)	1.0	2¼" dia. x 15" L.	8030

MODEL 8026
250-500 MHZ

FEATURES

- Direct Dial Readout
- Single Knob Tuning (typ.)
- Output impedance: 50 ohms, nom.
- Forced air cooling not required
- Ease of Tube Replacement

DUTY CYCLE: .001

PULSE WIDTH: 1.0 μsec

MODULATOR REQUIREMENTS: 3.0 KV @ 3.0 amperes max. Internal impedance: 600 ohms.

POWER VARIATION: 2.0 db, max.

ANODE TO GROUND CAPACITANCE: 150 Pf, max.

MICROWAVE SYSTEMS

MODEL 10461 PULSE GENERATOR

FIVE KILOWATT PULSE GENERATOR

The Model 10461 Pulse Generator is continuously tunable from 900 to 1220 MHz which is the Tacan Band. The generator is extremely useful as a Tacan test set. Peak power output is five kilowatts at .01 duty cycle. Pulse width and pulse repetition rates are adjustable.

The instrument is complete with power supplies, grid pulse modulator, cavity oscillator, cooling, output circulator, and protective circuitry.

The power output is adjustable from 50 watts to 5.0 kilowatts. A three digit numerical read-out with calibration chart provides accurate frequency setting.

The 10461 is a solid state instrument except for the planar triode oscillator. An output circulator is provided to minimize frequency pulling and power variations due to load mismatch; operation into open or short circuit conditions will not damage the equipment.

SPECIFICATIONS

Frequency:	900-1220 MHz tunable	Weight:	85 pounds
Power Output:	50 W - 5.0 KW adjustable	Primary Power:	110 or 220 volts* 50-60 Hz
Duty Cycle:	.01 maximum	Frequency Stability:	0.1%/hour after 15 minutes operation
Pulse Width:	0.5 - 10.0 microseconds adjustable	Power Stability:	0.02%/10 minutes after 1 hour operation
Pulse Repetition Rate:	10 - 4000 Hz adjustable	Sync Output:	±4 volts at 50 ohms
Pulse Rise Time:	100 nanoseconds maximum	Trigger Input:	+4 volts. High impedance
Pulse Fall Time:	100 nanoseconds maximum	Pulse Droop:	<5.0%
Maximum Load VSWR:	Open or short circuit (circulator protected)		
Dimensions:	19" rack panel, 10½" high x 20¼" deep	*Specify Desired Voltage

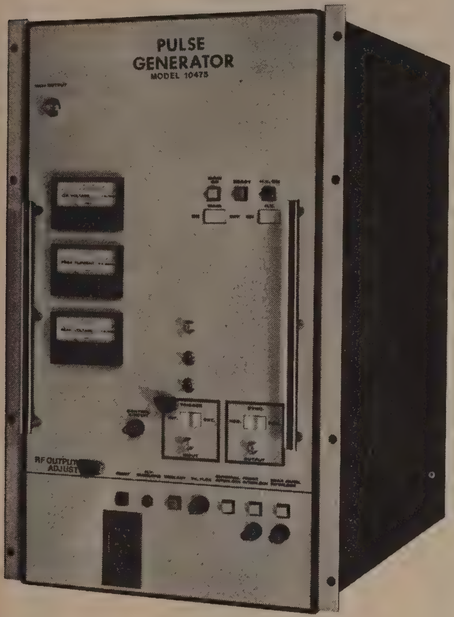
MICROWAVE SYSTEMS

HIGH POWER LONG PULSE MODULATOR



Designed to fulfill the need for a high power long pulse modulator in laboratory or field. The unit interfaces readily with plate pulsed oscillator cavities or other microwave tubes.

GENERAL FEATURES

- Integral floating filament supply, adjustable voltage @ 4A.
- Turn-on sequencing circuitry.
- T^2L compatible sync input and output.
- Fully protected.

CW OSCILLATORS

The CW Oscillator cavities designed by MCL cover a very wide range of frequencies, power levels and applications, and have been used by OEM in industrial and military applications ranging from oil exploration to aircraft altimeters. The listings below though not complete, typify the broad expanse of MCL's experience in CW Oscillator design and manufacture. If your exact requirements cannot be met using a listed cavity, call us for assistance.

COMPONENTS CAVITIES

PULSE OSCILLATORS

The listed models are MCL standards, produced to satisfy the demanding needs of the original equipment manufacturer engaged in producing industrial or military equipment. These reliable, rugged cavities have been used in missiles, helicopters, ships and mobile applications. If your cavity needs are not listed here, minor modifications to existing units or custom design by MCL could make your requirements a reality.

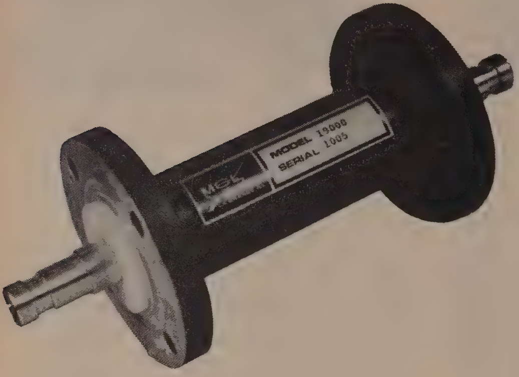
COMPONENTS-FILTERS

FILTERS COAXIAL LOW PASS



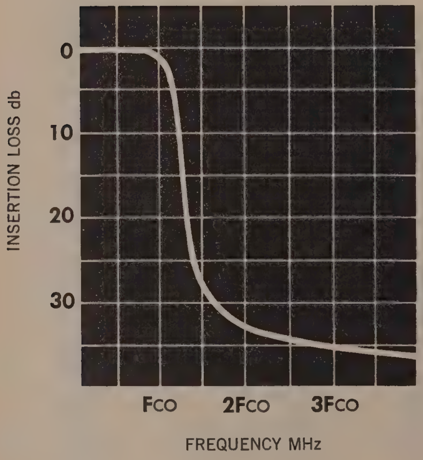
FREQUENCY RANGE FROM 200-2000 HZ

MCL Low Pass Filters are designed for cut off at a specific frequency (see table). The cut off curve is relatively steep and is sufficient for most applications; however, additional filter sections can be employed to increase the offband attenuation. For special applications, MCL's capability includes custom filter designs on a quick reaction basis.

All MCL Low Pass Filters employ conservative design techniques and are suitable for military applications. The body is constructed of 1⅝" rigid coaxial air line with silverplate finish.

TYPICAL SPECIFICATIONS

Max. VSWR (Passband): 1.4:1.
Max. Insertion Loss (Passband): .3 db.
Impedance: 50 ohms.
Power Rating, CW: 3 KW.
Power Rating, Peak: 50 KW.
Finish: Silverplate.
Flanges: LC and EIA RS-225.



Model Number		Cut Off Frequency MHz	Insertion Loss @ 1.25 Fco	Insertion Loss @ 1.5 Fco —6.0 Fco	Length Inches

MCL INC LA GRANGE ILL.

CAPABILITIES/APPLICATION

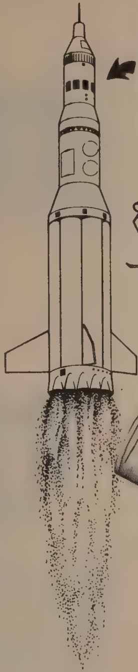
CAPABILITIES

MCL has been in the business of providing microwave cavities and high power amplifier systems to the electronics industry for over a decade. In an effort to prevent dilution of technical strength, the company has limited its product lines to cavities, cavity related systems and R.F. accessories. This intense concentration in a limited area has created a pool of technical excellence without peer.

The competence and imagination of MCL engineering has been tested repeatedly by the electronic industry, and MCL has successfully answered the call, delivering in excess of 400 different cavity designs and over 300 unique systems and subsystems.

MCL products are in use throughout the world performing a myriad of tasks that stagger the imagination. MCL cavities are used to provide pin-point accuracy for offshore drilling operations, to test the electromagnetic susceptibility of heart pacemakers, to maintain control of weather satellites, to determine the altitude of commercial and military aircraft, and many other operations. Our equipment has been used to communicate with the Apollo capsule and will be used on the Sky Lab program. Some of our equipment has gone into space on unmanned space probes. Be it satellite, ground, ship or shore, plane, helicopter, or missile MCL has built equipment to operate in the environment. We cover the field from cavities three inches long delivering 10 milliwatts to cavities four feet long delivering 100 plus kilowatts.

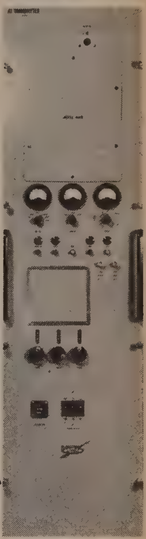
This experience can be applied to your microwave requirements by considering MCL a part of your design/development team.

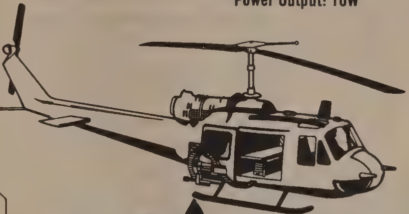


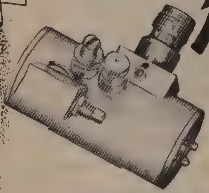
S-BAND RF AMPLIFIER

Freq.: 2101.80 MHz
Power Output: 10W

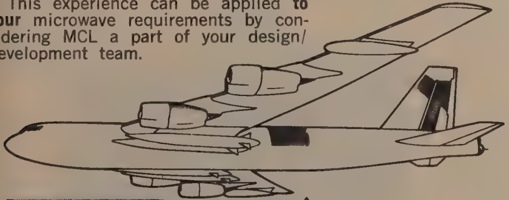
Freq.: 960 - 1200 MHz
Power Output: 10 KW

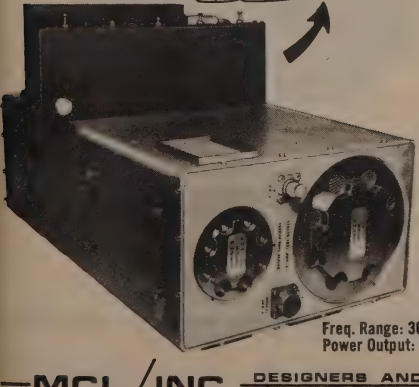




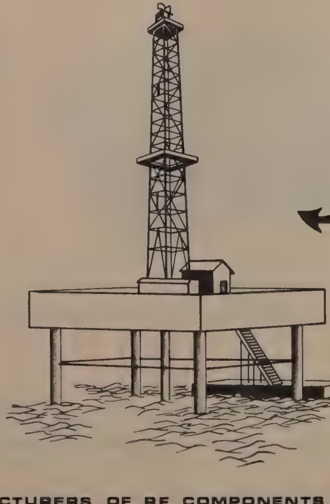


Freq.: 4300 MHz
Power Output: 250 W





Freq. Range: 360-480 MHz
Power Output: 1.5 KW



Freq.: 230 MHz
Power Output: 15 KW

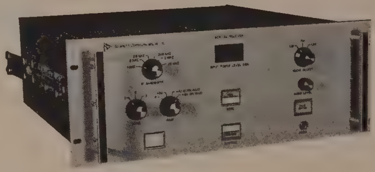
SURVEILLANCE RECEIVERS

Scientific Communications has developed a full line of solid state microwave surveillance receivers. Current production models cover the frequency range from 5 KHz thru 40 GHz. Equipment available varies from fixed frequency down converters to complete digital controlled receiver systems offering simultaneous multi-band panoramic reception. All receiver models combine state-of-the-art performance with high reliability. Reliability and performance are enhanced through careful component selection and the wide use of standard modules and circuits. Modular construction is used wherever possible to optimize maintainability. Special features include computer compatibility, remote tuner capability and linear IFM processing, a technique pioneered by SCI to facilitate signal identification and analysis. SCI offers a demonstrated ability to respond quickly in designing and manufacturing custom equipment. Previously delivered models have ranged from standard commercial units to receivers tested and qualified to MIL-E-16400. The cost effectiveness and customer acceptance of SCI produced equipment has earned the company an excellent reputation in the field of microwave receivers.

RT SERIES REMOTE TUNERS
0.1 GHz to 40 GHz



SCR-25C COMPUTER CONTROLLED SURVEILLANCE FROM 5 KHz TO 1000 MHz

SCR-1200A SIMULTANEOUS PANORAMIC RECEPTION USING REMOTE TUNERS FROM .5 - 40 GHz

PARAMETRIC AMPLIFIERS

SR 395 PARAMETRIC AMPLIFIER
Scientific Communications, Inc.
GARLAND, TEXAS

SCI has delivered parametric amplifiers all over the world for use in radar, telemetry, radio astronomy and satellite communications. Cryogenic or uncooled models are available from below 400 MHz to above 30 GHz. In addition to the many standard models available, SCI can design and manufacture amplifiers for any application. S-BAND RADAR TRANSPONDER

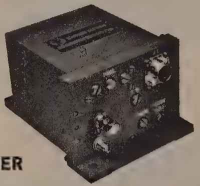
MODEL 312-S

Freq: 2775-3000 MHz; **Receiver Type:** Superhet with sensitivity of −70 dbm; **Transmitter Type:** Triode cavity with 300 w min. peak power output; **Input Power:** 22 to 32 VDC; **Size:** 50 cu. in.; **Weight:** 47 oz.; **Temp:** −55°C to +75°C; **Altitude:** 230,000 ft.; **Humidity:** 100%; **Shock:** 125 g in any direction, 3 shocks in opposite directions along each axis for 6 μsec each; **Acceleration:** 125 g applied along any axis for 3 minutes; **RF1:** Per MIL-1-26600. **Vibration:** Sinusoidal, 5 to 25 Hz, 0.4 in. DA and 15 g 15 to 2500 Hz.

C-BAND RADAR TRANSPONDER

MODEL 302C-2

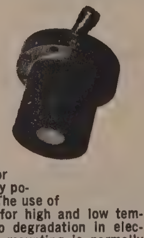
Freq: 5.4-5.9 GHz; **Receiver Type:** Superhet with sensitivity of −70 dbm; **Transmitter Type:** Magnetron with 400 w min. peak power output; **Input Power:** 22 to 32 VDC; **Size:** 43 cu. in.; **Weight:** 43 oz.; **Temp:** −35°C to +75°C; **Altitude:** 230,000 ft.; **Humidity:** 100%; **Shock:** 125 g in any direction, 3 shocks in opposite directions along each axis for 6 μsec. each; **Acceleration:** 125 g applied along any axis for 3 minutes; **RF1:** Per MIL-1-26600. **Vibration:** Sinusoidal, 5 to 25 Hz 0.4 in. DA and 15 g 15 to 2500 Hz.



C-BAND RADAR TRANSPONDER

MODEL 321C

Freq: 5400-5900 MHz; **Receiver Type:** Superhet with sensitivity of −70 dbm, 100% firing; **Transmitter Type:** Triode Cavity with 300 w min. peak power output; **Input Power:** 24 to 32 VDC, 45 w; **Size:** 38 cu. in.; **Weight:** 44 oz.; **Temp:** −37°C to +75°C; **Altitude:** 230,000 ft.; **Acceleration:** 125 g; **Shock:** 125 g; **Vibration:** Sinusoidal, 5 to 25 Hz, 0.4 DA. 25 to 2500 Hz, 15 g; **RF1:** Per MIL-1-26600.



CAVITY BACKED HELIX ANTENNAS

MODELS 815S, 820C and 830X — C, S, and X BAND

An optical quartz-loaded, cavity backed helix radiator which produces a circularly polarized radiation pattern. The use of quartz material provides for high and low temperature stability with no degradation in electrical performance. Flush mounting is normally used on reentry vehicles with no performance deterioration as a result of reentry heat.

X-BAND RADAR TRANSPONDER

VEGA'S MODEL 229X

Miniature all solid-state radar transponder is smaller than a king size pack of cigarettes; weighs only 10 oz. This X-Band (9.1-9.6 GHz) unit employs the latest state-of-the-art solid-state devices and construction techniques, and features high sensitivity (−40 dBm full-firing) with average power output of 4 watts peak. It operates with an input voltage from 24 to 32 VDC and draws only 60 milliamperes quiescent or 80 milliamperes at a PRF of 2500 PPS. Uses single or double pulse codes and operates with practically all X-Band airborne, ship and ground radars in use today without any change to the radar. A circularly polarized antenna is attached to the top of the unit. Optional battery pack available. Also available in C-Band (5.4-5.9 GHz).

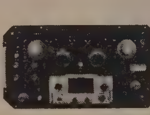
C, S AND X-BAND STUB ANTENNAS

MODELS 832S, 845CX

A vertically polarized omnidirectional antenna enclosed within a radome, it is compact and extremely lightweight while maintaining the electrical and environmental characteristics of this type antenna. Height of the radome is approximately ¾″; diameter is approximately 1″. The skin of the vehicle serves as the ground plane for the antenna due to the simplified mounting technique. Mounting is accomplished via a "D" hole (.505 dia. x .480 flat) through the vehicle skin. It is then secured to the vehicle with a locking nut.

RADAR SIMULATORS

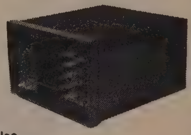
C-BAND
X-BAND
S-BAND



The 616C, 617X, and 627S Series are designed to interrogate and measure parameters of radar transponders or beacons during final checkout on a launch pad or flight line. They are particularly useful when tracking radars are located at great distances from launch sites. Transmitters and receivers are calibrated and controllable from the front panel in tuned frequency, output power, code spacing and sensitivity. Built-in oscilloscopes are hooded for daylight viewing. A resonant stubhorn antenna is standard. The internal battery supply includes a self-contained charging circuit. Telescoping legs are optional.

HORN ANTENNA TYPES

The Model 844X-2 Flared Horn Antenna was developed for use in target drone applications. Radiation coverage is controlled to the desired beamwidths by the flared aperture. A colinear type feed is employed to couple energy from the TNC input connector into the waveguide. Construction utilizes standard aluminum waveguide parts dip-brazed together. The radome is epoxied in position over the aperture. Flared horn antennae of this type are available in other frequency bands utilizing the same design.



DIGITAL CODE GENERATOR

MODEL 766

Generates extremely accurate pulse stream for pulse position code simulation. Pulse stream starts with a sync pulse followed by five data pulses. Each data pulse is independently adjustable for both delay from the sync pulse and for pulse width. Delay adjustable from 0.0 to 999.9 microseconds in 0.1 microsecond steps. Width is continuously adjustable from 0.1 to 1.0 microseconds. Operates from 115 VAC, 50 to 400 Hz. Outputs are TTL positive logic terminated in 50 ohms.

POWER DIVIDERS

Vega produces an assortment of power dividers with two, three or four-way division in addition to a variable power divider. Choice of input connectors (TNC or SMA) is offered in most models. All designs are well engineered and provide low VSWR, low insertion loss, and balanced power division with high power capabilities. Some designs are qualified for missile and satellite use. Frequency ranges extend through X-Band with stripline and coaxial devices.

Vega's antenna and microwave engineering staff specialize in the design and development of aircraft, space and missile components. Among our designs are units intended for RPV control. A single basic system can be used to control virtually any vehicle. Our laboratory utilizes the latest in equipment and suitable antenna test ranges are maintained. Some of the more popular available components are shown above.

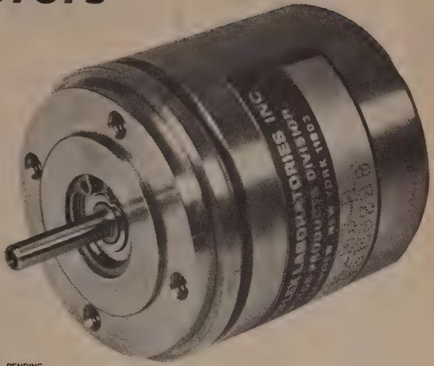
New brushless D.C. Motors from AEROFLEX

- LONG LIFE
- HIGH RELIABILITY
- HIGH STARTING TORQUE
- HIGH EFFICIENCY
- LOW EMI
- LOW ACOUSTIC NOISE



PATENT PENDING

Aeroflex Laboratories new line of brushless DC motors combine modern solid-state sensing and switching techniques with proven motor technology. The non-contacting rotor position sensors are speed independant and do not employ LED or RF techniques. The size, performance, and efficiency of these motors are comparable to brush type motors, **without** the problems inherent in brushes.

Aeroflex brushless DC motors have the high starting torque and linear speed/torque characteristics of conventional, permanent magnet, DC motors. The solid-state commutation circuitry is available with integral speed regulation, to meet custom requirements.

The motor can be supplied for operation from a fixed polarity voltage and rotation in either direction, or with the direction of rotation reversing with reverse polarity voltage.

Fan and blower motor applications can benefit by the higher reliability of the Aeroflex brushless DC motors. In addition, these motors may be used in AC blower applications without the rotational speed/line frequency limitations of AC motors.

In instrumentation and control applications, their reliability and long life can significantly enhance total system performance. They are compatible with pulse modulation and pulsed variable rep-rate types of servo control techniques.

Contact Aeroflex Motor Applications Engineering for assistance.

TYPICAL PERFORMANCE DATA

NOTES:

1. Designed to meet military and industrial specifications.
2. Available with speed regulation to ±1% for variations in load torque and supply voltage.
3. Shaft details as requested.
4. Synchro type mounting optional.
5. Excitation voltage-standard ratings available.
6. Peak torque ratings approx. 40% above continuous value.
7. Efficiency up to 75%.
8. Consult our engineering staff for other ratings.

Full Rotation *brushless* D.C. Torque Motors

A torque delivery system designed to achieve maximum power efficiency within a minimum of space, weight and power. It consists of a permanent magnet brushless DC torquer mechanically coupled with a brushless resolver.

For Commercial/Industrial Applications

Ask Aeroflex about the **Valueline**-Brushless, Wide Angle, Direct Drive Low Cost, DC Torque Motors.

Available in a great variety of sizes and outputs, Valueline offers thes designer benefits: • No gear trains required • System simplificatio • Precise positioning • Smooth, quiet output • Unlimited life

MOTOR PRODUCTS DIVISION

AEROFLEX LABORATORIES INC.

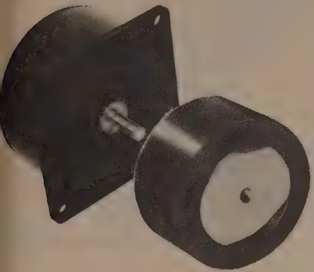
AEROFLEX

AEROFLEX VALUELINE brushless D.C. Torquers



for the commercial/industrial user

A quality counterpart of the mil-spec Aeroflex Brushless DC Torque Motor, Valueline offers the value-engineered alternative to motor-gearhead combinations. A low cost line that comes in a variety of sizes and outputs, its direct-drive design provides for compact, space-saving packaging and simplified installation. Performance benefits include:

FEATURES:

- High torque/power ratio
- Rapid acceleration at low speed
- Smooth, quiet output
- Precise positioning
- Excellent linearity
- Wide dynamic range
- Unlimited service life.

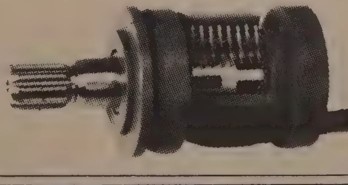
ENCODERS A wide variety of encoders is available: T / B, BCD, Gray, etc. Special encoders may equire nominal tooling charges. Encoders can be supplied with uilt-in logic circuitry. Sizes: 3-33.



SWITCHES When close accuracy, repeatability and size are important, specify Airflyte rotary switches for timing and positioning applications. Successfully replaces snap action switches and cams. Pre-set to eliminate installation time. Zero hysteresis.

hysteresis synchronous motors

AVAILABLE IN SINGLE SPEED, DUAL AND MULTIPLE SPEEDS, Ashland Hysteresis Synchronous motors are of the highest quality and are designed and manufactured for many years of trouble free operation.

Our type of construction provides rigidity for accurate bearing alignment and close air gap maintenance, so necessary in obtaining quiet and efficient motor operation.

Noise and vibration have been eliminated. Peripheral equipment manufacturers using our motors have been able to greatly reduce their wow and flutter levels.

Ashland Hysteresis Synchronous motors can be supplied in numerous speeds, frequencies and voltages. The following pages supply specifications on only a few of our many designs.

AEP MOTORS

IN PHASE WITH INDUSTRY

torque motors

CAPACITOR START AND RUN. Ashland Torque Motors have met with a great deal of success in military as well as commercial applications. They are presently being used in Tape Recorders, Servo, and Positioning applications and when required, are capable of being locked on the line indefinitely without overheating.

Our high quality of design enables us to produce a motor with an extremely low external flux field, a minimum of hum and less than 1% variation in torque when the rotor is allowed to rotate from zero to 10 RPM at rated voltage.

AEP MOTORS

IN PHASE WITH INDUSTRY

induction motors

60 Hz-400 Hz-VARIABLE FREQUENCY. 1-2 or 3 Phase Designed for Your Specific Application. Ashland Electric manufacturers a wide range of induction motors, either self-cooled or totally enclosed, motors for a wide variety of fan, blowers and instrumentation drives are our specialty. All temperature grades of insulation are available as required up to Class H to meet your specific ambient conditions.

AEP military type models are designed to meet all existing specifications for shock, vibration, humidity and environmental conditions.

AEP Induction Motors are designed for efficiency, and manufactured to close tolerances, assuring a low temperature rise, and longer bearing life with minimumum noise and vibration.

A complete line of DC motors to continue Ashland's twenty-three year reputation for quality and performance. Available in series, split series, shunt and compound wound designs. The split series operates on half wave rectified AC as supplied by thyratron or silicon controlled rectifiers for economical control and fast reversal.

Applications

1. Where control of RPM and torque are required as in Bi-Directional speed controlled systems in data handling transports.
2. Tension maintaining devices such as in winding of plastic films, fibers or yarns.
3. Conventional motor uses and where high starting or running torque is required.

Design Features

- Maximum brush life through minimum current density
- Dynamically balanced armatures
- Electric motor quality bearings selected and lubricated for maximum life.
- Insulation grades available class A-through class H.
- Stainless steel shafting
- Brake mounting provisions
- High torque to inertia ratio for plugging applications.
- Provision for external cooling if required
- Voltage range 12 to 120 VDC
- HP range 1/100 to 1 HP
- Size commensurate with requirements

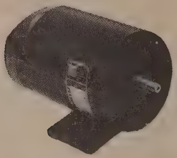
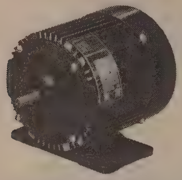
BODINE

fhp motors— gearmotors & speed controls

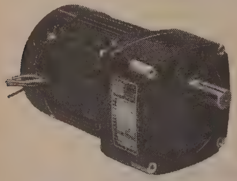


42A Permanent Magnet Motor Line: Standard TENV ratings are ⅛, ⅙, and ¼ Hp at 2500 Rpm. Only 4.3″ in diameter. Available with NEMA Type C face mounting shields.

42A-E Permanent Magnet Parallel Shaft Gearmotor Line: Torques thru 350 Lb-in. Ratios thru 300:1. Helical steel gearing. High overhung and thrust load capabilities.

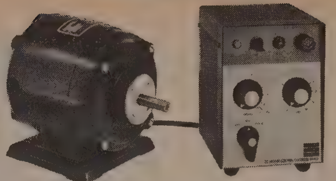


42R Induction Motor Line: TEFC ratings from 1/20 thru ¼ Hp. All A-C winding types. Options include capacitor mountings, overload protectors, and special wiring provisions.

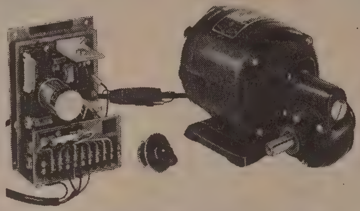


42R-E Induction Parallel Shaft Gearmotor Line: Torques thru 350 Lb-in. Ratios thru 300:1. Helical steel gearing. High overhung and thrust load capabilities.

Torque Motors: Selected K-2 and N-line motors for holding, positioning, and winding applications. Intermittent and continuous duty. Standard ratings from 7 thru 92 Oz-In.

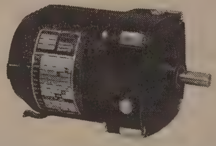


Encased Speed Controls: Nine models are stocked. Several with extended speed range or adjustable torque control.



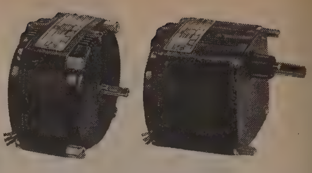
Chassis Speed Control Kits: Four models stocked. Unlimited adaptability. Adjustable torque control available. Permits maximum performance with matched Bodine drives.

N-Line Motors: Three basic sizes; 3.36″, 4.50″ and 5.68″ in diameter. Stock ratings from 1/125 thru ¼ Hp. All popular windings are available.

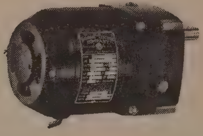


N-1S Gearmotors: Special purpose gearmotors for applications not requiring the ruggedness of the N-1D. Parallel in-line shaft. Only 3.41″ square. 100 lot minimum order.

K-4 Motors: Special purpose motors for high volume applications. Standard ratings from 1/60 thru 1/20 Hp. Only 2.88″ square. 500 lot minimum order upon application approval.

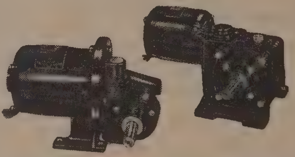


K-2 Line Motors and Gearmotors: Permanent-split capacitor instrument designs. Normal slip, high slip, and synchronous windings. Gearmotor torques thru 120 Oz-in. Only 2.405″ square.

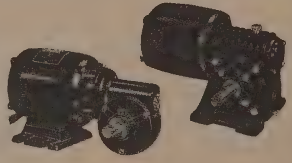


N-1D Gearmotors: Parallel shaft helical and spur gearing. Ratings thru 40 Lb-in. Ratios thru 900:1. Only 3.41″ square.

N-1R Gearmotors: Single and double reduction right angle worm gearmotors. Stock ratings thru 5 Lb-in. Many ratios available for a wide range of speed selection.



Double Reduction Right Angle Worm Gearmotors: Provide high torques at low speeds. Stock ratings over 200 Lb-in. Ample reserves for overloads.



Single Reduction Right Angle Worm Gearmotors: 6 frame sizes with stock ratings over 200 Lb-in. Ratios thru 60:1. Ample reserves for overloads.

There are more than 3,500 standards in the Bodine line. From 1/2000 thru ¼ Hp. Torques from 0.3 Oz-in. thru 350 Lb-in. Custom or specials? Yes . . . designed and built for your needs and available in small quantities, too. Over 340 STOCK motors, gearmotors, and speed/torque controls are available off-the-shelf from Bodine distributors. Call 312-478-3515 . . . or write for Catalog S: Bodine Electric Co., 2542 W. Bradley Place, Chicago, Illinois 60618.

New PM drive systems

From the people at Bodine ...and Bodine Distributors

PM Controls *– Encased type.*

42D Control Gearmotors
Torques through 350 Lb-in.

42D Control Motors
Standard continuous duty ratings – 1/8 through 1/4 Hp at 2500 Rpm.

PM Controls *– Chassis type.*

New Type DPM permanent magnet SCR adjustable speed/torque drive systems designed and built for a wide variety of demanding applications. Available from stock.

Built for rugged, long term use—controls feature new circuitry with an unusually wide degree of engineering flexibility for end-use convenience. Chassis type controls can be adapted into virtually any type of sub-system.

Our proven single source systems approach—Bodine designs and manufactures both the control and drive units. The result is perfect matching. DPM controls are perfectly matched with 42D control motors and gearmotors providing performance and reliability often found only in more complex and costlier systems. Get the facts on Bodine DPM control systems.

DESCRIPTION

Rapid-Syn Drivers are solid state pulse-to-step converters capable of providing bi-directional operation of the stepping motor.

All Rapid-Syn Drivers listed, except Model M2301F, are designed to drive 3 Phase and 4 Phase motors regardless of type or step angle of the motor. Model M2301F is a bi-polar driver designed for 4 Phase PM motors.

All models require 2.4 to 30 volts positive going pulse with a minimum pulse width of 20 micro-seconds (TTL compatable). For rated input voltage and maximum current rating of various models, refer to table.

GENERAL SPECIFICATIONS

Operating Temperature Range: 0°C to 60°C
Input Impedance: 3KΩ Minimum
Switching Capability: 10K PPS Minimum

RAPID SYN
STEPPING MOTORS AND CONTROLS

INCREASE PRODUCT RELIABILITY—REDUCE COSTS!

Choose Steppers and Controls from the broad, flexible line of Computer Devices Corporation, and be assured of top quality at prices you can live with. Check our widest range of step angles in 2, 3, 4 and 5 phase units—all designed to operate from a wide variety of solid state logics which are stock items. Also available, RAPID SYN Synchronous 72, 200, 300, 450 and 600 RPM motors (not shown). You'll like our service on your special requirements.

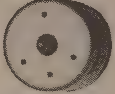
SMALL D.C. MOTORS



The Canon lines of d.c. motors are both extensive and comprehensive. They offer the equipment designer a broad variety of options from which he can select the size and performance characteristic combinations best suited for his application. All models are proven designs whose reliability has been demonstrated in numerous applications.

There are two basic lines: Type C, unshielded, and type M, which are shielded electrically to minimize R.F. noise and mechanically to reduce acoustic noise. All are permanent magnet, iron core motors.

Both types include models which are: Ungoverned, electronically governed and mechanically governed at a single speed, two speeds or three speeds. Also included motor-tachometer units. For electronically governed motor applications where the customer wishes to provide the electronics himself, the motors can be supplied without the p.c. boards.

Where torque multiplication and speed reduction are required, a variety of gearheads, to fit many of the models, are available. (A few representative units are listed.)

Mounting: Most models are designed for front mounting and are supplied with holes tapped for metric and U.S. screw sizes.

Shafts: Shaft lengths are supplied to customer order. Flats, grooves, holes splines etc. can be specified.

Wiring: Shielded units have floating ground. For R.F. filtering motors can be supplied, pre-wired with capacitors and choke coils, internal on shielded, external on unshielded. Electronically governed units are pre-wired to p.c. board.

GEAR HEADS

Model	Reduction Range	Torque max. con. oz-in
OFFSET OUTPUT SHAFT		
GH30	1/50 to 1/150	27.78
GH35	1/30 to 1/500	27.78 to 83.33
RB-54	1/10 to 1/1800	13.88 to 25
CONCENTRIC OUTPUT SHAFT		
RA-20	1/5 to 1/3000	1.38 to 13.88
RA-27	1/8 to 1/3000	5.55 to 34.72

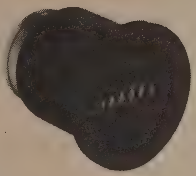
Specify CRAMER MOTORS & TIMING DEVICES . . . for a better chance of solving your timing problem.

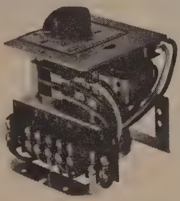
635 SERIES ETIs

- large selection of models, built around same basic mechanism
- inductor motor for faster starts and stops
- excellent readability from large numerals on 1″ diameter wheels
- low cost
- durable
- compact
- UL recognized



472/473 SERIES RESET TIMERS

- 5 basic models with varying combinations of switches, terminal blocks and wiring arrangements
- low cost through design simplicity
- better than 1% accuracy
- cam-actuated switches for programmed timing
- reduced switch actuator overtravel provides longer switch life
- mounts on front or rear of control panel
- optional high capacity load switch (up to 25 amps)
- UL recognized



402/403 SERIES PLUG-IN RESET TIMERS

- plug-in for instant time range interchangeability and simplified maintenance
- can be used for interval or delay timing
- includes pilot light and progress indicator
- modern square bezel provides up-to-date panel design
- unique damping method eliminates bounce
- thirteen time ranges
- UL recognized

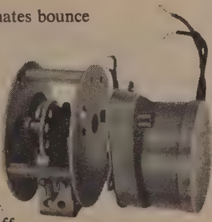
140* SERIES CLUTCH MECHANISMS

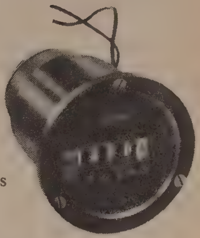
- hardened gear clutch construction
- AC or DC power-operated
- driven by input from timing or other motor, belt or chain take-off
- end plates, shafts, gear mechanisms available to meet special clutching or speed changing requirements
- integrally mounted reset springs available

*When a Cramer timing motor is the input source, the mechanism is known as the 142 clutch motor.



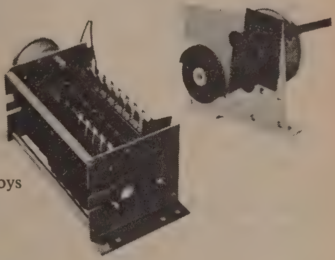
636 SERIES ETIs PUSHBUTTON RESET

- faster and more reliable than thumbwheel reset
- excellent readability
- inductor motor for faster starts and stops, higher accuracy
- unique "anti-topping" mechanisms
- UL recognized



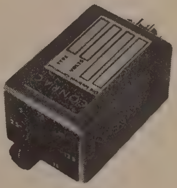
525/526 SERIES CYCLE TIMERS

- compact
- low cost
- two types of switch actuators available
- Model 525 uses adjustable cams
- Model 526 employs fixed cams
- UL recognized



3800/3801 SERIES ELECTRONIC TIMERS

- time delay (3800) or interval (3801) versions
- standard time ranges 1, 10, 30, 60 sec. and 5 min.
- time calibrated dials
- for 115 or 24 volts AC
- DPDT output contacts rated 10 ampere
- compact plug-in units for base or panel mounting



117 SERIES AC MOTORS

- fast starting and stopping
- superior output bearing design
- low power input
- stainless steel output shaft
- round or pear-shaped gear trains
- output torque up to 60 in. oz. at 1 rpm.

800 SERIES DC MOTORS

- low current drain
- high torque output
- long life brushes
- wide choice of gear ratios
- round or pear-shaped gear trains

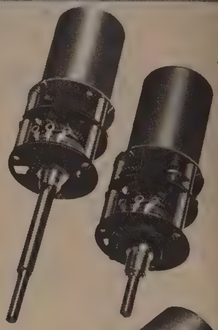
CONRAC CORPORATION

DEPENDABLE DALE® ELECTROMECHANICAL PRODUCTS

REVERSIBLE AC MOTOR DRIVEN POTENTIOMETERS

FOR USE IN ■ Home Entertainment Appliances ■ Instrumentation ■ Controls



FEATURES

■ Available with all standard potentiometers: Single, ganged or with power switch—dimensions change accordingly.

■ Magnetic clutch eliminates coasting and allows manual control independent of gear motor inertial load.

■ Long life expectancy ■ No lubrication in normal use ■ Operates in any position ■ Special terminal configurations available

SPECIFICATIONS

Operating Voltage: 6, 12, 24, 117 V.A.C., or any specified

Power Input: 5.5 Volt Amperes

Output: Approximately 5.6 R.P.M.

Torque at Potentiometer Shaft: 10 in./oz. minimum (with decoupler); 21 in./oz. minimum (without decoupler).

Reversing: Accomplished by switching capacitor as shown in hysteresis motor circuit diagram below.

Dimensions: Length: 3.275″ (not including shaft) Diameter: 1.531

REVERSIBLE AC GEARHEAD MOTORS

FOR USE WITH ■ Switches ■ Potentiometers ■ Projectors ■ Turret Drives ■ Ribbon Drives ■ Chart Drives ■ Turntable Drives ■ Business Machines ■ Displays ■ Light industrial and consumer product controls

SPECIFICATIONS

MECHANICAL

Overall Dimensions: Length: 3.275″ (not including shaft) Diameter: 1.531″

Shipping Weight: .32 lbs.

Will meet normal industrial environmental requirements.

Mounting: Horizontal standard, vertical optional; bracket provided for chassis mounting and mounting control.

Output Torque: 14 in./oz. at 5.3 R.P.M.

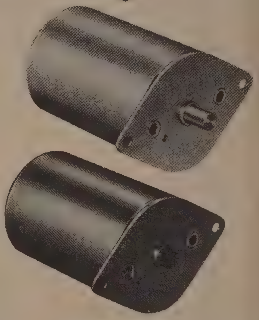
ELECTRICAL

Operating Voltage: 117 volts AC, 60 cycles standard. Available from 6 to 117 volts AC, 60 cycles.

Capacitor size: Dependent on input voltage. (Capacitor not supplied.)

REVERSIBLE AC HYSTERESIS SYNCHRONOUS MOTORS

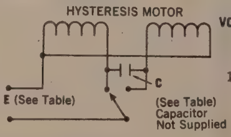
FOR USE IN ■ Low Power Driving Mechanisms ■ Control Circuits ■ Timers ■ Fans ■ Entertainment Appliances ■ Scanning Devices ■ Stirring Devices ■ Cassette Drives



FEATURES

- ■ Output shaft configuration can be specified. Standard units provided with gear.
- ■ Mounting arrangement can be varied to meet customer requirements.
- ■ Self-lubricating bearings.
- ■ Aluminum housing.
- ■ Long life expectancy.
- ■ Reversing accomplished by switching external capacitor as shown in circuit diagram.

CIRCUIT DIAGRAM



E VOLTAGE	C CAPACITANCE	C VOLTAGE
6	170 MFD	20
12	50 MFD	25
24	16 MFD	50
117	.47 MFD	300

SPECIFICATIONS

Operating Voltage: 6, 12, 117 V.A.C., or any specified.

Power Input: 5.5 Volt Amperes

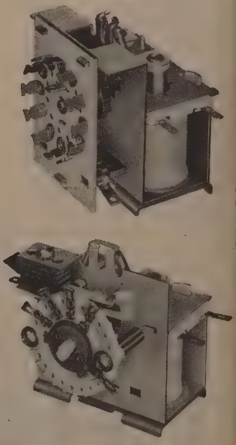
Output: Approximately 1800 & 3600 R.P.M.

Torque: 0.1 in./oz. min.

AC & DC STEPPING RELAYS

FOR USE IN ■ Control Circuits ■ Television Controls ■ Hi-Fi, Stereo & Radio ■ Appliances ■ Telephone Devices ■ Coin Machines ■ Car Washes ■ Crystal Switching ■ Copy Machines ■ Medical Electronics ■ Computers ■ Coin-operated Laundry Equipment ■ Programmers

FOUR TYPES AVAILABLE ■ Uni-Directional A.C. & D.C. ■ Bi-Directional A.C. and D.C.



SPECIFICATIONS

ELECTRICAL

Operating Voltage: 6 V, 12 V, 24 V, 117 V (AC or DC)

Power Required: 2.5 watts with Plate Sequence Switch (Fig. A); 4.5 watts with Wafer Sequence Switch (Fig. B).

Contact Arrangement: Single Pole 4, 6, 10, 12 or 13 throw sequence. Auxiliary power switch operates at predetermined position of sequence.

Contact Rating: From Dry Circuit to 1 amp at 24 V.A.C. on Sequence Switch. Optional power switch 5 amps at 117 V.A.C.

MECHANICAL

Overall Dimensions: Height: 2.200″
Width: 2.190″
Depth: 2.005″

Shipping Weight: 0.27 lbs. Uni-Directional; 0.40 lbs. Bi-Directional

Will meet normal commercial environmental requirements.

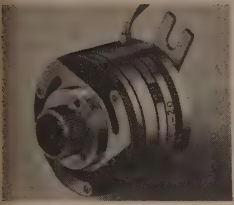
Standard auxiliary power switch may be omitted.

Mounting: Vertical or horizontal using one screw and two locating tabs.

DALE ELECTRONICS, INC., Box 180, Yankton, South Dakota 57078 • Phone: 605—665-9301

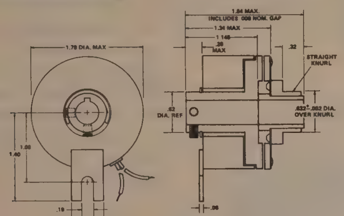
CLUTCHES & BRAKES ELECTRO MAGNETIC

MODEL 20 . . . Where performance and price are critical



FEATURES

- High torque in compact package (only 1.78" diameter)
- Fast response
- Ease of maintenance
- Available as stock items
- Standardized design at competitive price
- Flange or shaft mounting
- Long life
- Zero backlash armature with spring release
- **NO BURNISHING REQUIRED**



MECHANICAL CHARACTERISTICS

Static torque without burnishing	12 Lb. in. minimum*
Dynamic or slip torque	12 Lb. in. @ 1800 RPM 8 Lb. in @ 3600 RPM
Standard bores	1/4" 5/16" 3/8"
Standard key slots	1/16 x 1/32 3/32 x 3/64 3/32 x 3/64
Armature and hub inertia	8 x 10—5 Lb. in sec.2
Rotor inertia	10 x 10—5 Lb. in sec.2
Mechanical response time	
65% Rated torque	27 MS*
100% Rated torque	45 MS*
Electrical response time	12 MS*
Max. energy absorption continuous	420 FT. Lb./Min.

*With forcing voltage the response time can be reduced and torque increased. See Performance Characteristic Curves.

ELECTRICAL CHARACTERISTICS

(continuous duty)

Volts DC	12	24	90	
Resistance DC	24	96	1350	Ohms minimum

Power requirements	6 Watts
Standard leads	12", 22 AWG, 105°C-UL, 600 Volt

OPTIONS AVAILABLE BY SPECIAL ORDER:

1. Coil voltages not listed above.
2. Armature mounted drive elements such as pulleys, sprockets and gears.
3. Rotor and armature hub bores, including metric, not listed above.

Other standard designs for higher or lower torque ranges . . . write for further information.

HYSTERESIS CLUTCHES/BRAKES . . . HYB-HYSTERESIS BRAKES

A continuous slip device capable of providing precise, infinitely adjustable torque control. Units are basically direct current sensitive . . . having excellent reliability, repeatability and linearity. Described below are some of the infinite variations of Hysteresis Brakes manufactured. Also available are a similar wide variety of clutches.

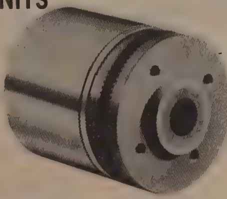
SPECIAL ENGINEERED UNITS

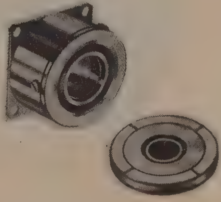
SUBMINIATURE CLUTCHES/ BRAKES

Fast response, low drag torque, high torque-to-inertia ratio, zero backlash. Torque from 3.5 to 240 oz. in. and response time from 4 to 50 mili. sec. Variety of designs for use as clutches, brakes, or clutch/brake combinations.



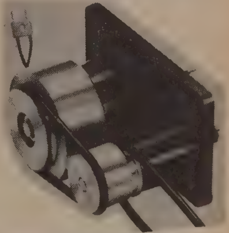
TOOTH TYPE CLUTCHES

Positive engagement and high torque to weight ratio make them ideal for airborne and space applications. Clutches and brakes available to 700 lb. in. Unit shown rated at 250 lb. in. in a 2-1/8" diameter x 2" long package.



APILON® FACED CLUTCHES and BRAKES

For severe service over extended periods of time. Special APILON ceramic friction facing has exceptionally high wear resistance and heat dissipation properties. Life expectancy of APILON faced units is in the area of 100 million operating cycles. The mechanical life of the unit matches the extraordinary life of the facings.



CUSTOM-DESIGNED UNITS

Delevan can provide units to meet the highly specialized requirements of virtually any commercial, industrial or military application. Here is a clutch/brake used to incrementally move recording type. The molded frame not only supports the clutch and brake, but also includes an idler pulley for a secondary speed output.

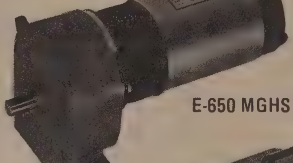
Solid State Motor Control Systems

MOTOMATIC®

Transistorized Motor Speed Control Systems

FEATURES

- **VERY WIDE SPEED RANGE**
  Typically 1000:1. For example 5 to 5000 rpm. Motomatic's speed range is wider than any SCR-type controller's.
- **FULL TORQUE**
  Even at lowest speeds. Hence, a 1/5 HP Motomatic has more torque at the low end of its speed range than a 1/2 HP SCR system.
- **COGGING FREE**
  Smooth output torque in the entire 1000:1 speed range.
- **EXELLENT SPEED REGULATION**
  From no load to full load the variation in speed is typically better than 1% of set speed (not nominal speed).
- **UNIQUE* CLOSED-LOOP SYSTEM**
  Consisting of an integrally-wound permanent magnet motor-generator and transistorized DC servo amplifier.



E-650 MGHS

E-650
Master Control

E-650 MGHR

- **RELIABLE DESIGN AND CONSTRUCTION**
  Typically rated for 5000 hrs. use. In the past 8 years, over 1/2 million units were sold to over 1000 different customers, establishing and excellent history of reliability in the field.
- **PRECISE CONTROL — LOW DRIFT**
  Speed can be set very accurately and monitored continuously. Ultra-stable amplifiers and temperature compensated motor-generators assure stable performance.
- **OVERLOAD PROTECTED**
  All systems can be stalled without damage to motor or controller.

*Patents issued and pending.

P6000 Series High P.W.M. Servo Systems

FEATURES

- Unique Open Modular Construction
- Completely self contained
- Plug in Standard or Custom Options
- Regenerative Energy Protected
- Silent Operation
- 115/230 AC or DC Power Options
- Independent Average and Peak Current Limits
- Cro-Bar Protected AC Power Supply

MOTOMATIC®

THE MOTOMATIC CONCEPT

MOTOMATIC is a unique* transistorized motor speed control system designed, engineered and manufactured by Electro-Craft Corporation. MOTOMATIC is not a SCR-type motor speed control, MOTOMATIC is a complete closed-loop system consisting of a fast response, permanent magnet, integrally-wound motor-generator and high-gain transistorized servo feedback amplifier. MOTOMATIC systems offer precise speed control, even in the presence of changing load and line voltage conditions. Using MOTOMATIC speed can be accurately controlled from a potentiometer or from any transducer sensing heat, light, tension, etc.

SPEED REGULATION

Speed regulation is defined as the ability of a motor to maintain a set speed when a load torque is applied. A DC motor with "open loop" control has a relatively constant power input so if the load increases, the speed decreases. In order to maintain a constant speed with increasing load, the power input to the motor must, therefore, be increased.

The MOTOMATIC closed-loop control system is a self-balancing system which automatically adjusts the input to the motor so that an essentially constant speed is maintained even while the load on the motor is changing. The integral tachometer-generator senses that the load wants to change the motor speed and calls for more or less power to maintain constant speed. From no-load to full-load conditions, the variation in speed is typically better than 1% of set speed. It may be noted that similar claims made for certain SCR variable speed drives are frequently based upon "percent regulation of maximum speed". MOTOMATIC's speed regulation can be considerably better than 1% if less than the full load or the 1000:1 speed range is utilized.

DESIGN AND CONSTRUCTION

Electro-Craft motor-generators are quality engineered and manufactured to exacting specifications. Typical life cycle, on the basis of over 500,000 MOTOMATIC systems in operation, is in the range of 5000 hours at rated speed before brush changes are necessary. All rotors are epoxy resin insulated by a spray-coating process before winding and all finished armatures are impregnated to NEMA standards. Commutators are turned with a diamond cutter for a 20 micro-inch surface finish, assuring perfect brush seating and minimum brush bounce. Finally, all rotors are dynamically balanced for smooth operation and long bearing life. Motors are rated at a maximum armature temperature rise of 75 degrees C, which is better than the limits of Class "B" insulation. All units are "run in" before 100% final testing and shipment.

*Patents issued and pending.

P6000 SERIES P.W.M. MOTOR CONTROL SYSTEMS

The P6000 series are the fastest pulse width modulated servo controls competitively available, providing bandwidths at full load exceeding 2000 H_Z. The unique fixed frequency design gives completely silent operation free from annoying audible "chirps". The standard unit, which is available for operation from AC line (model P6000AP) or for operation from a DC power supply (model P6000A), has the following features: three input fully adjustable summing amplifier with independent gain and lead-lag adjustment to enable operation with a wide range of motor and load types; a dual stage current limiter providing independent adjustment of peak and average current limit as well as pulse duration; unique cro-bar protection (model P6000AP) which protects the amplifier from damage due to short circuits, motor failure or misuse; space for two 4-5/16" x 2-3/4" option cards which can be selected from a wide range of standard options or custom designed options; logic compatible end of travel limit and clamping inputs; all major subassemblies are mounted on plug-in connectors to enable replacement without the need to change the entire unit; and all major test points are brought out to a 14 pin D.I.P. socket for fast, easy troubleshooting and set up. This, combined with the unique open construction, makes the P6000 series the most accessible and serviceable units of their type available. The P6000 series amplifiers can be readily adapted, by means of plug-in options, for interfacing with an unlimited range of remote inputs, programmers, and computer controls. Larger volume users can purchase the basic modules and harnesses for use in applications where space and cost are critical.

The P6000 amplifiers are also available in Electro-Craft's D.P.S. range of Digital Positioning Systems which typically can provide fully programmable step motion drives capable of completing single steps of 1.8° in 8 ms including settling, and slew speeds of 15,000 steps per second with inertial loads of 0.05 oz-in-sec^2 and friction loads of 50 oz-in. The D.P.S. series are available in a wide range of step sizes; consult our factory for further details.

*Patents applied for.

CHARACTERISTICS

RPM: Rigid one piece housing eliminates bearing alignment problems

RINGS: Coin Silver 5 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG — 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

HI-POT: 1200 VAC 60 CYCLE for 15 seconds

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

COVER: Easily removable for brush and ring inspection

BEARINGS: Shielded or sealed ball bearings

BRUSH MATERIAL

- Fabricast grade Fag 180, the universal low noise level grade used for all standard brush assembles.
- Fabricast grade FAG 193, the lowest noise level grade, however, the ring surface speed is limited to 250 SFM.
- Fabricast grade FAG 150, the highest surface speed grade, however, noise levels are compromised.

Grade No.	Composition	Recommended Surface Speed	Carrying Capacity
FAG150	50% silver, 50% graphite	Over 3500 ft. per min.	100 Amps per sq. in.
FAG180	80% silver, 20% graphite	Up to 3500 ft. per min.	250 Amps per sq. in.
FAG193	93% silver, 7% graphite	Up to 250 ft. per min.	300 Amps per sq. in.

CHARACTERISTICS

RINGS: Coin Silver 5 AMP Rings
Copper 50 AMP Rings

BRUSHES: Silver Graphite
Fabricast Grade FAG 180 (80% AG – 20% C)
Two brushes per ring
Brushes individually removable and replaceable

NOISE: 10 Milliohms dynamic resistance MAX
5 Milliohms MAX with 4 brushes per CKT

CURRENT: Noted in tabulated block
Rating may be doubled with 4 brushes per CKT

HI-POT: 1200 VAC 60 CYCLE for 15 seconds

ROTOR: One piece steel sleeve
Ring complement vacuum cast on sleeve as unit with epoxy dielectric

ROTOR LEADS: 5 AMP Leads – 20 GA per MIL-W-16878 TYPE "E"
50 AMP Leads – 8 GA per MIL-W-16878 TYPE "B"
Lead exit as shown on most units. Maximum ring complement may require smaller wire or leads to exit both ends.

BRUSH BLOCK: Laminated phenolic
Optional mounting methods shown.

HYSTERESIS CLUTCHES & BRAKES

offer maximum reliability — smooth clutching minimum maintenance. They are ideal for tension control and power absorption devices where smooth variable slip torque is required. Torque is proportional to control current. Clutch-brake combinations and fixed field clutches also available.

GEMCOR

Gemcor Digital Instruments *for* *Industrial Monitoring Applications*

GEMCOR
TACHOMETER
22575
RPM

Digital Tachometer

A digital instrument designed and used for the direct measurement of angular velocity expressed in revolutions per minute of a rotating spindle or shaft. A typical application is the measurement of drill and shave spindle revolutions per minute.

The unit contains an amplifier, logic board with power supply and readouts.

SPECIFICATIONS:

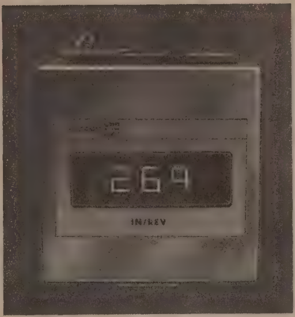
Number of digits: 5 or 6

Range: 100 to 999,999 RPM

Accuracy:
Better than ± 2% at any RPM

Input:
Magnetic pick-up also adaptable to any type of electro-mechanical transducer.

Sampling Rate:
.24, 1, or 2.4 Sec. Adaptable to different pitch transducers.



Digital Feed Rate Indicator and Monitor

A digital instrument designed to directly measure and display the chip load or cut per revolution of a rotating cutter. The digital readout displays the cutter chip load directly in units of thousandths of an inch. Typical application is measurement of drill spindle chip load.

The unit contains amplifiers, power supply and logic needed to compute and display cutter chip load.

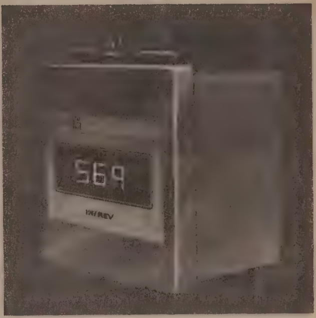
SPECIFICATIONS:

Number of digits: 3

Range: .001 to .999 in/Rev.

Accuracy:
Better than 2% of reading

Input:
Magnetic pick-up for RPM, photo-electric for feed. Adaptable to other transducers.



Digital Feed Rate Control and Feedback System

A digital instrument designed to monitor and maintain a constant cutter chip load by correcting feed or speed or both of a cutter spindle. The system can also be programmed to stop a spindle at a pre-set cutter depth. Digital or analog outputs are available to control auxiliary equipment. A typical application is constant feed per revolution control of a cutter spindle.

SPECIFICATIONS:

Range:
.001 to .999 in/Rev.

Accuracy of Control Unit:
More than 2%

Input:
Magnetic pick-up for RPM, photo-electric for feed. Adaptable to other transducers.

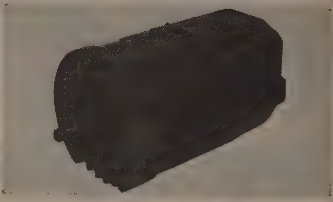
GEMCOR

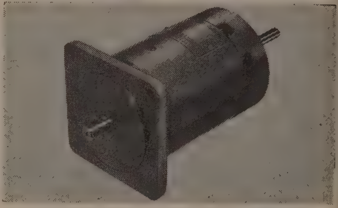
AC and DC MOTORS AND GEAR-MOTORS

DC Motors



For general duty on variable- or constant-speed applications where the power supply is d-c or where a-c/d-c conversion is used for controlled speeds. Also ideal for reversing applications. Type BC direct-current motors will start, accelerate, and run fractional-horsepower devices smoothly and easily. They are available in open, totally enclosed, explosion-proof, and severe-duty enclosures with solid base, round frame, or end mounting in most ratings. Special-purpose type motors are also available for full- and half-wave rectified power drives. For complete information, write for Bulletins GEA-9956 and GEA-9965.

Reel-Drive Motors



GE's full line of fhp direct-current motors includes three frame sizes widely used for reel drives: 3.4″, 4⅝″, and 6 5/16″ diameters. Special end mountings and shaft extensions meet exacting application requirements. Series, split-series, compound, shunt, and compensated-shunt winding designs offer a broad design choice. Stall torque ratings from 3 to 120 ounce-feet and higher span various application needs, and motor voltage requirements are normally matched to your system design.

New Permanent Magnet Motors

GE's new BPA-34 permanent-magnet motors are smaller and lighter than comparable wound-field motors of the same rating. Permanent magnets replace field windings, eliminating the need for field power supply and the chance of field-winding failure or burnout; and with battery power efficiency is increased, battery drain decreased. Two leads from power supply reduce connect and disconnect time. The motor features double shielded ball bearings and Class B-R insulation system that meets NEMA and USA Standards for Class B, and is recognized by UL for up to 130 C hot spot temperature.

In 3.4-inch-diameter totally enclosed frame, the BPA-34 is available in face, flange, or welded-base design for 115 volts d-c with modifications from 6 volts d-c. Speed-torque is linear, producing a d-c rating of about ⅓ hp at 3450 rpm, ⅕ hp at 1725 rpm, and 1/7 hp at 1140 rpm on a continuous basis.

The BPA-34 is ideally suited for such applications as copy machines, tape reel drives, printers, and filing equipment, and for any other equipment utilizing variable-speed drives or battery power where size and weight are critical.

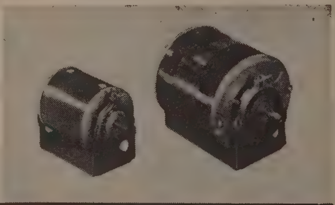
NEMA 48- and 56-Frame A-c Induction Motors

Dependable Form G Motors in Thousands of Variations

Form G a-c induction motors are available in most any electrical type, enclosure, and mounting in a variety of ratings from 1/20 to 5 hp for a complete range of commercial/industrial applications. **For complete information write for Bulletins GEC-5000 and GEA-9964.**

Small, Compact, A-c Induction Motors

Provide High Power in a Lightweight Package

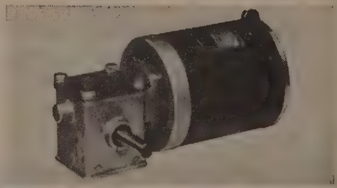


Small in size, but high in reliability, General Electric compact, powerful, a-c induction motors are available in ranges from 35 mhp to ½ horsepower. These reversible motors provide consistent, quiet, long-life operation in any mounting position. Synchronous motors for constant-speed applications are available in 3- and 3⅞-inch diameter models. Special designs can be provided for various torque motor applications such as tape reel drives. For dimensions, features, ratings, and application information, write for Bulletin GEA-8254.

Typical Electronic Applications: Computer memory drums, tape reels, capstans, disc filers, card stackers, card printers, card punchers, and data cells.

Mina-Gear™ Motors

Right-Angle and Parallel-Shaft



A compact, dependable, lightweight line of gear-motors with a flexible range of speeds, ratios, motor types, and frame sizes. Right-angle gear-motors are rated 1/40- to ½-hp with gear ratios of 102:1 to 11:1 with output speeds from 323 to 8 rpm. Parallel-shaft designs are of lightweight construction with aluminum gear housing and motor endshields. Ratings from 15 mhp to ⅙ hp with gear ratios of 195:1 to 4:1 and with output speeds from 417 to 8 rpm in two gear sizes. Mina-Gear motors offer you years of efficient operation, and are ideal for such devices as printing and office machines, medical equipment, door operators, and vending machines, and for many other applications requiring a compact design with relatively high-torque capability. For complete information on right-angle write for Bulletin GEA-7839; for parallel-shaft, Bulletin GEP-466.

For complete information contact your nearby GE Sales Office, or write to General Electric Co., Section 998-2. Schenectady, N. Y. 12345.

GENERAL ELECTRIC

AC and DC MOTORS

Small Induction and Synchronous Motors

Versatility is synonymous with General Electric Small Induction and Synchronous motors. With this complete line, GE offers the design engineer the widest possible application freedom, plus the traditional fine quality of General Electric motors.

These small diameter motors are designed to provide dependable power for a wide variety of applications, including data communication printers, cash registers, telecopiers, typewriters, audio recording equipment, air compressors, projectors, computer card readers, disc file drives, as well as various machine tool applications. And many other jobs as well.

Such versatility is made possible by the choice of mounting styles, electrical types, bearing and insulation systems available.

M-49 FRAME MOTOR

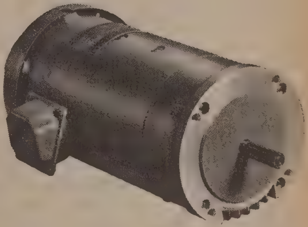
The 3 inch diameter M-49 motor is specifically built for applications requiring AC power in a limited space. This reversible motor can be mounted at any angle because it is available with either steel-backed babbit sleeve or ball bearings. The M-49 is offered in reluctance synchronous, permanent split-capacitor, split-phase and capacitor-start models. Shaft diameter is 5/16 or 3/8 inches.

19-FRAME MOTOR

The 3⅞ inch diameter 19-frame motor is designed to meet most small induction motor needs. Available with bolted cast-aluminum endshields, the 19-frame comes in synchronous, polyphase, permanent split-capacitor, split-phase and capacitor-start electrical types. This motor also features all-angle mounting, with the choice of either steel-backed babbit sleeve or ball bearings. On open models, a standard NEMA 42-frame mount is offered. Standard shaft diameters are 5/16 or 3/8 inches.

Write for Bulletin GEA-9964

56-Frame DC Motors



General Electric's 56-frame DC motors are designed to start, accelerate, and run FHP devices on variable- or constant-speed applications, with a DC or AC/DC conversion power source. They offer unequalled design flexibility, long-life quiet operation, and easy installation.

With a wide range of design choices in accessories, modifications, winding types, and enclosures, the 56-frame offers the designer/manufacturer valuable options in motor selection. These motors are available in open, totally-enclosed, and severe duty enclosures for most ratings, while totally-enclosed non-ventilated construction is also available for dirty indoor environments. Low voltage drip-proof fully-guarded types are available for battery-powered equipment drives, as are full- and half-wave rectified power drives.

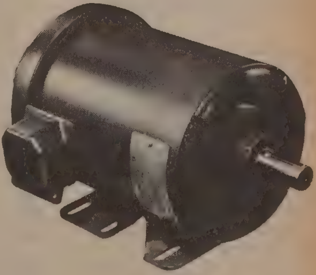
The 56-frame motor features a new, improved insulation system which is superior to the previous one. This insulation has proved its excellent resistance to heat, aging, and dielectric failure in tests at the Underwriters' Laboratory, and has been designated Class B-R by the UL. Its unique capabilities enable the use of smaller, lighter weight motors in applications such as office and business machines.

All design elements of the 56-frame DC motor contribute to its high reliability, and long-life, efficient performance. These motors are designed to operate over a wide speed range, and provide fast starting, acceleration, deceleration, and reversing — while maintaining stable motor temperatures.

Write for Bulletin GEA-9965

Form G Motors

For commercial and industrial equipment, when you choose from the Form G Line, you choose from literally hundreds of standard models . . . and thousands of variations. Designs are available in almost every enclosure, electrical type, and speed rating in the wide scope of the NEMA 48- through 145T frame sizes up to five horsepower.



6½-INCH-DIAMETER FORM G MOTOR NOW INCLUDES NEMA 56-, 56H-, 143T- and 145T-FRAME DESIGNS

General Electric's reliable Form G motor line now includes commercial and industrial motors with more power per pound, yet compact and lightweight for today's new equipment. The new heavy-duty designs have welded-on steel bases that are large and rigid for sturdy mounting and accurate shaft alignment. Comparable solid and resilient cradle bases are also available. Meeting high horsepower torque requirements are heavy-duty bearings and large diameter shaft extensions.

5½-INCH-DIAMETER FORM G MOTOR INCLUDES NEMA 48- AND 56- FRAMES

Now it is common to have ratings up to one horsepower in General Electric's 5½-inch-diameter motors. This is so because the Form G motor family contains many advanced design features. These features include improved ventilation, insulation, and bearing load-carrying ability and motor life.

If you have specialized requirements, contact us for the General Electric solution.

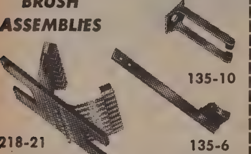
†Shunts are provided. **Mounting hole diameter for brush holder dimension D.

Request and fill in Brush Inquiry Sheet, Form 109, so that we can supply the proper grade of brush material.

BRUSH ASSEMBLIES



CONTACTS

GRAPHALLOY, because of its inherent non-welding and arc-quenching characteristics, is used widely for contacts. Ask for Data Sheet 950.

BUSHINGS, Oil-free

Replace oil-lubricated bushings in synchros, instruments, timers and missiles.

Advantages: 1) Lower friction at room temperatures. 2) No oil to solidify at low temperatures. 3) No oil to carbonize at prolonged elevated temperatures.

*Ask for Data Sheets 270 and 277 on Miniature Bronze-*GRAPHALLOY *Bushings.*

CONNECTORS (garter springs)

These silver-plated coil spring Connectors make for positive electrical connection to the brass body of the brush holder by snapping into the groove on the holder. The connecting lead can be pre-soldered to the Connector.

GARTER SPRING CONNECTORS	BRUSH SIZE	BRUSH HOLDER NO.

CLUTCH FACINGS and CLUTCH GEAR ASSEMBLIES

Torque remains same within close operating limits despite changes in temperature and humidity. For instrumentation, guided missiles, constant friction devices.

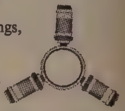
SLIP RINGS Solid Coin Silver

Standard Coin Silver Slip Rings, both *cylindrical* and *flat* types, are illustrated at right. We recommend the cylindrical type rings with three brushes per ring . . . spaced at 120°. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type or slip-ring assemblies can be furnished with leads attached.

No. 168 Series flat type to 20″ O.D.

Standard "Flat" rings have ¼″ radial contact surface and ⅛″ radial spacing between adjacent rings.

No. 116 Series cylindrical type to 36″ O.D.



Copper Slip Rings, flat or cylindrical, are available.

BRONZE and COPPER Slip Rings, cylindrical or flat, are available in the above sizes.

Cylindrical coin-silver rings, stacked with insulating rings between them, are press-fitted over insulation on the shaft. The insulation should be kept concentric on the shaft to avoid losing the high degree of concentricity already built into the slip rings and to maintain the effectiveness of the highly finished ring surface.

Model 409 Flat Slip-Ring Assembly

Where cylindrical-type slip rings cannot be used because of axial space limitations, standard flat (or disc type) coin-silver slip rings will solve the problem. A series of these rings has been designed so that the rings will nest with a standard 1/8"-spacing between successive rings. Each ring provides a radial contact surface of 1/4" width. Our 5/16"-square brush in Brush Holder 11570 should be used with these rings. We strongly recommend three brushes per ring to reduce noise level to a minimum.

BINDING POSTS

Binding Posts (normally spring-type 19185 or 22978) insure simple, low resistance, positive electrical connections between brush shunts (which have been threaded through brush-holder caps) and the external circuits. Binding posts are used also with brush and slip-ring assemblies and with brush-holder assemblies to make connection between the assembly and the external circuit.

Miniature (Spring-type) Miniature binding posts are valuable where space is at a premium, particularly for some rotary strain-gage and rotary thermocouple applications. These miniature binding posts are not insulated.

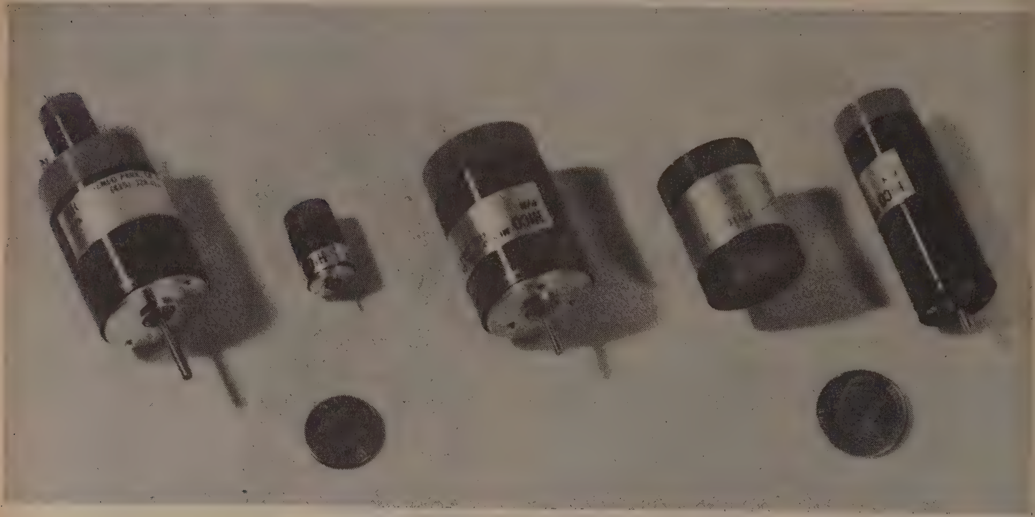
SPECIAL BINDING POSTS

Special binding posts are designed where particular characteristics are required.

HICO MAXON : MINIATURE PRECISION DC MOTORS



FEATURES

Subminiature Motors, Tachometers and Gearmotors: (9 Frame Sizes)

1. Low inertia, servo design, PM.
2. Ironless rotors, wave wound.
3. Life, to several thousand hours.
4. Highest torque to sizes ratio available.
5. Efficiency to 90%; low friction.
6. Flatter speed-torque curves.
7. Up to 13 bar commutators, 3 and 4 element brushes.
8. Reliable low voltage starts; .5-48 VDC.
9. Gearmotors — low to high ratios. Stock.
10. Tachometers: Ripple under 2% RMS; Voltage .5 to 6.00/1000 RPM. Stock.
11. USA tapped mounting holes.
12. Precision Swiss made.
13. Sizes from 12mm (.472″) to 32mm (1.26″) for every application.
14. Operating Temp. Range: −20°C to +65°C (−4°F to +150°F).
15. Bearings, sintered oilite bronze, standard; ball bearing additional.
16. Windings, standard and specials, with torques to over 3 oz.-in. running and 8-10 oz.-in. stall, without gearing and low speeds to over 20,000 RPM.
17. Stocks of popular sizes and windings, others reasonable delivery.
18. Competitively priced. Application engineering assistance.

IMC MOTOR FACTS

FHP motors... precision, power, performance

Whatever your motor requirements, chances are IMC Eastern Division has a pre-engineered design to meet them. If not, we will custom engineer to your exact specifications.

IMC offers a complete range of motor types, sizes and performance characteristics.

Hysteresis synchronous, polarized and reluctance synchronous, induction, torque, and servo motors. 50, 60 400, 800 and 1000 Hz, multi-Hz and variable frequency types. Standard voltages from 13 to 230 V, single, 2 and 3-phase. Models include totally enclosed and open frame designs with or without internal cooling. Base, face, flange and servo mountings. Shafts offset, double-ended, with slots, keyways, tapers, etc. at customer option.

The tables below provide a few typical examples of IMC Eastern Division motor capability. For additional data on these designs, information on your individual requirements, or application engineering assistance, contact us at

SERVO MOTORS

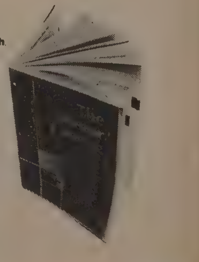
Motor-generators, motor-tachometers in BuOrd sizes 5-18. All available with precision gearheads.

BRUSHLESS DC MOTORS

Newly developed IMCom Brushless DC Motor meets maximum power output requirements — up to two horsepower.

FREE

Our Driver Manual. It's your license to control all driving situations, free for the asking. 100 pages of detailed motor specifications, comprehensive theory and applications information (ref. cat. #EMistr.). From IMC Eastern Division.



IMC MOTOR FACTS

A FIRST!

Available in frame sizes
from ¾″ to 5⅜″ diameter.

IMC Brushless DC Motor meets requirements up to TWO HORSEPOWER

A first — this newly developed product meets maximum power output requirements, unfolding a new era for the Brushless DC motor. Features electromagnetic commutation, wide temperature range, two wire input, exceptional life/reliability, electronic motor control and modular construction. Literature on request! For further information please call Gene Egan, V.P. Sales — (516) 334-7070 or write:

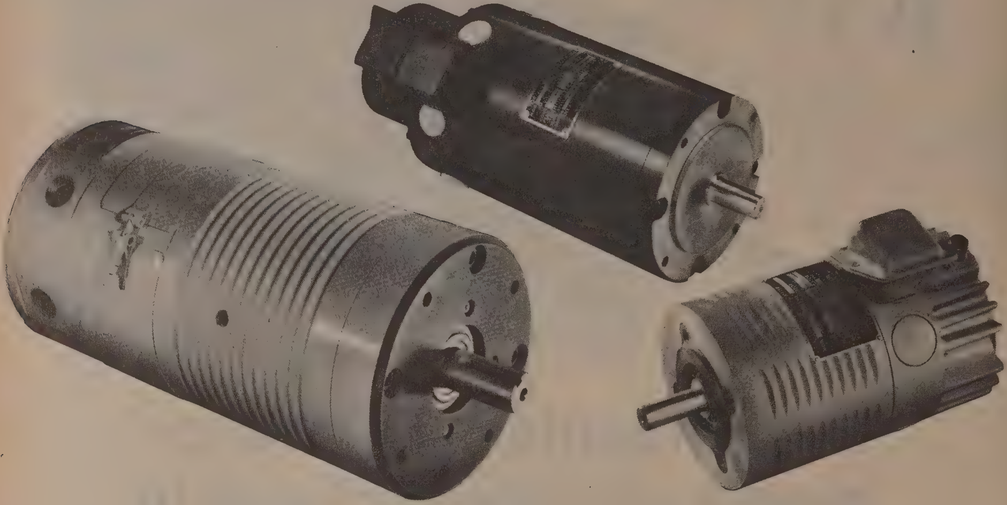
EASTERN DIVISION
570 MAIN STREET, WESTBURY, NEW YORK 11590

Inland Motor
DC Servo Motors for machine tools and high-performance industrial drives.



Our full line of DC motor-tachometers ranging from 1.5 to 12 HP will fit an exceptionally wide range of high-performance industrial drive applications. Integral tachometers yield precision speed regulation and eliminate the need for adaptors, gears, couplings or special mountings. Integral brake and resolver options available. Choice of various connections available on all models. A fully compatible solid state SCR power amplifier can be matched to any unit. We will custom design to meet your special machine requirements.

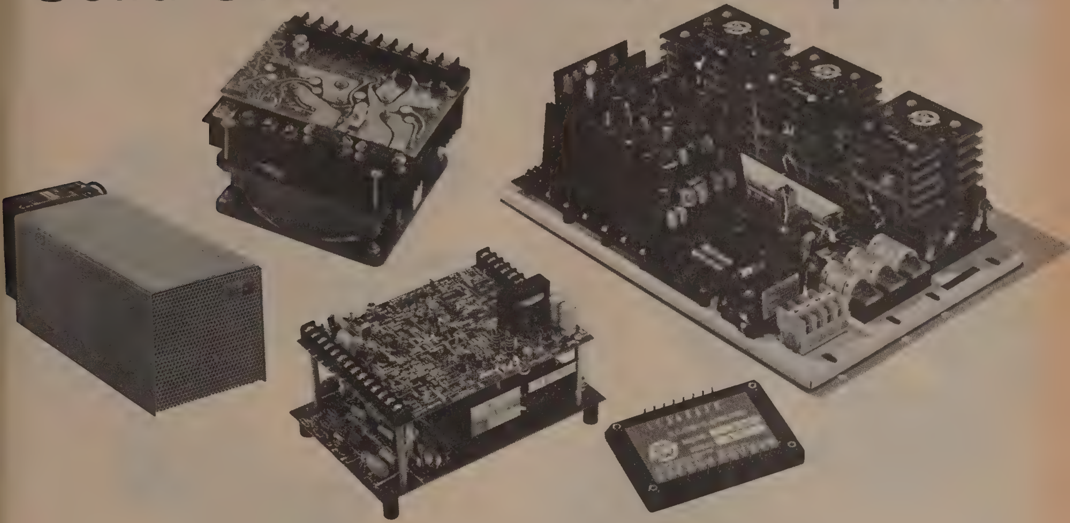
Inland Motor
Solid State DC Power Amplifiers.



These SCR and transistor amplifiers are specifically designed to provide optimum system performance, operation and protection. Inherent stiffness and wide bandwith assure fast accurate control for position, tension or variable speed applications at moderate cost. SCR and PWM transistor models are highly modular in construction with interchangeable PC boards and other components for easy serviceability. Compact configurations save valuable space.

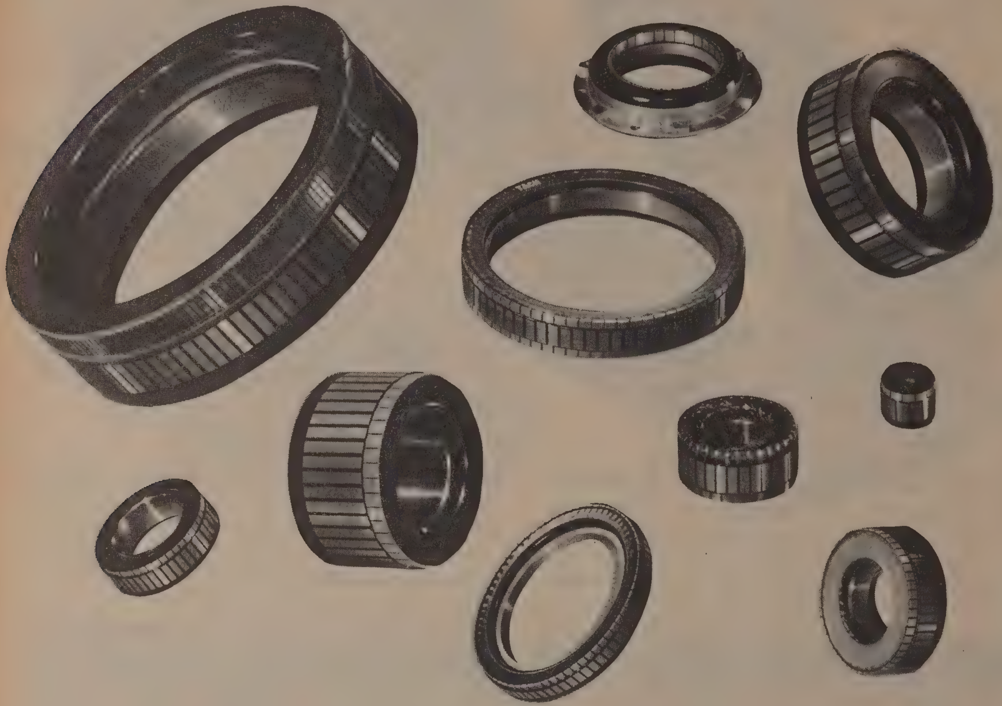
Inland Motor
DC Direct Drive Pancake Torquers for aerospace applications.



As the world's largest producer of DC torque motors and servos, we can supply the widest range of sizes and configurations to meet standard as well as the most unique and highest precision applications.

Product reliability of 99.999% made Inland the exclusive supplier for Apollo, Gemini, Mercury, Saturn, the Orbiting Solar Observatory, MOL, Skylab, Titan and Sprint. We're sole or primary supplier on Polaris, Minuteman, Poseidon, TIROS, SINS, Trident and Phoenix programs.

Our direct drive pancake torque motors are specified first where there can be no compromise with reliability. Every major aerospace and weaponry project during the past 20 years has depended on the proven reliability of Inland torque motors, servos and tachometer generators.

In addition to our competitively priced standard models, we custom design to meet your special performance requirements. Our design bank includes thousands of standard and advanced-concept model variations ready for production on short notice. We probably have one ideally suited to your special application. Selecting a model from our design bank can save you considerable engineering time and money right now.

INLAND MOTOR DIVISION, Kollmorgen Corporation, 501 First St., Radford, Va. 24141, (703) 639-3973 TWX 710-875-3740

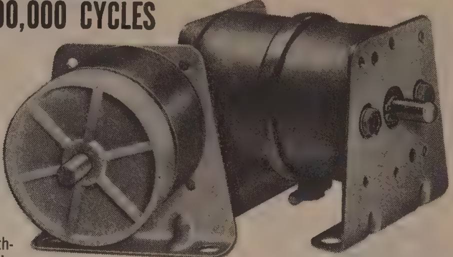
* No-load speeds given are based upon applied voltage at Tp (stalled). Higher maximum speeds are available based upon specific motor winding selected. However, units with integral tachometer may be limited in speed by tachometer winding. Consult factory for data.

Compact size and high thermal capacity under severe duty cycles characterize these high performance DC motors and motor tachometers. All units are available as housed or unhoused units. We custom design for special applications.

LEDEX

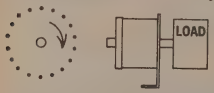
SERIES 50-L EXTENDED LIFE STEPPING MOTORS NOW 10,000,000 CYCLES



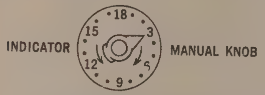
TORQUES TO 246 OUNCE INCHES

New internal design extends life 3 times without changing external dimensions. Accurate to ±1°, non-accumulative. Series 50-L stepping motors are engineered expressly for simplicity of construction and economy. All parts are permanently lubricated and enclosed for maintenance free operation. Their high torque to size ratio is a major benefit.

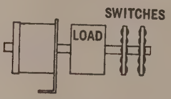
With a **unidirectional** Series 50 you can . . .



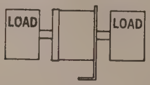
drive your load remotely through a series of short steps and stop at any one of 12, 18, 24, or 36 positions.



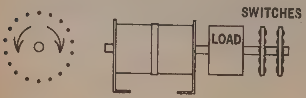
or add a knob for manual reset in either direction . . .



or add rotary switches for a combination power positioning drive and a step or program switch



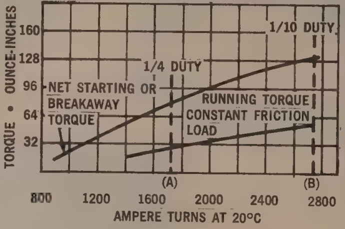
or use shaft extensions on each end to direct-couple two loads and drive them in the same direction at the same time.



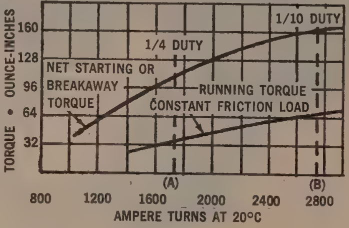
With a **bidirectional** Series 50 you can do all this . . . plus **remotely position** loads CW or CCW.

stock models for quick prototype starts

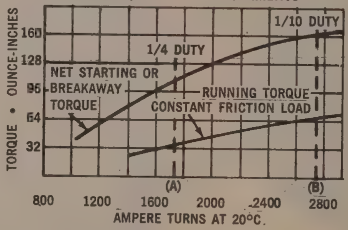
12 POSITION, 30° STEP INCREMENTS



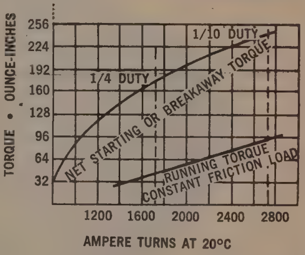
18 POSITION, 20° STEP INCREMENTS



24 POSITION, 15° STEP INCREMENTS



36 POSITION, 10° STEP INCREMENTS



Top curve in each graph shows net starting or breakaway torque, typical when friction component of load is high in beginning — as in driving a valve. **Lower** curve applies when friction load is consistent throughout stroke. Dotted lines "A" show output at 1/4 duty, 84 watts; dotted lines "B" 1/10 duty at 210 watts.

Highlights	Unidirectional	Bidirectional
Voltage	6 to 220 VDC	6 to 220 VDC
Length	1.9″	2.5″
Width	2 1/16″ (Dia.)	2.5″
Height	2⅛″ (Sq. plate)	2 13/32
Weight	14 oz.	24 oz.
Price, 1-9	$30	$48
Price, 1000 up	$15	$25

All working parts are completely enclosed. Minimum life is 10 million steps. For bidirectional, 10 million in each direction. And, the Series 50-L works on simple square wave input pulses . . . so you don't need expensive logic circuitry. Ledex Series 50-L stepping motors are engineered for high torque-to-size, uniform stepping accuracy, construction simplicity and economy.

Newly developed tooth clutch drive gives positive grip stepping action (no slip) and doubles as a built-in electromechanical clutch brake to eliminate the natural tendency of overdriving at the end of a step.

Catalog D-7500 lists complete details on stock models, performance data and engineering considerations.

DC Torque Motors

Magnetic Technology®

High Performance DC Torque Motors

Brush type and Brushless, More than 500 standard models

Magnetic Technology® offers designers the broadest standard line of high performance DC torque motors, as well as exotic one-of-a-kind units. These motors are produced to the most exacting reliability and performance standards, and have been proven in aerospace, ground-based and undersea applications.

Magnetic Technology® has paced the industry with developments such as 40 million oz-in/sec² power rate motors, ultra light-weight units for deep space use, 500°F temperature rated motors and compact units for implanted cardiac assist systems.

MAGTECH® DC torque motors combine high ratios of torque to power, speed and size with other desirable characteristics such as low electrical time constant and low ripple torque.

Example Specifications

	1500G-050	1937G-050	2340-077	2813-100	3680-185	6980-195	14000E-300

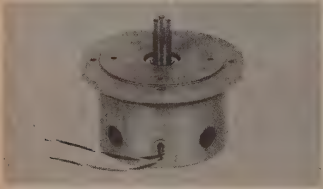
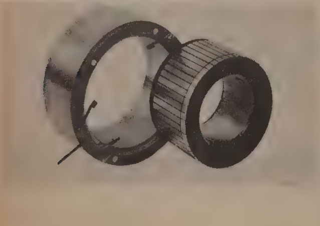
Weight (oz.)	2.5	4.2	7.6	18	49	145	850



Typical high performance units



These permanent magnet, armature excited motors are furnished frameless for direct mounting to the driven load without gears. Large bore, minimum width and thin-ring configurations make possible compact system packaging.

Peak torque ratings of standard models range from 7 oz-in. to more than 120 lb-ft., OD's from 1.5 inches to more than 19 inches, and armature bores to more than 10 inches. Special designs may be furnished to meet specific customer requirements.

Brushless motors are continuous rotation type that have advantages over conventional brush-type DC torque motors in some applications.

Example Brushless Specifications

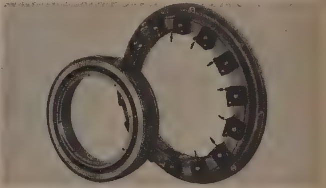
Magnetic Technology®

Tachometers

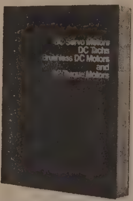
Any of the more than 500 standard MAGTECH® torque motors may be operated as a tachometer generator. In addition, separate product lines of precision tachometers and industrial tachometers are available. These range from .05% ripple voltage units usable at rates less than one revolution per day and units with a 50,000:1 dynamic range, to popular industrial units.

These tachometers feature open, frameless configuration for direct drive mounting. The direct mounting without gears eliminates dead zones and inaccuracies that can result from gearing backlash and gear imperfections. Typical characteristics include high voltage gradient, low time constant, high coupling stiffness and resolution, and accuracy at low speeds.



Precision rate reference unit

Typical industrial units



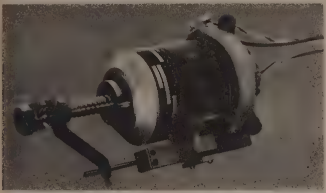
162 Pages of Vital Technical Assistance

Send for your free copy of our most comprehensive product and application guide — 374 photographs, drawings, performance, curves plus some 14,000 data points.

Magnetic Technology®

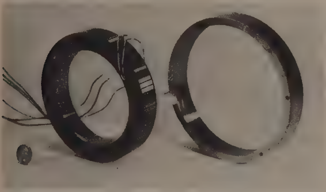
Special Products

Magnetic Technology® also produces linear actuators, and a wide variety of custom devices including the examples below.



Linear actuator: Example shown incorporates ball screw directly driven by DC torque motor, thus eliminating gearing. Motor is rare earth design providing exceptional peak torque for its size and having the added feature of withstanding excessive peak currents without altering performance characteristics.

Gimbal Cartridge. This model 4000B-100 cartridge, with integral labyrinth shield for class 7 special low torque duplex bearings, contains the model 3375-057 torque motor.



Limited Angle Brushless DC Torquers are now available either as adapted from a conventional brush type torquer as shown above or in custom designs providing characteristics and performance to customers exact requirements.

Precision Motor Tachometer is an example of MAGTECH® design combining both aerospace quality motor and precision tachometer into an integral package to precisely fit, electrically and physically, into customers specific application.

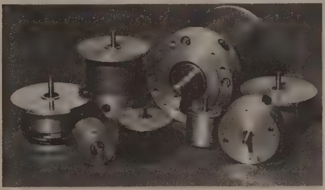
Industrial DC Servo Motors

Brushless and Brush-type, Frameless or Housed, Motor-Tach Combinations

Only subtle design, performance and materials variations distinguish these quality, direct drive motors from Magnetic Technology's® established military grade motors. Yet, through volume production they are priced for industrial applications.

Features include fast response, high torque, precise positioning, high tracking accuracy, quiet operation, and relatively low ripple. These DC servo motors utilize a permanent magnetic field for higher efficiency plus a moving iron armature for maximum thermal inertia.

The motors are available in frameless configuration to allow compact packaging and mounting of the armature directly on the driven load. Housed units, with shaft and bearings also are available. Direct coupling to the driven load eliminates the disadvantages of gears and couplings in servo systems. System simplification is possible and excellent system stability results.



Remember . . . call or write us today for your free copy of our new 162 page product and application guide. Magnetic Technology®, a division of Vernitron Corporation, 21001 Kittridge Street, Canoga Park, California 91303. TWX 910-494-1217. Telephone (213) 887-7700.

Magnetic Technology®

Applications for these units include disc memory systems, card sorters, tape transports and printers, N.C. machine table drives and feedback tachometers.

Continuous rotation brushless units, for constant or variable speed operation, also are available. Electronic drive and control systems can be supplied with these units.

In addition to MAGTECH® industrial servo motors and tachometers, motor-tach combinations can be supplied. A number of standard combinations are available, but virtually any motor and tachometer can be combined to meet drive and tachometer sensitivity requirements. The combination unit is smaller, lighter, easier to mount and generally lower in cost than separate units. These units aid reduction of system resonances.

Example Specifications

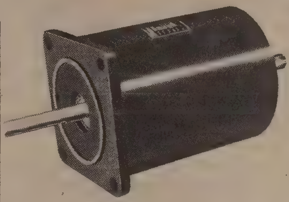
47	1800	14 oz-in.	3 Mfd.
47	3600	12 oz-in.	5 Mfd.
59	1200	55 oz-in.	8 Mfd.
59	1800	60 oz-in.	6 Mfd.
59	1200 3600	45 25 oz-in.	9 Mfd.



REQUEST DATA SHEET

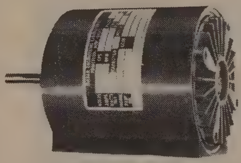
FEATURES

- The starting torque approximates the running torque. Self-starting.
- The motor runs at synchronous speed, but is not phase polarized as are the polarized synchronous motors shown elsewhere.
- The direction of rotation of the shaft is reversible externally.
- Dual voltage and/or dual speed motors available.

POLARIZED SYNCHRONOUS MOTORS

PERFORMANCE ON 115 VOLTS, 60 Hz., WITH INTERNAL FAN		
FRAME USED	47 FRAME	59 FRAME
Speed	3600 RPM	3600 RPM
Line current	1.2 amp.	1.5 amp.
Capacitor required	5 Mfd.	8 Mfd.
Stall torque	10-14 oz-in.	27 oz-in. max.
Pull-in torque	15-18 oz-in.	25 oz-in.
Pull-out torque	15 oz-in.*	14 oz-in.*
Reversible	yes	no

*Must not be exceeded for continuous duty.



REQUEST DATA SHEET

FEATURES

- Ideal where repeated phase synchronization is required between line voltage and shaft position for one or more motors.
- Single or dual voltage, but only single speed, motors available.
- Currently available for 3600 rpm only at 60 Hz. Other speeds and frequencies available when the need materializes.

INDUCTION MOTORS

PSC and 3-PHASE

McLEAN 47 FRAME MOTOR

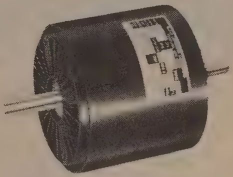
3200	250	5⅛	60	open, with circulation	single
3200	525	6⅞	60	open, with circulation	single
3200	100	4⅛	400	open, with circulation	single
3200	130	4⅛	400	open, with circulation	three

FEATURES

Optimum design achieved using McLean high speed electronic digital computer with our internally programmed analysis.



Starting and running torques matched to fan and blower loads, where the motors are so used.

Direction of rotation of the shaft is reversible externally.

Dual voltage and/or dual speed motors available.

Face mount is standard, but base mount is available in 47 Frame Size Motor and flange mount is available in 59 Frame Size Motor.

Available for single-phase use in 2, 4, 6, 8, and 12-pole speeds, and for three-phase use in the same speeds.

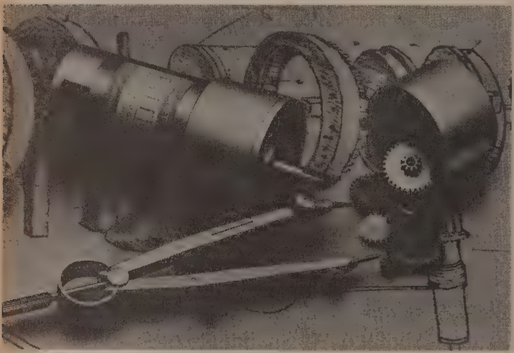
For cost effective solutions to your miniature D-C motor application problems...

Put Pittman's forty years of experience to work for you.

MOTORS: Three series of d-c motors having diameters of 1.27″, 1.63″ and 2.05″. Each in three lengths ranging upward from 2.2″ exclusive of shaft extension. Most models can be supplied for inputs from 6 to 48 VDC. Load speeds from under 1,000 rpm to approximately 10,000 rpm. Stall torques from under one oz.-in. to more than 70 oz.-in. Quality materials and construction ensure high performance and durability at moderate cost. All motors available with your choice of self-aligning oil-impregnated bronze bearings or double-shielded ball bearings. Custom modifications possible in production quantities.

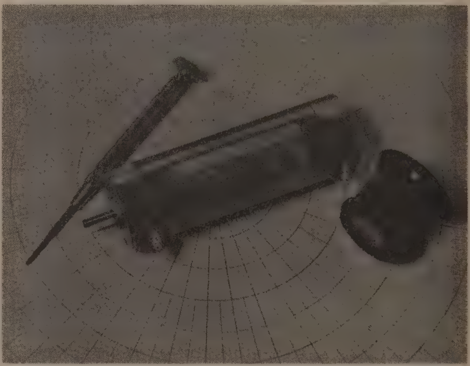
LO-COG® servo motors are built in three series identical externally to the motors described above plus a fourth series 1.18″ in diameter exclusive of terminal block. These LO-COG motors offer exceptionally low magnetic cogging yet provide the desirable thermal characteristics and high torques of iron armature designs.



GEARMOTORS: PITMO® gearmotors have a gearbox diameter of 1.375″ with lengths from 2.99″ to 3.39″ excluding output shaft extension and pilot boss. Gears are sintered iron to precision tolerances. Selected armature windings and gear ratios provide shaft speeds under load from approximately 5 rpm to 650 rpm. Torque limit on the gearbox is 250 oz.-in. Motor sections feature LO-COG construction as described above under "MOTORS".

MOTOR TACHOMETERS: Units in the current series of PITMO motor-tachs have a diameter of 1.18″ exclusive of terminal blocks. Their length is 3.66″ exclusive of shaft extension and pilot boss. Separate motor and tachometer-generator armatures are mounted on a single shaft and operate within two different field magnet systems. Standard 12-volt unit provides stall torque of 3.6 oz.-in. and No-load speed of 4,100 rpm. Tachometer gradient is two volts per 1,000 rpm with typical ripple of 6% peak-to-peak with no filtering. Other windings are available for both motor and tach.

Typical applications include digital tape cassette drives, chart and pen drives, and other velocity or position servo systems where accuracy of speed control or high damping is a requirement.



For specifications, performance curves and prices for models of PITMO miniature d-c motors to meet your needs, call or write us today. 112

Powerful • Rugged • Extremely Reliable • Versatile in Application

Frequencies:	50-60-400 cps • Variable Frequency • Dual Frequency
Speeds:	450 thru 22,000 rpm • 1-2-3 Speeds
Horsepower:	1/2000 to ¼ H.P.
Voltages:	To 440V AC • Single or Dual Voltages
Phases:	1-2-3 • Reversible or Unidirectional
Bearings:	Precision Life Lubricated Ball Bearings
Mounting:	Face, Base, Flange, Servo
MIL SPECS:	Exceed MIL-M-7969, MIL-M-17059, MIL-M-13787, MIL-E-16400, MIL-E-5400, MIL-E-5272, MIL-STD-202 Also for quality commercial applications
Life:	In excess of 10,000 hours in many designs
Gearheads:	Available with all models Hundreds of models available

BRUSHLESS DC MOTORS

- IMPROVE YOUR PRODUCT
- REPLACE BRUSH TYPE MOTORS, FANS, BLOWERS.

OPERATE FROM DC POWER SOURCES • SOLAR CELLS.

LIFE — extremely long — no brushes to replace — no brush dust.

SAFER — no sparking in explosive atmosphere.

RFI — minimal.

MIL SPEC APPROVED for severe environments.

SPEEDS — wide selection as required.

QUIET — no brush noise.

EFFICIENT — low input power.

SUPERIOR at high altitudes.

USES — Aircraft — Submarines — Spacecraft — Ground Equipment — Any Electronic Equipment.

RCI PRODUCTION MODELS QUICKLY AVAILABLE — SEND FOR DATA

GEAR MOTORS

R.C. offers a wide range of integral motor-gearhead combinations with synchronous and induction motors as well as Servo motors in all R.C.I. frame sizes including 8, 10, 11, 15, 18, on up to 3⅞ O.D.

- Precision engineered for long life.
- Torque up to 4000 in oz.
- All Ratios.
- Backlash: 30 minutes maximum.
- Temperature Range: —55°C to + 150°C.
- Lubrication: MIL-L-6085, MIL-G-3278.
- Environmental Testing: MIL-E-5272.
- Mechanical slip clutch available on request.
- Ball bearings are stainless steel ABEC 5 or better as reqd.
- All gears precision class 2 or better per AGMA 236.04

BLOWERS

- Single
- Double
- 115-208 Volts

- 50-60 Hz
- 400 Hz
- 1 or 3 Phase

SERVO-TEK
Servo-Tek
RPM
Servo-Tek

Servo-Tek is located in suburban Hawthorne, New Jersey where the firm was founded in 1945. Modern facilities house all company operations: Administrative, Sales, Research and Development, Design, Engineering, Production and Shipping. Just 30 minutes from New York City the plant, which ships its products to major industrial concerns in all 50 states and to companies in most of the Free World, is conveniently close to world-wide land, sea and air transportation routes.

Servo-Tek, by combining innovative engineering programs with highly efficient methods of production, manufactures items of matchless quality at truly economical prices. In 1958, Servo-Tek introduced a line of tachometer generators with a guaranteed brush life of 100,000 hours, and in 1963 temperature compensation was introduced. Today, under the guiding hand of its president, Helen N. Wilkins, Servo-Tek also offers a complete line of miniature motors, adjustable-speed drives, bimode servos, speed indicating systems and a series of low ripple generators. Indicative of the versatility of these products is the fact that some are used in computers, satellites and other space projects, while others are used on heavy machine tools and in the wheels of commercial and military aircraft. Still others are used in delicate pumps that replace the human heart during surgery and in complicated equipment associated with medical research.

Servo-Tek's enviable reputation is founded upon superior quality and in years of specialization in the advancement of state-of-the-art techniques combined with rigid quality control.
With the nation's top industrial and commercial manufacturers among its extensive list of repeat customers, Servo-Tek takes pride in its position as a leader in the field of instrument-type dc generators and servomotors.

Servo-Tek maintains a sales office in Van Nuys, California, and has several sales agents representing the company throughout the United States and Western Europe.

SERVO-TEK Just what you've been looking for...

In Speed Measurement and Control

Proven Performance, Reliability and Ease of Maintenance for the Most Demanding Industrial Applications

Solid-State "500" Series Precision Adjustable-Speed Drives*

All Motors Totally Enclosed, Fan-Cooled

MAINTENANCE — Design eliminates vacuum tubes, selenium rectifiers and time delays. Utilizes silicon diodes, transistors and a magnetic amplifier for exceptionally long service life. Modular plug-in construction requires only a screwdriver for servicing.
REMOTE CONTROL — A 10-turn potentiometer provides precise adjustment and can be placed in any convenient location. Meter monitors operation and continuously indicates speed.
GEARED MOTORS — Motors are available with integral gear reducers.
BRAKE-REVERSING — Relay-controlled braking and reversing models available.
SPEED RANGE — Infinitely adjustable from less than 24 rpm to 3600 rpm (150:1) while delivering full-rated torque. Continuous duty rating at all speeds.
REGULATION — Temperature-compensated tachometer feed-back provides both line and load regulation of better than 1/3 of 1% of rated speed.

Models available from 1/8 to 1½ hp

D-C Permanent-Magnet Tachometer Generators

Temperature-Compensated

Applications
SERVOS — The highly linear output and wide speed range are ideal for velocity or integrating servos. Low-driving torque permits its use as a damping or rate signal in all types of servos.
TEMPERATURE-COMPENSATED — The voltage output @ +25°C will not deviate from this amount by more than 1/100 of 1% per degree of change when operated at any temperature within the temperature range of −20°C to +75°C.
SIZE — Miniature. Approx. Dia. 1⅛".
OUTPUT — Various models with outputs as high as 45v/1000 rpm.
LINEARITY — On most models from 0 to 12,000 rpm is better than 1/10 of 1% of voltage output at 3600 rpm.
BRUSH LIFE — Better than 100,000 hours (10 years) of continuous operation at 3600 rpm.
BIDIRECTIONAL OPERATION — Output in either direction is held to ¼ of 1% tolerance.
RIPPLE — The rms value will not exceed 3% of the d-c value at any speed in excess of 40 rpm.
CONSTRUCTION — Aluminum housings with protective treatment; stainless steel shafts; fully shielded stainless steel ball bearings; Mylar insulation.
Consult our Engineering Department for information on our low ripple generators.

Bi-Mode Servo

A device which is so versatile it can be programmed to operate as either a bi-directional speed regulator or positioning servo. A d-c permanent magnet servo motor and temperature compensated d-c generator (torque unit) designed for maximum reliability provide control to the driven load. An integrated operational amplifier with external gain adjustment coupled with a high efficiency booster provide high follow-up accuracy and excellent dynamic response under various load conditions. A highly regulated temperature compensated reference supply insures stable operation with variations in ambient temperature, line voltage and time.

Features

Adjustable, stepless bi-directional speed control — Dynamic speed range in excess of 2000:1 — High accuracy maintained with load, line voltage and temperature variation — Adjustable output torque control — Controlled deceleration capability — Remote programming capability — Easy conversion from one mode to the other.

D-C Permanent-Magnet Servo Motors

Model SU-680D-29 Delivers 13.3 Watts of Continuous Power Output at 9000 rpm

Applications
Chart Recorder Pen Drives, Null-seeking Devices, Capstan Drives for Tape Transports, Proportioning Applications, Prime Mover in Servo-Mechanisms.

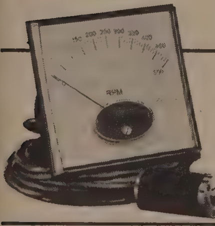
Specifications

DYNAMIC: Maximum No-Load Speed @ 23v D-C — 10,000 rpm; ±500 rpm; Full Load Torque @ 9,000 rpm — 2.0 oz-in (max.); Stall Torque @ 23v D-C (Theo.) — 20.0 oz-in (min.); Frictional Torque — 0.25 oz-in (max.); Acceleration at Stall (Torque/Inertia) — 46,800 RAD/SEC² (min.); Case Temperature Rise @ Full Load (Free Air Dissipation) −55°C (max.); Case Temperature Rise Per Watt of I²R loss (Free Air Dissipation) −6°C.

STATIC: D-C Resistance — 3.24 Ohms (typ.); Inductance — 2.5 Millihenry (typ.); Rotor Inertia — 30.0 GM-CM² (typ.); Total Weight — 8.25 oz. (max.); Length — 3.25 in., excluding shaft; Maximum Ambient Temp. −40°C.

FUNCTIONAL CONSTANTS: Inertial Time Constant — 25.0 Milliseconds (max.); Electrical Time Constant — 0.77 Milliseconds (typ.); Torque Constant — 2.8 oz-in/Amp. (min.); Voltage Constant (back emf) — 2.07 x 10^{-3} volts/rpm (min.); Viscous Damping Factor — 1.79 x 10^{-3} oz-in/rpm (min.).

Other Models Available



Accurate Speed Indicating Systems

A truly versatile "package" provides accurate speed indication for almost anything that moves. Nearly every industrial process or machine can benefit by the economy and safety of continuous speed indication.
SELF POWERED — No batteries or external power required.
LOW VOLTAGE — Connecting cable can be as long as 500 ft.
PERMANENTLY LUBRICATED BALL BEARINGS.
EASILY READ 4½" INDICATOR.
TAUT BAND MOVEMENT — Withstands vibration and shock.
STANDARD RANGES — 0 to 100, 250, 500, 1000, 2000, 3000, 4000, 6000, 8000, 10,000 and 12,000 rpm. These speeds can also be provided to read "Percent of Full Speed" or "Percent of Capacity."
0 to 10 rpm available at small additional cost.
Complete System includes Generator, Indicator (specify range), Mounting Base, Coupling and 15 ft. of Connecting Cable.

Control Meter Relay Systems

A speed monitoring system using an optically controlled meter relay and a d-c tachometer generator. Ideal for use in process and control applications requiring under and over speed limit control while continuously monitoring speed settings and changes. Also can be used to directly control power to motors, alarms, solenoids, etc. without the use of power controls. Both single and double set-point systems are available from 10 to 12,000 rpm full scale. System accuracy is 2% of full scale including indication and set-point accuracy. The set-point repeatability is 0.5% Input power requirement is 3 watts at 105 to 130 volts AC 60 Hz.

***An additional discount is available to resale organizations and original equipment manufacturers using these drives as an integral part of their product.**
Prices subject to change without notice.

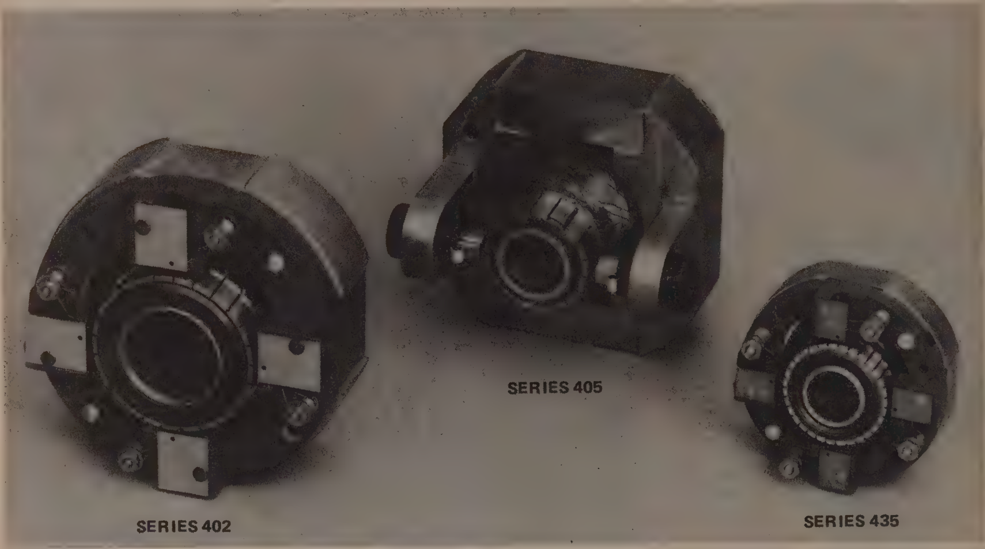
DC TACHOMETER GENERATORS



The D C tachometer generator is a servo control device which converts mechanical rotation into an electrical signal. Attached directly to the driving shaft, eliminating the need for gearing, the tachometer functions as a rate reference in rate servo systems and for velocity damping in position servo systems. The high voltage gradient available from these tachometers significantly reduces signal to noise and drift problems and allows higher gain systems providing more precise servo control. The extremely low ripple and high linearity of Sierracin/Magnedyne tachometers have made them the standard of the industry for machine tool control. Frameless units, requiring very little space, offer great flexibility and adaptability in application. Housed models, as well as housed D C torque motor/tachometer combinations coupled on a common shaft are also available.

The illustrated models, which are shown approximately full size, are representative commercial/industrial, unhoused tachometers. From left to right, the 402 Series is available with average to peak ripple of less than 2% linearity of less than .5% and a wide range of voltage gradients.

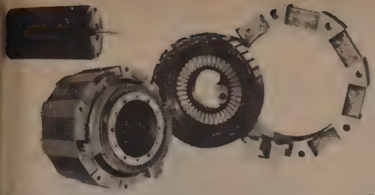
The center illustration, Series 405, is a recently developed 2-pole tachometer intended for low-cost, high volume commercial applications. Performance data is available in response to your specification requirements.

The 2" O.D. 435 Series is a high performance unit with average to peak ripple of less than 2% and output of .1 volts/rad/sec. All the above models are supplied with cartridge type brushes for long life and with air stabilized permanent magnet field which minimizes assembly and disassembly problems.

Larger sizes, up to 9.37" O.D., with reduced ripple are available for precision applications. Special encapsulated designs to full MIL-SPEC requirements are available in equivalent O.D.'s but with reduced axial length resulting in lighter weight units for aerospace applications.

The basic simplicity of our designs and our production experience have put Sierracin/Magnedyne tachometers in major defense programs, in addition to the many industrial and process control applications.

Please write or call with your specific requirements.



Sierracin/Magnedyne

DC TORQUE MOTORS

for accurate, high torque positioning and speed control

2 types to choose from

Standard – Low cost units. Reliable varnished construction. Axially displaced commutator for easy installation. Cartridge-type brushes.

High-Performance – High torque in smaller, lighter motors. Special encapsulated, wrap-around commutator construction.

Advantages

High Efficiency – High energy, permanent magnets in a unique field structure and an efficient, multi-pole armature produce high torque-to-power and torque-to-weight ratios.

Torque Applied Directly To Load – Wrap-around rotor mounts directly to, or around shafts; eliminates gear trains and backlash problems.

Housed or frameless models available for integration into customer's equipment.

Top source for big thin-ring motors

DC torquer up to 58" OD, 45" ID. Rated to 3000 ft-lbs.

Wide Application

- Position and velocity servo systems
- Antenna drives
- Missile and aircraft flight control actuators
- Memory drives
- Rate-of-turn tables
- Inertial navigation platforms
- Control moment gyros
- Rocket motor thrust vectoring systems
- Precision tape recorders
- Film drives
- Machine tool controls
- Throttle control actuators
- Linear and rotary servo actuators

Low Inertia Motors

For computer tape drives, high-speed printers, wherever high acceleration, low torsional resonance required. Intermediate and high performance models.

DC tachometers for every job

Extra low ripple, high-output tachs from 2" OD to 9.375" OD for big precision jobs. Low-cost units for machine tool control.

DC TORQUE MOTORS – VARNISHED

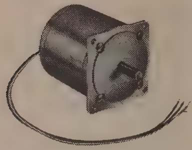
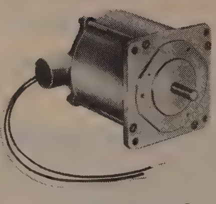
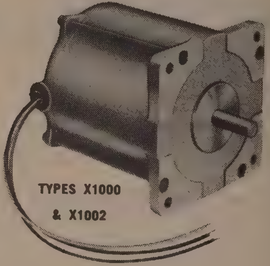
TYPES SS150 & SS152



TYPES TS50 & TS52



TYPES X250 & X252



TYPES X1000 & X1002

AC OPERATION

Standard SLO-SYN Synchronous/Stepping Motors are permanent magnet a-c motors having extremely rapid starting, stopping and reversing characteristics and a slow basic shaft speed of 72 rpm synchronous with a line frequency of 60 hertz. Three-lead types need only a single-pole, three-position switch for complete forward, reverse and "off" control. No excessive inrush current when energized because starting and operating current are nearly identical. Can be completely stalled without overheating and with no harmful effects on components. Starts or stops in less than 5° of shaft rotation; no need for mechanical or electrical braking. When used with an auxiliary high speed motor, the SLO-SYN motor can remain coupled to the load and safely overdriven. Phase shifting resistor and capacitor must be used when operating from a single-phase source but not from two-phase. All standard motors are rated for continuous duty at maximum ambient temperature of 65 °C. All models have Class B insulation.

DC STEPPING

When used for phase switched d-c stepping, 28.8 rpm models take 500 steps per revolution, 72 rpm models take 200 steps per revolution and 200 rpm models take 72 steps per revolution. Accuracy of the steps is ±.09° noncumulative. Three-lead types require a center-tapped d-c supply and single-pole, double-throw switching. Four-lead types require a single-ended power supply and single-pole, double-throw switching. Bifilar models can be used with transistorized switching circuits. Models specifically designed for stepping offer the best characteristics for most applications.

PRECISION STEPPING

For phase switched d-c stepping. These motors make 200 steps per shaft revolution. Each 1.8° step is accurate within ±3% (.06°) noncumulative. With properly designed circuitry incorporating programmed acceleration and deceleration, precision stepping motors can be operated at rates to 5000 steps per second.

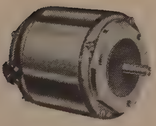
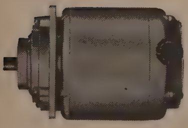
BIFILAR

Used for d-c stepping where use of push-pull circuitry and center-tapped power supply is not possible or where increased torque at high stepping speeds is required.



SPECIAL ENVIRONMENT

High Vacuum types for vacuums to 10^{-8} Torr; High Temperature types for temperatures to 130°C; High Radiation types withstand dosage of 3,000 megarads. All available from 50 to 1800 oz-in; High Vacuum 25 oz-in also.



PLANETARY GEAR

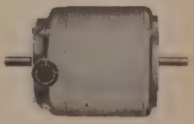
Basic 50 and 150 oz-in types and type X250 available with planetary gear assemblies in speeds of 16.6, 3.32, 0.665, 0.133 or 0.027 rpm; 16.6 rpm available in other 250 and on 400 oz-in types.

ENCODER

Consist of a precision stepping motor with an integrally mounted incremental photo encoder. The encoder outputs allow continuous monitoring of motor speed, position and direction of rotation.

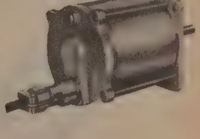
FOUR-LEAD

Designed for d-c stepping to provide the flexibility needed for use with equipment requiring isolated windings with no common connection.



DOUBLE END

Three-lead, bifilar and four-lead types with output shaft at each end of motor available in all listed torque ratings. 50, 150 and 250 oz-in types available also with planetary gear assemblies in 16.6, 3.32, 0.665, 0.133 or 0.027 rpm speeds.

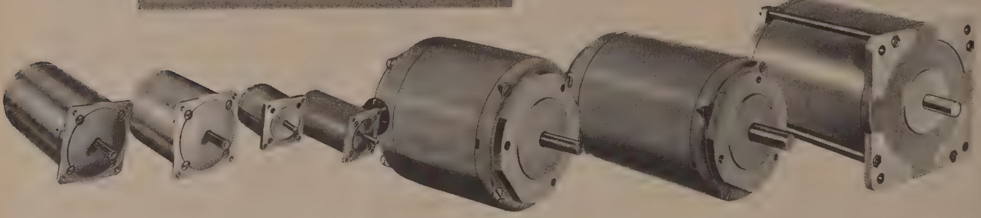


VISCOUS DAMPED

Type HS50D precision stepping motor has a unique fluid system resulting in a step function approaching critical damping. Speed of response and running characteristics are essentially unaffected by the silicone viscous damping fluid. Possesses characteristics of types described under PRECISION STEPPING on facing page.

M Series SLO-SYN® *Stepping Motors*

HIGHLIGHTS OF M SERIES SLO-SYN MOTORS
- Widest range of sizes and torque
- Highest torque to inertia ratios
- Faster single-step response
- High stepping rates
- Compact, space-saving design
- Proved reliability



The M Series SLO-SYN motors represent the most advanced permanent magnet stepping motor design available. They offer the most complete range, both in torque ratings and in size configuration. The motors provide the highest torque per pound and torque to inertia ratios and can be driven at rates above 10,000 steps per second with a minimum of power input. Standard drives are available for rates to 5000 steps per second. Drives for higher rates can be supplied on special order.

CONSTRUCTION

All M Series motors have permanent magnet rotors and eight-pole stators. They have no brushes, ratchets or detents and use shielded ball bearings to insure maximum reliability and long life.

TEMPERATURE

M Series motors have Class B insulation and may be operated at ambient temperatures from —40°C to +65°C. The continuous duty temperature rise is 65°C.

STEP ANGLE

Using a four-step input sequence, the stepping increment is 1.8° with a choice of +5% or precision +3% accuracies available as standard. An eight-step input sequence gives a stepping increment of 0.9°.

TORQUE

Standard types are offered in torque ratings from 35 to 840 ounce-inches.

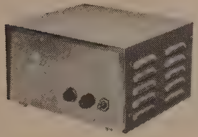
SLO-SYN® *Preset Indexers*

SINGLE-AXIS
TYPE SP1800B-5

Used to control indexing of SLO-SYN bifilar motors. The index angle, or position, can be preset by dial setting on the control panel the number of steps to be driven. Have provision for actuating any external equipment needed to perform related operations. Index, jog and free run can be initiated manually from the control panel or from an external switch. Can be made to cycle automatically with proper external switching. Speed adjustable from 4 steps/second up to maximum possible with motor used. Optional backlash take-up circuit.

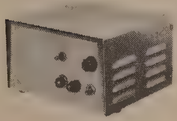
SLO-SYN® *Translator*



TYPE ST1800B

Pulse-to-step converter designed for use with appropriate bifilar SLO-SYN motors converted for incremental stepping. Convert low level signal pulses or square waves into the correct switching sequence needed to step a SLO-SYN motor. Input is 105-125 volts a-c, 1 ampere. Signal input impedance is 500 ohms. Used for programmed positioning, indexing and indicating operations.

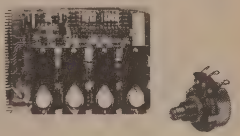
SLO-SYN® *Adjustable Speed Drive*



TYPE ST1800BV

Essentially, SLO-SYN Adjustable Speed Drive type ST1800BV is a translator which includes a built-in oscillator to supply the triggering signals. Oscillator frequency can be adjusted to vary the speed from 4 steps/second up to the maximum permissible with the motor used. Direction of rotation can be controlled either from the front panel or from a remotely located switch.

SLO-SYN® *Translator Module*



TYPE STM1800CV

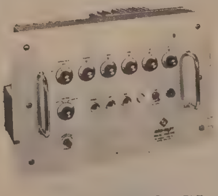
Plug-in printed circuit boards with logic capabilities for stepping SLO-SYN motors. Models offered for external triggering only or with built-in oscillator for either internal or external triggering. Models STM1800 and STM1800V drive bifilar SLO-SYN motors. Models STM1800C and STM1800CV drive bifilar and precision stepping motors and provide stepping rates to 2000 steps per second.

SLO-SYN® *High Speed Drives*

TRANSLATORS

Drive SLO-SYN Precision Stepping motors at rates to 5000 steps per second. An internal oscillator can be adjusted to any desired stepping rate and provides programmed acceleration and deceleration. Translators can also be triggered externally by pulses from tape readers, computers, oscillators, pulse generators and other signal producing equipment.

TYPE HTR105RT



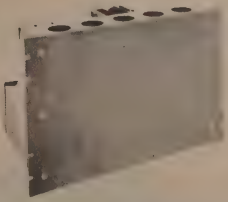
TYPE HPI 155T

PRESET INDEXERS

Drive SLO-SYN Precision Stepping Motors in indexing and other positioning operations. Acceleration and deceleration circuit rates to 5000 steps per second without missing steps. Can be controlled from the front panel or from a TTL compatible computer link. Backlash take-up circuit is optional.

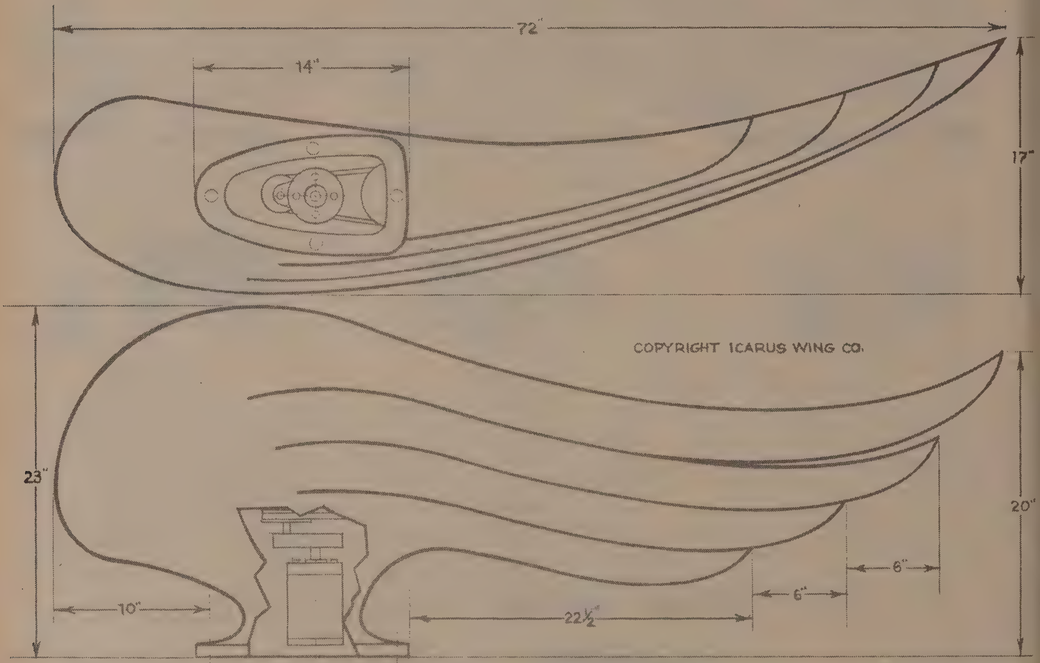
BUFFERED TRANSLATORS

Drive SLO-SYN motors in response to commands from computers, digital controls and other devices which operate at fixed pulse rates. The translator stores the pulses and feeds them to the motor, automatically providing acceleration and deceleration at a rate compatible with the response characteristics of the motor. The motor is driven one step for each pulse received from the control unit at rates to 5000 steps per second. A built-in oscillator can also supply the triggering pulses.



TYPE BTR105RT

Your application really deserves a super-reliable mini motor, but the cost enrages the boss. Now what do you do?



Good time to call TRW/Globe. When your product can't afford to fail (like this design for the Icarus Wing Co.), we can supply precision miniature motors that will protect you and calm the boss.

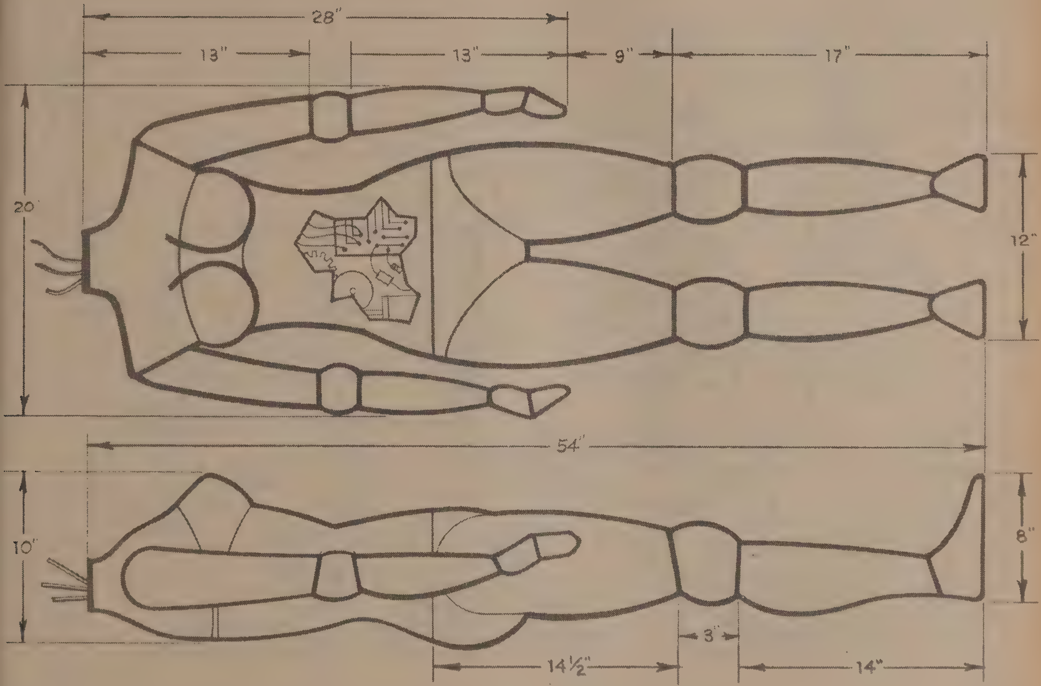
We learned about reliability the hard way, designing motors for military, aerospace, and nuclear applications.

Many commercial and industrial applications benefit from that "military" experience. They gain dependable performance, superior output per cubic inch, multiple functions in small "motion packages," and minimum interfacing, assembly, and inventory costs.

To learn more about protecting your product from failure, **write for our free booklet: "Protect Yourself."** TRW/Globe Motors, an Electronic Components Division of TRW Inc., Dayton, Ohio 45404 (513-228-3171).

TRW® GLOBE MOTORS

Your design was beautiful, but you got a hot mini motor and no space for cooling. Now what do you do?



Good time to call TRW/Globe. Chances are good we can rescue your dream design from the potential wastebasket.

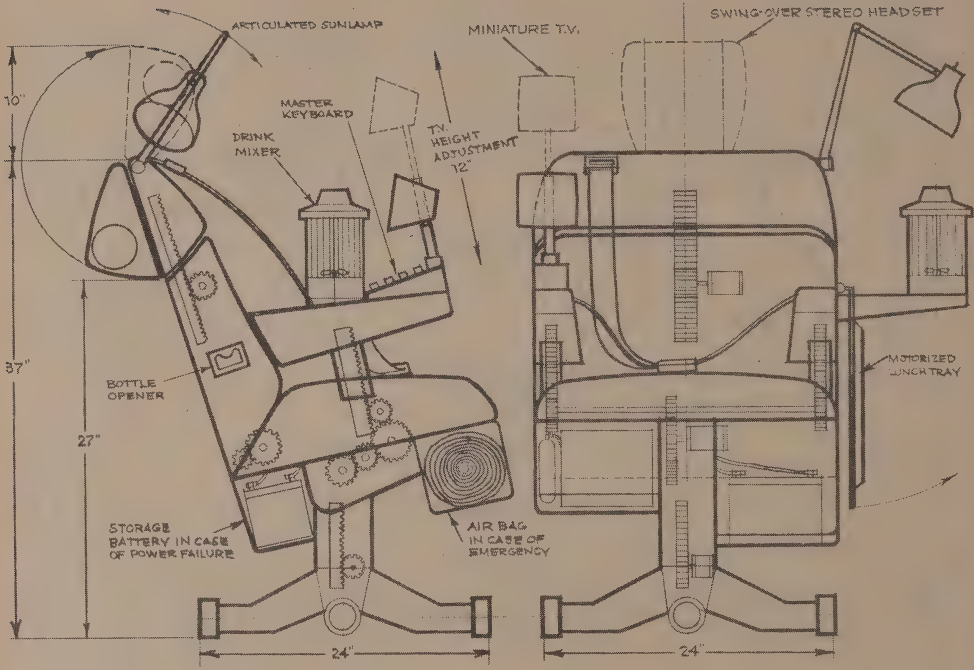
One of our precision miniature motors and blowers can probably fit the same shape with equal or better performance.

Designers constantly come to us with their occupational hazard: changing parameters. "Got to get more torque in the same space." "Now we need a limit switch and a brake." "Our service people want a motor they can forget." "Some dingaling forgot about this motor, so now it has to fit way back in there."

The ways we can help you cope with changing parameters are described in our **free booklet: "Quick-change Artists."** TRW/Globe Motors, an Electronic Components Division of TRW Inc., Dayton, Ohio 45404 (513-228-3171).

TRW GLOBE MOTORS

You tried a stock mini motor and added a bunch of detail parts, but it's a mess of assemblies. Now what do you do?



ARTICULATED SUNLAMP
MINIATURE T.V.
SWING-OVER STEREO HEADSET
MASTER KEYBOARD
DRINK MIXER
T.V. HEIGHT ADJUSTMENT 12"
10"

27"
BOTTLE OPENER
MOTORIZED LUNCH TRAY
STORAGE BATTERY IN CASE OF POWER FAILURE
AIR BAG IN CASE OF EMERGENCY
24"
24"

Good time to call TRW/Globe. We can build a "motion package" that will cost less than your cheap motor with a lot of kluge hung onto it.

TRW/Globe motion packages combine multiple functions to save space, simplify purchasing, eliminate assembly and interfacing costs, and reduce inventory problems.

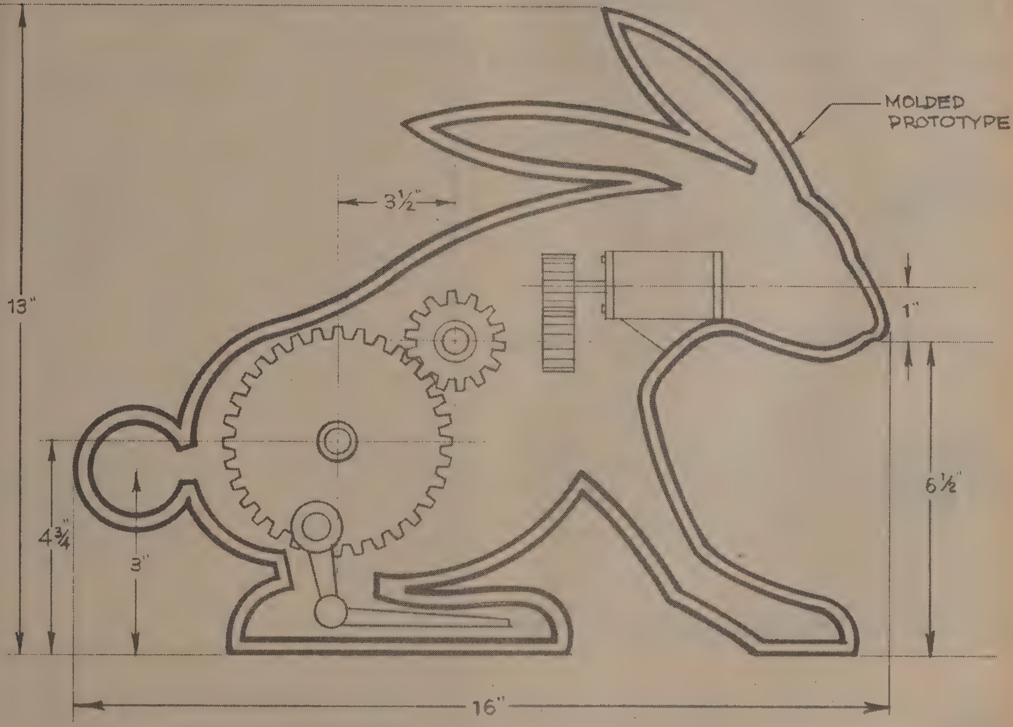
For example, a recent package combined motor, gearing, limit switch, mechanical stop, slip clutch, electro-mechanical brake, and filter in one complete unit measuring just a few cubic inches.

We're the largest builder of precision miniature motors that will do that for you.

For more information about our "motion packages" **write for our free booklet: "The Simplifiers".** TRW/Globe Motors, an Electronic Components Division of TRW Inc., Dayton, Ohio 45404 (513-228-3171).

TRW® GLOBE MOTORS

You need a prototype mini motor from a very fast guy who can make 200,000 when your design's final. Now what do you do?



Good time to call TRW/Globe. Our Small Order department is hopped up to build and deliver prototype precision miniature motors quick like a rabbit.

Then, when you're ready to multiply that prototype into thousands, we have 191,000 square feet of plant and equipment to handle volume production.

Our new plant in Dothan, Alabama, is designed and equipped specially for production runs of commercial and industrial precision miniature motors.

So whether you need one motor or a million, you'll find us the fastest thumpers in the briar patch.

For more information on this uncommon capability, **write for our free booklet: "The Multipliers."** TRW/Globe Motors, an Electronic Components Division of TRW Inc., Dayton, Ohio 45404 (513-228-3171)

TRW® GLOBE MOTORS

TORQUE SYSTEMS
INCORPORATED

Snapper Series Wide Bandwidth
DC SERVO MOTORS

The SNAPPER is a high performance permanent magnet field DC servo motor for use in both direct drive or geared servo systems. It is capable of high speed, low speed, control through zero speed, as well as plugging and operation at stall. The SNAPPER line is so named because of its very high torque capability in a totally enclosed, non ventilated frame. The excellent thermal capacity of the SNAPPER makes it possible to operate severe servo duty cycles without overheating. Its rotor construction is not subject to warpage, or to the extreme temperature cycles that plague designs of lesser thermal capacities and ruggedness.

Motor/Tachometer/Encoders

Torque Systems Incorporated can provide an integral shaft encoder for each of its Snapper Series DC Servo Motors with or without integral DC tach generators. The available options for the encoder include:

- Any number of lines/revolution up to 1000
- Up to 3 tracks—2 signal (phase quadrature) plus marker pulse
- Sine wave or square wave TTL outputs

For assistance in ordering encoders with your motor or motor/tach, call or write the factory sales office.

LOW RIPPLE MATING DC TACHOMETERS are available for all SNAPPER Series Motors (see next page).

FRAMELESS (unhoused) DC SERVO MOTORS (Model 9800 Series) are also available in three standard sizes with peak torque ratings from 25 to 100 ft/lbs. Designed for direct mounting on the load shaft, they have excellent acceleration and smooth running speed to make them suitable for antenna drives, gyro rate tables, machine tools, etc.

Snapper Series Wide Bandwidth
DC SERVO AMPLIFIERS

NOTE: Torque Systems offers a complete line of dual polarity power supplies.

These high performance amplifiers are all silicon transistor, linear, bi-directional class B, short-circuit protected and ruggedly built for tough environments. They are priced for high volume use. Detailed Application Notes on each model plus immediate quotations on special amplifiers are available on request.

BI-POLAR OUTPUT (REQUIRES SINGLE POLARITY POWER SUPPLY)

PACKAGE	SPECIFICATIONS	PRINCIPAL FEATURES
PA-122 Length 3.5 Width 1.8 Height 0.47 	Output Watts = 60 Output Volts = ±22 Output Amps = ±3 Internal Dissipation: Peak Watts = 60 Average Watts with 1.2°C per watt heat sink = 35 Response, Full Power = 20 KHz Voltage Gain = 25 v/v Power Supply Volts = +28	Bridge type amplifier designed for use with single polarity, +28 volts supply. Fast response power booster for IC Op-Amps. Mating Socket PC-120 for convenient location of input, balancing, and current limit adjust components. Use with heat sink HS-200 or equivalent.
PA-223 Length 4.7 Width 2.8 Height 0.62 	Output Watts = 110 Output Volts = ±22 Output Amps = ±5 Internal Dissipation: Peak Watts = 150 Average Watts with 0.12°C per watt heat sink = 130 Response, Full Power = 1.0 KHz Open Loop Gain = 100,000 v/v Power Supply Volts = + 28	Bridge type amplifier designed for use with single polarity power supply. Nominal supply volts = +28 only, and minus reference voltage is internally generated. Unit includes "inhibit" input for clamping output to zero volts. Use with heat sink HS-200 or equivalent. Mating socket is PC-220.
PA-301 Length 12.4 Width 7.7 Height 6.7 	Output Watts = 1000 Output Volts = ±25 Output Amps = ±40 Internal Dissipation: Peak Watts = 1400 Average Watts = 700 Response, Full Power = 1.5 KHz Open Loop Gain = 20 v/v Power Supply Volts = +35 Reference Supply Volts = −15 ±5	Designed as a power stage for severe average as well as good peak power, from a single power supply. Contains provisions for front end "plug ins" internally, and has its own heat sink and fan. Available at 40 volts output, and also with a pulse power capability to 2000 watts.

BI-POLAR OUTPUT (REQUIRES DUAL POLARITY POWER SUPPLY)

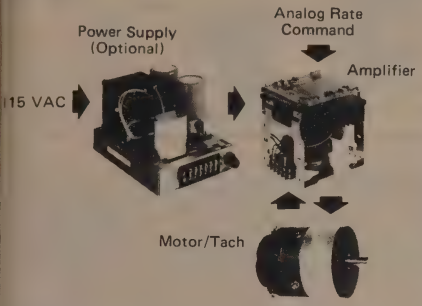
PA-011 Length 2.0 Width 1.1 Height 0.62 	Output Watts = 20 Output Volts = ±20 Output Amps = ±1 Internal Dissipation: Peak Watts = 20 Average Watts = 5 Response, Full Power = 5 KHz Open Loop Gain = 20,000 v/v Power Supply Volts = ±24	Designed for PC card mounting, for driving small servo motors, valves, solenoids, etc. Gain is sufficient for high performance applications. Feedback components for gain shaping to be mounted on same PC card. Unit is epoxy molded for maximum reliability. Mating socket is PC-1001.
PA-112 Length 3.5 Width 1.8 Height 0.47 	Output Watts = 60 Output Volts = ±20 Output Amps = ±3 Internal Dissipation @ 25°C: Peak Watts = 80 Average Watts with 1.2°C per watt heat sink = 40 Response, Full Power = 10 KHz Open Loop Gain = 60,000 v/v Power Supply Volts = ±24	Designed for "plug in" applications utilizing mating socket and servo feedback component board PC-110. Rated for driving size 32 and larger DC motors. Must be mounted onto model HS-200 heat sink or equivalent for full performance.
PA-601 Length 8.0 Width 4.4 Height 2.0 	Output Watts = 525 Output Volts = ±35 Output Amps = ±15 Internal Dissipation: Peak Watts = 600 Average Watts Using 50 CFM Forced Air = 350 Response, Full Power = 5 KHz Open Loop Gain = 60,000 v/v Power Supply Volts = ±40	Designed for high acceleration low cycle servos, where large peak power is involved. Amplifier contains provisions for feedback components, and its own heat sink extrusion. Optional fan and bracket is FB-200.

225 Crescent Street • Waltham, Massachusetts 02154 • (617) 891-0230

Snapper Series Wide Bandwidth

ANALOG CONTROL SERVO SYSTEMS

For Speed Control or use as Stable Inner Loops

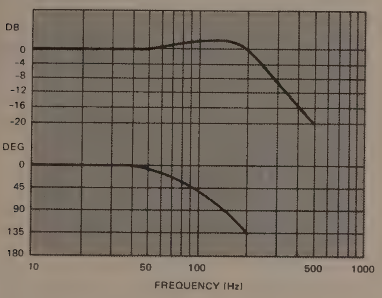


The SNAPPER Series of wideband, direct drive, servo systems consists of a low inertia, permanent magnet, DC motor/tachometer and a transistorized servo controller. In contrast to an SCR control system, the high gain and wide bandwidth of the SNAPPER system assures response to rapidly varying command signals, rejection of torque disturbances and freedom from parameter variations. In addition to precise average speed regulation, it minimizes instantaneous speed fluctuations.

Features include:

Choice of Output Power	**—.01 to .5 HP**
Wide Speed Range	**—2000 to 1 bidirectional**
Precise speed regulation	**—1 RPM from no load to full load**
Low Flutter	**—1% instantaneous speed variation**
Excellent Linearity	**—1% of set speed or 1 RPM**
Fast Dynamic Response	**—Over 200 Hz servo bandwidth**

Typical Gain and Phase vs Freq (Closed Loop)



Partial Listing

The several standard speed control systems below represent only a few configurations. Many other speed/torque combinations can be supplied.

*The servo compensation is based upon load inertias of zero to twice the motor/tach inertia. Higher load inertias may require the adjustment of a single feedback resistor.

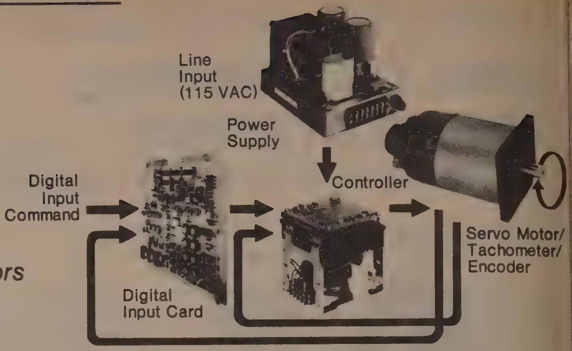
DIGITAL CONTROL SERVO SYSTEMS

The logical replacement for stepper motors providing high-speed control of shaft position and accuracy possible only with a closed-loop digital servo system.



Line Input (115 VAC)
Power Supply
Controller
Digital Input Command
Servo Motor/ Tachometer/ Encoder
Digital Input Card

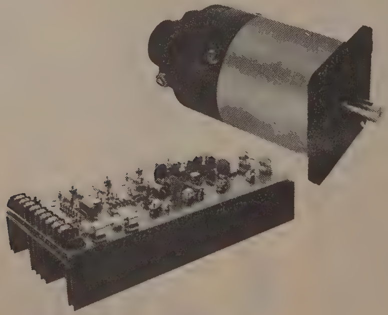
- **COMPLETE SYSTEMS include all necessary components direct from the actual manufacturer—Motor/Tachometer/Encoder Assembly, Power Amplifier, Power Supply and from 1 to 3 Digital Input PC Cards**
- **HORSEPOWER RATINGS from 1/20 to over 1/2 HP continuous duty**
- **ACCELERATIONS to over 300 rpm per millisecond**
- **SLEW RATES to 50,000 steps per second**
- **OVERSHOOT CONTROL by simple feedback adjustment**
- **SELECTABLE ENCODER RESOLUTIONS to 2,000 steps per revolution**

System Operation

Digital control features of DS Systems are achieved by means of a feedback Encoder integrally mounted on the Motor/Tachometer (shown above) plus one or more Digital Input Cards (right). This digital circuitry is available for control of ANY of the rate loops described on the previous page, thereby providing a very wide choice of torques and speeds.

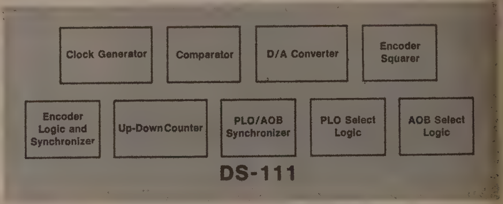
The inner velocity loop (Motor/Tachometer, Rate Loop Controller and Power Supply) provides fast response time and a tolerance for widely varying load conditions.

Bi-directional shaft positioning is provided by each TSI system in response to TTL compatible digital input commands which are accepted at very high rates without loss of steps and with minimum positioning time.



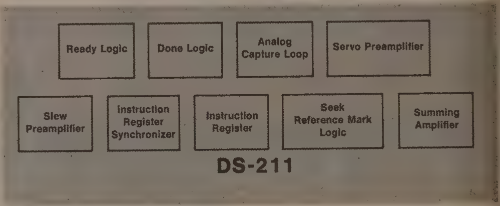
Three Digital Input Cards Provide a Full Range of Options

(Detailed descriptions of these PC cards and their functions are contained in the 12-page Torque Systems' DIGITAL POSITION SERVO CONTROL Catalog.)



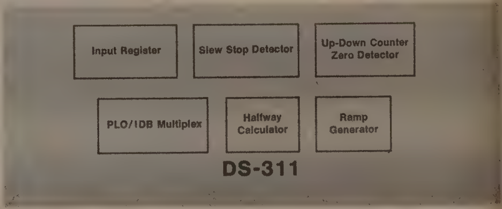
Clock Generator
Comparator
D/A Converter
Encoder Squarer
Encoder Logic and Synchronizer
Up-Down Counter
PLO/AOB Synchronizer
PLO Select Logic
AOB Select Logic
DS-111

INCREMENTAL CONTROLLER CARD DS-111
is the basic card required for all systems. It accepts a serial pulse train and permits control of either position or velocity. The DS system incorporating DS-111 effectively replaces a stepper motor.



Ready Logic
Done Logic
Analog Capture Loop
Servo Preamplifier
Slew Preamplifier
Instruction Register Synchronizer
Instruction Register
Seek Reference Mark Logic
Summing Amplifier
DS-211

MODE PROGRAMMER CARD DS-211,
used in conjunction with DS-111, permits a programmed series of commands to be fed into the system. It includes provisions for homing in on a positional reference pulse. An analog capture loop on this card provides continuous position feedback information when the digital error is less than 1 bit, thus eliminating jitter.



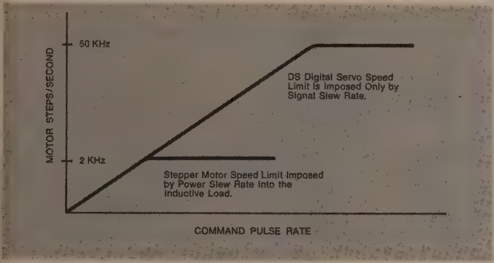
Input Register
Slew Stop Detector
Up-Down Counter Zero Detector
PLO/IDB Multiplex
Halfway Calculator
Ramp Generator
DS-311

OPTIMUM MOTION PROFILE COMPUTER CARD DS-311
used with DS-111 and DS-211 cards, accepts BCD or binary coded incremental position commands. Using information from a half-way calculator, it computes the optimum response profile and defines the acceleration/deceleration curves to achieve it.

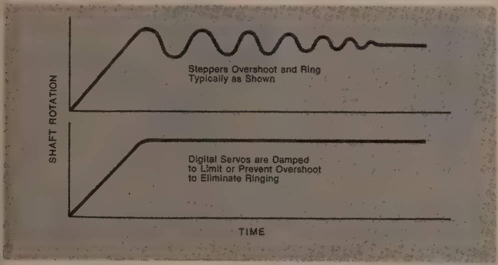
225 Crescent Street ● Waltham, Massachusetts 02154 ● (617) 891-0230

DS Digital Servo Systems are
- *Faster than the Fastest Stepper Motor*
- *Programmable—Internally or Externally*
- *Available as Modules or Prepackaged*

Speed Comparison of Digital Servo vs. Stepper Motor Performance



SPEED COMPARISON



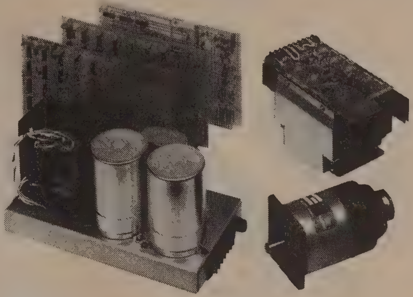
STABILITY COMPARISON

Programmability of DS Digital Servo Systems

The DS digital servo contains features to permit programming either externally or by automatic internal sequencing (any sequence) or a combination of both. The several operating modes available in the standard DS System are:

NOP	Standby Mode	up/down counter is cleared and all other instructions ignored
SRM	Go to Reference Mark	reference mark is usually an externally generated pulse
AOB	Stepper Mode	Motor will take one step per input pulse
IDB	Advance by 12 Bit Data Word in Minimum Time	uses internal halfway computer
PLO	Feed Rate Mode	operates as servo phase locked to an external frequency
GTD	Absolute Position Mode	advances to any absolute position up to 1,000,000 steps from reference mark under external feed-rate control

Do It Yourself—Or Have Us Do The Packaging



As Modules

A modular DS Digital Servo System includes the following items of Torque Systems' hardware:

1. Motor/Tachometer/Encoder Assembly
2. Rate Loop Controller Module
3. Line to DC Power Supply Module
4. One or more Digital Input Cards (as required)

The Motor and Controller which constitute the DS Systems Analog Rate Loop are power-matched.

or Prepackaged

Torque Systems is prepared to provide all help necessary to specify a system tailored to your exact requirements. The DS Systems Catalog includes performance data and instructions on how to order Digital Servo Systems.

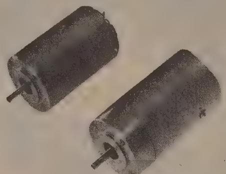
military & commercial

The quality, performance and life of the prototype you get from Wertonix is the same as you get in production. And we can deliver just as fast as a cross-town distributor.

Special low torque speed reducer, enclosed and special blower.

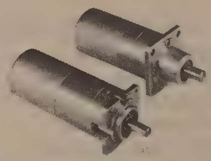
Ratings @ continuous duty.



1/100 & 1/65 hp, 3-50 vdc,
4500 to 24,000 rpm,
1-1/4 D. x 2-1/32".

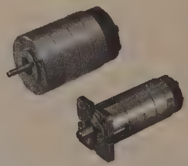
1/45 & 1/30 hp, 3-115 vdc,
3500 to 12,650 rpm,
1-1/2" D. x 2-15/16".

G'Box torques to 1600 oz. in.,
3-115 vdc, 0.53 to 3446 rpm,
1-1/2" D. x 4-37/64".

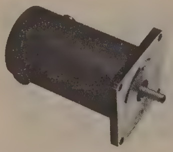


G'Box torques to 1250 oz. in.,
3-50 vdc, 0.2 to 6300 rpm,
1-1/4" D. x 4."

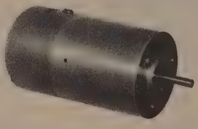
50 & 100 vdc/1000 rpm
tach/generator,
3-1/14" D. x 6-1/2";
Low ripple & high linearity.



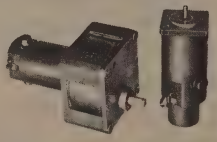
1/100 & 1/65 hp, 3-50 vdc,
4900 to 16,400 rpm,
1-1/4" D. x 1-3/4".
Available with G'Box.



1/12 & 1/10 hp, 6-115 vdc,
2600 to 8550 rpm,
2-1/8" D. x 4".



7, 20, 35, & 45 vdc/1,000 rpm
tach/generator,
1-1/4" D. x 3-1/4". Ripple —
3% RMS, Alnico V magnet
for good linearity.



Special high torque speed reducer with tach/generator.

SQD DEPARTMENT Super Quick Delivery

Work directly with the people who design and build to your standard or special requirements — from sketch or phone call. We can build to specs from scratch, often within 24 hours.

VERNITRON

vernitorq® BRUSHLESS DC TORQUE MOTORS

■ Limited rotation, wide angle ■ Infinite resolution for precise positioning ■ Direct drive for increased sensitivity, and response ■ Simplified design for economy, compact packaging.

Elimination of brushes, use of toroidal field windings and permanent magnet rotors provides smooth operation without slot effect. Infinite resolution and high linearity result, allowing these motors to provide high accuracy in positioning, actuating, tensioning, measuring and indicating applications for both military and industrial use.

Vernitorq motors develop high torque with low input power and high acceleration rates which make it possible to couple them directly to the driven load without gears. The elimination of gearing aids response and eliminates backlash, gear tooth resilience, acceleration attenuation and other disadvantages of gearing.

Brushless and gearless operation eliminates electrical and mechanical noise, and explosion hazard. It also reduces the number of moving parts and associated friction wear.

Vernitorq brushless DC torque motors are available in two and four-pole configurations, in a variety of sizes and outputs.

The motors are normally supplied "frameless" — without housing, shaft and bearings. Housed versions, with or without mounting flanges, are also available for all units.

OVER 100,000 STRONG

Every month over 100,000 buyers and specifiers like yourself receive Electronic Products Magazine . . . that makes us the largest electronics magazine around. And we're the largest for a darn good reason . . . we give you what you need: a practical editorial approach . . . one that's application and new product oriented. Editorial that offers solutions to the problems you face in your everyday task of designing and building electronic systems and subassemblies. The type of information you can put to use now.

If you're not getting EPM . . . why not write our circulation manager for a qualification form and join the over 100,000 strong.

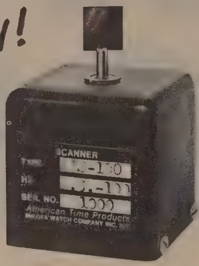
BULOVA® Optical Scanners,*

Frequencies from 10 Hz to 16 KHz   Scan Angles to 30°
Available with Drivers

NEW!



Tracks input signal with precise linearity whether waveform is ramp, triangular, sawtooth, step or any combination from d c to design frequency band. X–Y mounts available for raster scan.

LINEAR (ANALOG) SCANNER

This new electromagnetic scanner, Model ALS-100, from Bulova has a veritable host of new features which the optical systems engineer can apply to solve design problems. Here are just some of the things it can do:

Scan a field up to 30° pp – up to 100° pp at lower frequency available.
Scan any portion of that field around a selected "center" left or right of true center.
Hold at any static angle in its field, move and hold again.
Center automatically with current off.
Track any analog input with good linearity—mirror position is proportional to input current.
Mirrors to 30mm X 30mm standard, larger for lower frequencies.

It does all this and much more in a compact package that uses very little power < 30mA/degree. The model ALS-100 has an operating frequency range from dc to 100Hz.

If you have requirements other than shown for the specified model above please contact us.

Low Cost Lock-In Amplifier

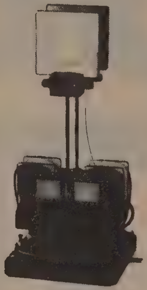
Bulova has designed a low-cost Lock-In Amplifier for use with scanners, choppers and other instruments in applications where it is desired to distinguish and pull out weak signals from high back-ground noise. It is available in three forms: cased as a lab bench instrument, for standard rack mounting or for incorporation without casing as a module in OEM's instrumentation.

For details see Bulova Lock-In Amplifier ad in Volume 1.

Typical Torsion Bar Type

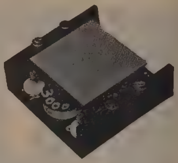
Type L45
1-1/2" x 1-1/2" x
approx. 3" high

Dual Mirror Torsion Bar



Type L44
3/4" x 1" x
approx. 3" high

Taut Band



Type L50
1-7/16" x
1-7/16" x 5/8"

GENERAL SPECIFICATIONS

(The principle of operation and general features are given on facing page.)

Scanners are produced in two basic types, torsion bar, with single or dual mirrors, and taut band, capable of handling large mirrors.

TORSION BAR

Type L45: Single Mirror
Type L44: Dual Mirror
Frequency: L45, 600 Hz to 16 KHz; L44, 100 Hz to 600 Hz (any fixed discrete)
Accuracy: ±2% standard
Scan Angle, P to P: 10° max reduces to 2° at higher frequencies. L44, 20° max
Mirror Size: 30mm x 30mm max, reduces as frequency increases
Power: 500 milliwatts, max. with driver

TAUT BAND TYPE L50

Frequency: 10 Hz to 400 Hz (any fixed discrete)
Accuracy: ±2% standard
Scan Angle, P to P: 30° max, reduces with frequency increase to 5° at upper end.
Mirror size: 30 x 30mm, standard max. (This type scanner also can mount larger mirrors.) Reduces as frequency increases.
Power: 500 milliwatts max, with driver

MIRRORS

Flatness: 1/2 wavelength standard, 1/4 or better available
Stock Sizes, mm: 30 x 30, 20 x 20, 15 x 15, 10 x 10, 7 x 7, 5 x 5, 2 x 3.

*Patents pending and issued

Choppers, Modulators*

Frequencies from 5 Hz to 3 KHz   Many Modulation Patterns
Available with Drivers

OPERATING PRINCIPLE AND BASIC FEATURES

The same basic principle, mechanical resonance, is involved in the three basic types of units which are the foundation of Bulova's line of Optical Scanners and Light Choppers.

Application of this principle enables design of optical scanning and chopping devices which have many advantageous properties. Chief of these are:

- Reliability: No rotating parts, no bearings, no lubrication; hence no wear and no service problems
- Excellent Accuracy: ±1% usual, ±0.1 attainable. Can be any discrete fixed frequency, even fractions of a hertz
- Small Size: Down to 0.5 in ^{3} and less than 0.5 oz.
- Low Power: In milliwatt range.
- Virtually Drift Free: Exceptional stability with time, excellent temperature characteristics
- Reference Signals: Inherently available through driver Also, an optional, isolated pick-up can be incorporated directly in the scanner or chopper as a signal source.
- Environment: Withstand vibration to 20g, shock to 100g; temperature from cryogenic to 250°C; altitude to space vacuum; radiation $>2 \times 10^{13}$ NVT.
- Raster Scan: X-Y mounts and slaved units provide synchronized raster scan.

Existence of a broad range of stock designs enables Bulova to supply prototype and production quantities to customer specification on short lead time.

GENERAL SPECIFICATIONS

Choppers and Modulators are available in three basic types: tuning fork, torsion bar and taut band. The torsion bar and taut band mount single vanes, the tuning fork, pairs of vanes. Configuration and mounting positions of the vanes control beam modulation patterns.

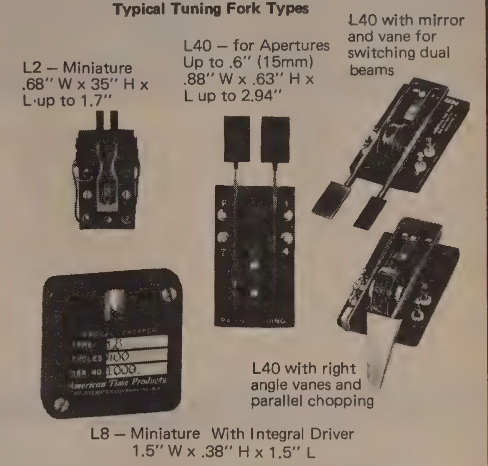
TUNING FORK

Type L2: Miniature (.68 W x .35 H x L to 1.7")
Type L8: L2 with integral driver (1.5" W x .38" H x 1.5L)
Type L40: (.88 W x .63 H x L up to 2.94)
Frequency: 10 Hz to 3000 Hz (any fixed discrete)
Frequency: (any fixed discrete)
  L2 Range 200 to 3000 Hz
  L8 Range 200 to 2000 Hz
  L40 Range 10 to 1000 Hz
Aperture; Max (L40): Width 0.6", length .63". All reduce with increase in frequency
Accuracy: ±1% Standard, special to 0.1%
Power: 500 milliwatts max., with driver

TAUT BAND TYPE L51C

Frequency: 5 Hz to 100 Hz (any fixed discrete)
Accuracy: ±2% standard
P to P: 30° max. reduces with frequency increases to 5° at upper end. Excursion a function of vane length
Vane: Length 1 1/2" x 1" max. Can chop 1 or two beams to 0.60" diameter. Reduces with frequency increase to 0.30" dia. max. at 100 Hz.
Power: 500 milliwatts, max., with driver

Typical Tuning Fork Types



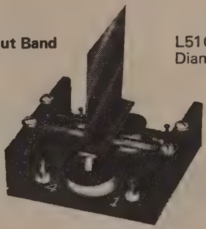
L2 – Miniature .68" W x 35" H x L up to 1.7"

L40 – for Apertures Up to .6" (15mm) .88" W x .63" H x L up to 2.94"

L40 with mirror and vane for switching dual beams

L40 with right angle vanes and parallel chopping

L8 – Miniature With Integral Driver 1.5" W x .38" H x 1.5" L



Taut Band

L51C – for Large Diameter Beams

DRIVERS

The scanners and choppers can be driven in any one of three modes:

1 Closed loop at the natural frequency of the fork, torsion bar or taut band with negative feedback from the pick-up coil;
2 Open loop at the natural frequency; or
3 In a phase lock or frequency lock loop.

Electrical or mechanical dampening can be included to reduce Q. In addition, automatic gain control can be added where extreme precision in amplitude is desired. Drivers can be supplied to operate from a DC source having an AC input. All drivers provide a reference signal for synchronizing other devices and instruments. Furthermore, an isolated pick-up can be incorporated directly in the chopper or scanner as a reference signal source.

Bulova designs and manufactures drivers. However, engineering assistance is offered to customers desiring to build their own drivers.

From Bulova Electronics Division: Frequency Control Components • Crystals • Crystal Oscillators • Monolithic Crystal Filters • Fork Oscillators • DC Servo Amplifiers • 400 Hz Servo Amplifiers • Optical Devices • Choppers and Scanners • Frequency Changers • Inverters • Lock-in Amplifiers

CL603AL	.25 X .5	3.5K		170	75
CL703	.36 X .18	133K		300	125
CL703A	.36 X .18	67K		300	125
CL703L	.36 X .18	2.7K		100	125
CL903	.21 X .15	133K		250	50
CL903A	.21 X .15	67K		250	50
CL903L	.21 X .15	6.0K		100	50

Type 3 CdSe, peak spectral response 7350 angstroms, fast response, and very high light-to-dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps.

CL504	.5 X .5	1.5K	1:400	250	500-250[1]
CL5M4	.55 X .18	1.5K		250	2000-500[1]
CL504L	.5 X .5	0.25K		170	500-250[1]
CL5M4L	.55 X .18	0.25K		170	2000-500[1]
CL604	.25 X .5	30K		300	75
CL604L	.25 X .5	1.5K		170	75
CL704	.36 X .18	30K		300	125
CL704L	.36 X .18	0.6K		100	125
CL904	.21 X .15	30K		250	50
CL904L	.21 X .15	2K		100	50

Type 4 CdSe, peak spectral response 6900 angstroms, lowest resistance photocells available. Can be used for "on-off" applications when low resistance is desired. For use with incandescent or neon lamps.

CL505	.5 X .5	9K	1:100	250	500-250[1]
CL5M5	.55 X .18	9K		250	2000-500[1]
CL505L	.5 X .5	1.5K		170	500-250[1]
CL5M5L	.55 X .18	1.5K		170	2000-500[1]
CL605	.25 X .5	166K		300	75
CL605L	.25 X .5	7.5K		170	75
CL705	.36 X .18	166K		300	125
CL705L	.36 X .18	3.3K		100	125
CL905	.21 X .15	166K		250	50
CL905L	.21 X .15	10K		100	50

Type 5 CdS, peak spectral response 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps.

CL705HL	.36 X .18	28K	1:1000	100	125
CL905HLL	.21 X .15	15K	1:1000	60	50
CL905HL	.21 X .15	100K		100	50
CL905HN	.21 X .15	700K		100	50

Type 5H CdS, peak spectral response 5500 angstroms (closely matches the human eye). Combines high speed, stability, linearity, and uniform color temperature response.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL507	.5 X .5	7.2K	1:300	250	500-250[1]
CL5M7	.55 X .18	7.2K		250	2000-500[1]
CL607	.25 X .5	133K		300	75
CL707	.36 X .18	133K		300	125
CL707L	.36 X .18	2.7K		100	125
CL907	.21 X .15	133K		250	50
CL907N	.21 X .15	66K		100	50

Type 7 CdS, peak spectral response 6150 angstroms, moderate speed and ratio. Can be used in general beam breaking applications. For use with incandescent, neon or fluorescent lamps.

CL707H	.36 X .18	500K	1:1000	300	125
CL707HM	.36 X .18	100K		250	125
CL907H	.21 X .15	600K		250	50
CL907HN	.21 X .15	300K		100	50
CL907HL	.21 X .15	24K		100	50

Type 7H CdS Peak Spectral response 6200 angstroms. Very fast decay time coupled with low resistance and high linearity. Ideal for beam breaking applications.

Photocell ordering abbreviation	Diam. X Length (inches)	Resistance @ 2 fc ± 33⅓%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)	Type
CL703/2	.36 X .18	50K	1:10,000	300	125	3 CdSe
CL703L/2	.36 X .18	6.5K	1:10,000	100	125	3 CdSe
CL704/2	.36 X .18	17K	1:400	300	125	4 CdSe

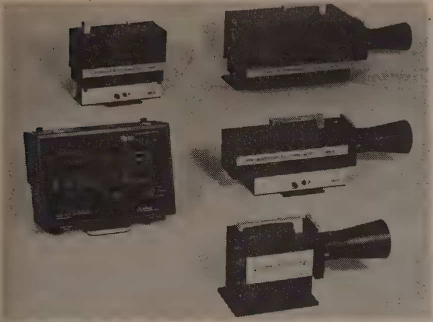
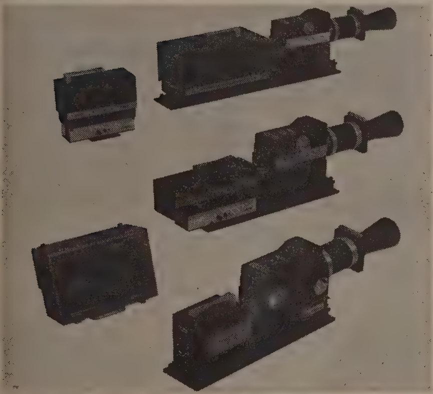
LIGHT MEASUREMENT INSTRUMENTS



MODEL 580 RADIOMETER/PHOTOMETER SYSTEMS

The Model 580 Systems provide fast, accurate measurements of optical radiation in radiometric and photometric terms. The systems are inherently capable of measuring both continuous (cw) sources as well as pulsed events as fast as one nanosecond in duration. An autoranging digital panel display provides readings of average power and integrated energy. The Detector Heads also have provision for oscilloscope display of pulsed light signals so that wave shape measurements can be made, i.e., peak power, pulse duration, and rise and fall times. The spectral range is from 0.2 μm (200 nm) in the ultraviolet to 3.2 μm (3200nm) in the near infrared. The overall dynamic range is over fifteen decades (full scale) of light intensities. The basic system concept can be used in a great variety of applications due to the designed modular approach of interchangeable Detector Heads and accessories. The Model 580 has become an industry standard for most laser output measurements.



MODEL 580/585 SPECTRORADIOMETER SYSTEMS

The Model 580/585 Systems add a digital grating monochromator and additional optics onto the Model 580 Radiometer Detector Head, thereby allowing absolute measurements of the power and energy of chromatic cw and pulsed light sources as a function of wavelength. A truly functional system with provision for recorder ouput and BCD computer interface, the 580/585 can measure over a 12-decade range of light levels. The system can also be used as a radiometer and photometer.

MODEL 550 RADIOMETER/PHOTOMETER SYSTEM

The Model 550 Radiometer/Photometer provides fast, precise measurements with direct readings in 12 photometric and radiometric units. The direct readings, which are easily taken from a 3½ digit panel meter and digital decade indicator, eliminate the need for post measurement calculations. The system is both manual and autoranging over seven full scale decades. Measurements can be obtained of both pulsed and continuous sources with excellent accuracy, repeatability, and stability. Provision for ambient compensation permits its use outside of a dark room environment. High sensitivity is achieved through the use of a single, low noise silicon multiprobe detector.

MODEL 450 PHOTOMETER/RADIOMETER SYSTEM

The Model 450 Photometer/Radiometer System is a lower cost version of the Model 550 System. It is similar in capability to the Model 550 except for one less decade of sensitivity, fewer units of direct readout, and the lack of the autoranging feature.

Other standard light measurement instruments together with accessories and optical calibration standards are available.
E G & G also offers complete optical calibration services.

CUSTOM PHOTODIODES

In addition to these standard photodiode products, E G & G engineering and production capabilities permit the design and fabrication of custom photodiode devices. Special configurations such as larger and smaller areas, circular and rectangular active areas, arrays, matrices can be manufactured per specific customer requirements. Inquiries for both small and OEM quantities are welcome.

XENON FLASHTUBES

Xenon flashtubes. dc krypton arc lamps, and long arc Xenon lamps are available from E G & G in a wide variety of configurations and envelope materials. Tubes are available in linear, bulb-type, helical, "U" shape, coaxial, and air or liquid cooled designs. Envelope materials include quartz, UV inhibiting quartz, and hard glass with a wide range of bore and arc length sizes. Custom configurations are available upon request.

Common applications involve the use of these lamps as the primary light source for:

Laser stimulation
Photocopy systems
Phototypesetting machines
Microfiche systems
Strobes
UV curing of polymers
Marine, aircraft and satellite beacons
Warning beacons
Photoresist exposure
Large area indoor lighting

HEWLETT PACKARD
COMPONENTS

Isolators and Photodetectors

PIN PHOTODIODES

- High Speed — <1 ns
- Low Light Level Detection
- Wide Dynamic Range — dc to 1 GHz
- Low Noise
- Wide Spectral Response — UV to IR
- Low Capacitance

ISOLATORS

- High Speed — to 10M bit/s
- Low Input Currents — from 0.5 mA
- High CTR — to 800%
- Performance Guaranteed over Temperature Range
- TTL Compatible Output
- High Common Mode Rejection
- U.L. Recognized Component
- High Density Packaging

PIN Photodiodes

OPTICAL CHARACTERISTICS AT 25°C

	Max.					2500		3.6×10^{-14}
5082-4220	Min.			0.57×10^{12}				
	Typ.	1.0	2×10^{-3}		<1			
	Max.						5000	8×10^{-14}

NOTES:

1. Response at 770 nm may be described as a RESPONSIVITY, R ≈ 0.5 μA/μW corresponding to a quantum efficiency, η ≈ 0.75 electron/photon.
2. Specification includes lens effect.
3. For further information ask for AN 915 on Threshold Detection with PIN Photodiodes.

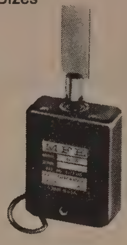
OPTICAL SCANNING MOTORS

FOR ALL OPTICAL AND MECHANICAL SCANNING APPLICATIONS:

- Moving Iron Motors
- High Reliability
- Up To ±15° Deflection
- High Frequency Response
- Long Life
- Tangent Corrected Response
- Low Power
- Four Frame Sizes



DESCRIPTION

MFE Optical Scanning Motors are a development of the highly proven MFE moving iron motor technology. All MFE scanning motors feature high reliability, long life, low-power consumption, and up to ±15° deflection.

Typically, MFE Scanning Motors are internally compensated for tangent corrected response. Tangent correction is provided such that the deflection of the image on a flat projection plane is directly proportional to driving current.

Accessory equipment such as mirrors, mirror mounts, drive amplifiers and power supplies can be provided with the Scanning Motors. The aluminized mirrors with silicon oxide protective coating have one wave per inch flatness and are available in a variety of sizes. Special mirrors to satisfy individual requirements are available.

PERFORMANCE SPECIFICATIONS

Model	S4-025	S4-050			S4-075			S4-150	
Spring Selection	A	A	B	C	A	B	C	B	C

Cross Section (inches)	2x1⅛	2x1⅛	2x1⅛	2x1⅛	2 x 1⅛	2x1⅛	2x1⅛	2x1⅛	2x1⅛
Height (inches) (L)	1 11/32	1 9/16	1⅝	1⅝	1 27/32	1⅝	1⅝	2 9/16	2 9/16

PEN MOTORS

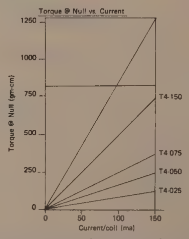
Output rotation is tangent corrected to facilitate use in edge writing oscillographs. The R-4 Series Motors have been successfully used in many thousands of strip chart recorders which are now employed in the medical monitoring field as well as other industrial applications. When used with a stylus of less than 25 gram-cm² inertia, 100 Hz or better 3 db frequency response is easily attainable.

PERFORMANCE DATA

	Units	R4-077	R4-155
Rotation	degrees	±14.5	±14.5
Rotor Inertia	gm-cm²	4	8
Null Torque (Minimum)	gm-cm	350	750
D.C. Power for full scale	watts	1.5	2.0
Natural Frequency (no load)	cps	90	100
Linearity	% of p.t.p.	±.75	±.5
Hysteresis	% of p.t.p.	±.75	±.5
Weight	ounces	9	16
Cross Section	inches	1⅛ x 2	1⅛ x 2
Height, overall	inches	1⅝	2½
Height of stack	inches	.77	1.54
Resistance*	ohms/coil	14	22

* Each motor is wound with two coils which may be used in series or parallel.

TORQUE MOTORS



The proprietary MFE Series T-4 limited rotation torque motors are moving iron devices. The high performance of these units makes them widely applicable in the actuator field. The features are small size, ruggedness, low power and high stability. The output torque and response time are as high as those of competing devices which exhibit hysteresis and nonlinearity greater by an order of magnitude. The T-4 Series is designed for maximum torque in applications requiring ±15° rotation such as:

- Servo systems
- Process control
- Optical systems
- Stable platforms

Technical Information:

Standard spring stiffness values are:

A — 1350 B — 2850
C — 5700 gm-cm/rad 0 — No spring

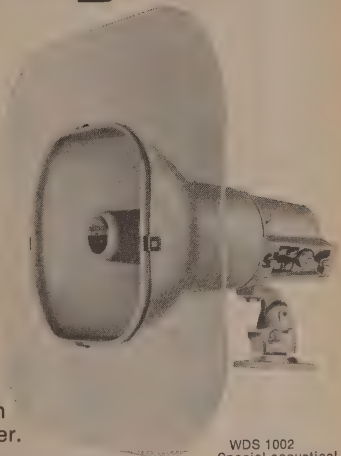
Standard units are supplied with rotor mounted on a spring and bearings. Other configurations with single or dual flexures are available with small angle of rotation for extremes of environment or performance.

TYPICAL SPECIFICATIONS

Model No.	T4-025	T4-050	T4-075	T4-150
Maximum Torque at Null (gm-cm)	125	250	350	750
Power at Rated Torque (watts)	0.7	0.9	1.0	1.5
Coil Resistance/ coil (ohms)	15	19	22	32
Rotation	±15°	±15°	±15°	±15°
Inertia (gm-cm²)	1.3	2.6	4	8
Linearity	0.2% — 2.0% peak-to-peak			
Force Hysteresis	0.2% peak-to-peak			
Motion Hysteresis	0.2% — 1 % depending on mounting			

the SOUND of security.

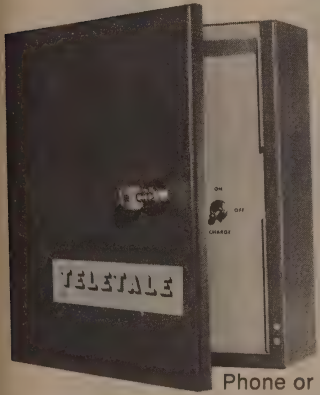
It warns intruders to stay out, and triggers the alarm if they don't.



WDS 1002
Special acoustical
sensor/transducer

There's nothing quiet about the Teletale surveillance system. But that's the idea behind it—to discourage break-ins and prevent costly damage and trouble. Teletale sends out a continuous, audible tone (840 Hz) that makes intruders think twice. If they ignore it, intrusion is sensed immediately and a relay activates to sound an alarm, switch on auxiliary equipment or signal a security center.

You can rely on Teletale. Because the sensing frequency responds only to movement of man-sized objects. It rejects other mechanical and electrical disturbances which are apt to trigger false alarms, such as those that occur in high frequency, ultrasonic or microwave systems. Attempts to disarm it will trip the alarm circuit.



WDS 2001
Teletale master
motion detector

The basic Teletale system consists of a solid state master motion detector, and a special sensor that fills each area with an audible tone. Up to eight sensors can be used to cover larger areas, separate locations or remote buildings. The Teletale sensors can be used for paging, local warble alarm or audio monitoring applications. The master unit has both normally closed and normally open contact outputs. Even during power failure, rechargeable batteries in the master detector will provide uninterrupted service for over 24 hours. The batteries are recharged automatically when AC power is restored.

Installation is simple as well as day-to-day operation.

Phone or write for Technical Information and Specifications.

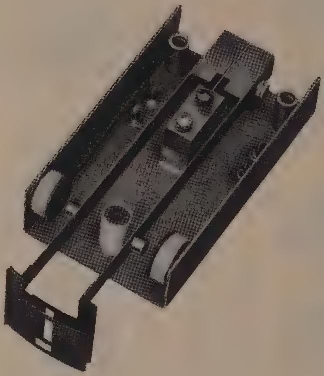
FORK OSCILLATORS

Output frequencies from 1.0 to 20,000 Hz. Absolute frequency accuracies from ±.10% to ±.001%. Operating temperature ranges up to from −55°C to +100°C depending upon accuracy. Wide choice of DC inputs from 5 to 28 volts and output waveshapes such as logic-clock, square or sine. Full MIL shock and vibration environmental capability, hermetically-sealed designs. Also ultra low current versions, miniature sizes, specials to suit either your performance or packaging requirements.

FORK OPTICAL MODULATORS

Frequencies from 40 to 1,000 Hz . . . for modulating or chopping either light or energy beams. May often be used to replace motor driven choppers, offering weight and power savings plus no need to lubricate. Particular design and construction provides exceptional fork balance and high resistance to shock and vibration for most MIL specs. Tine ends may be fitted with shutters, lenses, or mirrors to suit your special requirements, various drive circuits available.



COMING SOON . . .

Still smaller oscillators, a greater selection of fork optical modulators, and new optical scanning devices.

PHILAMON® SPECIALIZES in top performance and top reliability products. For latest information, for complete application cooperation, for prompt service on standards or specials . . . phone, write, or twx . . .

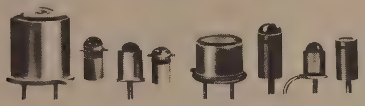
OPTOELECTRONIC PRODUCTS FROM SPECTRONICS

Whether your requirements are for opto chips, components, assemblies or systems—call Spectronics *first*. We make optoelectronics work . . . for you!

DISCRETE PHOTOTRANSISTORS & LEDs

Spectronics offers the industry's largest selection of standard optoelectronic components. Included are detectors in phototransistor, photodarlington and photodiode configurations that directly replace popular industrial types. High performance GaAs LED's are available also in standard industrial types. For special applications, non-standard devices are available upon request.



OPTICALLY COUPLED ISOLATORS

Spectronics offers the first 5KV isolator in the popular 6-pin dual in-line package. These components are directly inter-changeable with standard industrial 6-pin isolators. The complete Spectronics line ranges from miniature hybrid couplers to hermetically sealed TO-5 packages for both photodarlington and phototransistor versions.

OPTICAL SWITCHES

Spectronics low-cost optical switches are available in the industry's largest selection of standard device types. Direct replacements for such popular devices as the H13A1, A2; H13B1, B2; MCA 8, 81 and MCT 8, 81 are available at competitive prices. Six popular Spectronics switches are offered with off-the-shelf delivery, in both phototransistor and photodarlington versions.

REFLECTIVE ASSEMBLIES

Standard reflective assemblies are offered in four basic configurations in both phototransistor and photodarlington versions. These low-cost assemblies are available with off-the-shelf delivery.

Spectronics
INCORPORATED
830 East Arapaho Rd., Richardson, Texas 75080
(214) 234-4271 TELEX 73-0890

CUSTOM ASSEMBLIES

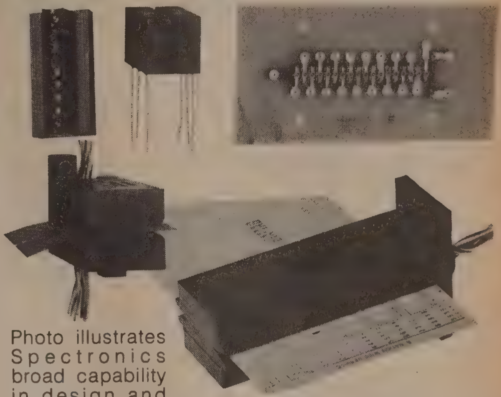


Photo illustrates Spectronics broad capability in design and manufacturing of custom optical assemblies. Units shown range from PC board arrays to specially configured optical switches with such features as aperturing, to functional card and tape readers containing complete logic circuits.

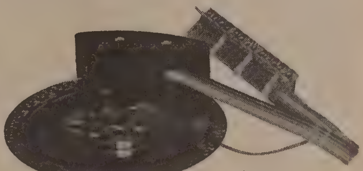
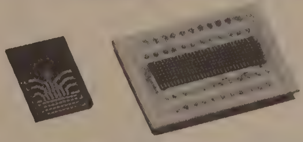
PRECISION ENCODERS



Spectronics precision rotary optical encoders used in encoding altimeters, numerical control machine tools, and other measuring instruments. The units are available with from 1 to 10 data channels and with analog signal or digital signal outputs. The code disc is typically manufactured using chrome on glass. Construction is all solid state utilizing light emitting diodes and phototransistors.

CUSTOM VISIBLE LEDs (IN RED AND GREEN) & IR DETECTORS



Spectronics offers state-of-the-art performance in linearity, element size and spacing with linear, staggered and x-y select configurations available. Capability ranges from VLEDs to detectors available in silicon, indium antimonide, indium arsenide and mercury cadmium telluride. Up to several hundred individual elements offered in a variety of packages and dewars.

PHOTOCONDUCTIVE CELLS

LIGHT DEPENDENT
RESISTORS

Photoconductors are thin films of CdS or CdSe on a ceramic substrate.
The material is designated by the second digit (0, 1, 2, 3, 4 or 7) of the part number.

Material	0 - CdS	1 - CdSe	2 - CdS	3 - CdS	4 - CdSe	7 - CdS

CUSTOM POWER SUPPLIES—VENUS SCIENTIFIC, INC. also will build custom power supplies to your specifications. Frequently an "off the shelf" power supply can be selected from stock, thus providing a considerable saving in cost and time, in addition to using a proven design.

If, however, a custom power supply is necessary, VENUS will be glad to offer a quote. Please contact our Engineering Sales Department for further details.

FEATURES

- Digital Sine Wave Generation.
- Switching Power Transistors.
- High Efficiency.
- Input and Output Protected with Fuses and/or Circuit Breakers.
- Convection Cooled.
- Low Output Distortion.
- Regulated Output Voltage.
- Short Circuit Protected with Automatic Restart upon Removal of Short.

PRODUCT & APPLICATION GUIDE

acdc electronics inc.

THIS CATALOG WILL GIVE YOU THE WHOLE STORY

It takes 48 pages to describe the breadth of the ACDC line. Forty-eight pages crammed with specifications, dimensions and technical information on 400 standard power supplies plus rack systems and custom designs. And, there's another 24 pages of engineering data . . . information that will make it easier for you to choose the correct power supply for your system.

The catalog is free. Just write for it.

GENERAL SPECIFICATIONS

(See back page for weights and dimensions)

	OEM & TR	CD CARD TYPE	HCM HIGH CURRENT	JP & JT ① HIGH EFFICIENCY TRANSISTOR SWITCHING	PCM MINIATURE PLUG-IN
OUTPUT					
Single	5 to 32V, up to 36A	5 to 30V, up to 1.5A	5 to 28V, up to 100A	5 to 24V, up to 150A	5 to 24V, to 200mA
Dual	±12 & ±15V, up to 2.7A	±12 & ±15V up to .42A	—	Available—consult factory	±12 & ±15V, to 400mA
Triple	5/±12 & 5/±15V, up to 10A	—	—	5/±12 & 5/±15V, up to 50A	—
Input	105-125 VAC or 210-250 VAC, 47-63 Hz (some models useable at 400 Hz, consult factory for proper derating). 100 VAC, 50 Hz available			115/230VAC 47-63 Hz 48 VDC, 100 VAC, 50 Hz available	115 VAC 50-400Hz (230 VAC available)
Load Regulation	0.1% +5mV NL-FL. ±0.1% ±5mV for ±10% input variation.				Singles: ±.02% Duals: ±.02% Logic: ±.04%
Ripple	2mV RMS and 20mV P-P max.			5mV RMS max., 50mV P-P max.	Singles: ±0.5mV RMS Duals: ±0.5mV RMS Logic: ±1.0mV RMS (4mV P-P max)
Temperature Stability	Typical 10mV for eight hour period after initial warmup.			0.1% +5mV for 8-hour period after initial warm-up	
Transient Response	Output voltage returns to within regulation limits within 50µsec in response to a 50% step change in load current.			Output voltage returns to within 1% in less than 500 µsecs following a 50% load step	
Remote Sensing	Terminals are provided to maintain regulation at the load, compensating for the DC voltage drop in the load cable.				
Remote Voltage Adjustment	Remote voltage adjustment is provided. Consult factory.				
Ambient Temperature	Operating: See tables for output rating vs. temperature. Storage: −55°C to +85°C.				Storage: −25°C to +85°C
Overload Protection	All models are inherently protected against overload and short circuits of any duration. No fuses or reset buttons are used — automatic recovery is electronically accomplished.				Limited duration, current limiting
Over-voltage Protection (Optional)	Optional: Any model can be furnished with overvoltage protection which "crowbars" the output in the event of a rise in the output voltage of 10% or 2 volts (whichever is greater). On dual outputs, overvoltage protection "crowbars" both voltages to near zero in the event of a rise of one or both of the voltages of 20% or 4 volts (whichever is greater). (Fixed on CD series.)			Standard: Output is crowbarred and output power is removed when output voltage exceeds adjustable trip points. This protection is reset by recycling the input power.	Standard on logic modules only
Connector	Barrier strip termination	Power supply mates with standard PC edge card connector (22x 156x1/16" thick). Barrier strip available as option.	Barrier strip and Stud terminals	Barrier strip and stud terminals	Plug-in (mating sockets available)
Output Impedance	DC — 1KHz 0.001 R_L or 0.005 ohm max. 1 KHz-100KHz 0.005 R_L or 0.5 ohm max. R_L = rated load.		DC-1 KHz 003 ohm max. 1K-100 KHz 15 ohm max.	See additional specs for this series in note ① below.	200 Milliohms @ 10KHz
Temperature Coefficient	0.02%/°C max.				

①Additional JP Specifications:
A. Typical Efficiency: 70-80% B. Holdover storage 25m/secs C. External inhibit control (remote programming) D. Soft start circuit on turn on.

① Contact ACDC for voltages not listed.

② Usually in stock.

③ For smaller quantities, add the following to the base price listed above:

	Case R8	Cases R1-R5
1-4 pieces	$15	$25
5-9 pieces	10	15
10-24 pieces	See base prices above	
Over 24 pieces	Refer to factory	

④ For overvoltage protection, add to the base price:

Case R8	Case R1, R2 & R3	Case R4 & R5
$8	$10	$14

⑤ Overvoltage protection is built into the single output of the TR Series. For OVP on the dual output, add $10.

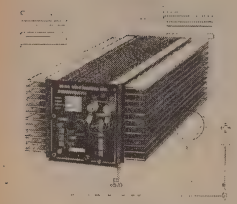
⑥ Covers: Add to the base price: (Add -2 to Model #)

Case R8	Case R1 & R2	Case R3, R4 & R5
$2	$4	$6

⑦ TR Series only. Optional 71°C operation: Add $15. (Standard Models are rated at 55°C. If the unit is to be operated at 71°C it must be specified when ordering so selected high temperature components can be included.

acdc electronics 401 Jones Road, Oceanside, California 92054, (714) 757-1880, TWX: 910-322-1470

JP SERIES HIGH EFFICIENCY SWITCHING POWER SUPPLIES



Smaller, cooler and more efficient than series-pass types, these 20KHz inaudible switching power supplies operate from a selectable input of 115/230 VAC, 47-63Hz (48 VDC & 100 VAC inputs also available), 70% efficiency, 0.1% regulation. Overvoltage and overload protection is standard① and EMI is minimized by shielding and filtering. (An optional built-in filter for compliance with MIL-STD-461, CE03 is also available④.) You get low inrush on turn on for soft start and can parallel switchers in master-slave configuration.

Conservative packaging density: A packaging density of approximately 1 watt per cubic inch was chosen as the optimum design. This includes a generous heat sink that minimizes temperature rise and permits the power supply to operate in free air (at 40°C or lower) at 100% of rated output.

JP SINGLE OUTPUT

Output Voltage ±5% Adj.	Output Current ③	Case Size	Model No.	Base Price Qty 1-9 ④
5	30	150	JP5N30	$295.00

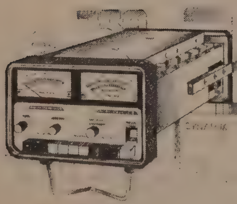
EL-750 SERIES PROGRAMMABLE ELECTRONIC LOAD TEST INSTRUMENT



EL-750 electronic load instrument tests performance of DC power sources. The EL-750 is a precision, programmable electronic load test instrument capable of dissipating up to 750 watts of DC power. It is a small, compact, portable unit designed for static and dynamic testing in laboratories, quality control and receiving inspection departments.

The EL-750 operates in either a constant current or constant resistance mode, selected with front panel push buttons.

Load current programming can be accomplished by a steady DC voltage level externally applied through a connector mounted on the rear panel. Dynamic loading is available in two modes: a square wave generator, built into the unit for testing at 1KHz or twice line frequency; or a variety of voltage waveforms (pulsed, ramp, square, sine, etc.) may be externally applied through the remote program input on the rear of the unit.

The EL-750 is 9.00″ wide x 6.00″ high x 17.3″ long and, without the case, is suitable for 5″ high half rack mounting. Price: $850.

For complete details on the EL-750, contact ACDC or your local ACDC representative.

acdc electronics 401 Jones Road, Oceanside, California 92054, (714) 757-1880, TWX: 910-322-1470

5 YEAR WARRANTY

When used within specified operating conditions, every catalog listed linear power supply is unconditionally guaranteed to meet all of its published specifications for a period of five years. JP and JT series power supplies are warranted under the same terms for eighteen months.

UL RECOGNITION

All 115 volt models in the OEM and HCM series are recognized under the Component Program of Underwriters' Laboratories, Inc. (File Number E48765)

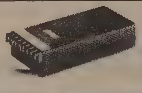
GSA

All ACDC power supplies are available under GSA contract number 95-00S-28294.

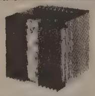
ORDERING INFORMATION

Model callouts: Order ACDC power supplies by model number and be sure to include the proper suffix for any options desired. (Example: OEM5N10-1 calls out the 5 volt, 10 amp model of the OEM series and also calls for built-in over voltage protection).
Prices: All prices quoted are in U.S. dollars, F.O.B. Oceanside, California. Terms are net 30 days.
Discounts: ACDC offers liberal quantity discounts to OEM buyers. Contact the factory or your local representative for a prompt quotation.

OTHER ACDC POWER SUPPLIES, ACCESSORIES AND CAPABILITIES

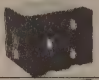


JR **MINIATURIZED HIGH EFFICIENCY SWITCHING POWER SUPPLY.** This compact, precision-regulated DC supply provides AC conversion, isolation, regulation and low output noise (only 25 mV p-p) in a slim, lightweight package. At only one-fifth the usual size, it's the answer to those "impossible" packaging problems. 0.1% regulation, 3 to 30 volts, up to 10 amps.



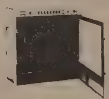
IC **OPTIMUM PERFORMANCE FOR IC APPLICATIONS.** A complete line of power supply modules designed to deliver optimum performance with IC circuits. Overvoltage and overload protection plus stability and regulation matched to the application make the IC series first choice in digital logic designs. 0.05% regulation, 5 volts, up to 25 amps.

OA **DUAL OUTPUT POWER SUPPLIES FOR DRIVING OP AMPS.** Built-in tracking and long-term stability are the special features of our OA series. Both regulation and temperature stability are optimized to assure the best performance for your op amp application. Size and weight are ideal for rack mounting. 0.01% regulation, ±12 and ±15 volts, up to 3.7 amps.



BX **PRECISION POWER SUPPLY MODULES.** All of the high performance features you need for ultra-critical applications are available in these precision power modules. For minimum output impedance and ripple coupled with outstanding regulation specify the BX series. 0.01% regulation, 2 to 28 volts, up to 20 amps.

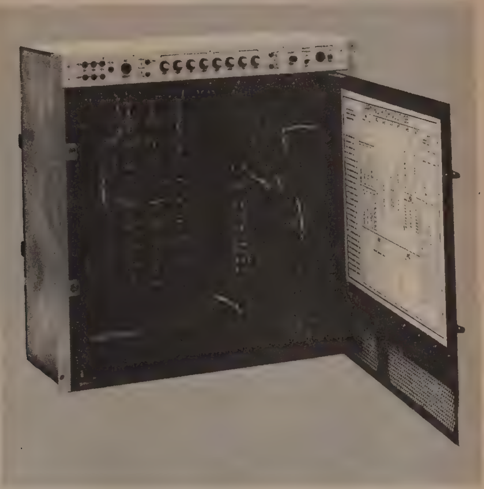
III **RACK SYSTEMS.** ACDC's standardized rack system provides you with a method for packaging total power system in a single compact unit . . . quickly, easily, economically. Five basic models, all designed to fit standard 19" racks. Available in kit form, factory assembled and/or factory wired.



CPS **CUSTOM POWER SUPPLIES.** ACDC has the ability to design a custom power supply for virtually any application. Past designs range from 400 Hz airborne power supplies to 3,000 amp power supplies incorporate such features as auto-progression, margining, sequencing, transistor switching, phase control and series regulation as well as special packing configurations. Call ACDC for your custom power supply requirements.

acdc electronics 401 Jones Road, Oceanside, California 92054, (714) 757-1880, TWX: 910-322-1470

CUSTOM POWER SUPPLIES



ACDC's ability to tailor a power supply to specific applications is virtually unlimited. As pictured on the following pages, it ranges from miniature 400Hz airborne power supplies to 3,000 amp power systems for state-of-the-art computer complexes. Many of these power supplies incorporate such features as auto-progression, margining, sequencing, transistor switching, phase control and series regulation as well as special packaging configurations.

Since these custom power supplies represent a substantial portion of the company's business, standard procedures have been established to facilitate the handling of these demanding requirements. This normally begins with the assignment of a cognizant engineer with complete responsibility for your project. His initial contact is made at the planning stage to assist you in determining the necessary special characteristics. (Incidentally, the technical section of this catalog contains an excellent article entitled "Ten Suggestions to Reduce the Cost of Custom Power Supplies"). The same project engineer stays with the job through production to assure that it stays right.

For large production orders, assembly lines are established, procedures are formalized and parts and other control systems are initiated. The Project Engineer maintains total responsibility for all phases of the program from initial design through assembly and test.

To assure conformance to customer specifications, complete documentation accompanies every custom power supply order. This documentation includes schematics, parts lists, instruction manuals and other collateral information deemed necessary for the satisfactory operation and maintenance of the system.

On the following pages we have presented some typical custom power supplies that have been produced by ACDC Electronics. They are not presented as a line, but merely as an indication of our capabilities. If your requirements are similar to those which we have met in the past or if they fall within the scope of our versatile capability, we would welcome the opportunity to discuss them with you.

acdc electronics

401 Jones Road, Oceanside, California 92054, (714) 757-1880, TWX: 910-322-1470

1. POWER SUPPLY FOR MINI-COMPUTER WITH CORE MEMORY.
Features: High power density. Protection circuitry for overload, overvoltage and overtemperature. Parallel capability. Power on/off control and sequence. Data save for undervoltage or AC line failure. **Input:** 105-129 or 210-258 VAC, 47-440 Hz, 1ϕ. **Outputs:** +15V @ 13.0A, +5V @ 12.5A, —5V @ 1.5A.

2. FOUR (4) POWER SUPPLIES FOR STATE OF THE ART COMPUTER SYSTEM. CONSISTS OF ECL, MOS, MEMORY SYSTEM CIRCUITRY.
Features: State of the art, high frequency SCR type regulators in the 5.2 and 22V units. Designed to meet UL 478. Logic interface signals for undervoltage, overvoltage, temperature, and overload. On/off sequence programming. The 5.2V units may be paralleled to provide 1800 amps. Overload protection is constant current. Thermal and overvoltage protection is automatic power shut down. High efficiency on 5.2 and 22V units. Forced air cooling provided. Remote voltage programming. **Input:** 208 VAC ±10%, 380-420 Hz, 3ϕ. **Outputs:** 5.2 VDC @ 300A, 22 VDC @ 270A, 6.5 VDC @ 10A Source, 50A Sink, 11.5 VDC @ 25A.

3. POWER SUPPLY FOR SHIPBOARD MILITARY DISC DRIVE SYSTEM.
Features: Primary fuse protection. Overload and overvoltage protection. Designed for forced air cooling. Ruggedized construction for shock and vibration. **Input:** 208 to 235 VAC, 380-420 Hz, 3ϕ. **Outputs:** +5V @ 25A, —5V @ 3A, —12V @ .7A, +25V @ 3.2A.

4. POWER SUPPLY FOR HAWK MISSILE INSTRUMENTATION.
Features: Military quality. Extended temperature range. Shock, vibration, humidity and altitude. **Input:** 117.5 VAC ±14.5 VAC, 380-420 Hz, 1ϕ. **Outputs:** +12V @ 1A, —12V @ 1A.

5. POWER SUPPLY FOR BLOOD ANALYZER.
Features: Separate AC inputs for sequence control. Plug in regulator assemblies. Convection and radiation cooled only. Low output impedance and fast recovery time. **Input:** 105-125 VAC, 47-420 Hz, 1ϕ. **Outputs:** 12 VDC @ 12A, 48 VDC @ 4A, 58 VDC @ 1A.

6. POWER SUPPLY FOR AUTO-REFRACTOR. PROVIDES FAST, ACCURATE AUTOMATIC MEASUREMENT OF THE OBJECTIVE REFRACTION OF THE HUMAN EYE FOR PRESCRIPTION OF CORRECTIVE LENSES. PRESCRIPTION IS PREPARED AS AN AUTOMATIC PRINT OUT.
Features: Designed to meet UL. Protection circuitry for overvoltage, undervoltage and overtemperature. Down sequencing and special interference rejection. **Input:** 105-130 VAC, 47-63 Hz, 1ϕ. **Outputs:** +15 VDC @ 3.5A, —15 VDC @ 3.5A, +5 VDC @ 6.0A, +7 VDC @ 8.0A.

7. DC POWER SUPPLY FOR CONTROL CONSOLE OF POWER DISTRIBUTION SYSTEM.
Features: Automatic failure indicators with redundant circuits for uninterrupted operation. Plug-in regulator assembly. AC and DC indicators. Spare components, diodes and transistors.
Input: 120 VAC ±10%, 47-63 Hz, 1ϕ.
Output: 24-26V @ 10A.

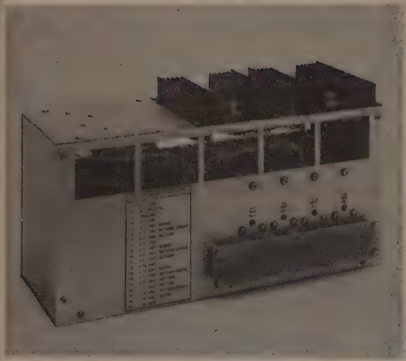
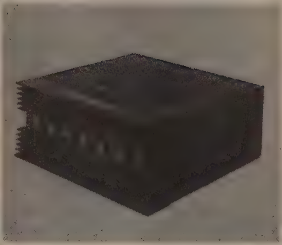
6



5



8. POWER SUPPLY FOR TERMINAL AND PRINTER ASSEMBLY.
Features: Fused primary protection. Overload and short circuit protection. Overvoltage protection on the +5V output. +27V output has pulse load requirement of 4 amps for impact printer. Droop less than .5 volts. **Input:** 105-125 VAC, 47-63 Hz, 1ϕ. **Outputs:** +5 VDC @ 5A, —12 VDC @ .2A, —5 VDC @ .3A. +27 VDC @ 10A plus 4A pulses.

9. SINGLE, DUAL AND MULTIPLE OUTPUT MIL-TYPE POWER SUPPLIES FOR SHIPBOARD VERSATILE AVIONICS SHOP TEST (VAST) EQUIPMENT AND CLASSIFIED AIRBORNE COMMUNICATIONS SYSTEMS.
Features: Fifteen (15) different models. Output voltages, 5V to 56 VDC. Output currents to 25 amps. Established reliability components. Severe environmental requirements including shock, vibration, humidity and temperature. High quality processing and workmanship.

10. POWER SUPPLY FOR MODEM MULTIPLEX COMMUNICATIONS SYSTEM.
Features: Unique mechanical envelope with provision for forced air cooling. Overload and overvoltage protection. Low output impedance and special filtering of 12 VDC @ 1.25A lamp supply. **Input:** 105-135 VAC, 47-440 Hz, 1φ. **Outputs:** +5 VDC @ 12A, +12 VDC @ .5A, —12 VDC @ .75A, 12 VDC @ 1.25A.

11. POWER SUPPLY FOR MEMORY EXERCISER.
Features: High power density. Protection circuitry for overload and overvoltage. Plug-in regulator PCB assemblies. Convection and radiation cooled. Remotely programmable outputs. **Input:** 103.5 to 127.5 VAC, 60 Hz, 1φ. **Outputs:** 5 VDC @ 20A, 5 VDC @ 1A, 125 VDC @ 50MA, 3-25 VDC Programmable @ .5A, 3-25 VDC Programmable @ .5A.

12. POWER SUPPLY FOR TRANSMITTER AND RECEIVER IN MICROWAVE RADIO EQUIPMENT. REMOTE, UNATTENDED LOCATIONS.
Features: Fault indication for ±25% tolerance band. Automatic recovery type overload and overvoltage protection circuitry. Voltage and current limit adjustments. Special shielding and primary to secondary interference rejection. **Input:** 115 or 230 VAC ±10%, 47-440 Hz, 1φ. **Outputs:** +15V @ .6A, +5V @ .5A, —15V @ .9A, —28V @ 1.2A, —28V @ .1A, +100V @ .2A.

13. POWER SUPPLY FOR CORE MEMORY COMPUTER SYSTEM.
Features: UL approved. Protection circuitry for overcurrent, overvoltage, undervoltage AC line detection and overtemperature. Sequencing, margin testing, status and fault indicators. The ultimate of pluggable modular construction for minimum mean time to repair (MTTR). **Input:** 208 VAC ±10%, 50-60 Hz, 3φ. **Outputs:** +15V @ 13A, —15V @ 7A, +5V @ 32A, —5V @ 22A.

14. POWER SUPPLY FOR DATA ACQUISITION SYSTEM.
Features: Primary control and protection. Output voltage and current meters. Self-contained forced air cooling. Overvoltage, undervoltage, overcurrent and short circuit protection, adjustable from front panel. Low ripple and output impedance. Overtemperature protection with automatic reset. **Input:** 105-132 VAC or 210-264 VAC, 47-65 Hz, 1φ. **Outputs:** 5.5 VDC @ 150A, +10.5 VDC @ 20A, —10.5 VDC @ 20A.

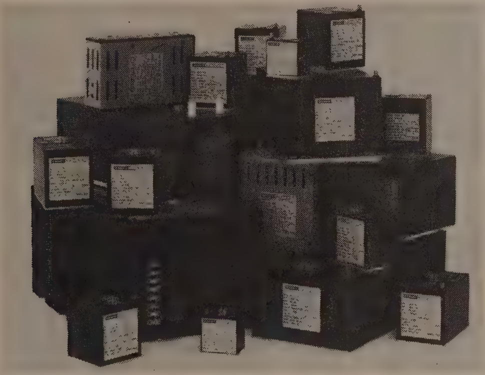
abbott Power Supply Modules

The Next 19 Pages List 913 Regulated Modules with Specifications and Prices



The most complete line of small size MIL-Spec and OEM type power modules available in the industry is fully described in the following 19 pages. The Abbott line of power modules includes output voltages from 3 volts to 100 volts DC, output current from 2 milliamperes to 20 amperes and output power from 1 watt to 300 watts. Sizes, weights, regulations and environments are shown for the various input and output powers. Abbott is proud to continue its policy of introducing new products to meet the growing demands of our customers by listing a completely new line of 28 VDC to DC power modules. The Model BN series is highly efficient (50-70%), is hermetically sealed, and it meets all military specifications. Look through the next 19 pages and you may find the power module you want is a standard Abbott model.

specifications

INPUT VOLTAGE RANGE: 105 to 125 volts AC
INPUT FREQUENCY RANGE: 380 to 420 Hertz, 1 phase
INPUT TRANSIENT PROTECTION: In accordance with MIL-STD-704A, Figure 3, Limit 1 (180 VAC for 0.1 sec.)
LINE REGULATION: ±0.2% for 105-125 VAC input, with load constant
COMBINED LINE AND LOAD REGULATION: ±0.5% for 105-125 VAC input and load variation of ½ to full load
RIPPLE: 0.2% RMS
SHORT CIRCUIT PROTECTION: Protected against short circuit conditions of any duration
VOLTAGE ADJUSTMENT RANGE: 12% by screwdriver adjustment
TEMPERATURE: +212°F (+100°C) Maximum at mounting base using adequate heat sink −65°F (−54°C) minimum at mounting base
RELIABILIIY: 70,000 hourse MTBF typical per MIL-HDBK-217 under worst case operating conditions. See Page **1•1053**.
ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc. See Page **1•1051**.
ISOLATION: Inputs, outputs, and case are isolated so that either a plus or minus output voltage polarity can be obtained
OUTPUT VOLTAGE AND CURRENT: See specific models listed

- RFI/EMI to MIL-STD-461
- Small
- Hermetically Sealed
- +100°C Operation
- 0.1% Regulation

specifications

INPUT VOLTAGE RANGE: 105 to 125 VRMS

INPUT FREQUENCY RANGE: 380 to 420 Hertz, 1 phase

INPUT POWER: Per MIL-STD-704A for category B equipment

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 105 to 125 VRMS with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv (whichever is greater) 25 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accesible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 750 vdc input to output and input to case • 200 vdc output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 vdc

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded

TEMPERATURE RANGE: Operating: −55° to +100°C maximum at center of mounting base
Storage: −55°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc. See Page 1•1051.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A Figure 3, Limit 1 (180 VAC for 0.1 seconds)

OVERVOLTAGE PROTECTION: Overvoltage protection modules are available for these units. Please see Page 1•1047 for further information

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

ELECTROMAGNETIC INTERFERENCE: Built to meet the requirements of MIL-STD-461 for generation of and susceptability to radiated and conducted interference

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217 under worst case operating conditions of full rated output current, 125 vac input voltage, and +100°C base plate temperature, has been calculated for typical units. Values are: W5D10 — 56,148 hrs; W95D0.3 — 47,393 hrs; WW3D0.3 — 67,385 hrs; WW30D4.0 — 48,618 hrs. See Page 1•1053.

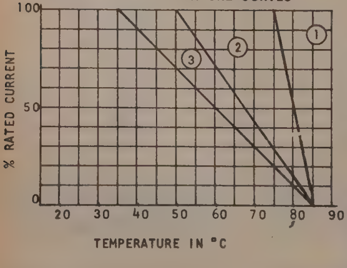
† Each Output

CURRENT VS TEMPERATURE CURVES



specifications

INPUT VOLTAGE RANGE: 100 to 132 VRMS

INPUT FREQUENCY RANGE: 47 to 440 Hz, 1 phase

EFFICIENCY: As high as 75%

OUTPUT VOLTAGE AND CURRENT: See specific models listed in table

LINE REGULATION: 0.04% or 5 mv (whichever is greater) for input change of 100 to 132 VRMS with load constant

LOAD REGULATION: 0.1% or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater); 50 mv (100 mv for duals) peak-to-peak maximum, measured with scope having 25 MHz bandwidth.

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer

ADJUSTMENT RESOLUTION:

Nom. Output Voltage	Resolution
3-16 vdc	35 mv
18-30 vdc	60 mv

ISOLATION VOLTAGE: 500 vdc input to output and input to case — 200 vdc output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 vdc

TEMPERATURE RANGE: Operating: −20°C to +80°C (see curves below)
Storage: −55°C to +85°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum — 0.01% per degree Celsius typical

SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal when the short is removed

INPUT TRANSIENT PROTECTION: 180 vac for 0.1 second

OVERVOLTAGE PROTECTION: Internal circuitry will reduce the output voltage to approximately 1 vdc within 15 microseconds if the output voltage rises 10% or 2 vdc (whichever is greater) above nominal. Available as an optional feature by adding "—1" to the model number and $10.00 to the 1-4 piece price ($20.00 for dual units)

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 200 microseconds in response to a step change of 50% in load current. Typical over/undershoot is less than 10% of output voltage

PARALLEL OPERATION: Any two identical single output units may be connected in parallel. Output should be derated to 90% of rated current

WEIGHT: 3.0 pounds maximum

ELECTROMAGNETIC INTERFERENCE: EMI filters are used in each unit for suppression of conducted interference

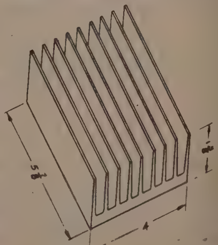
	Z1 Single Output	Z2 Dual Output
A	4	4
B	6	7¼
C	2¼	2½
D	1⅛	1⅛
E	¾	¾
F	4⅛	4⅛
G	2½	2½
H	¾	¾
J	5⁄16	5⁄16
K	1	1
L	1¼	1¼
M	1¼	1¼

DIMENSIONAL TOLERANCES: ± 1/16 UNLESS SPECIFIED

OUTPUT CURRENT VS TEMPERATURE

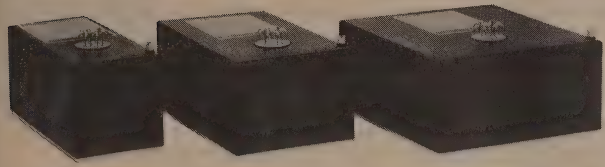
1) CONDUCTION COOLING — Mounting Surface 1 should be attached to a heat sink plate or chassis. The percentage of rated output current that may be drawn from any "Z" model at various mounting surface temperatures is indicated by Curve ①. Thus, 100% of the rated output current may be drawn at a **mounting surface temperature** of 75°C.

2) CONVECTION COOLING — A thermal finned radiator, Model TRZ1, may be attached to Mounting Surface 1. Using Mounting Surface 2, install the unit with fins in a vertical position. Curve ② indicates the percentage of rated output current that may be drawn from any "Z" model in this configuration at various **ambient temperatures.** Thus, 100% of the rated current may be drawn at 50°C **ambient temperature.** Model TRZ1, shown at right, adds 1⅜" to Dimension "C." Price is $5.00 each for 1 to 99 pieces.



3) RADIATION COOLING — Units may be installed on Mounting Surface 2 with **no** additional **heat sinking.** The percentage of rated current that may be drawn from any "Z" model at various ambient temperatures is indicated by Curve ③. The ambient temperature should be measured within ¼ inch of Mounting Surface 1 in still air. Thus 100% of the rated current may be drawn at 35°C **ambient temperature.**

abbott 60 ∿ to DC Hi-Efficiency



features

- Hi-Efficiency (64 to 77%)
- Low EMI
- Compact
- +160°F Operation
- Hi-Reliability
- Hermetically Sealed

specifications

INPUT VOLTAGE RANGE: 115 VRMS, ±10%

INPUT FREQUENCY RANGE: 47 to 440 Hz, 1 Phase

EFFICIENCY: Typical efficiency ranges from 64 to 77%

OUTPUT VOLTAGE AND CURRENT: See specific models listed in tables

LINE REGULATION: 0.4% or 50 mv (whichever is greater) for input change of 103.5 to 126.5 VRMS with load constant

LOAD REGULATION: 0.4% or 50 mv (whichever is greater) from no load to full load with line constant

RIPPLE AND NOISE (PARD): 0.2% plus 125 mv peak-to-peak from +25°C to +71°C. At 0°C peak-to-peak ripple increases to 0.4% plus 200 mv maximum. Measurements made with a scope having a 25MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

ADJUSTMENT RESOLUTION:

Nominal Output Voltage	Resolution
3-16 VDC	35 millivolts
18-50 VDC	60 millivolts

ISOLATION VOLTAGE: 500 VDC input to output and input to case, 100 output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 VDC

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded

TEMPERATURE RANGE: Operating: 0°C (32°F) to +71°C (+160°F) baseplate temperature. Storage: −55°C (−65°F) to +85°C (+185°F)

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Hermetically sealed and encapsulated to meet severe environmental requirements, including:
Vibration: MIL-STD-810B, Method 514, Procedure I, Curve H (±10g's) and Procedure XII. Also MIL-STD-167B, Type I
Shock: MIL-STD-810B, Method 516, Procedure II (75g's crash safety)
Humidity: MIL-STD-810B, Method 507, Procedure I
Saltspray: MIL-STD-983E, Paragraph 4.4.12
Saltfog: MIL-STD-810B, Method 509, Procedure I. See Page 1•1051.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration

INPUT TRANSIENT PROTECTION: Unit will withstand 180 VAC for 0.1 second in accordance with MIL-STD-704A, Figure 3, Limit 1

OVERVOLTAGE PROTECTION: Available as separate modules. See Page 1•1047 for complete information

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "Sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.3 volts in the load leads

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 7 msec. after a 50% step change in load current. Maximum over/undershoot is less than 0.8 VDC or 3% of the output voltage, whichever is greater

OUTPUT IMPEDANCE: DC to 1 KHz: .04 R_L or 0.1 ohm, whichever is greater. 1 KHz to 10 KHz: .06 R_L or 0.15 ohms, whichever is greater. 10 KHz to 100 KHz: .08 R_L or 0.4 ohms, whichever is greater.
R_L = Rated Load

ELECTROMAGNETIC INTERFERENCE: EMI filters are used in each unit for suppression of conducted interference

RELIABILITY: The Mean Time Betwen Failure (MTBF) per MIL-HDBK-217A under worst conditions of full rated output current, 126.5 VAC input voltage, and 40°C baseplate temperature was calculated to be 60,000 hours. See Page 1•1053.

Output Voltage Range	Output Current (Amps)	Size*	Weight (Lbs)	Model Number	Price 1-4 pcs

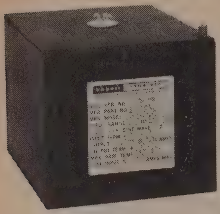
abbott transistor LABORATORIES, INCORPORATED

general offices
5200 W. Jefferson Blvd., Los Angeles, Calif. 90016
(213) 936-8185 Telex: 69-1398

eastern office
1224 Anderson Avenue, Fort Lee, New Jersey 07024
(201) 224-6900 Telex: 13-5332

abbott 60 ∿ to DC Hermetically Sealed



features

- Compact
- Hermetically Sealed
- Close Regulation
- High Reliability
- 5 to 740 Volts

specifications

INPUT VOLTAGE RANGE: 105 to 125 volts AC

INPUT FREQUENCY RANGE: 55 to 65 Hertz, 1 phase

INPUT TRANSIENT PROTECTION: In accordance with MIL-STD-704A, Figure 3, Limit 1 (180 VAC for 0.1 sec.)

LINE REGULATION: ±0.2% for 105-125 VAC input, with constant load

COMBINED LINE AND LOAD REGULATION: ±0.5% for 105-125 VAC input and load variation of ½ to full load

RIPPLE: 0.2% RMS

SHORT CIRCUIT PROTECTION: Protected against short circuit conditions of any duration. Output automatically recovers upon removal of short.

VOLTAGE ADJUSTMENT RANGE: 12% by screwdriver adjustment

TEMPERATURE: +160°F (+71°C) maximum at mounting base using adequate heat sink
−4°F (−20°C) minimum at mounting base
Storage: −30°C to +85°C

RELIABILITY: 80,000 hours (See Page 1•1053.

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810B including: altitude, vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc. (See Page 1•1051.

ISOLATION: Inputs, outputs, and case are isolated so that either a plus or minus output voltage polarity can be obtained.

OUTPUT VOLTAGE AND CURRENT: See specific models listed

abbott 28 VDC to DC (Reg.) Hi-Temp.

POWER MODULES

features

- Hi-temp. +212°F.
- 5 to 740 volts
- Hermetically sealed
- Short circuit protection
- Input spike protection

specifications

Input Voltage Range
24 to 30 volts DC

Line Regulation
±0.2% for input 24 to 30 VDC

Voltage Regulation
±1.5% for input 24 to 30 VDC and from ½ load to full load on Model B's
±2.5% for input 24 to 30 VDC and from ½ load to full load on Model BL's

Ripple
0.5 RMS — Model B's
1.0% RMS — Model BL's

Voltage Adjustment Range
12% by screwdriver adjustment

Input Transient Protection
In accordance with MIL-STD-704A, Limit 1, Category B (80 volts for 0.1 sec.)

Reliability
120,000 hours MTBF typical per MIL-HDBK-217 under worst case operating conditions See Page 1•1053.

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal).
Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-STD-810B and MIL-E-5400K, Class 2 See Page 1•1051.

Output Voltage and Current
See specific models listed
(Outputs and inputs are isolated)

Output Voltage Range	Output Current (Amps)	Size*	Wt. lbs.	Model Number	Price 1 pc.	Price 2-4 pcs.

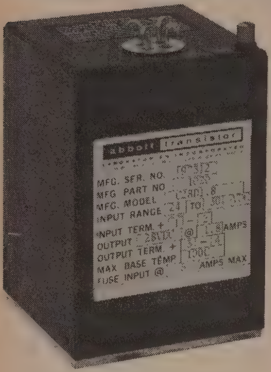
abbott 28 VDC to DC Hi-Performance Single & Dual Output



features

- Low Peak-to-Peak Ripple
- RFI/EMI to MIL-STD-461
- Small
- Hermetically Sealed
- +100°C Operation
- 0.1% Regulation

specifications

INPUT VOLTAGE RANGE: 24 to 30 vdc. Other input ranges are available

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 24 to 30 vdc with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for load change of no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 50 mv peak-to-peak maximum, each output, measured with scope having a bandwidth of 25 MHz

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer.

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 200 volts DC between input and output, input and case, and output and case.

INSULATION RESISTANCE: 50 megohms minimum at 50 volts DC between input and output, input and case, and output and case.

POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base.
Storage: −55°C to +125°C.

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Class 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc. See Page 1•1051.

SHORT CIRCUIT PROTECTION
Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

INPUT TRANSIENT PROTECTION: MIL-STD-704A, Limit 1, Category B (80 volts for 0.1 sec.).

OVERVOLTAGE PROTECTION: Overvoltage protection modules are available for use with these units. Please see Page 1•1047 for further information.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

ELECTROMAGNETIC INTERFERENCE: Built to meet the requirements of MIL-STD-461 for generation of and susceptability to radiated and conducted interference.

RELIABILITY: The mean time between failure (MTFB) per MIL-HDBK-217 under worst case operating conditions of full rated output current, 30 vdc input voltage, and +100°C base plate temperature has been calculated for typical units. Values are: C5D10 — 41,305 hrs; C95D0.25 — 55,463 hrs; CC3D3.5 — 34,710 hrs; CC30D3.5 — 20,105 hrs. See Page 1•1053.

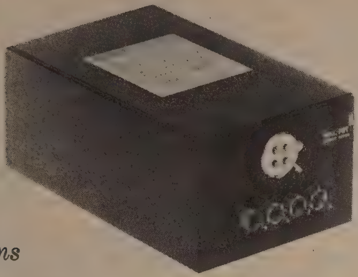
abbott DC to DC Hi-Efficiency



features

- Wide Range DC Input
- Up to 70% Efficiency
- EMI Filters
- Reverse Polarity Protection
- +100°C Operation
- Single & Dual Outputs

specifications

INPUT VOLTAGE RANGE: 20 to 32 VDC

EFFICIENCY: Typical efficiency ranges from 50 to 70%.

INRUSH CURRENT: Less than 8 times normal steady-state full load input current

LINE EFFECT (REGULATION): 0.5% for input change of 20 to 32 VDC

LOAD EFFECT (REGULATION): 0.5% for load change of no load to full load

PARD (RIPPLE & NOISE): 100 mv peak-to-peak, 25 mv rms from 25°C to +100°C; 130 mv peak-to-peak, 40 mv rms from −55°C to +25°C. Measured at power module terminals with measurement system noise bandwidth of 25 MHz

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Wider output ranges are available by restricting the input voltage range. Consult the factory for further information

ADJUSTMENT RESOLUTION:

Nominal Output Voltage	Resolution
5-10 VDC	37 mv
12-18 VDC	49 mv
24-31 VDC	75 mv

ISOLATION VOLTAGE: 100 VDC between input & output and input & case; 50 VDC between output & case

INSULATION RESISTANCE: 50 megohms minimum between input & output, input & case and output & case when measured at 50 VDC

POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating; −55°C to +100°C baseplate temperature. Derate maximum output current linearly above 85°C baseplate temperature to 80% of full load rating at 100°C baseplate temperature. Storage; −65°C to +125°C

TEMPERATURE EFFECT (COEFFICIENT): 0.03% per degree Celsius

ENVIRONMENT: Hermetically sealed and encapsulated to meet the environmental requirements of MIL-STD-810 and MIL-E-5400, Class 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

Output Voltage Range	Output Current (Amps)	Size*	Weight (Lbs.)	Model Number	Price 1-4 pcs.

	2.08	11J	2.9	BN50D-24A	325
	4.17	12F	4.4	BN100D-24A	425

*See Page 1•1048 for size charts

SHORT CIRCUIT PROTECTION: Each unit is completely protected against overloads (greater than 150% rated load) and short circuits of any duration. The output automatically restores to normal when the fault is removed

INPUT TRANSIENT PROTECTION: Each unit is completely protected against the transients of MIL-STD-704, Category B, (80 VDC for 0.1 sec) having rise times greater than 100 microseconds. Unit will turn off and resume operation when the input returns to normal

OVERVOLTAGE PROTECTION: Internal OVP is available as an optional feature and is indicated by adding "—1" to the model number (i.e.: BN25D-5A-1 indicates that OVP has been included.) The price is $15.00 additional on 1-4 pieces. The overvoltage threshold is factory set to approximately 2 V or 10% (whichever is greater) above the nominal output voltage. The OVP circuitry has a built-in delay of approximately 500 microseconds to minimize 'nuisance' tripping

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit can monitor the voltage directly at the load by using extra "sense" leads. The resulting circuit action will compensate for a DC voltage drop of up to 0.3 volts in the load leads

LOAD TRANSIENT RESPONSE: Output voltage returns to regulation limits within 2 ms after a 50% step change in load current. Maximum overshoot is less than 0.8 V

TURN-ON/TURN-OFF OVERSHOOT: No overshoot during turn-on into loads greater than half load. For loads less than half load, turn-on overshoot is less than 0.8 V for 25 ms. No turn-off overshoot under any conditions

OUTPUT IMPEDANCE:

DC-500 Hz	0.02 R_L or 0.04 ohms
500-5K Hz	0.10 R_L or 0.35 ohms
5K-100K Hz	0.30 R_L or 0.04 ohms

ELECTROMAGNETIC INTERFERENCE: Designed to meet the requirements of MIL-STD-461 for generation of conducted and radiated interference. Test report on a typical model is available

RELIABILITY: The Mean Time Between Failures (MTBF) per MIL-HDBK-217A under worst case operating conditions of 32 VDC input, full load output, and 100°C baseplate temperature was calculated to be 13,950 hours for Model BN100D-5A. At 71°C baseplate temperature, the MTBF increases to 23,000 hours

Output Voltage Range	Output Current (Amps)	Size*	Weight (Lbs.)	Model Number	Price 1-4 pcs.
26.6-29.4	0.89	10E	1.8	BN25D-28A	$275

±11.4 to ±12.6	1.04	10F	2.2	BBN25D-12A	325
	2.08	11J	2.9	BBN50D-12A	375
	4.17	12F	4.4	BBN100D-12A	450
±14.25 to ±15.75	0.83	10F	2.2	BBN25D-15A	325
	1.67	11J	2.9	BBN50D-15A	375
	3.33	12F	4.4	BBN100D-15A	450

Dual Output Units: 1) The output current listed is for each output.
2) The negative output is "semiregulated" and will meet regulation specifications only when operated into a balanced load.
3) The negative output will typically be within 4% of the positive output voltage for load imbalances up to 4:1 in magnitude.

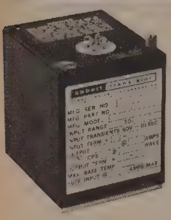
abbott DC to Sine Wave ∿1 ∅

DC to 400 Hz



POWER MODULES

features

- Close regulation
- 400 or 800 Hertz
- Hermetically sealed
- No moving parts
- Compact

specifications

Input Voltage Range: 24 to 30 volts DC. Other input ranges are available.
Line Regulation: ±0.5% from ½ to full load.
Frequency Stability: ±1%.
Voltage Adjustment Range: 12% by screwdriver adjustment.
Reliability: 55,000 hours MTBF typical per MIL-HDBK-217 under worst case operation conditions. See Page 1•1053.
Input Transient Protection: In accordance with MIL-STD-704A, Limit 1, Category B (80 volts for 0.1 seconds).
Environment: +212°F max. at mtg. base using adequate heat sink. −65°F min. at mtg. surface. Altitude: To vacuum (true hermetic seal). Vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, and explosion to MIL-E-5272C and MIL-E-5400K. See Page 1•1051.
Output Voltage, Current, and Frequency: See specific models listed (Outputs and inputs are isolated).
Output freqencies up to 1600 Hz are listed in our catalog as standard models. Contact our nearest office for your free copy.

Input Voltage Range	Output Frequency (Hertz)	Output Voltage Range	Output Power (Volt-Amps)	Harmonic Distortion (%)	Size (See Page 1•1048)	Weight (Lbs.)	Model Number	Price 1 Piece	Price 2-4 Pieces

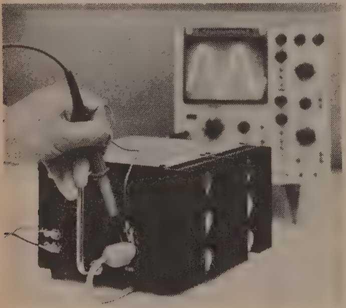
DC to 60 Hz



DC TO 60 Hz INVERTERS

features

- 115 VRMS 60 Hz Sine Wave Output
- 12, 24, 28, 36 VDC Inputs
- Low Cost
- High Reliability
- −20°C to +55°C ambient operation
- Reverse Polarity Protection

specifications

INPUT VOLTAGE RANGE: 11 to 15 VDC for KN's; 22 to 30 VDC for PN's; 29 to 38 VDC for LN's
OUTPUT VOLTAGE: 115 VAC ±2% at full load and nominal input voltage
OUTPUT FREQUENCY: 60 Hz ±2 Hz
LINE REGULATION: 3% for specified input voltage range with load constant
LOAD REGULATION: 3% for load change of half load to full load with line constant: 6% for change of no load to full load
WAVE FORM: Sine wave with maximum 5% distortion
LOAD POWER FACTOR: Full rated output VA from unity to 0.7 PF lagging or leading
EFFICIENCY: At full load and nominal input voltage: 40% minimum on KN's; 50% minimum on PN's; 58% minimum on LN's
OPERATING TEMPERATURE RANGE: −4°F to +131°F (−20°C to +55°C) ambient air temperature
INPUT TRANSIENT PROTECTION: 45 VDC for 0.1 second
ALTITUDE: 10,000 feet above sea level
OVERLOAD PROTECTION: Magnetic type circuit breaker

DELIVERY FROM STOCK

Abbott has designed a new line of quality, low cost DC to 60 Hz Sine Wave inverters. These units will convert DC battery voltage to regulated 60 Hz power to drive any AC equipment, such as, lamps, compressors, motors, televisions, radios, power tools, appliances, test equipment, etc. Surge current capabilities of these units is up to 3 times rated output power.

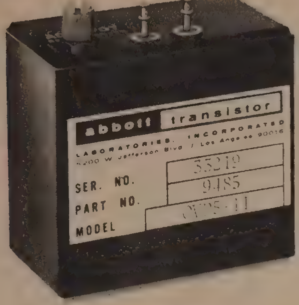
abbott Overvoltage Protectors



abbott transistor
LABORATORIES, INCORPORATED
5200 W. Jefferson Blvd / Los Angeles 90016
SER. NO. 33219
PART NO. 9485
MODEL OVP5-11

features

- Fast Response
- Adjustable Trip Voltage Setting
- Compact
- Hermetically Sealed

These modular overvoltage protectors will protect expensive circuitry, such as integrated or logic circuits, from damage which could be caused by an overvoltage condition. They are specifically designed for use with Abbott lines of hi-performance inverters and converters: Model C's, CC's, VN's, W's and WW's. If the power supply output voltage ever exceeds your pre-set trip-point voltage, the overvoltage protector will reduce the output to approximately one volt within 15 microseconds.

Model Number	For Use With Units Having A Nom. Output Voltage of:	Trip Point Adjust. Range	Price 1-99 pcs.
OVP5-11	5 to 11 VDC	6 to 14 V	$35
OVP12-24	12 to 24 VDC	14 to 27 V	35
OVP26-50	26 to 50 VDC	27 to 56 V	35
OVP55-75	55 to 75 VDC	55 to 90 V	35
OVP85-95	85 to 95 VDC	85 to 110 V	35

specifications

RESPONSE TIME: 15 microseconds maximum

RECOMMENDED TRIP-POINT SETTING: 10% or 2 volts (whichever is greater) above the output voltage of the power supply

OVERSHOOT VOLTAGE: 15% maximum above trip-point setting

TEMPERATURE COEFFICIENT: 0.05% per degree Celsius

OPERATING TEMPERATURE: −55°C to +100°C maximum at mounting base

STORAGE TEMPERATURE: −65°C to +125°C ambient

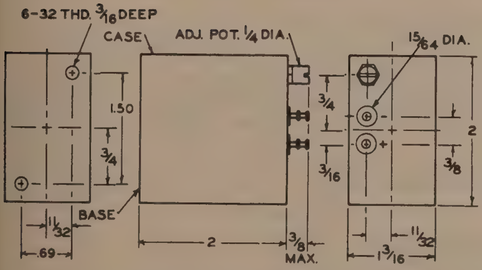
ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810B and MIL-E-5400K, Class 2, including altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

SIZE: See drawing

WEIGHT: 0.5 pounds

CONNECTIONS: The overvoltage protector should be connected to the Abbott power module as shown in Figure I. Use a Bussmann Mfg. Co., Type GBB Tron Rectifier fuse or equivalent with a current rating as indicated on the power supply identification label.

SETTING THE TRIP-POINT VOLTAGE: With an adjustable laboratory power supply adjusted to 0 volts output, connect the O.V.P. module in the circuit as shown in Figure II. Select the resistance R_1 required to limit the current in this circuit to 0.2 amps at the **desired** trip-point voltage. Increase the voltage of the power supply slowly and observe the voltage reading on the DC volt-meter until the voltage suddenly drops. This is the trip-point voltage of the O.V.P. module. The trip-point voltage setting can be increased by adjusting the potentiometer on the O.V.P. module clockwise, and decreased by adjusting it counterclockwise.



TOLERANCE: FRACTION = ± 1/32, DECIMAL = 0.015
MATERIAL: BASE – ALUMINUM 1100F
CASE – STEEL
FINISH: BLACK SEMIGLOSS LACQUER
FED. STD. 595 COLOR 37038

abbott General Information

ordering information

Abbott power modules can be ordered easily by indicating the exact model number that describes your requirement. When ordering to your own specification control number, please reference the corresponding Abbott model number to expedite your order. Should you need additional information or assistance of any kind, please contact us. We are always pleased to confirm price and delivery, and discuss the application of our product to your requirement.

prices

All of the prices listed are FOB, Factory, Los Angeles, California and are the same as those we charge for equal items and quantities to any customer including the United States Government. The prices shown do not include the costs of any special services, source inspections, environmental testings, special packaging or certified audits. All prices and specifications are subject to change without notice.

QUANTITY DISCOUNTS

1 piece — price listed. (This is the net price.)
2-4 pieces — price listed. (This is the net price.)
5-9 pieces — less 3% of the 2-4 piece price.
10-24 pieces — less 5% of the 2-4 piece price.
25-49 pieces — less 7% of the 2-4 piece price.
50-99 pieces — less 9% of the 2-4 piece price.
Above 100 pieces — Contact nearest office for an exact quotation.

TAXES — All applicable federal, state and local taxes are extra.

TERMS OF PAYMENT — Net payment within thirty (30) days from date of shipment to all accounts which have been rated (approved).

SPECIAL FORMS — Preparation cost of U.S. Defense Department's form DD250 is $10.00 per destination.

SOURCE INSPECTION — 2% or $25 per shipment for witnessing our standard final electrical inspection.

UNITS ORDERED IN ERROR — Stock units may be returned within 30 days from shipment if they are unused and in original cartons. Restocking charge is 20% or $25 each for 1 to 9 pieces.

delivering and shipping

Many units listed are normally carried **in stock ready for immediate delivery** — subject to prior sale.
All Abbott power supplies are shipped complete with mounting hardware, thermal compound, printed instructions and final test data. Abbott power modules are packaged for shipment per Interstate Commerce Commission, Uniform Freight Classification Rules No. 40 and 41. Special military preservation and packaging is available upon request at a modest additional cost. Shipment made by air freight or United Parcel Service has proved to be the safest and fastest delivery method for Abbott power modules.

warranty and service

All Abbott products are under warranty for one (1) year from date of shipment (see warranty conditions below). When you need repair service, please consult our factory by letter, wire or telephone. We will assign a "Return Material Authorization" number to your shipment to provide for its expedient handling when it reaches our factory. It is very helpful to receive your assessment of the problem along with the returned equipment. Please include the name of a company representative with whom we can discuss our recommendations. Only prepaid shipments of returned equipment can be accepted without prior written authorization from us. To minimize accounting paperwork, documents such as credit memorandums should not be issued until you have been advised by us as to the disposition of your equipment.

WARRANTY

"Supplier warrants products of its own manufacture against faulty workmanship or the use of defective materials for a period of one year from the date of shipment. This warranty is the only warranty made by the supplier, and is in lieu of all other warranties, expressed or implied, and can be amended only by a written instrument signed by an officer of the Supplier. The liability of the Supplier under this warranty is limited solely to replacing, repairing, or issuing credit (at Supplier's discretion) for any products which are returned by Buyer during the warranty period provided that (a) supplier is promptly notified in writing upon discovery of such defects by Buyer, (b) the defective unit is returned to Supplier, transportation charges prepaid by Buyers, and (c) Supplier's examination of such unit shall disclose, to its satisfaction, that such defects have not been caused by misuse, neglect, improper installation, repair, alteration, or accident. In no event shall Supplier be liable to Buyer for loss of profit, loss of use, or damages of any kind based upon a breach of warranty.

abbott Optional Features

terminals on mounting base (B option)

The electrical terminals extending through a glass sealed header may be located on the mounting base on most Abbott units at no increase in price. To include this feature, simply change the letter "D" preceding the first dash to "B". (Example V05**B**S-5A indicates a header out the base.) This feature is not available on Case Size 1B or the Model BN, C, CC, W, WW, and VN lines.

special connectors (A & C option)

A Military type hermetically sealed connector is available on most Abbott power modules. Simply change the letter "D" in the Model Number to "A" to have the connector extend out the top surface (opposite the mounting base), or to a "C" to have it extend out the mounting base. Example: V05**A**S-5A indicates a connector out the top surface and V05**C**S-5A indicates a connector out the mounting base. Not available on Model BN, W, and WW lines. Please consult factory if Military connectors are required on these units. Remote error sensing ('Y' Option) automatically included when ordering A Option on Model C, CC, W, and WW.

PRICE 1 pc	PRICE 2-4 pcs
$25.00	$20.00

remote output adjustment (R option)

Provision for locating an adjustment potentiometer in a remote location from the power supply can be made for an additional cost. To have this feature included, simply add an "R" after the character preceding the first dash of the model number. Example: V05DS**R**-5A indicates the remote output adjustment feature has been included. Special terminal arrangement includes additional terminals for connection to a remote potentiometer. A detailed outline and dimensional drawing is available on request from the factory.

$12.00	$10.00

special encapsulation (E option)

All of our hermetically sealed power modules are encapsulated to meet or exceed the shock, acceleration, and vibration requirements of MIL-STD-810B (see Page **1•1051**). Special encapsulation to enable these modules to withstand higher shock levels of 60 g's, acceleration levels of 50 g's, and vibration levels of 30 g's, is available. To have this feature included, simply add an "E" before the last series of digits in the model number. Example: V05DS**E**-5A indicates special encapsulation has been included.

$12.00	$10.00

recentering of dc input (H option) **(Model B's, C's, CC's, and S's only)**

The standard Model B's, C's, CC's, and S's operate from an input voltage range of 24 to 30 VDC. The units can be modified to operate from any one of the other input voltage ranges as shown below. To have this feature included simply add an "H" after the "D" in the model number then specify the desired input voltage range in parenthesis after the entire model number. Example: BL02D**H**-5A (20-26) indicates the input voltage range for Model BL02D-5A has been changed to 20 to 26 VDC. Consult the factory if input voltage changes are desired on Model B17's. Information on the input current of units with this option is available from the factory.

Input Voltage Range (Model B's, C's, and CC's)		
20 to 26; 22 to 28; 26 to 32	$12.00	$10.00
22 to 32 (Derate output current by 10%)	$18.00	$15.00

Input Voltage Range for Model S's Only	Derate Output Current By		
22 to 28; 26 to 32	0%	$12.00	$10.00
20 to 26	10%	$12.00	$10.00
20 to 28	20%	$12.00	$10.00
22 to 30	20%	$12.00	$10.00
22 to 32	25%	$18.00	$15.00
24 to 32	20%	$12.00	$10.00

remote error sensing (Y option) **(Model C's, CC's, W's, and WW's only)**

Additional sensing terminals can be provided on Model C's and W's to enable the regulator circuit to monitor the output voltage directly at the load and compensate for DC voltage drops of up to 0.3 volts in the load leads. To have this feature included simply add a "Y" after the "D" in the model number. Example: W5D**Y**2.5 indicates remote error sensing has been included.

abbott Environmental Testing

ALL OF THE HERMETICALLY SEALED POWER MODULES LISTED IN THIS CATALOG WILL MEET OR EXCEED MOST OF THE ENVIRONMENTAL SPECIFICATIONS OF MIL-STD-810B

Specification MIL-STD-810B establishes the climatic and environmental conditions applicable to aeronautical and associated equipment. The procedures described in this specification are utilized in simulating environmental test conditions. There are several different Military Specifications currently in use besides MIL-STD-810B which also specify climatic and environmental conditions. Among these are MIL-E-5400M, MIL-E-16400F, MIL-E-4058D, MIL-T-21200J, MIL-STD-202D, and MIL-E-5272C. Abbott's hermetically sealed power modules meet nearly all the requirements of these specifications. We have chosen MIL-STD-810B as our prime environmental standard because of its stringent specifications and wide use in today's systems.

In order to assist you in determining whether or not our power supplies will meet your environmental requirements, the adjacent table lists parameters which are met or exceeded by all of our hermetically sealed power modules. If your specific requirement is not listed in the table, or is more stringent than the levels shown, please consult our factory. Our experienced Sales Engineers will be happy to provide any additional information that you may require.

Over the years we have had occasion to environmentally test several of our hermetically sealed power modules to the stringent requirements of MIL-E-5272C. The cost incidentally, of environmentally testing one power module is approximately $3,300 and requires three months. Certified Test Reports from Wyle Laboratories of Los Angeles are available on two of our units. Because the units chosen for environmental testing are representative of our entire line of over 3,500 power modules, we will in most cases, certify any unit in our entire line of hermetically sealed power supplies to meet these standards.

The tests included in these reports are High Temperature, Low Temperature, Humidity, Altitude, Vibration, Immersion, Temperature-Altitude, Shock and Acceleration. Furthermore, specifications such as Salt Spray, Fungus, Sunshine, Rain, Sand and Dust are automatically satisfied by the hermetic sealing of the units.

Copies of these certified Test Reports from Wyle Laboratories are available at no charge, on request.

MIL-STD-810B

Condition	Method	Procedure	Level	NOTES*
Altitude	500	II	Vacuum	4
High Temp.	501	II		1
Low Temp.	502	I	−54°C	2
Temp. Shock	503	I	−54°C to +100°C	1, 2
Temperature Altitude	504	I	−54°C to 71°C 0-70,000 ft.	1, 2, 4
Sunshine	505	I	48 hrs.	
Rain	506	I	12 in 1 hr.	
Humidity	507	I	95% @ 71°C	
Fungus	508	I		
Salt Fog	509	I	48 hrs.	
Dust	510	I		
Explosion	511	I		
Immersion	512	I		
Acceleration	513	I, II	±14 g's	3
Vibration	514	I	±15 g's	3
Shock	516	I, II, III, V, VI	40 g's	3

*NOTES:

1. Maximum allowable base plate temperature is +100°C on all models except V and VN where the maximum is +71°C.
2. Minimum temperature is −20°C on Model V, 0°C on Model VN, and −54° on all others.
3. Special encapsulation is available so that any hermetically sealed unit can withstand vibration of ±30 g's, shock of 60 g's, and acceleration of 50 g's. Please see Page 1•1050 for complete details of the special encapsulation feature.
4. Model V power modules with case size 10 or larger have a maximum operating altitude of 10,000 ft.

U.S. AIR FORCE

Air Force personnel tested three Abbott model power supplies (two model CL24D-55A and one model A1D-70A) used to power electronic equipment on the Air Force Rocket Sled at Holloman Air Force Base. Test conditions consisted of 1½ minute sweeps of 30-G's peak sine vibration from 40 Hz to 1500 Hz, on each of three axis. Throughout these tests the Abbott power supplies operated within specifications.

abbott Electromagnetic Interference

In today's complex and sensitive systems, Electromagnetic Interference (EMI) requirements for power supplies are of increasing importance. EMI, however, is often a broad and confusing field to everyone concerned. The power supply user wants to know what areas of EMI he is going to have to be concerned with when using a power supply. The specifier of a power supply wants to know what he can expect from Abbott's power supply in the area of EMI.

The first question can best be answered by defining the types and methods of Electromagnetic Interference. **Interference** is defined as any electromagnetic disturbance, phenomenon, signal, or emission which causes or can cause undesired response, malfunctioning, or degradation of performance of electrical and electronic equipment. There are two basic types of EMI concerned with power supplies: **Broadband** and **narrowband.**

> **Broadband interference** exhibits energy over a wide frequency spectrum (30 Hz to 100 MHz) and is generally a result of sudden changes in voltage or current. It is usually measured in "decibels-above-one-microvolt-per-Megahertz-bandwidth" or dBuV/MHz.
>
> **Narrowband interference** is produced by an oscillatory circuit containing energy only at the frequency of oscillation and, usually, at harmonics or multiples of the frequency of oscillation. It is usually measured in "decibels-above-one-microvolt" or dBuV.

The EMI may be propagated by either of two methods: **conduction** or **radiation.**

> **Conducted interference** is any undesired electromagnetic energy appearing on the external conductors (input and output lines of the power supply) which may be conducted into other sensitive equipment and cause malfunction or otherwise affect its operation.
>
> **Radiated interference** is the propagation of electromagnetic energy without a direct conducting path and is generally the result of radiation from external wiring or inadequate shielding afforded by the power supply case.

Besides the Electromagnetic Interference generated by a power supply, there may also be concern about the affect on the power supply by interference generated from other sources. This is known as susceptibility.

> **Susceptibility** is defined as that characteristic which causes an equipment to malfunction or exhibit an undesirable response when its case or any external lead is subjected to electromagnetic voltages or fields.

These then, are the areas of EMI that concern the user of a power supply. Now, what can be expected from an Abbott power module in these areas?

First, Abbott's hermetically sealed power modules are encased in a 0.025 inch thick steel case, which is electro-copper plated to 0.002 inch and electro-tin plated to 0.001 inch, and then fused to a 0.25 inch thick aluminum base. This eliminates almost all radiated interference emanating from the unit. If the user provides shielded cables for the input and output leads of the unit, and the case is grounded, radiation levels will be negligible. Similarly, the power module is not susceptible to radiated interference from external sources.

Abbott Model LC's, RN's, U's, V's,, W's, and WW's contain no switching or oscillatory circuits. Therefore, the broadband and narrowband conducted interference of the units is minimal. Model B's, C's, CC's, GB's, HA's, VN's, and Z's employ switching circuits, which is a source of broadband interference; and Model KN's, PN's, LN's, and S's employ Class B amplifiers, a source of narrowband interference: if necessary, the following techniques can be used to minimize the effect of this interference.

> The magnitude of the conducted interference on the **input lines** of these units is directly proportional to the total impedance of the source (including the power lines) and the current demand of the unit itself. If the source impedance is low and care is taken to isolate the wiring to the converter from other associated circuitry, the interference on the DC input line can be kept to a minimum. If further attenuation is required, the use of one of Abbott's input filters is recommended. They have been designed specifically for this purpose.
>
> Isolation and decoupling networks within the power supply loads usually provide enough filtering to maintain the conducted interference on the DC **output leads** at a minimal level. However, the amplitude of this interference can be substantially reduced by installing a capacitor directly across the load. If further reduction is desired, a small inductor can be inserted in series with one or both output leads to obtain the desired attenuation level.

Abbott's standard power modules meet the EMI requirements of most systems. In addition, the hi-performance series of Model C's, CC's, VN's, W's, and WW's have been built to meet the stringent requirements of MIL-STD-461 for generation of and susceptability to radiated and conducted interference. A test report prepared by the Genistron Company per MIL-STD-461 on Model W5D2.5, 400 Hz to DC converter, is available. The test was conducted per methods CE03, CE04, and RE02 and shows that levels of narrowband and broadband conducted and radiated interference over the applicable frequency range were within the specification limits.

A formal Electromagnetic Interference Test per MIL-STD-826 has also been conducted by a specialist firm, the Filtron Company, Inc., of Los Angeles, on an Abbott Model S6AE-115A-400, DC to 400 Hz inverter, used with its appropriate input filter, Abbott Model YS6AE. This inverter was found to fully comply with all applicable EMI specification requirements.

abbott Reliability

The urgent need for the highest possible degree of reliability in today's military, industrial and commercial electronic equipment requires no explanation. Over-all power supply reliability can only be obtained through the use of stable, long-life components operated well within their capabilities. Although improvement in reliability can sometimes be realized by using excessive safety factors in the selection of certain components, this unbalanced approach is costly, it fails to take advantage of advanced designs, and it is seriously limited in the amount of improvement actually realized. In the final analysis, reliability must be **built** into a power supply from its inception. A true reliability assurance program must not only include the injection of the reliability concept into the basic design but also close quality control of all manufacturing steps. (See below.)

The responsibility for the reliability of a product lies squarely with the manufacturer—and Abbott accepts this principle. Abbott's Quality Assurance Program has the objective of achieving the highest probability of continuous trouble free performance of their power supplies in their customer's systems. A careful reliability analysis has been conducted on all of the units listed in this catalog, prior to their production, to insure meeting this company objective. As a result, Abbott has been approved for many military and aerospace high reliability programs, in accordance with the general requirements of MIL-Q-9858A, including: Saturn/Apollo Space Program, F-111 Tactical Fighter Plane, Hornet Missile, Trident Missile, Lunar Landing Training Vehicle, SUU-11A/A Minigun, TAT-102 Helicopter Turret, and many other priority programs.

In addition to a reliability analysis on all catalog power supplies, Abbott has also conducted a failure analysis on several representative units from each model family of power supply in accordance with MIL-HDBK-217. The following list indicates the **typical** Mean Time Between Failure (MTBF) of several of our models of power supplies:

Models Beginning With	Function	See Pages	Typical MTBF	Operating Temperatures
B	DC to DC	1•1043	120,000 hrs	100°C
BN	DC to DC	1•1045	23,000 hrs	71°C
C	DC to DC	1•1044	48,000 hrs	100°C
CC	DC to DC	1•1044	27,000 hrs	100°C
LC	60 Hz to DC	1•1054	100,000 hrs	50°C
LLC	60 Hz to DC	1•1054	70,000 hrs	50°C
RN	60 Hz to DC	1•1055	75,000 hrs	71°C
S	DC to 400 Hz	1•1046	55,000 hrs	100°C
U/GB	400 Hz to DC	1•1038	70,000 hrs	100°C
V/HA	60 Hz to DC	1•1042	80,000 hrs	71°C
VN	60 Hz to DC	1•1041	50,000 hrs	40°C
W	400 Hz to DC	1•1039	50,000 hrs	100°C
WW	400 Hz to DC	1•1039	45,000 hrs	100°C
Z	60 Hz to DC	1•1040	66,000 hrs	40°C

It should be noted that all of the failure rates are calculated in accordance with MIL-HDBK-217 at worst case operating conditions of specified operating temperature, maximum operating input voltage, and maximum rated output power. Models BN and VN were calculated in accordance with MIL-HDBK-217A.

abbott Quality Assurance

All of Abbott's Power Supplies Are Inspected No Less Than 41 Times During The Process of Their Manufacture

INCOMING INSPECTION

Incoming material is inspected on an "Attribute Basis" per MIL-STD-105D. Critical materials are given a 100% inspection. Raw and finished materials are inspected mechanically to insure mechanical specifications and quality. Inspected parts are sorted according to acceptance or rejection, and a record is made containing the date, vendor's name, number of parts accepted or rejected, the percentage of attribute basis used, together with the reasons for any rejections, and the inspectors stamp. All rejected parts carry a red rejection tag to insure they are returned to the vendor for correction or replacement. Vendor corrective action will be initiated when the vendor fails to meet company specifications or standards.

MECHANICAL INSPECTION

All in-process material is physically inspected. "First article" inspection is also performed on parts for new designs. All machined parts and hardware are fully inspected prior to stocking. Accepted or rejected material is noted in the record and all rejected material is either reworked or remade to insure its compliance to company specifications.

ELECTRICAL INSPECTION

In-process electrical components are mechanically inspected and electrically tested. All sub-assembly and harness wiring are carefully inspected and electrically tested. The wiring of the final sub-assembled units is mechanically inspected and electrically tested again. Assembled units are sent to the laboratory for their preliminary electrical test to Abbott specifications. After being mounted in their steel containers, the units are again mechanically and electrically tested for exact performance **better** than their published specifications. The results of all the above inspection points are recorded in the company's inspection records.

HERMETIC SEAL INSPECTION

When a power supply is encapsulated and hermetically sealed, it is again inspected. Each unit is given a special hermetic seal test to insure its leak-proof operation. Results of these tests are recorded including date, status, and inspectors stamp in the Quality Assurance Records.

FINAL INSPECTION

All completed power modules are now submitted to a final mechanical inspection for correct dimensions, test data, identification labels and appearance. Electrical performance must **exceed** catalog specifications. All of these final inspection results are recorded in the quality control assurance records which contain all pertinent information for each unit leaving the factory.

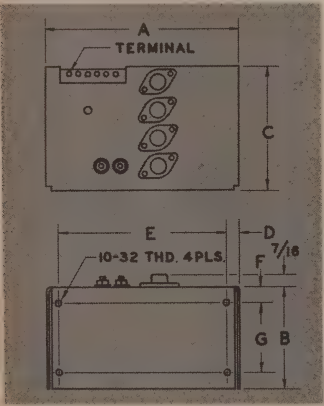
features

- 1 Day Stock Delivery
- Single and Dual Outputs
- 0.1% Regulation
- +50°C Ambient Operation
- 47-420 Hz Input Frequency

DELIVERY FROM STOCK

These reliable Abbott power modules are designed to meet the needs of OEM engineers. For their intended application, these units are not only rated high in overall quality, but also priced relatively low. Thus, they provide more quality per dollar compared to similar items on the market. Your best buy in OEM power modules is ABBOTT.



Size	A	B	C	D	E	F	G

L5	10	4	4¾	½	9	⅝	2¾
L6	10¾	4	4¾	½	9¾	⅝	2¾

specifications

INPUT VOLTAGE RANGE: 103 to 127 VRMS.

INPUT FREQUENCY: 47 to 420 Hertz, 1 Phase.

LINE REGULATION: 0.1% or 10 mV (whichever is greater), for input change of 103 to 127 VAC.

LOAD REGULATION: 0.1% or 10 mV, (whichever is greater), from no load to full load.

RIPPLE: 10 mV rms; 30 mV peak-to-peak.

OUTPUT VOLTAGE ADJUSTMENT RANGE: Voltage is continuously adjustable between the limits shown on the table by means of a screwdriver adjustment potentiometer.

ISOLATION VOLTAGE: 300 VDC between output terminals and chassis ground.

INSULATION RESISTANCE: 50 megohms between output terminals and chassis ground when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE: Operating: 0°C to +50°C ambient without derating, forced air or heat-sinking. Storage: −55°C to 85°C.

TEMPERATURE COEFFICIENT: 0.08% per degree Celsius.

ALTITUDE: 10,000 feet above sea level.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed within approx. 25 msec.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 75 microseconds after a 50% step change in load current. Maximum overshoot/undershoot is 5% of nominal output voltage.

TURN ON/TURN OFF OVERSHOOT: The output voltage overshoot during "turn on" or "turn off" will not exceed 1% of the output voltage.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

OVERVOLTAGE PROTECTION: Additional circuitry will reduce the output voltage to approximately 1 VDC within 25 μsec typ., if the output voltage rises 10% or 2 VDC (whichever is greater) above nominal. Available as an optional feature by adding "-1" to the model number and $8 ($16 for dual output units) to the 1-24 piece price.

OUTPUT IMPEDANCE: DC to 1K Hz — .003 R_L ohms or .03 ohms, whichever is greater.
1K Hz to 10K Hz — .008 R_L or .08 ohms, whichever is greater.
10K Hz to 100K Hz — .015 R_L or .30 ohms, whichever is greater.
R_L = rated load resistance.

RELIABILITY: The Mean Time between failure (MTBF) per MIL-HDBK-217A under worst case operating conditions is in excess of 100,000 hours per single output units and in excess of 70,000 hours per dual output units. For example: LC12T10 - 114,268 hours (MTBF); LC28T1 - 158,290 hours (MTBF); LLC12T5 - 75,593.

SINGLE OUTPUT

Output Voltage Range	Output Size Curr. (Amps)	(See Dwg)	Wt. (Lbs.)	Model Number	Price 1-24 Pieces
4.5 - 5.5	6.0	L1	5.5	LC5T6	$62.00
	10.0	L3	12.5	LC5T10	73.00
11.5 - 12.5	2.5	L1	5.5	LC12T2.5	62.00
	5.0	L2	8.7	LC12T5	73.00
	10.0	L3	12.5	LC12T10	99.00
14.5 - 15.5	2.0	L1	5.5	LC15T2	62.00
	4.0	L2	8.7	LC15T4	73.00
	8.0	L3	12.5	LC15T8	99.00
23 - 25	1.2	L1	5.5	LC24T1.2	62.00
	2.5	L2	8.7	LC24T2.5	73.00
	5.0	L3	12.5	LC24T5	99.00
27 - 29	1.0	L1	5.5	LC28T1	62.00
	2.1	L2	8.7	LC28T2.1	73.00
	4.3	L3	12.5	LC28T4.3	99.00

DUAL OUTPUT

Output Voltage Range	Output Size Curr. (Amps)	(See Dwg)	Wt. (Lbs.)	Model Number	Price 1-24 Pieces
±11.5 - ±12.5	1.2	L4	6.0	LLC12T1.2	$87.00
	2.5	L5	9.2	LLC12T2.5	93.00
	5.0	L6	13.5	LLC12T5	119.00
±14.5 - ±15.5	1.0	L4	6.0	LLC15T1	87.00
	2.0	L5	9.2	LLC15T2	93.00
	4.0	L6	13.5	LLC15T4	119.00

Dual Output Units:

1. Both outputs are isolated and non-tracking so each output can be used as a completely separate power supply.
2. The output current listed is for each output voltage.

specifications

INPUT VOLTAGE RANGE: 105-125 VRMS

INPUT FREQUENCY RANGE: 50-420 Hertz, 1 phase

LINE REGULATION: 0.1% or 10 mv (whichever is greater) for input change of 105-125 VRMS

LOAD REGULATION: 0.1% or 10 mv (whichever is greater) for change from no load to full load

RIPPLE: 0.02% or 5 mv RMS (whichever is greater)

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer

ADJUSTMENT RESOLUTION: 30 mv max.

POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded

TEMPERATURE: Operating: −4°F (−20°C) to +160°F (+71°C) without derating, forced air, or heatsinking. Storage: −40°F (−40°C) to +185°F (+85°C)

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 75 microseconds after a 50% step change in load current

TURN ON/TURN OFF OVERSHOOT: The output voltage overshoot during "turn on" or "turn off" will not exceed 0.1% of the output voltage, or 20 mv, whichever is greater

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

OVERVOLTAGE PROTECTION, 230 VAC OPERATION, AND REMOTE VOLTAGE ADJUSTMENT: Available as optional features.

when you order any Acopian power module listed on the following 25 pages...

3-DAY SHIPMENT IS GUARANTEED

Any time you order Acopian power modules, selected from the thousands of models described on the following pages, shipment will be made within 3 days after your purchase order is received. To save more time, telephone your order. Call us, or your local Acopian representative. We'll ship within 3 days after you've put down the phone.

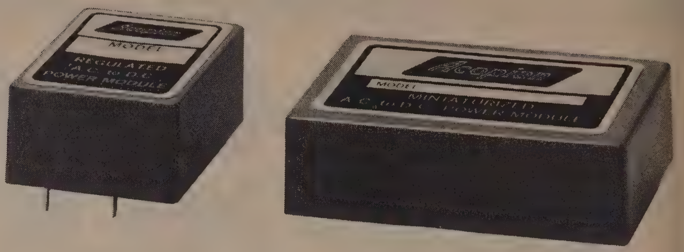
MINIATURIZED REGULATED SINGLE OUTPUT



Acopian
MODEL
REGULATED A.C. to D.C. POWER MODULE
Acopian
MODEL
MINIATURIZED A.C. to D.C. POWER MODULE

Conserve space with mini-modules as small as 2.3″ x 1.8″ x 1.0″. Models with outputs ranging from 1 to 75 volts, and from 30 ma to 2.5 amps are available. All feature excellent regulation and ripple parameters, and are short circuit protected. Rugged encapsulated construction and generously derated components insure years of reliable operation. Mini-modules are also available with multiple outputs—see pages 4 and 5.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Trim Adjustment: Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Output is floating. Either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. (Model 5E150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "−230" to model number and $10.00 to price.

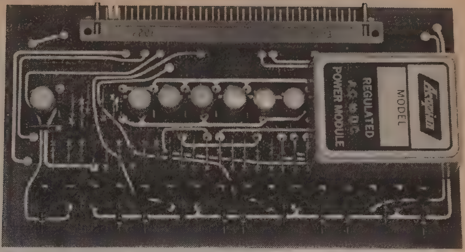
Case Size ES-10

Case Sizes EL-10, EL-13, and EL-20.

High voltage displays such as NIXIE* indicators may be powered with the Model NX-25A or NX-50. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

*Registered trademark of Burroughs Corp.



Placement of a mini-module on a printed circuit assembly eliminates the need for an outboard power supply, as well as all the associated wiring, connectors and hardware. Layout and construction are simplified, equipment size can be reduced, and system reliability is improved.

MODEL
DUAL OUTPUT REGULATED
POWER SUPPLY

MINIATURIZED REGULATED MULTIPLE OUTPUT

These dual and triple output mini-modules are compact and convenient sources of the voltages required to power operational amplifiers and related circuits. They may be mounted directly on printed circuit board assemblies, simplifying system layout and minimizing the connectors and wiring required.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Compact, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Setting: Each output is factory preset to ±2% (1 to 9 volt outputs) or ±1% (10 to 28 volt outputs) of the nominal output voltage. Outputs of Case Size END modules, except those marked (*), may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Single output sections may be used in either polarity. Dual output sections, marked (*), are provided with a plus/common/minus output connection configuration.

Ambient Operating Temperature: −20 to +71°C. No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 28 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
13 oz. (Case size END.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "—230" to model number and $10.00 to price.

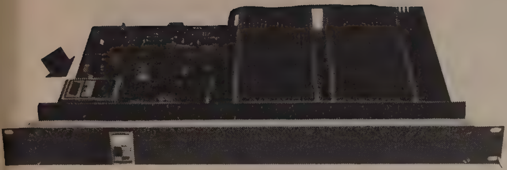
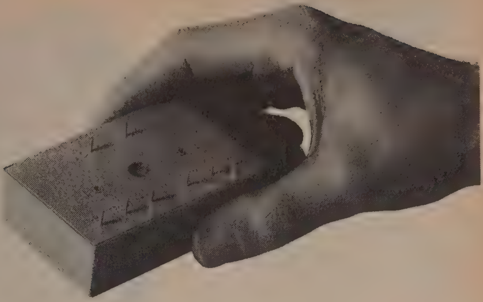
*TRIM or COMMON, depending upon model



Complete system assemblies only 1¾-inches high. Mini-modules permit exceptional flexibility in the design of rack-mounting assemblies built on standard 19-inch panels as small as 1¾-inches high.



Dual output modules have isolated outputs; triples provide two balanced and tracking voltages in a three-terminal configuration, plus an isolated third output for logic, control circuits, etc.

HOW TO ORDER:

Any two of the sections listed below, or two of the same section, can be combined into a multiple-output module. The complete model number is the combination of the two section numbers selected. Note that some sections provide two outputs; combination with a single output section results in a triple-output module.

Example: The combination of sections 6E20D and 15E10D is the Model 6E20D-15E10D. Always assign the lower voltage section first. For pricing purposes, add the costs of the sections selected. Example: The price of the Model 6E20D-15E10D is $39.00 plus $29.00, or $68.00 total.

Acopian
MODEL
AC to DC
POWER MODULE

Although small in size, these mini-modules offer high performance at modest prices. All models, with series regulated outputs ranging from 1 to 75 volts and as high as 2.5 amps, may be mounted in an area only 3.5″ x 2.5″. Dual output models are available with the ratings commonly required for driving op amps and other balanced loads. Terminal strip input/output connections eliminate all need for sockets or soldering. Short circuit protection, encapsulated construction, and conservative design assure long term reliability.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See tables.

Output Voltage Trim Adjustment: Outputs factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Single output models may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Either positive or negative terminal of a single output module may be grounded. Dual output modules have a positive/common/negative output terminal configuration.

Ambient Operating Temperature: −20 to +71°C. (Model 5EB150, 0 to +71°C.) No derating required.

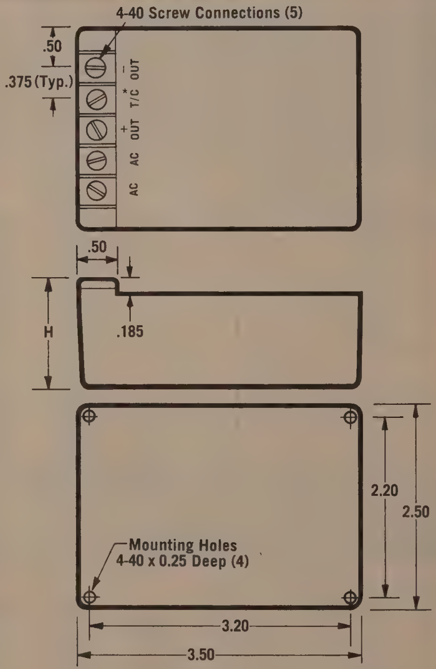
Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

> **High voltage displays** such as NIXIE* indicators may be powered with the Model NX-25B or NX-50B. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.
>
> *Registered trademark of Burroughs Corp.



*TRIM on single output modules; COMMON on duals

Case	H	Approx. Weight
EB-10	1.375	15oz
EB-13	1.625	1lb 5oz
EB-20	2.375	2lb 1oz

An Acopian miniaturized power module is used in the Valitron credit validation system manufactured by Video Systems Corporation. A Valitron terminal is capable of retrieving and displaying credit information for any of 100,000 accounts on a six inch video screen, in response to an account number being entered via its keyboard.

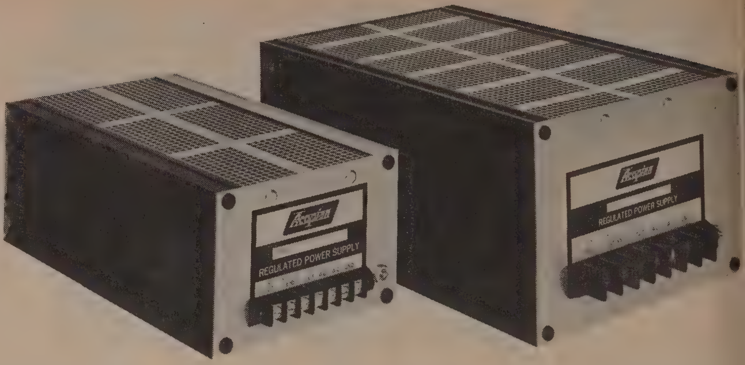
Acopian

SERIES A REGULATED PREMIUM PERFORMANCE

SERIES B REGULATED LOWEST COST



Acopian
REGULATED POWER SUPPLY
Acopian
REGULATED POWER SUPPLY

A broad selection of power supplies offering unusually high performance – many models have regulation of ±0.005%. Electronic current limiting and provision for remote voltage sensing are standard features; overvoltage protection is available as a built-in option. Rugged extruded aluminum cases include threaded mounting holes on bottom, back, and side, permitting mounting in any position.

SERIES A PREMIUM PERFORMANCE POWER SUPPLIES

STANDARD FEATURES

- Provision for remote sensing and/or external output adjustment
- Short circuit proof with automatic recovery (electronic current limiting)
- Can be mounted on any of three surfaces (case sizes H11 and H16, two surfaces)
- Convection cooled – no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series A supplies have model numbers beginning with the letter A.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load line are compensated, is a standard feature.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

Response Time: Less than 20 microseconds.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models. To order, add prefix "V" to the model number, and increase standard price as follows:

For all case sizes except H16:
Nominal output voltages from 3 to 28 V. $25.00
30 to 70 V. 35.00
Case size H16 (all voltages) 75.00

REGULATED POWER SUPPLY
Acopian
REGULATED POWER SUPPLY
OUT SENS OUT AC AC GND

These low-cost supplies provide the same high reliability as the Series A, and without sacrificing the basic features necessary for most applications. Many models have regulation of ±0.1% or better. All components are generously derated to insure a long and trouble-free life. And they use the same rugged construction as the Series A line. Overvoltage protection and other options are available.

SERIES B LOW-COST POWER SUPPLIES

STANDARD FEATURES

- Delivers current surges without damage — built-in fuse protects supply against prolonged overloads and shorts
- May be mounted on any of three surfaces
- Convection cooled — no heat sinking or forced-air ventilation is necessary
- Silicon semiconductors
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 10 and 11. Series B supplies have model numbers beginning with the letter B.

Remote Voltage Adjustment/Sensing: Available as an option. See below.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: 0 to +71°C.
Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models up to 70 V. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load lines are compensated, is available on all models. (This option also permits the use of an externally located potentiometer to adjust output voltage.) To order, add prefix "R" to the model number. No increase in price.

NARROW PROFILE REGULATED

Where only a narrow mounting space is available, Acopian narrow profile power supplies fit when many others cannot. Choose from Series A (high performance) and Series B (lower priced) models with output ratings up to 150 volts, up to 4 amps.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See table. Series A supplies have model numbers beginning with the letter A; Series B, with the letter B.

Remote Voltage Adjustment/Sensing: Standard in Series A, not available in Series B.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: Series A, −20 to +71°C; Series B, 0 to 71°C.

Storage Temperature: −55 to +85°C.

Short Circuit and Overload Protection: Series A, electronic current limiting with automatic recovery; Series B, fused — delivers current surges without damage.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models up to 70 V. To order, add prefix "V" to the model number and add $25.00 to the standard price of models with output voltages of 3 to 28 V, $35.00 to the price of models with output voltages from 30 to 70 V.

230 Volt Input: Available on some models. Contact factory for information.

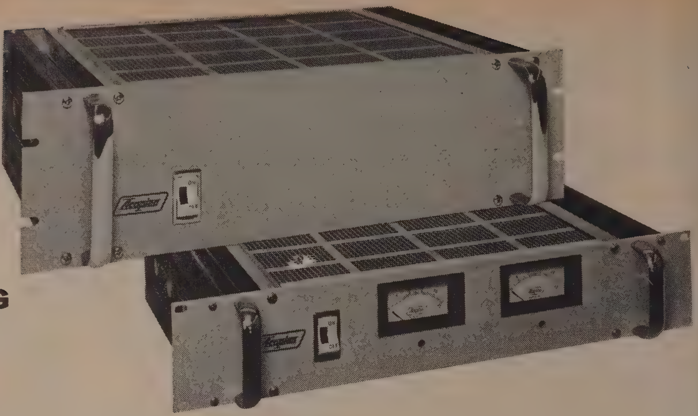
Acopian



RACK MOUNTING

Up to 50 Volts

Up to 60 Amps

Acopian rack-mounting power supplies feature excellent regulation and ripple specifications in 76 models with outputs up to 50 volts and 60 amps. Metering and overvoltage protection are available as options. These power supplies are constructed in sturdy extruded aluminum assemblies designed expressly for mounting in standard 19″ wide RETMA cabinet racks. The front panels are finished in light gray enamel; sides are black; the remaining casework is finished in gold alodyne.

STANDARD FEATURES

- Excellent line and load regulation, low noise
- Convection cooled
- Silicon semiconductors for maximum reliability
- Short circuit proof
- Attractively finished in light gray enamel and gold alodyne

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

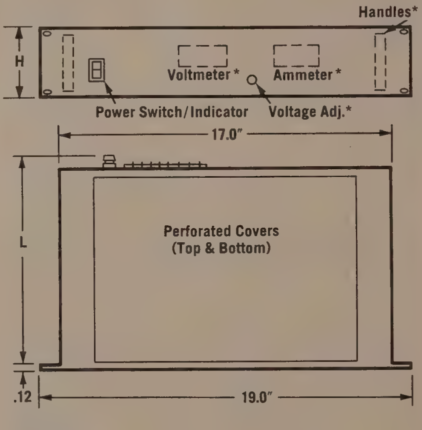
Output Voltage/Current:
Line Regulation:
Load Regulation:
Ripple:
Output Voltage Adjustment Range:
} See table.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Storage Temperature: −55 to +85°C.

Ambient Operating Temperature: −20 to +55°C.

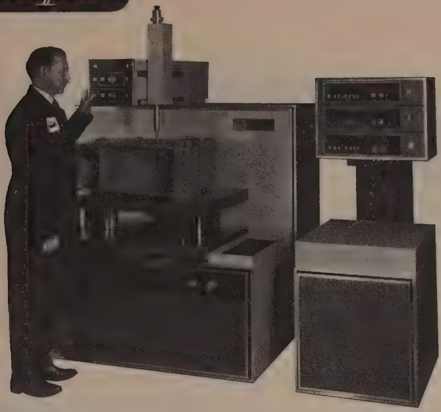
Protection: Short circuit. Overvoltage protection optional; see "Options."



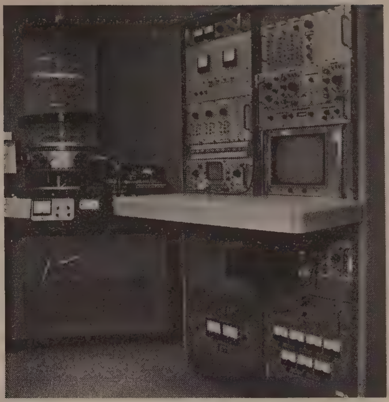
*Optional

Size	H	L	Approx. Weight
3P11	3½	11.0	22lb
5P12	5¼	12.0	28lb
5P17	5¼	17.0	43lb

Acopian



The Bendix Corp. eliminated the coupling of AC into the low level circuitry of this Cordax three-axis measurement system by using Acopian DC-output supplies for powering electromechanical components.



Sandia Laboratories uses Acopian power supplies in test equipment. Shown above is a Sandia electron beam nondestructive dielectric strength tester which is used to evaluate ceramic materials.

OPTIONS

Overvoltage Protection: An internally installed and preset overvoltage protector is available for all models. To order, add the prefix "V" to the model number and $25.00 to the price of models with an output current rating of 20 amps or less (at 40°C); add $75.00 to the price of higher current models.

Front Panel Voltage Adjustment: Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $5.00 to price.

Voltmeter: Add suffix "F" to model number and $15.00 to price.

Ammeter: Add suffix "A" to model number and $15.00 to price.

230 Volt Input: Add suffix "-230" to model number and $10.00 to price.

Handles: Add suffix "H" to model number and $10.00 to price.

EXAMPLE: The Model 5PT20 equipped with all options is designated as the Model V5PT20AFHP-230. (List suffix letters in alphabetical sequence.)

SERIES U UNREGULATED

Low-cost DC power suitable for driving loads such as lamps, relays, and small motors is provided by Series U unregulated power supplies. All components are generously derated, insuring a long and trouble-free life; built-in fusing prevents damage due to prolonged overloading or short circuits. Mechanically similar to the regulated supplies shown on pages 8 and 9, they are housed in extruded aluminum cases which can be mounted in any position.

STANDARD FEATURES

- Silicon rectifiers
- Capacitive filtering
- Fused input
- May be used in series or parallel
- No derating or heat sinking required
- Completely serviceable

SPECIFICATIONS

Input Voltage: 0–125 VAC, 50–400 Hz, single phase.

Output Voltage:
Output Current: } See table
Ripple:

Load Regulation: Nominal output voltage is based on 115 VAC input, with approximately 50% of rated output current being drawn.

Line Regulation: With fixed load, output voltage change is proportional to input voltage change.

Output Voltage Adjustment: An adjustable autotransformer (not included) may be used to adjust output voltage by varying the AC input voltage to the supply.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +65°C. No derating required.

Storage Temperature: −55 to +85°C.

Optional 230 Volt Input
Provision for inputs of 210–250 VAC, 50–400 Hz, replacing the standard 105–125 VAC input voltage range, is available on all models except those having an output current rating of 20 ma. To order, add the suffix "-230" to the model number, and $10.00 to the standard price.

The cross-sectional dimensions of Series U power supplies permit efficient rear mounting on either 3½″ or 5¼″ rack assemblies. Threaded holes on three surfaces permit mounting in any position. See page 24.

Bryant Grinder Corporation uses Acopian unregulated power supplies in the programmable controller of the Centra-Form Grinder. The controller features a display which provides immediate diagnosis of machine malfunctions.

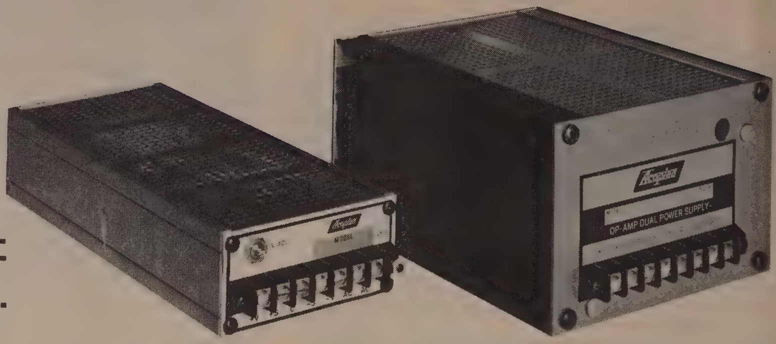
Acopian



DUAL OUTPUT For Op Amps.

Series D dual output power supplies are a convenient source of the tracking voltages required for powering operational amplifiers and related circuits. Their positive/common/negative output terminal configuration minimizes system wiring. Provision for remote sensing permits compensation of load line effects. Although moderately priced, they are sturdily constructed and conservatively rated.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.
Output Voltages: Tracking within 1%.
Output Currents:
Output Voltage Adjustment Ranges:
See tables. Outputs are short circuit protected.
Load Regulation: ±0.1%.
Line Regulation: ±0.1%.
Ripple: 1.5 mv RMS.
Polarity: Positive output, common, and negative output.
Remote Voltage Sensing: Standard.
Ambient Operating Temperature: −10 to +71°C.
Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: A built-in preset overvoltage protection circuit is available on all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $10.00 to price.

*Minor differences in panel layout. Same overall and mounting dimensions apply. (Pp. 8, 9, 12.)

SINGLE OUTPUT REGULATED PLUG-IN

An Acopian plug-in power module can be installed in a matter of seconds. Simply plug it into an octal socket. You don't even have to screw it down (although threaded holes are provided) unless it is to be mounted in other than a vertical position, or will be subjected to shock or vibration.

Standard models are available for any voltage from 1 to 200. For information on those not listed, contact factory.

SPECIFICATIONS

Input Voltage: 105 - 125 VAC, 50-400 Hz, single phase.

Polarity: Output floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient operating temperature: −10 to +65°C. No derating required.

MIL Tested/Increased Temperature Range: See p. 21.

Storage Temperature: −55 to +85°C.

Installation: Plugs into standard octal socket. Mounting holes (6-32) provided at each corner for installation in any position.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the octal-type plug. To order, add suffix "L" to model number and $5.00 to price.

Remote Output Adjustment: All models have a local voltage adjustment. When provision for remote (external) adjustment is also desired, add prefix "E" to model number. No increase in price.

Remote Sensing: Provision for remote sensing of the output voltage to compensate for drops in the load lines can be furnished at an additional charge of $10.00 per unit. Add prefix "R" to model number when ordering. "R" power supplies have a local voltage adjustment and provision for remote (external) output adjustment.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $10.00 to price.

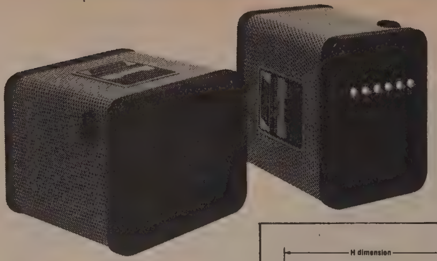
DUAL OUTPUT REGULATED PLUG-IN



Space-saving Acopian duals combine two electrically independent DC outputs in a single case. Either identical or different outputs may be selected. And with a choice of more than 300 output ratings, over 10,000 combinations can be supplied . . . each with Acopian's usual 3-day shipment guarantee.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Adjustment Range: ±1 volt.

Polarity: Outputs are floating. Each section may be independently connected to provide any combination of positive and negative outputs.

Short Circuit Protection: Delivers current surges without damage—to protect against prolonged overloads and shorts, use of an input fuse is recommended.

Ambient Operating Temperature: −10 to +65°C. No derating required.

MIL Tested/Increased Temperature Range: See p. 21.

Storage Temperature: −55 to +85°C.

HOW TO ORDER

Select the two sections desired. The complete model number is the combination of the two sections selected. Example: The combination of section 6J20D and section 12L40D is Model 6J20D-12L40D. Always assign the lower voltage section first. Where the indicated case sizes for the two sections differ, the larger case size applies.

For pricing purposes, add the cost of the individual sections selected.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the 11-pin plug. To order, add suffix "L" to model number and $5.00 to price.

Remote Output Adjustment: All models have local voltage adjustments. When provision for remote (external) adjustments is also desired, add prefix "E" to model number.

Remote Sensing: Provision for remote sensing of the output votlages, to compensate for drops in the load lines, can be furnished at an additional charge of $20.00 per unit. Add prefix "R" to model number when ordering.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $10.00 to price.

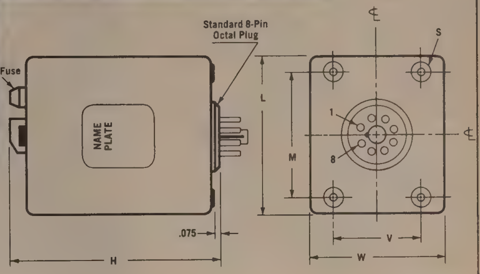
UNREGULATED PLUG-IN FOR RELAYS, LAMPS AND NIXIE TUBES

These low-cost, yet highly reliable unregulated power supplies have been specially designed to power DC relays, lamps and NIXIE tubes. Each has husky silicon rectifiers and a fused input to insure long and trouble-free operation. Installation consists of simply plugging the unit into a standard octal socket.



Size	L	W	H	M	V	S	Approx. Weight
G	3.40	3.28	5.0	2.625	2.625	Four 6–32 x ¼″ deep mounting holes	2lb 8oz
K	4.15	3.33	5.2	2.750	2.562	Four 6–32 x ¼″ deep mounting holes	2lb 14oz
Q	4.15	3.33	7.0	2.750	2.562	Four 10–32 x ½″ long mounting studs	7lb

SPECIFICATIONS

Input Voltage: 0-125 VAC, 50-400 Hz, single phase.

Output Voltage:
Output Current: } See table.
Ripple:

Load Regulation: Nominal voltage is based on 115 VAC input with approximately one-half load. At no load, the output voltage will increase by approximately 10%. At full load, the output voltage will be reduced by approximately 10%.

Line Regulation: Output voltage change due to input voltage change is directly proportional to the change in input.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +65°C. No derating required.

Storage Temperature: −55 to +85°C.

Installation: Plugs into standard octal socket.

OPTIONS

Solder Terminals: All models can be furnished with solder terminals instead of the octal plug. To order, add suffix "L" to model number and add $10.00 to price. Example: Model 24U100 becomes 24U100L.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "–230" to model number and $10.00 to price.

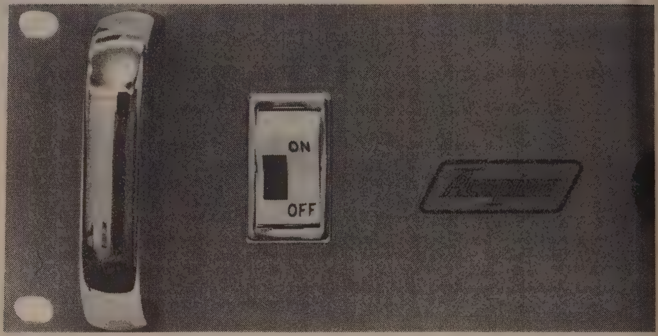
*Suitable for supplying input voltages to NIXIE tubes. NIXIE is a registered trademark of Burroughs Corporation.

Acopian

MULTIPLE-OUTPUT POWER SUPPLY SYSTEMS

shipped in only

9 days



Now you can fill your requirements for completely wired multiple-output rack-mounting power supply systems, without any need to search through a catalog and prepare time-consuming mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, simply call the Acopian "hotline" and specify the output voltages and currents that you require.

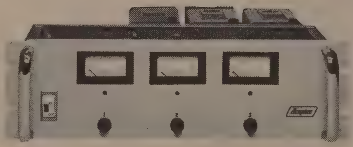
Acopian power systems offer the features that are most often required, and at reasonable cost. Each system is designed and constructed to provide an optimum mechanical and wiring configuration for the complement of power modules necessary to deliver the outputs specified. Acopian production expertise assures shipment of each system, completely wired and 100% tested, within 9 days after your order is received.

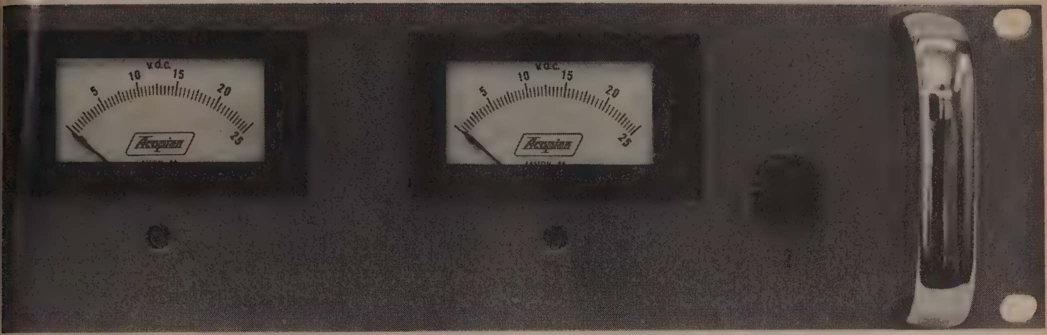
Ordering an Acopian power system is this easy:
List the DC outputs that you require. (Or, select the power modules that you wish to be included.) Note the system features which you consider necessary. Then, call the "Power Systems Hotline" collect at (215) 258-5441 and ask for the POWER SYSTEM DEPARTMENT.

An Acopian Applications Engineer will answer—on the phone—any questions which you may have. A distinctive system model number will be assigned, and a firm price will be quoted. Your completely-wired power supply system will be shipped within 9 days.

System Description
Any of the power modules listed in this catalog can be included in a power system. The rack assembly will be designed and wired in a manner optimum for the complement of modules included.

TYPICAL BUILT-TO-ORDER POWER SUPPLY SYSTEMS





Now you can design your power system on the phone . . . just call Acopian.

Pricing of assemblies equipped with plug-in type power modules is calculated as indicated below, and includes wiring, all necessary fuses, power switch/indicator on front panel, and all input and output connections via terminal strip(s) at the rear. When rear panel space is insufficient for terminal strips, a connector may alternately be furnished. Minimum price, $150.00.

To obtain pricing information for assemblies containing other than plug-in type modules, contact factory.

Panel height (19″ wide)	Price (not including plug-in power modules)
3½″	$20.00 plus $5.00 per output
5¼″	$25.00 plus $5.00 per output
7″	$30.00 plus $5.00 per output
8¾″	$35.00 plus $5.00 per output
10½″	$40.00 plus $5.00 per output

Description

The standard front panel is ⅛-inch aluminum finished in light gray baked enamel. Also available, at no additional cost, are Emcor or Amco gray formed steel panels. (The panel can also be supplied in any other color conventional type enamel supplied by customer, at an additional charge of $10 per purchase order.)

The rear portion of the assembly is normally constructed from extruded aluminum panels, alodyne finished.

Accessories and Options

Voltmeters and/or ammeters–
$15.00 each.

Front panel voltage adjustments–
$5.00 each.

Front panel handles–
$10.00/pair.

Chassis slides–
$50.00/pair.

Other features and accessories
Should you require any non-standard features, call the Acopian "hotline" at Area Code 215, 258-5441 and discuss your needs with an Acopian Application Engineer. A procurement charge of $25.00 minimum (exclusive of material) will apply if components not stocked by Acopian are specified. Engineering charges to cover special layout and wiring may also apply. Extra charges are minimized and delivery accelerated when the customer provides any special components which he wishes to be incorporated into a power system.

Redundant outputs—For applications where extreme reliability is a critical consideration, as in data communications and process controls, the use of redundant output power systems is recommended. Two power modules are included for each output and interwired in a manner permitting one to continue furnishing the required output should the other fail. Call the "Power Systems Hotline" at (215) 258-5441 for further information.

Delivery—Shipment of your completely-wired power supply system will be made nine days after receipt of order. Of course, the famous Acopian three-day shipping guarantee on any of 82,000 different individual power modules remains unchanged.

Guarantee—Acopian Corp. warrants each power supply system to be free from defects in material and workmanship for a period of five years from date of delivery.

ACOPIAN CORP., EASTON, PA. 18042 • TEL: (215) 258-5441 • TWX: (510) 651-4919

Acopian

BENCHTOP POWER SUPPLIES

These benchtop power supplies provide all the performance and operating features necessary in a laboratory instrument. A wide choice of single and multiple output models offer optimum combinations of the operating features and output ratings that are most often needed.

They are also "human engineered" for convenience and ease of use. Two meters provide for the simultaneous monitoring of voltage and current on single output supplies, or a combination of two output voltages or currents on dual and triple output models. When more than one is required, they may be stacked to conserve bench space. Interlocking design prevents the upper units from slipping off.

Coarse and fine voltage controls permit setting outputs to a high degree of resolution, and adjustable current limiting prevents the load from drawing a higher current than intended. Many models provide constant voltage/constant current crossover, and may be used to deliver a regulated current to a varying impedance load. Some also include adjustable overvoltage protection.

The rugged casework is attractively finished in black and gold. "Five way" output binding posts and a retracting handle contribute to user convenience.

SPECIFICATIONS

Input Voltage: 105-125 Vac, 50-400 Hz, single phase.

Output Ratings: See table.

Regulation, Ripple (constant voltage operation):
Line Regulation: ±0.01% or 2 mv, whichever is greater.
Load Regulation: ±0.01% or 2 mv, which is greater.
Ripple: 0.25 mv rms.
(Model KT7-20, ±10-20 V outputs only: Line regulation, ±0.05%; load regulation, ±0.05%, ripple, 1.0 mv rms.)

Regulation, Ripple (constant current operation):
Line Regulation: 2.0 ma (Model K7S500
6.0 ma).
Load Regulation: 10.0 ma.
Ripple: 1.0 ma rms (Model K7S500, 2.0 ma rms).

Output Current Control: Outputs marke ACL are short circuit and overload pro tected by means of a continuously adjust able rolloff type current limiting circuit.

Output marked CV/CC deliver a constan voltage with increasing load until the cur rent limiting point (continuously adjust able) is reached, beyond which voltage decreases as required to maintain a con stant current. In addition to providing shor circuit and overload protection, this fea ture permits the supply to be used as current regulated power source.

Temperature Coefficient: 0.015%/° C.

SINGLE OUTPUT MODELS

OUTPUT VOLTAGE RANGE	OUTPUT CURRENT, AMPS.	CURRENT CONTROL	PRICE	MODEL	CASE SIZE
0-7	1.0	ACL	$99	K7S100	K9
0-7	2.0	CV/CC	135	K7S200	K10
0-7	5.0	CV/CC	190	K7S500	K11
0-18	0.6	ACL	99	K18S60	K9
0-18	1.0	CV/CC	120	K18S100	K10
0-32	0.35	ACL	99	K32S35	K9
0-32	0.6	CV/CC	120	K32S60	K10
0-50	0.35	CV/CC	120	K50S35	K10

DUAL OUTPUT MODELS

OUTPUT VOLTAGE RANGES	CURRENT PER OUTPUT, AMPS.	CURRENT CONTROL	PRICE	MODEL	CASE SIZE
0-20/0-20	0.25	ACL	$139	K20D25	DK9
0-20/0-20	0.5	ACL	175	K20D50	DK10

TRIPLE OUTPUT MODEL

OUTPUT VOLTAGE RANGE	CURRENT PER OUTPUT, AMPS.	CURRENT CONTROL	PRICE	MODEL	CASE SIZE
0-7 ±10-20 (tracking)	2.0 0.5	CV/CC Fixed	$235	KT7-20	TK10

Stability: Over an eight-hour period, following a 30 minute warmup.
Constant voltage operation: 0.1%.
Constant current operation: 15 ma.

Temperature Range:
Operating: 0 to +50° C.
Storage: —40 to +85° C.

Protection:
Input: Line fuse.
Overload: Adjustable electronic current limiting.
Overvoltage: "Crowbar" circuit, continuously adjustable down to 3 volts, protects load by effectively short circuiting output when "crowbar" trip point setting is exceeded. (Models K7S200, K7S500 and KT7-20 only.)

Transient Response Time: Less than 50 μsec, for a step change in input from 105 to 125 Vac, or in output current from no load to full rated output current.

Output Impedance (constant voltage operation):
Less than 0.03 ohms from dc to 1 kHz.
Less than 0.5 ohms from 1 kHz to 100 kHz.

Meters: Two, each accurate to 2% of full scale. On multiple output models, selector switches permit monitoring every output voltage and current.

Controls:
Power switch
Output voltage, coarse and fine adjustments
Output current limit
Overvoltage protection trip point (Models K7S200, K7S500 and KT7-20 only)
Meter switches (multiple output models only)

Construction: Gold-finished extruded aluminum top and sides. Bottom, perforated aluminum panel. Front and rear panels, molded black phenolic. Retracting handle. Input power cord, 3-wire UL approved. Output connections, "five way" binding posts.

Case Size	Dimensions (overall) H x W x D (inches)	Approx. Weight
K9 DK9	3.3 x 8.5 x 10.9	4 lb 1 oz 4 lb 6 oz
K10 DK10 TK10	3.3 x 8.5 x 11.3	5 lb 5 lb 6 oz 7 lb 6 oz
K11	3.3 x 8.5 x 12.2	7 lb 8 oz

Warranty:
All Acopian products listed in this brochure are covered by a firm five year warranty which includes the cost of both parts and labor.

WHAT DOES ACOPIAN'S 3-DAY SHIPPING PROMISE MEAN?

For more than a decade, Acopian has been shipping standard AC to DC power modules three days after receipt of an order. During this period, the Acopian line has expanded from the original plug-in modules to a number of complete power supply families.

Our unique 3-day shipping guarantee has prompted many questions. Here are some of those most often asked.

Q. What does Acopian's 3-day shipping promise mean?

A. It means that any time you order power modules selected from our catalog, shipment will be made 3 days after we receive your purchase order.

Q. Has Acopian ever failed to meet this promise?

A. Never.

Q. Do I have to ask for 3-day shipment on my order?

A. No. It's automatic. In fact, you must tell us if you want the shipment delayed.

Q. What if I need four or five different models? Does Acopian still keep the 3-day promise?

A. Yes. Guaranteed 3-day shipment applies to one model or to a combination of models.

Q. Is the 3-day promise affected by quantity? Suppose we need 50 or 100 pieces?

A. The 3-day promise applies to small quantities. Acopian will ship a portion of a larger order in 3 days and, after discussing your requirements with you, schedule the balance.

Q. What do you mean by a "portion"? Isn't Acopian hedging?

A. Not at all. Our experience substantiates that shipping five or ten units in 3 days will get almost any project underway. Rarely are larger quantities required at one time.

Q. It takes me so long to get a requisition processed and approved that your 3-day shipment doesn't mean much to me. What's your answer to this problem?

A. Processing your internal paperwork is out of our control. However, verbal orders are acceptable. We suggest you ask your purchasing people to use the phone. Telephone orders to our area representatives are also shipped in 3 days. All we require is the purchase order number.

Q. How long after you ship will I have the power supplies?

A. Transportation time is out of our control. Some carriers are quite efficient. Even overnight service coast-to-coast is not unusual. Your purchasing department probably knows the fastest shipping method to your location. If not, Acopian can recommend the fastest carrier.

Q. I'm curious. You say Acopian has never failed to meet the 3-day promise. How do you do it?

A. We can't tell you all of the details, but it's in our attitude and commitment supported by efficient personnel, streamlined procedures and modern facilities. Facilities that have been designed and equipped specifically to meet our 3-day shipping promise.

It may surprise you to know we manufacture each power supply to order and do not ship from inventory.

Q. I've seen other power supply manufacturers advertise "stock delivery." Why should I consider 3-day shipment a significant benefit?

A. Because a "delivery-from-stock" promise is not precise. It may even be misleading. Consider what happens if the power module you require is out-of-stock when your order reaches a typical vendor. Four to six weeks is not unusual before inventory is replenished and your order is shipped. Consider further how this problem is compounded when you need four or five regulated outputs for your project. The significant difference, then, is that fulfillment of a "ship-from-stock" promise is dependent on a variable —the quantity in stock when your order is received. Acopian's 3-day shipment promise contains no unknowns.

Q. In a legitimate emergency, do you ever do better than 3 days?

A. Yes. Please call in an emergency. If we can't do it, we'll tell you immediately.

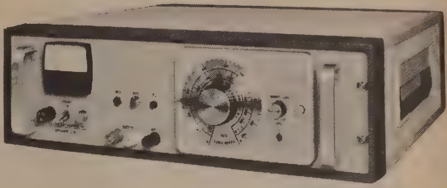
If you don't find the answers to your questions here, please call or write to our Vice-President, Marketing. You will receive a prompt and straightforward reply.

AC Power Sources—Single and Three Phase

The Standard "S" Features:

- All silicon solid state semiconductors.
- Multiple output voltages 0-135, 0-270.
- Instantaneous overload protection.
- Accepts over 50 different plug-in oscillators
- Frequency stabilities to 0.1%
- 13 models from 130VA to 5,000VA.
- 45 Hz to 10,000 Hz frequency range.

Solid State "S" Series Frequency Converters



MODEL 200SA WITH V141B OSCILLATOR

All aluminum parts are finished in gold iridite or black anodize. Steel parts are cadmium plated and finished with gold iridite. Front panels are blue enamel. Other paint available on special order. Furnish color chip and federal specification number.

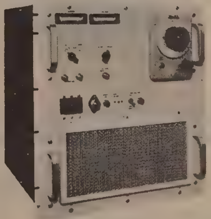
"T" Series High Power Frequency Converters



MODEL Y2500TA WITH F34C OSCILLATOR

The "T" series of regulated A.C. power sources is an extension of the "S" series in the higher power range with outputs up to 5,000 VA. The standard "T" series feature all silicon solid state components except for the output stage where rugged, forced air vacuum tubes are used. These units can also be used as high power audio amplifiers. The supplies are compact, ruggedly constructed, and contain all of the electrical and mechanical features of the "S" series.

ACDCo *Power* WHERE *you need it!*

Inverters-Uninterruptible Power Systems -Battery Chargers-Frequency Changers-Power Supplies

ACDCo Power Equipment is designed to meet high reliability and performance standards providing maximum life with minimum maintenance to protect all system circuits that require dependable, high quality power.

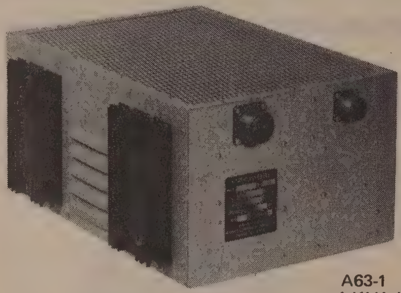
ENGINEERING SERVICES

SYSTEMS CONSULTATION
ACDCo's engineering is available to discuss protection of your valuable equipment from power crises effects, and also show you how ACDCo can save you money on your equipment.

FIELD SERVICE & ENGINEERING
ACDC's consulting engineers will conduct surveys and studies to determine systems definition and make appropriate recommendations.

CUSTOM CONTROLS
ACDCo designs custom built controls for all power systems. Contact our engineering department for specialized and custom power analyzing, monitoring and recording systems.

PROCUREMENT SATISFACTION
If ACDCo can not satisfy your power requirements, we will direct you to a choice of firms whose equipment should.



A63-1
1 KVA INVERTER

HARDWARE

Uninterruptible AC Power Systems – 36 VA to 5 KVA
Frequency Converters – AC to AC: 50/60 Hz, 60/50 Hz, 50/400 Hz and 60/400 Hz.
Battery Chargers – AC to DC Power Supply: 0-30 VDC/30-300 VDC Auctioneer Units and Automatic Transfers
Power Supplies – Constant current and constant voltage current regulated and modular.
Power Monitors (AC and DC) and Fault Detectors – Specialized and custom power analizing, monitoring and recording systems, and controls.
Inverters, power – DC to AC output: Fixed-base, portable, mobile and marine.
ACDCo INVERTERS are used in one of the **ROUGHEST** of Marine Environments on the **U.S. COAST GUARD'S - RESCUE LIFE BOATS** to power their Navigation and Communication equipment.

TYPICAL SPECIFICATION

INPUT** ± 15% from nominal
OUTPUT** Sine wave, 120 Volts RMS, 60 Hz
VOLTAGE REGULATION** 2% over full input and load range
FREQUENCY REGULATION** 1% over full input and load range
POWER FACTOR** .9 Lead to .8 Lag
EFFICIENCY** Over 80% at nominal input
DISTORTION** Less than 5%
OVERLOAD** Within specifications for ONE MINUTE at 140% load
OVERLOAD PROTECTION** No damage from short to open circuit, reversal of input, or input voltage to 140% nominal.

DESIGN FEATURES

Ruggedized construction, no moving parts, completely solid state, easy servicing - sides fold down, plug-in transistors and I/C's, transistors and I/C's on Printed Circuit Boards, all P/C boards plug-in removable.

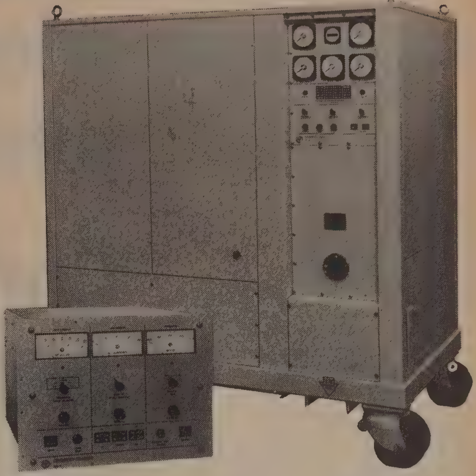
Solid State Frequency Changers Inverters-Uninterruptible Power Systems

A•L•S has achieved major innovations in power conversion techniques and power systems control. These accomplishments enable A•L•S to offer, at competitive prices, frequency changers, inverters and uninterruptible power systems embodying the best characteristics of both solid state and rotating machine equipments without the performance and reliability limitations of either.

The SMG Series General Purpose Frequency Changers are available in 50, 60, or 400 Hz output and will accept 45 to 450 Hz input. There are ten standard models available from 5 to 375 KVA. Single phase output systems to 50 KVA are also available.

In addition to their superior performance, the SMG Series offer many truly unique features, the most important of which are listed below.



Model SMG-5.
5 KVA, 400 Hz
Output.

Model SMG-150.
150 KVA, 400 Hz
Output.

EXCLUSIVE FEATURES

- Unity power factor rated. Will handle continuous full rated load from .5 leading to .5 lagging power factor.
- Reserve capacity to handle surge loads. Will start and run one horsepower of motor load per KVA of rating.
- Convenient, reliable parallel operation. Any number of units may be paralleled to increase capacity.
- Status lamps indicate specific cause and power circuits deactivate in the event of abnormal line voltage, sustained overload, excessive temperature or output voltage.
- Very low open loop output impedance. Less than 5% transient voltage excursion for 50% step load change.
- Operates with any input phase rotation. No need to worry about expensive blow-ups each time the input source location is changed.
- Integral KVA meter and switch monitor each phase or total load KVA. Accuracy, ±2% regardless of load unbalances.
- Cannot be damaged by progressively applied or stepped overloads, or by input line transients.
- High input power factor and low line distortion. Does not control output by phase firing SCR's in the rectifier section.
- Plug-in modules can be easily replaced and are designed so that a component failure in one module will not produce a consequent failure of any other module.
- Switchboard instrumentation. 4½" square, 250° instruments are used exclusively on all units 50 KVA and above.

SPECIFICATIONS

INPUT

Voltage: Available in all standard, domestic and foreign nominal voltages ±10% or per customer specifications. Frequency 45 to 450 Hz.

OUTPUT

Voltage: Available in all standard, domestic and foreign voltages or per customer specifications. Output adustment is ±10% from nominal or optionally 0 to 110%. Regulation is ±0.5% for the combined effects of line, load and temperature.

Waveform: 2% THD at full load. 1% available optionally.

Current: Adjustable current limit from 75 to 125% of ratings or optionally from 0 to 125%. Manual current limit override allows over 200% of ratings for motor starting. Regulation is ±0.5% for the combined effect of line, load and temperature.

Power Factor: Full rated power from 0.5 capacitive to 0.5 inductive.

Phase Displacement: 120° ± < 1° for balanced loads. Load may be 100% unbalanced. Line-to-line voltage will remain within ±1% from the average for load unbalances of 50%.

Incidental Modulation: 0.025% peak FM and 0.025% to 1.0% peak AM depending on input power frequency and phase unbalance.

Response Time: 1 cycle of output.

Recovery Time: 4 cycles of output.

Frequency: 50, 60 and 400 Hz adustable ±5% are standard. Stability is ±0.1% constant environment, ±0.5% from cold start. Quartz time base with ±0.001% stability is available optionally.

Instrumentation: All indications are accurate to ±2% of full scale. Provided are input/output voltmeter(s), ammeter(s), KVA meter, dial and pointer hertzmeter and running time meter.

Status Lamps: Depending on model, 6 to 20 lamps indicate system operating status.

Protection: Combination of circuit breakers, fuses, sensing circuitry, air switches, thermostats and contactors positively protect the unit from fault loads, improper input voltages and consequential power train damage.

Environment: 0-50°C continuous, full ratings.

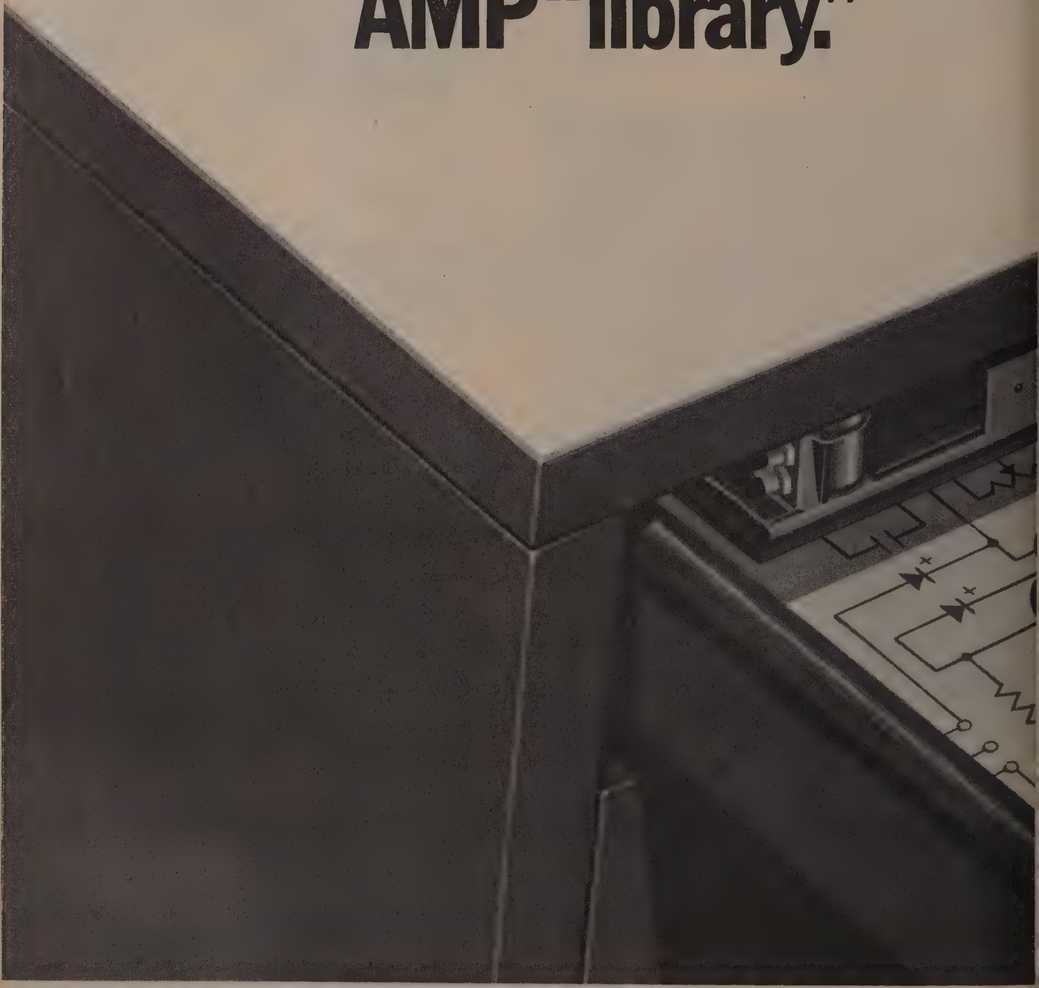
EMI

Shielded and filtered. Meets most EMI requirements. Optional filters for the most stringent requirements can be provided.

A•L•S ELECTRONICS CORP. • 733 East Edna Place • Covina, Calif. 91723/(213) 966-7431 TWX: 910-584-1812

Looking for a special power supply?

Consult the AMP "library."



You'll find over 1000 performance proven designs—up to 60 KV, and 2 KW. The result of 20 years' experience in power supply design. In high-, low- or combination-voltage configurations.

For CRT's, lasers, scan converters, klystrons, photomultipliers, X-ray, vac-ion pumps, image intensifiers, orthicons, silicon image tubes, TWT's and low voltage systems.

Limited room? We'll design a power supply to fit. With more output per cubic inch than probably any other supply you can lay your hands on. And we'll work with you from start to finish—using specs you write or helping you write them.

Whatever you decide, you can be sure of one thing. You'll wind up with a good power supply that fits the space available...at a reasonable cost and in a reasonably short period of time.

High Voltage Power Supplies and Modules

Telephone: (213) 997-7222

The HV models listed here fill the broadest range of applications and choice of options. In addition, Advanced High Voltage Co. has fully engineered High Voltage Power Supplies and Modules for a long list of specialized applications. See page 1•1092.

Advanced High Voltage Co. offers technical assistance for selecting and specifying High Voltage Supplies and Modules. Call us. If we cannot supply a unit to your specifications, we will assist you in obtaining a source.

HOW TO ORDER: Specify unit by model number and if applicable, add option number(s).

Advanced High Voltage Co. also manufactures the following type of High Voltage Supplies: High efficiency DC to DC converters, 1 to 500 watts, regulated and unregulated. OEM High Voltage Supplies for laser applications, x-ray, ion implantation, CRT displays, photo and microwave tubes, precipitation and electrostatic charge applications, multiple output and programmable supplies. Please contact factory for details.

Units are listed by series in order of increasing power output, then by increasing output voltage. Model number code: First letter refers to INPUT. A = 117 VAC, 50 to 400 Hz; D = 28 VDC. Second letter refers to LOAD REGULATION. R = regulated; U = unregulated. See specifications for line regulation. Other letters and numbers designate particular models.

EOUT Nom. kV	IOUT Max. mA	Model No.	Features, Specifications and Options	
1	15	HVA 1085	Encapsulated, compact High Voltage Sources for applications where user can supply 14 to 25 kHz at low cost. Units contain HV transformer, rectifier and filter components, and the upper, high resistance portion of the sensing divider. **Nominal Sensing Current:** 50 μa. **Ripple:** 0.1% P-P for 20 kHz, square wave drive. **Dimensions:** 2.13 x 1.06 x 3.13, 10 KV and above: 2.50 x 1.25 x 4.38. **Temperature** −10 to +65°C. **Weight:** 8 to 14 oz.	HVA
5	3	HVA 100		
10	1.5	HVA 200		
15	1	HVA 300		
20	0.8	HVA 400		
200V	15.0	DRF 325	Miniature, fully regulated DC to DC converter with 0.1% load regulation. Has remote programming capability. 3 watts output. Fully encapsulated, shielded, RFI decoupled, hermetically sealed. **Input:** 28 VDC. **Output Adjustment Range:** −30% to +10%. **Regulation (L/L):** 0.1%. **Ripple:** 0.1% P-P. **TC:** 100 ppm. **Operating Temperature:** −10°C to +65°C. **Dimensions:** 3.0″ x 1.5″ x 0.6″. (Flange length is 3.625″.) **Weight:** 4 oz. **Options:** Negative output (−01), remote program (−05), ±15 volt input (−33). Other options.	DRF/DUG

High Voltage Power Supplies and Modules

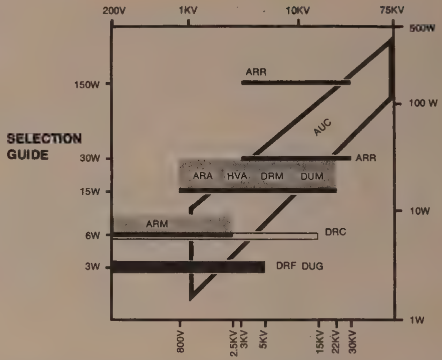
Advanced High Voltage Co., Inc. manufactures High Voltage DC sources anywhere in the graph, to 75 kilovolts, to 500 watts. The bars in the graph indicate the range covered by the company's STANDARD lines of modules and supplies. They are identified by the letters of their series. All units are adjustable, and most are programmable over a wide range of output voltages. The shaded areas indicate extended power output (option) for the particular series.



The following list shows examples of High Voltage Power Supplies and Modules, which were originally custom-designed for special applications as listed. They are now available as standard items. With the exception of the AUC referenced supplies, all units are DC to DC converters and can be furnished with different input and output voltages. The low-voltage units all have High Voltage input to output insulation. Output is adjustable on all regulated units (fully regulated and line only). Unregulated supplies have their output adjusted by means of the input. Units are listed in order of increasing output voltage. The 4th column lists the maximum output voltage available for the specific configuration. Maximum power output depends on the mechanical configuration and is one of the following: 6, 15, 30, 80, 150 or 280 watts. We invite you to telephone the factory engineering department for any other data you might need.

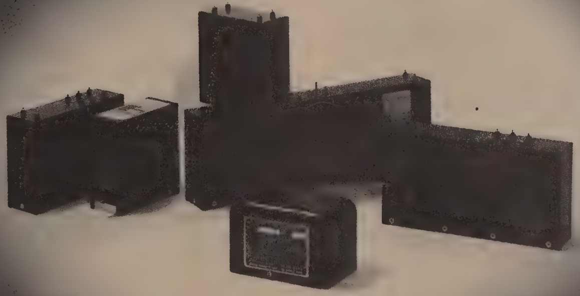
POWER CONVERSION EQUIPMENT



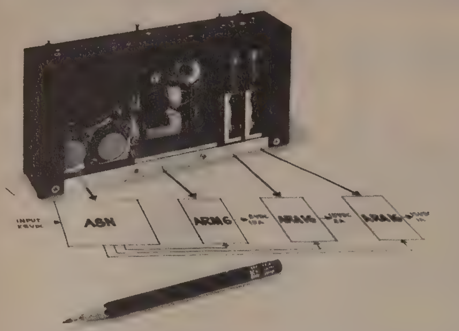
ARNOLD MAGNETICS

ARNOLD MAGNETICS CORPORATION

ARNOLD MAGNETICS

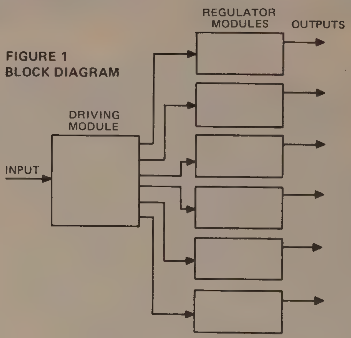
MODULAR POWER SUPPLIES

Design As You Order



Arnold Magnetics Thin-Mods let you design your own custom power conversion system as you order. No engineering charges . . . no lost design time. And, the complete power supply is provided in a pretested, encapsulated miniature package.

FIGURE 1
BLOCK DIAGRAM



HOW TO SPECIFY AND ORDER

1. **BLOCK DIAGRAM:** Construct your Power Conversion System block diagram in Figure 1.
   A. Use one block for the Driving Module.
   B. Use one block for each output required.
2. **REGULATOR SELECTION:** Select Regulator Modules from Table M1. Enter the following in Table M3 for each output:
   A. Module Part Number
   B. Output voltage (nominal) from Table M1 in Volts column
   C. Maximum output current for application in Amps column
   D. Output power in Watts column
   E. Input power (Watts/Efficiency) in Input Power column
3. **DRIVING MODULE SELECTION:** Select Driving Module from Table M2 using prime power source and Total Input Power from Table M3. The Driving Module must be capable of providing more power than the Total Input Power required for the Regulator Modules.
4. **CASE SIZE SELECTION:** Using the sum of all module lengths selected from Table M3, select the shortest case size that will accommodate from Table M4.
5. **PRICING:** Price and Weight for complete power system is the sum of the applicable column from Table M3.
6. **PART NUMBER:** Construct Power Converter Part Number as follows: Driving Module Part Number from Table M2 — Last Letter of Regulator Module Part Number from Table M1 — Operating Voltage (VDC)/Operating Current (AMPS) — Case Size Letters from Table M4.
   List Regulators in descending order of operating current.
   Enter Power Converter Part Number at "AMC/PN".
   Example: APT-M5/15V-T30/1-A15/.2-DA
   INPUT: (APT)-105 to 125 VRMS, 50-500 Hz
   OUTPUTS:
   1. (ARM 6) — Delivers 5 VDC @ 15 AMPS, overvoltage protection option (V) at 6 ±.5V
   2. (ART 30) — Delivers 30 VDC @ 1 AMP
   3. (ARA 16) — Delivers 15 VDC @ .2 AMP

   CASE SIZE: (DA Table M4) 1⅝ × 3⅝ × 10½
7. **DELIVERY:** Normal delivery is 10 days ARO.
8. **HOW TO ORDER:** Order using AMC P/N (defined as above) and base price (1 pc) from Table M3. Price discounts 2-4 pcs. .90 × base price, 5-9 pcs .85 × base price, 10-24 pcs .80 × base price. Consult sales representative or factory for higher quantity price discounts and special modules.

*Consult factory for delivery.

Outputs are all isolated Output Voltage Adjustment ±5% min.

Short Circuit Protection on all Regulator Modules

Overvoltage Protection Option Available for All Regulator Modules up to 30 VDC, set to 20% above maximum output voltage. Specify "V" after module part number. (add 0.6" to module length for each output with this option). (See Table 1.)

Ripple and Noise (Max.):	0.1% VRMS + 10 MV for ARA & ARB 0.5% VRMS + 10 MV for ART, ARM, BRP & BRQ
Temperature Coefficient:	0.01%/°C for ARA, ARB, & ARC 0.02%/°C for ART, ARM, BRP, BRQ
Weight (Including Case):	4.5 oz. for ARA & ARB & option "V" 10.0 oz. for ART 20.0 oz. for ARM 88.0 oz. for ARQ, BRP & BRQ
Operating Case Temperature:	−10°C to 71°C

TABLE M2
GENERAL SPECIFICATIONS FOR DRIVING MODULES

- 115 VAC, 47–500 Hz Input (25 KHz Converter)
  - 110 Watts output—APS
  - 200 Watts output—APT
  - 500 Watts output—BRN
  - 1000 Watts output—BPQ*
- 115 VAC, 400 Hz Input (Transformer)
  - 50 Watts output—ATA
  - 100 Watts output—ATB
- 220 VAC, 47–500 Hz Input (25 KHz Inverter)
  - 110 Watts output—APF
  - 200 Watts output—APG
  - 500 Watts output—BPF
  - 1000 Watts output—BPE
- 28 VDC Input (25 KHz Inverter)
  - 100 Watts output—ASM
  - 200 Watts output—ASN
  - 600 Watts output—BST*
  - 1200 Watts output—BSP
- 12 VDC Input (25 KHz Inverter)
  - 45 Watts output—ASL
  - 90 Watts output—ASA
  - 230 Watts output—BSB*
- 48 VDC Input (25 KHz Inverter)
  - 100 Watts output—ASG
  - 200 Watts output—ASJ
  - 600 Watts output—BSD*
  - 1200 Watts output—BSF*
- 115 VDC Input (25 KHz Inverter)
  - 110 Watts output—ASH
  - 220 Watts output—ASK
  - 500 Watts output—BSR*
  - 1000 Watts output—BSQ*

Input	Output Power (watts)	Module Part Number	Module(4) Length (inches)	Price (1 pc)

*Consult factory for delivery

Inputs are isolated from output and Case EMI/RFI Filtering

Transient Protection Option Available

Special Driving Modules available with Modified Output Power and Input Voltages

Weight (Including Case): APS—23 oz. ASL, ASM, ASG, ASH—18 oz., APT—26 oz., ASA, ASN, ASJ, ASK—20 oz., ATA—30 oz., ADN—14 oz., ATB—35 oz., BRN, BPF, BSB, BSD, BSR, BPQ, BPE, BST, BSF, BSQ—75 oz.

Operating Case Temperature -10°C to +71°C

†Specify input in Model Number, thus: BPQ (240 Δ) –XXX (47-500 Hz) 480V must be 4 wire Y

NOTES:

(1) Max. Output Voltage and Current, nominal Input

(2) Add 10 MV to Load Regulation and Line Regulation for all models.

(3) ARM Regulator Modules may not be used with ATA or ATB Driving Modules

(4) Module part numbers beginning with the letter "B" defines case 3¼"W × 3⅝" H (Mate with "B" Driver only)

(5) Add 0.6 inches to length for each additional amp of output current over 3 amps for each regulator. Not to be used with ARM regulators.

ARNOLD MAGNETICS CORPORATION 11520 W. Jefferson Blvd., Culver City, Ca. 90230 • (213) 870-7014 • TWX 910-343-6468

ARNOLD MAGNETICS

AC-DC REGULATED CONVERTERS

115 VAC 50-500 Hz to single or multiple DC outputs

Case CA

FEATURES:

- Wide output voltage choice
- Multiple outputs standard
- Short circuit protected
- Miniature size
- Light weight
- Fully encapsulated
- Meets MIL-E-5272C

SPECIFICATIONS

INPUT: 105-125 VRMS, 10 47-500 Hz (See Note 4)
OUTPUT: 2 VDC through 2000 VDC, 12 Amps and below up to four outputs
OUTPUT REGULATION AND RIPPLE: See Notes 1 thru 4
OPERATING TEMPERATURE: −10° to 71°C at case
COOLING: Primarily cooling by conduction through base plate
ENVIRONMENTAL: Per MIL-E-5272C
EMI/RFI: Filtering in all models

OPTIONS (See Table 1):

A — Remote external voltage adjustment
CT — Center tap output
E — Input voltage
G — Flexible Leads
I — RFI qualified (MIL-1-6181D certification)
S — Short terminals
V — Overvoltage protection

NOTES:

(1) Load Reg. (½ FL-FL) 2% Max., Line Reg. .3%, adjust ±5% of nominal output, ripple .3% VRMS +10 MV. Options available: A, CT, E, G, I, S, V

(2) Load Reg. (½ FL-FL) 0.1% + 10 MV, Line Reg. 0.1% + 10 MV, Adjust ±5% of nominal output, Ripple 0.1% VRMS + 10 MV.

(3) Load Reg. (½ FL-FL) 0.2% + 10 MV, Line Reg. 0.2% + 10 MV. Adjust ±5% of nominal output, Ripple 0.5% VRMS + 10 MV.

(4) Input voltage range for PHU 105-125 VRMS.

Case BB

HOW TO ORDER:

- Standard models: Use model numbers listed. Add option letters as required per Table 1.
- Special models: Use three letter model number followed by voltage (volts)/current (amps). Use standard model of highest voltage for output power rating and price. For PHU model only.

EXAMPLE: PHU-5.5V/5 has output of 5.5 VDC at 5 amps with overvoltage protection option. Price in 1 pc. quantity $335 00 Case Size B.

For other Models see "Design As You Order" pages. **A·4**

ARNOLD MAGNETICS CORPORATION 11520 W. Jefferson Blvd., Culver City, Ca. 90230 • (213) 870-7014 • TWX 910-343-6468

AC-DC REGULATED POWER SUPPLIES

115 VAC 400 Hz to single or multiple DC outputs

ARNOLD MAGNETICS

FEATURES:

- ■ Short circuit protected
- ■ Multiple outputs standard
- ■ MIL STD 704 power input
- ■ Isolated outputs
- ■ Small size
- ■ Tight regulation
- ■ EMI/RFI free
- ■ Fully encapsulated
- ■ Conduction cooled

SPECIFICATIONS:

INPUT: 105-125 VAC, 1Ø, 380 to 420 Hz
OUTPUT: Up to three outputs. 5 VDC to 200 VDC
REGULATION:
LINE: ±.1% (105-125 VRMS) + 10 MV
LOAD: ±.1% (1/2 FL-FL) + 10 MV
TEMP. COEFFICIENT: −.015%/°C
RIPPLE: .1% VRMS: +10 MV Max.
OPERATING TEMPERATURE: −10°C to +71°C at case.

OPTIONS: (See Table 1)

A — Remote external voltage adjustment
E — Input voltage alteration
G — Flexible leads
S — Short terminals
V — Overvoltage protection

SINGLE OUTPUT MODELS

Output

200 28 5	0.13 0.50 4.00	Display, Linear Amp and Logic Power	CA	ATB-A5-A28-B200	440

HOW TO ORDER:

Standard models: Use model numbers listed. Add option letters as required per Table 1.

For other Models see "Design As You Order" pages.

DC-SINE WAVE INVERTERS

28 VDC to 400 Hz Sine Wave Output

FEATURES:

- ■ Miniature Size
- ■ Closely Regulated Output Voltage
- ■ Low Harmonic Distortion
- ■ Meets MIL-E-5272 & MIL-STD-709A
- ■ Closely Regulated Output Frequency
- ■ Generates NO RFI-EMI

SPECIFICATIONS:

INPUT: 24-30 VDC
OUTPUT: Voltage: 28 or 115 VRMS, Isolated from case and input. (Other voltages 6-440 VRMS available).
FREQUENCY: 400 Hz (Other frequencies 360 to 10 KHz available).
WAVE SHAPE: Sine Wave with maximum distortion of 6%.
REGULATION: Output Voltage: ±.5% line, ±2% load.
OUTPUT FREQUENCY: ±.3% line, ±.2% load.
OPERATING TEMPERATURE: −10° to +71°C at case.
COOLING: Primarily cooling by conduction thru base plate.
TEMP. COEFFICIENT: ±.05%/°C.

Output (VRMS)	Output Power (VA)	Case	Model Number	Price 1 pc.
115	50	K	SKB-28-115-400-50	$353
115	100	L	SKD-28-115-400-100	625
28	50	K	SKB-28-28-400-50	353
28	100	L	SKD-28-28-400-100	625

HOW TO ORDER:

(1) Standard Units: Use Model Numbers listed.

(2) Special Units: Specify SKB (50VA), SKD (100VA)—Nominal Input Voltage—Output Voltage—Frequency—Output Power (VA).

EXAMPLE: SKB 26-100-800-40 operates on a nominal 26 VDC input and deliver 100 VRMS at 800 Hz with output power of 40 VA.

DC-DC REGULATED CONVERTERS

11 to 13 VDC Input to DC Power Converters

FEATURES

- ■ Wide choice of input voltage
- ■ Polarity reversal protection
- ■ 5000 Volt output isolation
- ■ Small size
- ■ EMI/RFI filtering
- ■ High reliability

SPECIFICATIONS:

See notes for individual models.

OPTIONS (See Table 1):

A — Remote external voltage adjustment
CT — Center tap output
E — Input voltage modification
G — Flexible leads
V — Overvoltage protection

ARNOLD MAGNETICS

DC-DC REGULATED CONVERTERS

12, 28, 48 or 115 VDC to single or multiple DC outputs

FEATURES

- Wide choice of input voltage
- Polarity reversal protection
- 5000 Volt output isolation
- Small size
- EMI/RFI filtering
- High reliability

SPECIFICATIONS: See notes for individual models.

OPTIONS (See Table 1):

A — Remote external voltage adjustment
CT — Center tap output
E — Input voltage modification
G — Flexible leads
V — Overvoltage protection

NOTES:

(1) Input 26-30 VDC, Load Reg. (½ FL-FL). Adjust 90% to 105% of nominal output, operating case temp. −55 to 100°C 2500-5000 VDC output isolation. Options available: A, CT, E, I, S.

(2) Input 26-30 VDC or other input range specified load regulation (½ FL-FL). Adjust 40% to 105% of nominal output, operating case temp. −55 to +100°C. 2500-5000 VDC output isolation. Options available: A, CT, EE, G, I.

(3) Input 24-30 VDC, Load Reg. (½ FL-FL). Adjust ±5% min. of nominal output, Overload/short circuit protected, operating case temp. −10 to +71°C. Options available: see Table 1

(4) Load Reg. (½ FL-FL). Adjust ±5% min. of nominal output, Overload/short circuit protected, operating case temp. −10 to +71°C. Options available: see Table 1.

(5) Add 10 MV to Load Regulation and Line Regulation for all models.

(6) Add 10 MV RMS to ripple for all models.

HOW TO ORDER:

(1) Standard models: Use model numbers listed. Add option letters as required per Table 1.

(2) Special models: For SHU converters use three letter model number followed by voltage (volts/current/amps). Use standard model of highest voltage for output power rating and price.

EXAMPLE: SHU 28 CT has output of ±14 VDC at 1.4 Amps with a 1 pc. price of $297.00

For other Models see "Design As You Order" pages.

ARNOLD MAGNETICS CORPORATION 11520 W. Jefferson Blvd., Culver City, Ca. 90230 • (213) 870-7014 • TWX 910-343-6468

OPTIONS FOR POWER CONVERTERS
Table I

ARNOLD MAGNETICS

Option Letter	Option	Specifications (Examples)	Use on Models	Price $
A	External (Remote) Adjustment of Output Voltage	Two (2) flexible leads for external pot. All performance specifications unchanged, 5K pot PHU, SMU; 10K pot SHU (PHU-5-A)	SHU, SMU, PHU	$ 39
(CT)	Center Tapped Outputs	Put "CT" in parenthesis for center tapped output. Example: SHU-30(CT) provides ±15 VDC @ 1.3A. Output voltage available to 500 volts except 50 volts for SMU.	SHU, SMU, PHU	44
E	Input Voltage Alteration	Permits operation over specified range of input voltage: E_L to E_H. Output power and adjustment range are affected. Consult factory for maximum values. When E-E exceeds 4V, observe case temperature closely. Specify lowest and highest input voltage (E & E). Example: SHU 30E (20-30) will deliver 30 volts @ 0.87 A at any input from 20 to 30 VDC.	ALL MODELS	44
EE	12 Volt Nominal Input	Derate output current 50%. Input: 11–13 VDC Max. Output: 2500 VDC (SHU-12EE)	SHU	60
G	Flexible Leads	Leads per MIL-W-16878 where applicable. Lead length: 10 inches minimum. Price per pair of leads (ASN-M5/15-A15/1-BA-6)	MOST MODELS	20
I	EMI/RFI Qualified	Conducted and radiated noise below spec. Level of MIL-I-26600, Class I and MIL-I-6181D. Qualification is by similarity. PHU and SHU to MIL-I-6181D only case size b SMU case size Q (PHU-5-I)	SHU, SMU, PHU Single Outputs Only	150
KI	Constant current in overload†	Constant voltage – constant current (sharp "knee"). (APT-M100/1KI-DA)	Available on all regulators of table M1 (except "series" types).	100
L	Logic Control (Inhibit)†	The output voltage of any regulator will drop below 3% of rated when a control signal of 3.5 to 20V is applied to the control terminals. (APS-M5/8L-CA)	Consult Factory	85
PE	Programmable Output Voltage (By Voltage)†	Output varies directly with 0–10 VDC applied between control terminals. Input resistance to control terminals 5K ohm approx. Output voltage range: 3% to 105% (min. of rated output). Programming linearity will not exceed 5% full scale.* (APT-M5-A15PE-DA)	Available on all regulators of table M1.	75
PI	Programmable current limit†	Output current limit is a linear function of programming resistor, R. $R = 50\left[\frac{\text{Desired limit current}}{\text{Maximum output current (table M1)}}\right]$ The power supply output changes from constant voltage mode to constant current mode when the load demand exceeds the programmed value. (BPQ-Q5/100PI-EB)	Available on all regulators of table M1.	125
PR	Programmable Voltage (By Resistance)†	Output Voltage $\leqslant (K = 500\Omega/V)$. R = Total resistance connected to programming terminals. Programming temperature coefficient: .01%/°(Max.) *Programming response time will not exceed 1 ms. (BPQ-Q30/30PR-EB)	Available on all regulators of table M1.	75
R	Remote Sensing	Senses Voltages at point of Load (cable drop reduces max. output voltage). (Output reduces with open sense leads.) (BPQ-Q5/75R-EB)	Available on all models except models .6" long	85
S	Short Terminals	3/8 inch maximum terminal length. Sleeving will be required for high voltage outputs. Price per pair of terminals. (PHU-30-S)	SHU, SMU. PHU	14
T	Wide Temperature Range	Operates from –55°C To +85°C baseplate temperature. (Maximum output currents from table M1 and output powers from table M2 must be derated 20%. (ASM-A5/2-A15/1-BA-T)	Available on most models in tables M1 and M2.	*
U	Uninterruptable Output†	Will deliver I_0 amps to load for T (seconds) after line drops below 105VRMS. (Add C_x Mfd to terminals provided) $C_{x(mfd)} \equiv KI_{0(A)}\,T_{sec}$ (for 115V to 5VDC supply: K = 1792). I.e.: 17,920 MF (200V) cap will provide 10A (at 5V) for 1 second. (APS-M5/10-CA-U)	APT, BPE (also all AS– series drivers).	35
V	Overvoltage Protection	Prevents output voltage from increasing above overvoltage set point. PHU-increase to case size B. Other models add 0.6 inch to total module length for each output. Set to 120 ± 10% of nominal output. Example: (APT-M5/17V-CA)	PHU, ARA, ARC ARM, ART BRP, BRQ	48 96 144

*Consult Factory

†PERFORMANCE GUARANTEE

In addition to our normal warranty, and to encourage new application effort, Arnold Magnetics will accept selected orders for standard, single output, converters on a 40-day trial basis (ie: undamaged items received FOB our plant within 40 days of date of previous shipment will receive full credit, on demand, without cause).

As a condition of this cost free trial, the buyer agrees to provide Arnold Magnetics with a description of the application, and how it performs, together with the right to publish the information submitted with (or without) identifying the writer, at the writer's option.

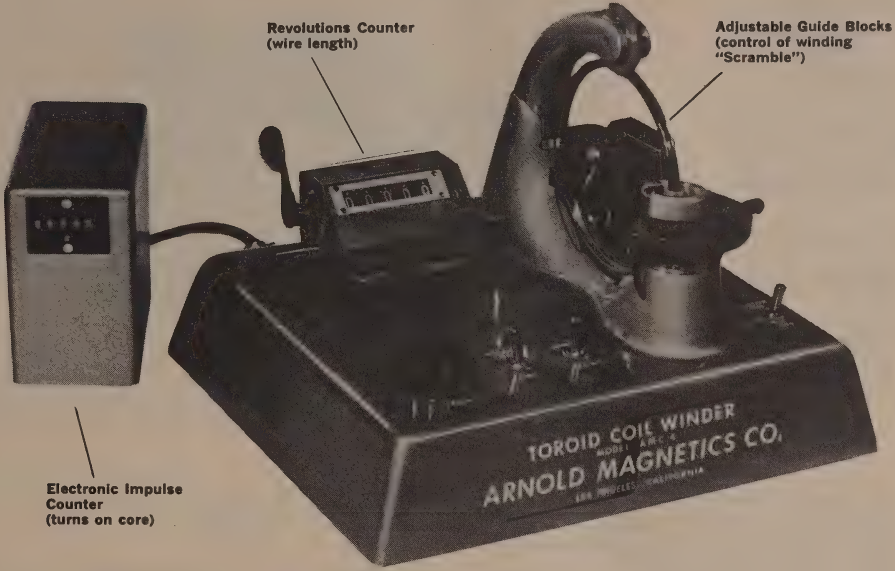
TOROIDAL WINDING MACHINE

ARNOLD MAGNETICS

● Sets up quickly ● Winds at high speeds ● Easy to operate ● Wide range of wire sizes ● Portable



Revolutions Counter
(wire length)
Adjustable Guide Blocks
(control of winding
"Scramble")
Electronic Impulse
Counter
(turns on core)
TOROID COIL WINDER
MODEL AMC-4
ARNOLD MAGNETICS CO.
LOS ANGELES, CALIFORNIA

SETS UP QUICKLY—Install core, lock the ring, and begin winding in less than 45 seconds. Change of wire and core size equally fast.

EASY TO OPERATE—Just drop the core in place and start winding. No accurate centering of core required. One tension adjustment point. A continuous range of tension settings easily selected. Quiet operation. Both fingertip and foot controls provided. Easy to train, easy to set up and operate.

REDUCES WIRE WASTE—Precise control of length of wire loaded into machine.

Price (FOB our plant) Model AMC-4 complete with all accessories both counters, set of three winding rings and slides, set of nylon inserts and foot control . . . $1300.00. Model WTB (same as AMC-4) except, no mechanical counter, without 1/4" and 1/8" rings, slides, and inserts $1,050.00

DELIVERY: STOCK TO 3 WEEKS ARO

SPECIFICATIONS

Wire range		AWG #26HF to #44HF
Minimum toroid ID		0.18 inch
Maximum toroid OD		4.0 inches
Maximum toroid height		1.5 inches
Max. recommended winding rate		1500 turns/min.
Winding rings	OD (all rings)	4.5 inches

Capacities of rings:

Nom. size of crossection (inches)	Wire range (AWG-AWG)	(ozs.)	Approx. Wire Capacity (ft. of #40 HF)
1/8 × 1/8	33.44	.15	300
3/16 × 3/16	26-44	.35	700
1/4 × 1/4	26-44	.62	1240

Bench Space	11 × 11 inches
Power required	115 VAC, 50-60 Hz

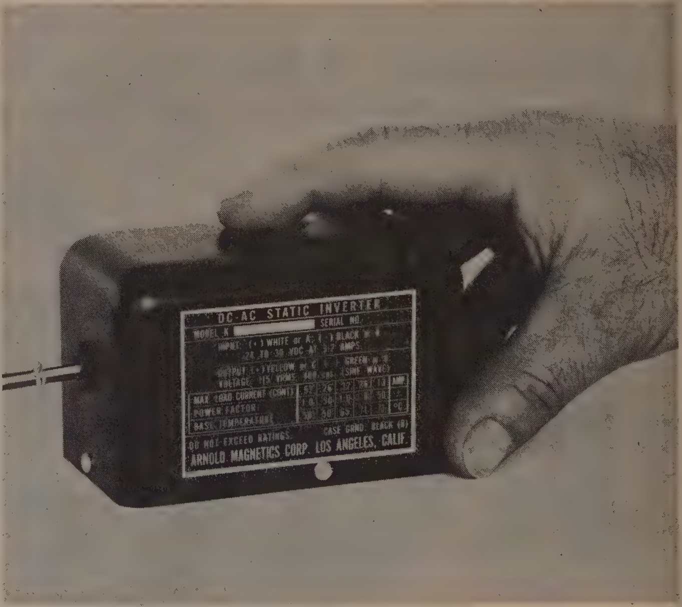
ARNOLD MAGNETICS CORPORATION 11520 W. Jefferson Blvd., Culver City, Ca. 90230 • (213) 870-7014 • TWX 910-343-6468

ARNOLD MAGNETICS

SOLID STATE INVERTER

DC-115 VRMS • 400 Hz SINE WAVE @ 50VA

- **Low harmonic distortion**
- **Closely regulated outlet**
- **Small size and weight**
- **Short circuit protected**
- **Operates from battery source**



This power supply is ideally suited for driving A.C. motors (both synchronous and phase sensitive), A.C. gyros, magnetic amplifiers and other A.C. devices from a 28 volt battery line. It is self protected for short circuits, overload or reactive loads, transients on the input line and reversal of input polarity. A unique circuit design renders this unit insensitive to widely varying load impedance and power factor. It is tested 100% for compliance to MIL-STD-704 (line spikes of a 60 volt peak). The output contains low harmonic distortion and is regulated to close limits (see specifications). This makes the unit well adapted to military systems.

To meet aerospace and shipborne environment, the unit is fully encapsulated. This allows it to meet the requirements of MIL-STD-704 (ASG) including vibration, heat and moisture. Its compact design makes it readily adaptable to airborne systems. The standard Model (SKB) is generally in stock and is comparatively inexpensive.

SPECIFICATIONS

INPUT Voltage: 24 to 30 VDC(1)
OUTPUT Voltage (isolated): 115 VRMS
  Frequency: 400 ±0.5% Hz (Also available in other frequencies from 360 to 10,000 Hz)
  Power: 50 VA at 50°C† (1)
    30VA at 71°C†
  Wave Shape: Sinusoidal with 6% harmonic distortion (at specified load)
  Power Factor: Any (derate per fig. 1)
OPERATING Temperature: −55°C to +71°C
  Environment: per MIL-STD-704

SIZE: 2½" × 4" × 2½" high
  Weight: 28 oz.
REGULATION (*typical*): As the below variable changes, it has these effects:*

VARIABLE	FROM	TO	FREQUENCY	VOLTAGE
Input Voltage	24 VDC	30	±0.3%	±0.5%
Load Current	0.25 AMP	0.5	±0.3%	±2.0%
Temperature†	−10°C	+71°	±2.0%	±3.5%
Power Factor‡	0.8	1.0	±0.5%	±1.0%

---

(1) Arnold also manufactures higher power units. Specify Model SKD for double the load current, weight and width (EI: 5.00"W).

NOTES
*Values listed are for one variable changing when all other variables are held at their maximum rated or nominal values.
†Temperature at surface of base plate.
‡Power factor with a load of 27 volt-amperes (leading or lagging).
Specifications subject to change without notice.

HOW TO ORDER

FOR STANDARD UNITS

Specify simply: Model "SKB" static inverter (This standard unit will have an input of 28 VDC and an output of 115V 400 Hz).

FOR SPECIAL UNITS

Specify Model "SK" followed by termination desired, nominal input voltage, output voltage and output frequency. (All other specifications will be as described on the reverse side).

EXAMPLE

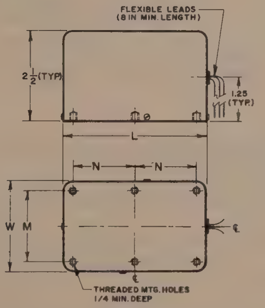
SKB-28-115-400-40

SK	B —	28 —	115 —	400 —	40
Model	Termination	Nominal Input Voltage	Output Voltage	Output Frequency	Output Power

TERMINATION DESIGNATION:
Wire leads out end "B" (standard configuration)

Each Inverter is identified with Serial Number and AMC Part Number. In the example above, the correct AMC Part No. is: SKB-28-115-400-40. Order by AMC Part No. only.

MECHANICAL SPECIFICATIONS



Case Size	W (Width)	H (Height)	L (length)	Mounting Holes

ARNOLD MAGNETICS

POWER CONVERSION EQUIPMENT

Miniaturized • High Efficiency

SPECIAL PRODUCTS THRU MODULARIZATION

(If your application is experimental, see the free trial provision in the performance guarantee, Page A8)

The following new product concepts are based on the application of Arnold Magnetics' modularized power conditioning elements (such as those depicted in the first pages of this presentation).

This method of contributing to your product development is suggested because of its lower cost (due to using stock modules) and proven reliability (the MTBF of a typical module exceeds 100,000 hrs.).

Several modifications to the modules' performance, involving voltage and current control, as a function of analog quantities, make these units as flexible as high power operational amplifiers. Special characteristics such as the following are obtained by adding modification letters to the model number. (Keep in mind these controllers have constant internal dissipation over their entire load line to, and including, short circuit).

Figure 2 — MODIFICATION PI

PROGRAMABLE CURRENT LIMIT

To Order:
1. Add "PI" to Model No.
2. Add $125 to 1 pc. price

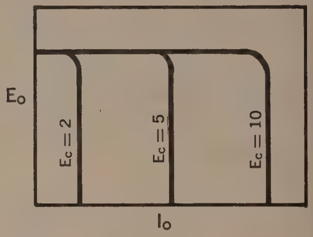

Figure 1 — MODIFICATION PE

PROGRAMABLE OUTPUT VOLTAGE

To Order:
1. Add "PE" to Model No.
2. Add $75 to 1 pc. price

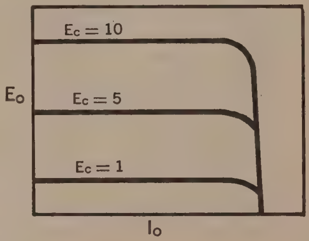

Figure 3 — MODIFICATION KI

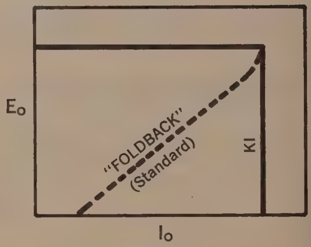
CONSTANT CURRENT IN OVERLOAD

To Order:
1. Add 'KI' to Model No.
2. Add $100 to 1 pc. price



EXAMPLE: Mod APT-ARM100PE will deliver 0-100 VDC @ 2 amps as a function of 0-10V control signal fed of 3K Ohm (min.) input. Response time will be approximately 1 ms, depending on load.

SINE WAVE POWER SOURCES

Bidirectional outputs at frequencies of 360 to 10KHz (400 Hz is typical) with harmonic distortion under 6% can be produced at 5VA/in³ (if the system can tolerate zero crossing distortion during load transients affecting power factor).

A typical model is SKB-28-115-400-100 with specs of:

Input: 24-30VDC
Output: 115V, 400 Hz, 100VA
Efficiency: 82%
T.H.D. (at PF = 1.0) 6% max.
Size: 4" × 2½" × 5
Weight: 56 oz.

This unit exhibits constant power per unit weight at lower output frequencies because no low frequency transformer is used. (i.e.: Regulator feeds load directly). To allow for "reverse" currents required by uncorrected load power factor, the output is "shorted" during load discharge. This results in approximately a 20° "flat spot" in the voltage waveshape at 0.85 power factors. (A "clean" sine wave is obtained by adding a capacitor to correct the power factor).

POWER CONVERSION EQUIPMENT

Miniaturized • High Efficiency

ARNOLD MAGNETICS

SPECIAL PRODUCTS THRU MODULARIZATION

SERVO AMPLIFIERS

High power, miniaturized, servo amplifiers are made possible by utilizing these modularized converters with the programmable features such as shown in Figure 1. Response to frequencies near 600 Hz (3db point) is possible with DC motors or torquers with reasonable inductance and load inertia.

HIGH PERFORMANCE DC MOTORS - TORQUERS

Because of the relative ease of controlling high currents with high frequency magnetic amplifiers, the programmable, low voltage modules (such as ARM5PE) match well with low impedance motor windings (including printed circuit types).

CONSTANT CURRENT SOURCES

Electro magnets frequently must be controlled so as to regulate their field. Instantaneous output current sensing with gauss meter feedback can be effective in controlling currents in the hundreds of amperes.

As an example, Model BPQ-BRQ6PI would supply constant, adjustable current to a copper wire load whose temperature rose 100°C. Currents to 100 amps at 5 volts (.05 ohm) are available from this 3¼" × 3⅝" × 15 unit.

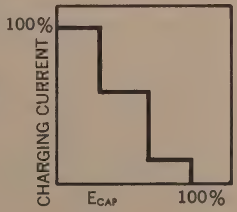
REDUNDANT OPERATION

For the ultimate in reliability, two or more separate systems can be operated in the current tracking (sharing) mode. In this way, each operates a half load. In the event of failure, the survivor operates at full load. Random and early failures are thereby nearly eliminated. The large dynamic overload range provided by this connection is often useful in enhancing reliability and performance.

LASER POWER (and other pulsed devices)

Pulsed laser systems frequently require rapid charging of large capacitors. By paralleling the outputs of an ARM30, and 100, a capacitor can be charged at 5, 1.7 and 1.0 amps as its voltage reaches 16, and 100V, respectively. The end voltage will be determined by the voltage at which the ARM-100 is set.

SPECIAL DESIGNS OF THESE UNITS ARE BEING SOUGHT BY ARNOLDS' DEVELOPMENT STAFF.



BATTERY CHARGING

When charging battery systems such as Nickel-Cadmium types, the charging current should be varied as a function of voltage, temperature, cell pressure, or history (of the cells).

Cyclical charging-discharging to "condition" such cells is accomplished by relay shorting of the battery-charging circuit. The charger will operate in the "foldback" current limit mode with little increase in internal dissipation.

A small system such as model APT-ARM30 would provide 5A charging current to a 28V battery. Shorting, "tapering" or other conditioning would be possible.

LOW FREQUENCY POWER

Low frequency energy (0.1-100Hz) is frequently difficult to generate with reasonable power — size — cost relationships. It is also sometimes difficult to control amplitude near resonance and to provide for the widely varying "power factor". The Arnold programmable units are so insensitive to loading conditions, that experimental use is encouraged. Models BRQ are suggested for the higher power systems.

OTHER APPLICATIONS INCLUDE:

SQUIB firing
SOLENOID control
DIGITAL analog power
AIRCRAFT power source
GEOPHYSICAL (earth-charging,
  truck mounted)
SERVO power (torpedo-bombs,
  x-y plotters i.e.: Fast & Small)
AMPLIFIERS, power, DC coupled,
  to 2 KW, to 1KHz response

HOW TO SPECIFY

1. Pick modules from tables M1 and M2. (Page A3)
2. Enter in table M3 with modifications from Figure 1, 2 or 3
3. If desired, add the following paragraph to the face of the purchase order:

"The subject item will be experimentally applied by the buyer as a(n)________

____

Seller agrees to issue full credit if returned prepaid, within 40 days of the date of shipment."

POWER SUPPLIES

BUNKER RAMO AMPHENOL

Series 279 Mini Power Supply

AMPHENOL
REGULATED D.C.
POWER SUPPLY
MODEL
AMPHENOL
REGULATED D.C.
POWER SUPPLY
MODEL

For the first time Amphenol now offers distributor availability of high reliability mini power supplies.

Amphenol offers you the benefit of saving manufacturing and engineering time and cost—and insures prompt delivery through **"off-the-shelf"** availability at your Component Marketing Service distributors and at the Broadview, Ill. CMS Distribution Center.

These compact, fully epoxy encapsulated power supplies are ideal companion power sources for op amps, CMOS logic and other types of low power logic systems.

They are high quality components incorporating a superior thermal design which gives longer life. The units are designed so that internal components run cooler resulting in no derating of output current at higher temperatures.

COST-SAVING BENEFIT TO YOU

- Compact size allows placing power supply adjacent to the load which reduces power losses, uses less interconnecting hardware and requires minimum cabinet space.
- The availability of a compete power module means you do not have to buy, inventory and assemble individual components to make your power supply and also saves you design and engineering time.

CUSTOMER USAGE BENEFITS

- Performance is guaranteed — no need to reinvent the wheel.
- **Longer life and higher reliability** than competitive units due to superior thermal design.
- **Fast mounting capability** because terminals may be soldered directly to boards by flow solder method.
- Rugged construction is **resistant to** printed circuit flux cleaning solvents.
- The design of the units assures **short circuit protection** . . . and **isolates** the output **from AC line** . . . and on dual voltage models, tracking outputs.

**FOR LOCAL SOURCE OF SUPPLY
SEE EEM VOL. 2 PAGE 462**

So . . . **ACT NOW** . . . Ask your local Amphenol distributor or CMS Sales Representative to supply you with Amphenol's Mini Power Supplies and enjoy their "powerpacked" advantages.

POWER SUPPLIES

BUNKER RAMO AMPHENOL

SPECIFICATIONS — Single output

Input Voltage: 105-125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Trim Adjustment: Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 and up) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Output is floating. Either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. (Model 279-5E150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 volts up. Approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.); 1 lb. (Case size EL-10.); 1 lb. 3 oz. (Case size EL-13.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "-230" to model number and $10.00 to price.

SPECIFICATIONS — Dual output

Input Voltage: 105-125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Setting: Each output is factory preset to ±1% of the nominal output voltage.

Ambient Operating Temperature: −20 to +71°C. No derating required.

Storage Temperature: −55 to +85°C.

Temperature Coefficient: Approximate TC is .015%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.); 1 lb. (Case size EL-10.); 1 lb. 3 oz. (Case size EL-13.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "-230" to model number and $10.00 to price.

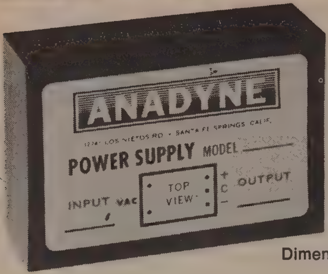
MINIATURE AC/DC POWER SUPPLIES



SERIES 400
Dimensions: 1 x 2 x 3 in.

POWER AT THE RIGHT PRICE. Regulation, ripple, and temperature stability of these supplies are comparable to much larger and more expensive units. In all cases, the specs are consistent with the requirements of most monolithic and discrete-circuit type operational amplifiers.

POWER WITH PROTECTION. All models are protected against sustained overloads and short circuits either to ground or between the two outputs. The 5V (600 Series) is protected against overvoltage. In addition, current limiting prevents excessive heating in case of shorted outputs.

POWER WITHOUT RIPPLE PROBLEMS. The low ripple of these power supplies is far better than most required circuit applications. ANADYNE'S power supplies will operate over a temperature range of 0° to 71°C; however, the output is derated outside the 10° to 55°C range.

SERIES 400

Output Current	0.100 A
Input Voltage	105 to 125 VRMS, 50 to 400 Hz
Dual Output Voltage	+15 VDC and −15 VDC (Also available: ±6, ±10, ±12, ±18, ±24, +28)
Accuracy (Each Output)	±0.1 VDC
0 to Full Load Regulation	0.02% max.
Line Regulation	±0.005% max.
Ripple	0.5 mv RMS max.
Short Circuit Protection	Either or both outputs to common or together indefinitely
Dimensions	1 x 2 x 3 inches
Weight	Less than 9 ounces

ATR UNIVERSAL INVERTERS

Specially Designed for Operating Standard A.C. Tape Recorder, Television Set, Dictating Machine, Radio Set, Ham Gear, Public Address System, Amplifier, Record Player, Electric Razor, Food Mixer, Vacuum Cleaner, Sewing Machine, Business Machine, Electric Drill, Fluorescent and Incandescent Lamp, and Electronic Test Equipment from D.C. Voltages in Automobiles, Buses, Trucks, Boats, Trains, Planes, and D.C. Districts. Ideal for Emergency Lighting Applications for Civil Defense, Red Cross, Rescue Work, etc., Simply Using Extension Cords.

Featured cut above illustrates Model 12U-RHG.

ATR Universal Inverters are actually a combination of 4 Inverter designs in one unit! These Inverters are especially recommended for applications as mentioned above and feature complete RF frequency interference suppression, instant starting, frequency stability, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated are equipped with ATR heavy duty plug-in Inverter Vibrators. These Inverters also come equipped with four-point voltage regulator which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is in excess of 75%. To figure approximate current consumption from storage battery, divide the rated input wattage of the recorder (or load) being operated by the storage battery voltage and further divide this answer by .75 which will give the actual current consumption based on the actual load and efficiency. The battery current consumption required for a tape recorder is normally less than that drawn by ordinary automobile headlight(s). These Universal Inverters are recommended only for use with loads having power factors in excess of 70%.

All Units are Frequency Stable and have Automatic Frequency Control.

"—P" models equipped with cigarette lighter cord set to plug into dash receptacle.

All ATR Universal Inverters are housed in attractively finished brown-hammerloid metal cabinets.

Dimensions of Standard (RSF) Model Universal Inverters, 8½" x 9⅞" x 5¼"; shipping weight 22 lbs.

Dimensions of Heavy Duty (RHG) Model Universal Inverters, 6⅞" x 11¼" x 8½"; shipping weight 27 lbs.

Dimensions of Super Heavy Duty (HSJ) Model Universal Inverters 6½" x 12⅞" x 8½"; shipping weight 37 lbs.

For correct replacement Vibrator, consult Inverter Vibrator Guide.

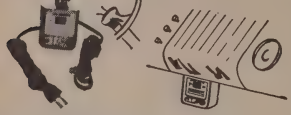
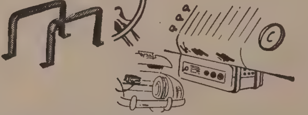
* Recommended for 24 volt battery systems.

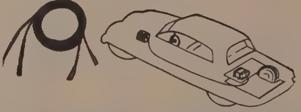
ACCESSORIES for 6, 12, and 28 Volt D.C. Input Inverters.



REMOTE CONTROL UNIT — for under-dash mounting permitting installation of Inverter in auto-trunk compartment.
Net Price $15.67



MOUNTING BRACKETS — to securely mount Inverter in trunk compartment of car or under-dash, as illustrated
Net Price $9.08 pr.



EXTENSION CABLES — to provide additional cable lengths for installation of Inverter in trunk compartment; #8 gauge, 15′ length.
Net Price $15.13 pr.

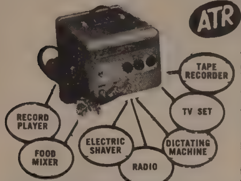
NOTE CAREFULLY: ATR Inverters are not recommended for operating refrigerators, washing machines, or similar motor-driven appliances; also, ATR Inverters are not recommended for operating toasters, electric irons, sun lamps, or similar appliances of high wattage or low power factor. Any attempt to use the Inverter for applications not recommended will ruin the Inverter immediately and void the guarantee.

INVERTERS, VIBRATORS, "A" ELIMINATORS, ETC.

ATR ELECTRONICS, INC.

MANUFACTURERS OF QUALITY PRODUCTS SINCE 1931
(612) 222-3791 • 300 East Fourth St., St. Paul, Minnesota 55101

ALL ATR INVERTERS LISTED ARE FREQUENCY STABLE AND HAVE AUTOMATIC FREQUENCY CONTROL



DC TO AC UNIVERSAL INVERTERS

Frequency Stable with Automatic Frequency Control.

New, universal inverters for operating 110V, 60 cycle AC equipment from DC voltages in autos, buses, trucks, boats, trains, planes and DC districts. Designed especially for standard 110 VAC tape recorders, TV sets, radios, PA systems, electric razors, test equipment, etc. Units are carefully engineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stability. Have operating efficiency in excess of 75%. Four-point voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or higher than normal. Inverters are recommended for use with loads having power factors in excess of 70%. Built-in toggle switch selects most efficient operation for use with TV sets or tape recorders. Inverters are not recommended for use with large motor driven appliances such as refrigerators, washing machines, etc. All have On-Off switches. Housed in attractive brown hammerloid metal cabinet with convenient leather carrying strap. Sizes: Standard Model RSF, 8½x9⅞x5¼″; Heavy-Duty Model RHG, 6⅞x11¼x8½″; Extra-Heavy-Duty Model HSJ, 6½x12⅞x8½″. With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles.

*Recommended for 24V battery operation. **Before ordering, check wattage of equipment with which inverter will be used.**

PORTABLE PLUG-IN TYPE INVERTERS — DC TO AC

Frequency Stable with Automatic Frequency Control.

Specially Designed for Operating Standard AC Dictating Machines, Record Players, Incandescent Lamps, Electric Razors, Electronic Test Equipment, and other Small Electrical and Electronic Devices from DC Voltages in Automobiles, Buses, Trucks, Boats, Planes, Trains, and DC Districts.

Lightweight inverters for operating 110 VAC equipment from DC voltage sources. Feature excellent frequency stability and high efficiency. 6 and 12V units plug into cigarette lighter receptable of any vehicle; others are equipped with standard 2-prong plugs. All are designed especially for use with dictating machines; record players, electric razors, test equipment, etc. Not recommended for large tape recorders and motor driven appliances such as refrigerators, washing machines, etc. Brown Hammerloid case with leather carrying strap. Sizes: DME, 5¼x4¾x2¾″; RME & RMF, 8⅜x8x3¾″.

Mfr's Type	DC Input (Volts)	AC Output 60 Cycles (Volts)	Output Wattage Int.	Cont.	Shipping Wt. (Lbs.)	Net Price

†This Inverter specially designed and recommended also for use with portable TV set.

SOLID STATE INVERTERS — DC TO AC

Frequency Stable with Automatic Frequency Control.

Specially Designed to Provide 117V 60 Cycle AC Power for the Operation of Tape Recorders, VTR Equipment, Public Address Systems, TV Sets, Ham Gear, Small Portable Tools and Appliances, Test Instruments, Closed Circuit TV, Scientific Laboratory and Hospital Equipment, Small AC-DC Universal Motors, Fluorescent and Incandescent Lamps from 12 VDC Storage Battery Power in Automobiles, Buses, Trucks, Campers, Motor Homes, Boats, and Aircraft.

ATR SOLID STATE Inverters are Universal Type Inverters recommended for the applications as listed above plus hundreds more! These Inverters are very well filtered and feature quick starting, frequency stability with varying load and input voltage, rugged heavy-duty construction, reverse polarity protection, and built-in power factor corrector utilizing a simple toggle switch. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life operation at high efficiency and maximum reliability. All models indicated here are equipped with heavy duty power transistors and plug-in frequency reed for automatic frequency control. These Inverters also come equipped with four-point voltage regulators which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal. The operating efficiency is approximately 80%. To figure approximate current consumption from storage battery, divide the rated input wattage of the load being operated by the storage battery voltage, and further divide this answer by .80 which will give the approximate current consumption from the battery based on the actual load being operated. These Inverters are recommended primarily for use with loads having power factors in excess of 70%. Inverters come complete with battery cables ready for operation.

*"-P" model is equipped with cigarette lighter cord set to plug into dash receptacle. Caution — Do not load beyond 150 watts due to possible damage to cigarette receptacle wiring.

Dimensions of Model 12U-S2A, 11x9x4″. Dimensions of Model 12U-S4G, 11x9¾x5¼″. Dimensions of Model 12U-S6M, 11x11¼x6¾″. Dimensions of Model 12U-S44G, 11x9¾x10½″. Dimensions of Model 12U-S66M, 11x11¼x13½″.

All ATR Inverters are housed in attractively finished brown-hammerloid metal cabinets and are complete with battery cables ready for operation.

For Inverters having larger or smaller output capacities, or for operation on other DC input voltages from 6V to 220V, please consult available ATR Inverter catalog sheets.

STANDBY POWER SYSTEMS

FOR EMERGENCY LIGHTING AND POWER

Illustrates ATR Standby Power System complete with lamps, automatic crossover, and battery charger.

Completely Automatic Standby Power Units specially designed to permit the instantaneous continued operation of critical lighting equipment, PA systems, amplifiers, intercom systems, burglar alarms, fire alarms, synchronous electric clocks, electric time and recording clocks, incubators, gas valves, telephone and test equipment, and similar critical devices in the event of 115 volt AC commercial power line failure. For use: In hospitals, banks, hotels, theatres, factories, office buildings, schools, homes and other areas of operation.

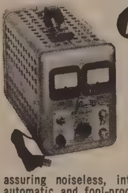
For units with Lamps, change W to 16″ and add 7½″ to H; also increase shipping weight by 5 lbs.

SHAV-PAKS

Every man should have this lightweight ATR Inverter in his car for that "Keep Clean-Shaved Look." Will operate standard AC electric shavers and other small electrical devices from your car or boat. Complete with 3 ft. cord set. Plugs into cigarette lighter receptacle. Fuse protected, rugged construction, and attractively housed in grey hammerloid-finish steel case. Input: 12 VDC. Output: 110 VAC. 60 cycles, 15-25 watts. Size: 4x2⅝x2¾″. Ship. wt., 2½ lbs.

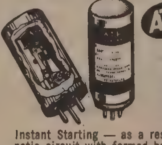
Model 12-SPB .... Net **$18.10**



BATTERY ELIMINATOR & CHARGER

For Demonstrating and Testing Transistor or Vibrator-Type Auto Radios. Ideal as a Power Supply for Model Railroad Trains, Radio Sets, Electro Plating Outfits, and other 6 or 12 VDC Equipment. May also be used as a Battery Charger. Designed for testing DC electrical apparatus on regular 110 VAC lines — equipped with full-wave solid state rectifier, assuring noiseless, interference-free operation. Fully automatic and fool-proof; has voltmeter, ammeter, and 8-position voltage control. Fuse protected and housed in heavy gauge brown hammerloid-finish metal case. 6 ft. cord set included. Size: Model 610C-ELIF, 6½x8⅛x8½″, ship. wt., 22 lbs.; Model 620C-ELIT, 6½x12⅞x8½″, ship. wt., 33 lbs.

Model 610C-ELIF (6 volt at 10 amps or 12 volt at 6 amps) .... Net **$82.50**
Model 620C-ELIT (6 volt at 20 amps or 12 volt at 10 amps) .... Net **109.73**



VIBRATORS

For All Auto Radio Sets Since 1954 Use One of the ATR Vibrators Listed Below.

ATR Vibrators Feature:
Ceramic Stack Spacers with two-bolt stack construction.
Instant Starting — as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.
Large Oversize Tungsten Contacts having Full Wiping Action — for greater reliability and longer life.
Perforated Reed of Highest Quality Swedish Spring Steel.
Highest Precision Construction and Workmanship.

Ship. Wt., ½ lb.

ATR No. 1400 (Bulk), 4 Prong, 6 Volt.	Net $3.57
ATR No. 1843 (Bulk), 3 Prong, 12 Volt.	Net $3.57
ATR No. 1848 (Bulk), 4 Prong, 12 Volt.	Net $3.57

We specialize in engineering and manufacturing

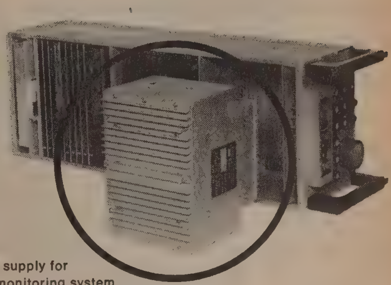
Custom Power Supplies

If you're looking for a custom designed power supply we would like to talk to you.

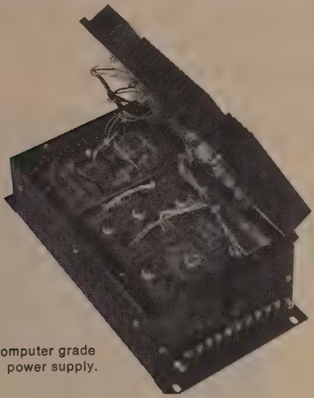
Over the past 19 years we've saved countless customers time and effort by applying our design and manufacturing expertise to their custom power supply applications.

The know-how we have developed during this time has enabled us to produce single and multiple output units combining switching and linear techniques for optimum performance. Designs range from plug-in card types to highly sophisticated packages — for both military and commercial/industrial applications.

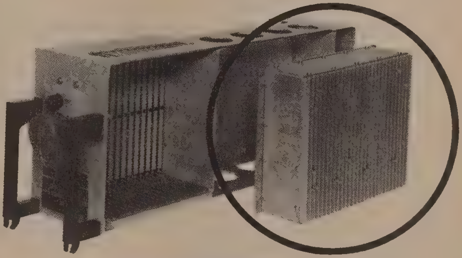
A condensed listing of our general product capabilities is shown below. Call us first the next time you need a custom power supply. If we can't help you we'll try to tell you who can.



Computer power supply for in-flight engine monitoring system.



Computer grade power supply.



Airborne data processing computer power supply.

Typical Applications

- Power supplies for military computers designed to monitor aircraft engine parameters in flight.
- Power supplies for data processing computers used in commercial aircraft.
- Power supplies for computers in automated oil field installations.
- Power supplies for control logic and sonar transmitters for manned anti-submarine warfare targets.
- Inverter power for gyro stabilized systems.

See EEM Controls Section 2200 for Autronics' Custom Controls capabilities.

Call us first . . . we'll put our know-how to work for you.

Autronics Corporation

180 North Vinedo Avenue Pasadena, California 91107 (213) 681-3545 TWX (910) 588-1977

A.C.POWER

from the A.C. POWER SUPPLY PROBLEM SOLVERS

STANDARDS ■ SPECIALS ■ CUSTOM

20 years of innovation by the A.C. power supply pioneers — power outputs from milliwatts to tens of kilowatts — all silicon solid state.

The smallest, lightest, least expensive units available. ■ All units rated at worst case condition. ■ All units capable of continuous duty at 150% of their power rating at nominal line and high power factor load. ■ Single, two and three phase outputs. ■ Units available with switch selection of single or multi-phase output.

Ultra-sophisticated magnetics in combination with highly simplified circuitry effect dramatic size, weight and cost reduction plus greatly improved reliability. Basic power amplifiers are available in frequency ranges to suit your application, thereby eliminating the need to pay size, weight and price penalties for unnecessary frequency capability.

A.C. POWER SUPPLIES. SERIES 10/300. Power outputs from 100 to 9000 VA in 144 standard single, two and three phase models. Available in four basic frequency ranges to provide AC power anywhere from 45 Hz to 10 KHz. Feature very tight regulation, low distortion and instantaneous overload protection. Wide variety of fixed and variable frequency plug-in oscillators available. Input line power and output AC power fully isolated. Many options available.

A.C. POWER SUPPLIES. SERIES 10 NT / 300 NT. Similar to above but output ground or neutral is common to line ground or neutral. Can be used in any application where AC output does not have to be isolated or floating. Cuts weight by a factor of 4 or 5 to 1 and effects very substantial cost and size reductions.

UNINTERRUPTABLE A.C. SUPPLIES. SERIES UPS 10 / UPS 300. Battery powered series 10/300 and 10 NT / 300 NT supplies. Automatic changeover if line fails.

LINE CONDITIONERS. SERIES LC 10 / LC 300. Entirely new circuit concept provides regulated, conditioned power with any line frequency from 45 Hz to 500 Hz.

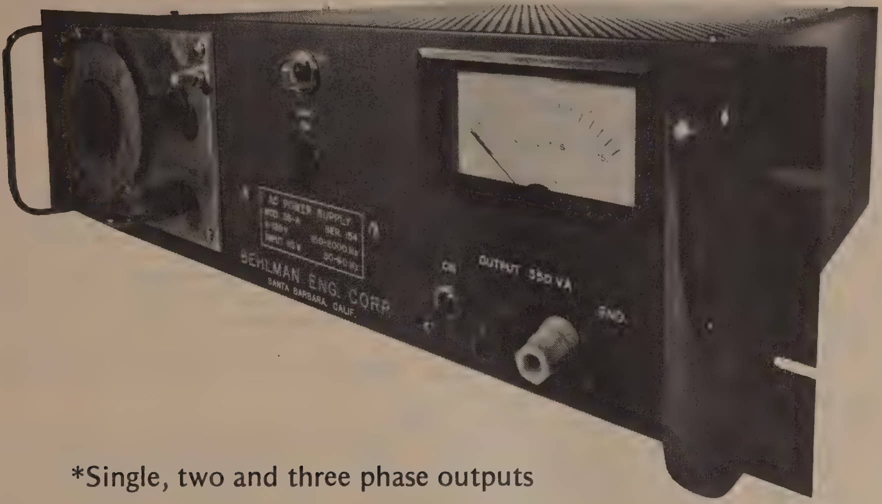
SERIES 10/300 AC POWER SOURCES



*Single, two and three phase outputs

*Up to 3000 VA per phase in 144 standard models

*Fixed or variable output frequencies, 45 Hz - 10 kHz

*Tight regulation vs. line and load changes

*Instant response time

*Low output distortion

* Full rated output into loads of any power factor

*Up to 150% of rated output with high power factor loads

*Instantaneous overload protection, automatic recovery

*Complete transformer-coupled isolation, input and output

*All silicon solid state, entirely new circuit concepts

*Smaller, lighter, simpler, less expensive, more reliable

*Can be used as linear power amplifier

*Complete line of plug-in oscillators

*Wide variety of options available

Specialists in electronic energy conversion devices

Behlman Engineering Corporation

P.O. BOX 4518 · 427 N. NOPAL STREET · SANTA BARBARA, CALIFORNIA 93103 (805) 963-9019

The 10/300 series of AC Power Supplies are linear power amplifiers driven by plug-in oscillators. Fixed and variable frequency oscillators, with frequency accuracies to 0.001% and 0.1% respectively, are available in a wide variety of standard models. An almost unlimited variety of oscillators with various degrees of accuracy and many special features can be provided.

An entirely new concept has been employed in the power amplifiers. This concept greatly increases the power conversion efficiency while at the same time reducing circuit complexity. This, in combination with very advanced magnetics, makes possible units that are smaller, lighter, less expensive and much more reliable. Behlman Engineering AC Power Supplies weigh only one half to two thirds as much as competitive units.

An extremely high degree of feedback is employed in the power amplifier resulting in very low output distortion, tight line and load regulation and exceptional stability. Distortion is 0.5% max.at frequency extremes and less at mid band. Load regulation is ±0.5% and is adjustable through zero for specific loads. Line regulation is ±0.1% for ±10% line.

Two separate power amplifiers driven by a two phase oscillator and three separate power amplifiers driven by a three phase oscillator are used to provide two and three phase power outputs. Units are available capable of providing a choice of single or multi-phase output by means of a front panel mode selector switch.

The output power is transformer coupled and completely isolated. It can be left floating or one side grounded.

Line input to these units is via very advanced islolating magnetics.

These power supplies are capable of providing continuous full-rated volt-ampere output under worst case conditions, i.e., zero power factor loads either leading or lagging, 10% low line and output voltage at 75% of maximum. With unity power factor loads, nominal line and maximum output voltage, continuous duty at 150% of rating is permissable. The graph on the next page shows maximum power output for various conditions of load power factor output voltage, line voltage and ambient temperature. Even though these power supplies are rated under worst case conditions and in addition have a 50% overload capability they are nevertheless smaller, lighter and less expensive than other supplies whose ratings have been derived under considerably more favorable operating conditions.

Complete overload, short circuit and fault protection is provided by a combination of an instantaneous, automatic-recovery electronic protector plus a fast acting main circuit breaker and fuses in various low level internal D.C. supplies.

SPECIFICATIONS

INPUT VOLTAGE: 117 VAC ±10%, single phase. Units up to 750 VA output.

230 VAC ±10%, single phase. 1000 VA to 2250 VA output.

120/208 or 230 VAC ±10%, three phase. Units over 2250 VA output.

INPUT FREQUENCY: 60 Hz ±20%

EFFICIENCY: 50-70%, depending on operating conditions.
Various input voltage, frequency and power options are available, many at no extra charge.

OUTPUT VOLTAGE: 0-130 standard. Other ranges or combinations of ranges available.

LOAD REGULATION: ±0.5% No load to full load. Adjustable through zero for specific loads.

LINE REGULATION: ±0.1% for ±10% line change

POWER FACTOR: Full rated VA into any power factor load down to zero, lead or lag.

DISTORTION: 0.5% max. harmonic distortion at frequency extremes. Less at mid-band.

OVERLOAD AND FAULT PROTECTION: Instantaneous, automatic recovery short circuit and overload protection. Fast acting main circuit breaker and fuses for fault protection.

METERING: Output voltmeter

EXTERNAL INPUT: Via optional plug-in. 12 volts RMS. 80K ohms input impedance.

OPERATING TEMPERATURE: 0° to 55°C.

FRONT PANEL COLOR: Dark grey, white lettering.

Some of the special options available include input power types, output voltage ranges or combinations of ranges, metering, higher and lower frequency outputs, higher and lower power outputs, physical configurations, paint colors, tighter regulation specifications, single to multi-phase output switching, etc. Completely special or custom units providing solutions to virtually any A.C. power supply problem can be furnished.

Behlman Engineering Corporation

P.O. BOX 4518 · 427 N. NOPAL STREET · SANTA BARBARA, CALIFORNIA 93103 (805) 963-9019

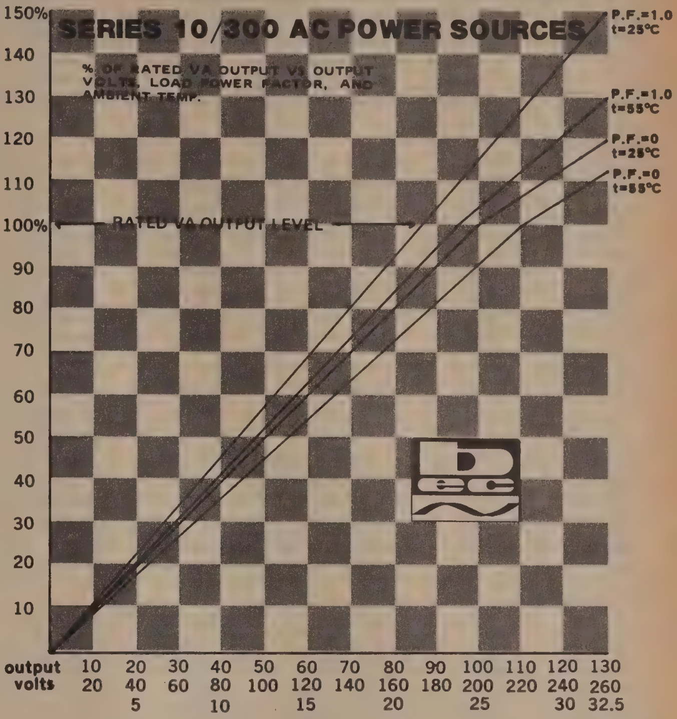
The graph to the right relates output power limits, expressed as a percentage of rated output, to various conditions of output voltage, load power factor, and ambient temperature.

The output voltages shown are the three most popular ranges. Other voltage ranges are comparable on a pro-rata basis.

An important advantage, inherent in Behlman Engineering Corp. AC Power Sources, lies in the availability of power amplifiers in four separate output frequency ranges. The narrow band power supplies effect cost and weight savings that add to the already existing size, weight and cost advantages of our full frequency models.

Many AC power supplies require derating to half power in the 5kHz to 10kHz range. This derating is not required with the Behlman Engineering 10/300 series.

This graph carries an important message: Don't buy an AC power supply without knowing how its ratings were determined.



THE AC POWER SUPPLY PROBLEM SOLVERS

DO YOU HAVE A SPECIAL AC PROBLEM?

Behlman Engineering versatility can solve it. Standard units can be stacked for more power or multi-phase output or combined in special configurations. Omitting input and/or output isolation can effect dramatic cost and size savings. A great variety of options provide solutions to many special requirements. Completely special or custom units or systems can be provided.

Behlman experience in the field of AC power sources covers a period of 20 years. The expertise accumulated in pioneering this field, and introducing most of its innovations, has earned for Behlman Engineering Corporation the reputation of being "The AC Power Supply Problem Solvers."

An example of Behlman Engineering's versatility is the special Model 600-8-1K shown at right. Designed for an unusual field service application, it generates 6000 VA of A.C. power over the frequency range of 8 to 1000 Hz. Its weight of only 250 lbs. and overall panel height of 28 inches was accomplished through a combination of very high efficiency linear power amplifiers and unique magnetics design.

To Order: Use model no. corresponding to output power level and number of phases required. Add letter corresponding to desired frequency range. Plug-in oscillators are available in a very wide variety of frequencies, both fixed and variable. Most units are in rack mounting enclosure. Cabinet enclosed versions of any of these units are available. Specify desired lengths of time for battery operation and battery recharge of UPS units.

SERIES LC 10/LC 300 A.C. LINE CONDITIONERS

These line conditioners are not frequency sensitive and will accept and condition line power of any frequency over the range of 45-500 Hz. They are not frequency converters but true line conditioners and provide very high correction ratios of Line voltage variations, distortion, noise, spikes and transients. They are exceptionally efficient, compact, light and inexpensive.

This series of line conditioners is available in all of the power output ratings and phase configurations applicable to the A.C. power supplies listed above. For example a line conditioner to provide 1050 VA of 3 phase conditioned power in a wye configuration would be ordered as model 3-LC35. Specify nominal line voltage.

General Laboratory and Systems Instrumentation

BERTAN ASSOCIATES, INC. is engaged in the design, development and manufacture of high voltage power supplies and instrumentation. Our staff of specialists has developed the unique techniques, components and designs required to manufacture quality instruments at reasonable prices. The products described in this catalog are typical of our sophisticated capabilities. They underscore our ability to convert your custom requirements into quality products quickly and economically.

Typical of BERTAN excellence is the use of proprietary linear circuits for the development of high voltages. Linear circuit techniques provide three advantages which advance the state—of—the—art. First, they eliminate the spikes and noise associated with competitive saturated core and inverter devices. Second, they can be readily programmed by remote control, computer or internal tracking circuitry. Third, linear operation of the high voltage assembly is inherently more reliable than inverter operation with its high surges of peak power. The resultant purity and versatility of our power supplies makes them ideal for applications where noise cannot be tolerated, or where program control is required. All units are arc protected, short circuit proof and self restoring.

BERTAN ASSOCIATES, INC. is equipped to provide you with the most advanced high voltage power supplies available from today's technology. We would be pleased to discuss our capabilities with you and to quote on either your custom or catalog requirements.

Inquires for OEM applications are particularly invited. Specifications for all units shown can be tailored for optimum performance in your application.

BULOVA Inverters and Frequency Changers

Features:

- Up to 500–VA Output
- Fully Regulated Sine Wave
- All Solid-State
- Protected Input/Output

Performance Specifications:

OUTPUT:

Frequency Output: 50 or 60 Hz, standard; other specific frequency, custom

Frequency Regulation: ±1%, ±.1%, ±.015%, ±.005% or better.

Temperature Range: 0° C to + 50° C

Wave Shape: Sine Wave, 3% Distortion max.

Output Voltage: 115 or 230V AC nominal

Voltage Regulation: ± 1% any combination of full line and load change

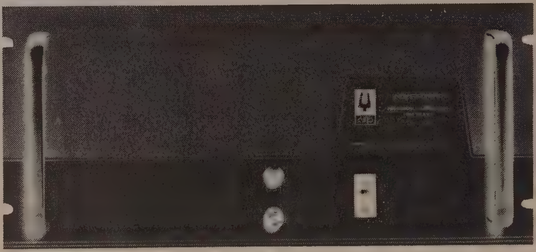
INPUT:

115V AC or 230V AC, ±10%, 45 to 65 Hz; or 22 to 30V DC

Applications:

Ideally suited for synchronous motor drives, chronographs, stroboscopes, generator frequency control; running timers, clock and time-of-day systems, tape recorders, general laboratory use.

INVERTERS

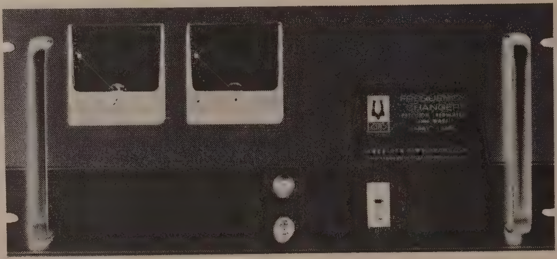


(Meters optional)

Model	Input VDC	Output			Wt. Lbs. (2)	Dimensions (For 19" Rack)	
		VA	Freq. Hz	Volt		H	D
DA-250S	22-30	250	50 or 60	115 (1)	70	8¾"	13"

(1) 230 Volt Available (2) For 50 Hz, add about 5 lbs.

FREQUENCY CHANGERS



Meters optional)

Model	Input		Output			Wt. Lbs. (2)	Dimensions (For 19" Rack)	
	VAC. ±10%	Freq. Hz	VA	Freq. Hz	Volt		H	D
ADA-100S	115/230	45-65	100	50 or 60	115	75	5¼"	13"
ADA-250S	115/230	45-65	250	50 or 60	115 (1)	80	8¾"	13"
ADA-500S	115/230	45-65	500	50 or 60	115	130	10½"	15"

(1) 230 Volt Available (2) For 50 Hz, add about 5 lbs.

5VA INVERTER — PRECISION FREQUENCY

Model DA5S

Standard 115 V 60 Hz, available at any fixed frequency from 50 to 400 Hz

- Accuracy to ±.0002%
- Sine Wave, max. THD 5%
- Input 28V DC ± 4V

Size: 4½" x 5" x 3¼"
Weight: 3 lbs. approx.

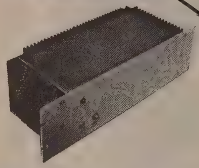
RACK SUPPLIES

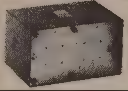


Recently developed multiple output rack supplies integrate either standard or custom modules into 19″ rack cases for system applications.

FEATURES INCLUDE: All options in this catalogue, metering, cooling, interface and protection circuitry, high density and efficency.

CALL THE FACTORY TOLL-FREE TO DISCUSS YOUR PARTICULAR APPLICATION AND REQUIREMENTS.

UPS
AC — BATTERY — DC/AC UNINTERRUPTABLE POWER SUPPLY



SYSTEM SUPPLIES CONTINUOUS AC OR DC POWER, EVEN IN EVENT OF POWER LINE OR GENERATOR FAILURE.

SPECIFICATIONS

OUTPUT: AC or DC, Regulated typically 1% OR battery characteristic.
OUTPUT POWER: 6 watt hours and up — to 1000 VA.
INPUT: 105 - 125 VAC, 50 - 420 Hz. (Other AC inputs optional.)
PACKAGING: Modular or rack. Internal batteries provided. (optional).

CALL THE FACTORY TOLL-FREE TO DISCUSS YOUR PARTICULAR APPLICATION AND REQUIREMENTS.

CUSTOM SUPPLIES

CEA's vast experience and technical expertise in all phases of power supply design and development is available to answer your custom power supply requirements.

Our highly reliable custom designs are presently hard at work in many commercial, industrial, and military applications around the world meeting requirements different than the standard units listed.

CALL THE FACTORY — TOLL FREE (800) 235-4150 OR IN CA. (800) 592-5910 TO DISCUSS YOUR REQUIREMENTS.

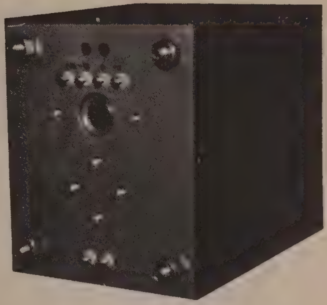
AC-DC Regulated TRIPLE OUTPUT +5V & ±15V MODULAR POWER SUPPLIES

CEAT SERIES — DISSIPATIVE REGULATORS

STANDARD FEATURES INCLUDE



- OUTPUTS +5, ±15VDC. .25 to 20 AMPS, to 250 WATTS.
- INPUTS 50 to 420 Hz, 95 to 460VAC and DC inputs are optional.
- REGULATION ±.02% and ±.04% for line plus load.
- 80°C BASE TEMPERATURE without derating.
- SHIELDING line isolation eliminating glitches and other noise problems. 20 db standard up to 100 db optional.
  Floating outputs, + or − may be ±500VDC from case.
  No voltage overshoot on turn-on or turn-off.
  Short ciruit protected.
  MIL-T-27 modular case sizes with removable covers for servicing.
  Critical components pretested aged and graded.
- BURN-IN (stabilization) 16 hrs. min. at rated load and high base temperature.
  100% TESTING after burn-in, test data with shipment.
  Specifications guaranteed, not just typical
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.

Input Voltage and Frequency: 105 to 125VAC, 50 to 420 Hz are standard. DC and other voltage ranges are optional.

Output Voltage and Current: +5, ±15VDC. .25 to 20A. See correlation in table above. +4.5-6.0VDC. ±10-18VDC also aavilable. Call factory.

Voltage Setting Accuracy: +5V ±1%. −15V ±1%. +15V tracks ±1%.

Temperature Base: −20°C to +80°C operating. −40°C to +85°C storage.

Thermal Data: Details associated with thermal curve numbers (3 thru 7) in table above are shown on page 19.

Size - Weight - Terminations: Details associated with MIL-T-27 case (JA thru SA) in table above are shown on page 20.

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or a percentage of the base price; add the larger number to the base price.

Sym-bol	Option Description	Prices	Extend Delivery (Weeks)	REMARKS
G	−15 remote balance adjust ±3%	$5	None	
G5	+5 remote adjust ±5%	$5	None	Increase thermal number by one.
G15	±15 remote adjust ±5%	$5	None	Increase thermal number by one.
L	Input 95-135 VAC, 50-420 Hz	10%	1	Input terminals parallel or series for 115/230 volts.
L1	Input 208 VAC ±10%, 50-420 Hz	$15 or 10%	1	
L2	Input 230 VAC ±10%, 50-420 Hz	$15 or 10%	1	
L3	Input 460 VAC ±10%, 50-420 Hz	$25 or 15%	1	
L4	Input 105-125 VAC, 400 Hz ±20 Hz	$15 or 10%	1	Derate current to 60% of rated.
L5	Input 115/230 VAC, 50-420 Hz	$30 or 20%	1	Reduce case size to next smaller. Derate ripple by 5X.
L6	Input 12 VDC (11.6-13.8 VDC)	$70 or 40%	1	Derate current to 60% of rated.
L7	Input 24 VDC (23.2-27.6 VDC)	$70 or 40%	1	Derate current to 80% of rated.
L8	Input 48 VDC (46.4-55.2 VDC)	$70 or 40%	1	Derate current to 80% of rated.
P2	Overtemperature cutout	$20	1	Limits base temperature to maximum rated. Self restarting.
P3	Crowbar voltage limit on +5 V	$30 or 15%	1	Operates at 10% or 1 volt over maximum settable voltage.
P4	Crowbar on all outputs			
T	40 db transformer shielding	$25 or 15%	1	Reduces capacitance between line and circuit by 100X.
T1	100 db transformer shielding	$50 or 25%	1	Reduces capacitance between line and circuit by 100,000X.
U	Output float up to ±1000 V	10%	1	Any output terminal will withstand ±1000 volts to case or input.
W	Potted for ruggedization in polyurethane resin JA	$10	1	Weight increased about 30%.
	MA, NA	$20	1	
	QA	$30	1	
	SA	$40	1

NET 30 days, F.O.B. San Luis Obispo, California

DELIVERY

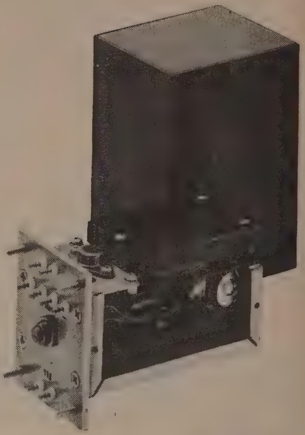
All supplies 3 weeks. Some options extend delivery as shown above. Shipments will be as directed. United Parcel where serviced or Parcel Post for the remaining.

AC-DC Regulated
SINGLE OUTPUT
MODULAR POWER SUPPLIES

CEA, *a division of Berkleonics, Inc.*
1 Aerovista Park, San Luis Obispo, Calif. 93401
Toll-Free: Phone 800-235-4150 • In Calif. 800-592-5910

CEA6 SERIES DISSIPATIVE REGULATORS

STANDARD FEATURES INCLUDE



- OUTPUTS from 3.5 to 500VDC, .05 to 25 AMPS, to 800 WATTS.
- INPUTS 50 to 420 Hz, 95 to 460VAC and DC inputs are optional.
- REGULATION from .05% to .0005% for line plus load.
- 80°C BASE TEMPERATURE without derating.
- SHIELDING, line isolation, eliminating glitches and other noise problems. 20 db standard, up to 100 db optional.
  Floating outputs, + or − output may be ±500VDC from case.
  Remote sensing standard, all models, eliminates load lead errors.
  Adjustment of output ±5% standard. Other ranges are optional.
  Remote adjustment optional at no charge.
  Series starting with rated load, for multiple supplies to a common load.
  Short circuit output current will not damage supplies.
  No voltage overshoot on turn-on or turn-off.
  MIL-T-27 modular case sizes with removable covers for servicing.
  Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment. **Specifications guaranteed, not just typical.**
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.

SPECIFICATIONS

REGULATION — STABILITY — RIPPLE — BASE MODEL PRICE

Class of Regulation	Line Plus Load Regulation	Line Regulation for 10% Line Change	Load Regulation for No Load to Full Load	Temperature Coefficient Per Degree C	Stability for 40 Hours	RMS Ripple	Option Required	Output Current Limit	BASE MODEL PRICE

AC-DC Regulated SINGLE OUTPUT MODULAR POWER SUPPLIES

CEA6 SERIES

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	FIXED OUTPUTS			Not available with "G" or "R" options.
F	Fixed output ±1.0%	No charge	None	Available in all classes of regulation.
F1	Fixed output ±0.1%	$15	1	Available in classes C & D.
F2	Fixed output ±0.01%	$50	1	Available in class D only.
	ADJUSTABLE OUTPUTS			
G	Output adjust range ±1%	$5	None	Increases resolution of adjustment output.
Std.	Output adjust range ±5%	No charge	None	Provided unless a "G" or "F" option is specified.
G1	Output adjust range ±10%	$5 or 5%	1	Reduce maximum current to 80% of rated output.
G2	Output adjust range ±20%	$10 or 10%	1	Reduce maximum current to 60% of rated output.
G3	Output adjust range ±30%	$15 or 15%	1	Reduce maximum current to 50% of rated output.
G4	Output adjust range ±40%	$20 or 20%	1	Reduce maximum current to 45% of rated output.
G5	Output adjust range ±50%	$25 or 25%	1	Reduce maximum current to 40% of rated output.
Note: Next larger case size may be required for options G2,G3, G4 & G5. The temperature coefficient is degraded in classes B, C & D for options G2 thru G5.				
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$100 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$20 or 20%	4	Storage to −55°C
H3	Temperature range −55°C to +115°C	$200 or 100%	6	Requires next larger case size. Storage to −62°C.
	AC INPUT VOLTAGE AND FREQUENCY			
L	Input 95-135V, 50-420 Hz	$10 or 10%	1	Derate maximum current to 60% of rated output.
L1	Input 208V ±10%, 50-420 Hz	$15 or 10%	1	
L2	Input 230V ±10%, 50-420 Hz	$15 or 10%	1	
L3	Input 460V ±10%, 50-420 Hz	$25 or 15%	1	
L4	Input 105-125V, 400 ±20 Hz	$15 or 10%	1	Reduce case size to next smaller. Derate ripple by 5X.
L5	Input 115/230V, 50-420 Hz	$30 or 20%	1	Input terminals parallel or series for 115/230 volts.
	DC INPUT VOLTAGES			
L7	Input 12 VDC (11.6 to 13.8 VDC)	$70 or 40%	1	Derate output to 60% of normal.
L8	Input 24 VDC (23.2 to 27.6 VDC)	$70 or 40%	1	Derate output to 80% of normal.
L9	Input 14 VDC (12.0 to 16.0 VDC)	$90 or 50%	1	Derate output to 60% of normal.
L10	Input 28 VDC (24.0 to 32.0 VDC)	$90 or 50%	1	Derate output to 80% of normal.
L11	Input 48 VDC (42-60 VDC)	$90 or 50%		
L12	Input 40-115/210-230 ±10%	$30 or 20%		
	SPECIAL CONNECTIONS			
N1	Screw terminals #6-32	$15	3	Used for connections of 20A or less HA size or larger.
	PROTECTION CIRCUITS			Available in all sizes except FA.
P1	Current limiting	$25 or 15%	1	Protects system circuit. Limits current to 130% of rated.
P2	Overtemperature cutout	$20	1	Limits base temperature to maximum rated. Self restarting.
P3	Crowbar voltage limit	$30 or 15%	1	Protects power supply and system circuit under all circumstances. Operates at 10% or 1 volt, whichever is greater over maximum settable voltage. Remove input power to restart.
	REMOTE PROGRAMMING			
R	Remote adjust (no pot provided)	No charge	None	Remote programming options allow power supply to be externally adjusted. Resistance to output ratio is approximately 5 mv per ohm except for class C and D units below 8.5 volts which are approximately 1 mv per ohm.
R1	Remote adjust with 1% linearity	$20 or 10%	1	
R2	Remote adjust plus internal pot (A & B only)	$5	1	
R3	Remote adjust with pot provided (A & B only)	$5	1	
	START INTO HIGH CAPACITANCE LOADS			
S1	Start with 30,000 mfd/amp-100,000 mfd max.	$20 or 10%	1	Recommended for all high capacitance loads.
	HIGH ISOLATION			6″ minimum shielded leads vs. terminals.
T	40 db transformer shielding	$25 or 15%	1	Reduces capacitance between line and circuit by 100X.
T1	100 db transformer shielding	$50 or 25%	1	Reduces capacitance between line and circuit by 100,000X.
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$10 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			
W	Potted for ruggedization in polyurethane resin. FA, GA, HA, JA	$10	1	Weight increased about 30%.
	KA, LA	$15	1	
	MA, NA	$20	1	
	PA	$25	1	
	QA	$30	1	
	RA	$35	1	
	SA	$40	1	
	TA	$45	1	
			1

AC-DC Regulated CONSTANT CURRENT MODULAR POWER SUPPLIES

CEAC6 SERIES

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$100 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$20 or 20%	4	Storage to −55°C
H3	Temperature range −55°C to +115°C	$200 or 100%	6	Requires next larger case size. Storage to −62°C.
	AC INPUT VOLTAGE AND FREQUENCY			
L	Input 95-135V, 50-420 Hz	$10 or 10%	1	Derate maximum current to 60% of rated output.
L1	Input 208V ±10%, 50-420 Hz	$15 or 10%	1	
L2	Input 230V ±10%, 50-420 Hz	$15 or 10%	1	
L3	Input 460V ±10%, 50-420 Hz	$25 or 15%	1	
L4	Input 105-125V, 400 ±20 Hz	$15 or 10%	1	Reduce case size to next smaller. Derate ripple by 5X.
L5	Input 115/230V, 50-420 Hz	$30 or 20%	1	Input terminals parallel or series for 115/230 volts.
	DC INPUT VOLTAGES			
L7	Input 12 VDC (11.6 to 13.8 VDC)	$70 or 40%	1	Derate output to 60% of normal.
L8	Input 24 VDC (23.2 to 27.6 VDC)	$70 or 40%	1	Derate output to 80% of normal.
L9	Input 14 VDC (12.0 to 16.0 VDC)	$90 or 50%	1	Derate output to 60% of normal.
L10	Input 28 VDC (24.0 to 32.0 VDC)	$90 or 50%	1	Derate output to 80% of normal.
	PROTECTION CIRCUITS			
P2	Overtemperature cutout	$20	1	Available in all sizes except FA. Limits base temperature to maximum rated. Self restarting.
	REMOTE PROGRAMMING			
R	Remote adjust (no pot provided)	No charge	None	Remote programming options allow power supply to be externally adjusted. Resistance to ouput ratio is approximately 1% linearity from 20% to 100% rated output. For potentiometer requirements see below.
R1	Remote adjust with 1% linearity	$20 or 10%	1	
R2	Remote adjust plus internal pot (A & B only)	$5	1	
R3	Remote adjust with pot provided (A & B only)	$5	1	
	HIGH ISOLATION			6″ minimum shielded leads vs. terminals.
T	40 db transformer shielding	$25 or 15%	1	Reduces capacitance between line and circuit by 100X.
T1	100 db transformer shielding	$50 or 25%	1	Reduces capacitance between line and circuit by 100,000X.
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$10 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			
W	Potted for ruggedization in polyurethane resin. FA, GA, HA, JA KA, LA MA, NA PA QA RA SA TA	$10 $15 $20 $25 $30 $35 $40 $45	1 1 1 1 1 1 1 1 1 1	Weight increases about 30%

EXTERNAL ADJUSTMENT

For **CONSTANT CURRENT** supplies (CEAC6 series), remote programming is accomplished by adding resistance to the remote adjust terminals. With the terminals shorted, the output current will be at maximum. To decrease the output current on supplies rated at 1 amp and below, add approximately 1 ohm of resistance for each .1% of change wanted. For supplies rated above 1 amp, add 1 ohm per each .2% of change wanted. Constant current supplies may also be voltage programmed. Use zero to 1 volt for units 1 amp and below and zero to ½ volt for units over 1 amp.

CASE SIZES AND WEIGHTS (UNPOTTED)

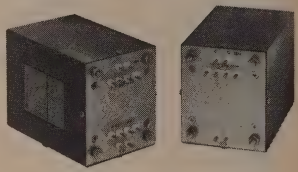
Toll-Free: Phone 800-235-4150 • In Calif. 800-592-5910

CEAD6 SERIES DISSIPATIVE REGULATORS

STANDARD FEATURES INCLUDE

- OUTPUTS from 3.5 to 500VDC, .05 to 10 AMPS, to 300 Watts each output.
- INPUTS 50 to 420 Hz, 95 to 460VAC and DC inputs are optional.
- REGULATION from .05% to .0005% for line plus load.
- 80°C BASE TEMPERATURE without derating.
- SHIELDING, line isolation, eliminating glitches and other noise problems. 20 db standard, up to 100 db optional.
  Floating outputs, + or − output may be ±500VDC from case.
  Remote sensing standard, all models, eliminates load lead errors.
  Fixed output voltages to within 1% unless specified otherwise.
  Remote adjustment optional at no charge.
  Series starting with rated load, for multiple supplies to a common load.
  Short circuit output current will not damage supplies.
  No voltage overshoot on turn-on or turn-off.
  MIL-T-27 modular case sizes with removable covers for servicing.
  Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment.
  Specifications guaranteed, not just typical.
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.



SPECIFICATIONS

REGULATION — STABILITY — RIPPLE — BASE MODEL PRICE

Class of Regulation	Line Plus Load Regulation	Line Regulation for 10% Line Change	Load Regulation for No Load to Full Load	Temperature Coefficient Per Degree C	Stability for 40 Hours	RMS Ripple	Tracking	Option Required	Output Current Limit	BASE MODEL PRICE
A	±0.05%	±0.01%	±0.04%	±0.01%	±0.05%	0.01%	±0.05%	F's or R's	10A	Tabulated below

D	±0.0005%	±0.0001%	±0.0004%	±0.0005%	±0.0005%	0.0003%	±0.0005%	F's or R's	1A	A plus 270.00

Input Voltage and Frequency: 105 to 125 volts — 50 to 420 Hz are standard. DC and other voltage ranges are optional.

Output Voltage and Current: 3.5 to 500VDC. 0.05 to 10A. See correlation in table below.

Recovery Time: As fast as 10 microseconds, depending on model selected.

Insulation Resistance: 100 Megohms DC standard for input, output and case; 1K Megohms for option "T"; 10K Megohms for option "TI".

Temperature, Base: −20°C to +80°C operating, −40°C to +85°C storage.

Thermal Data: Details associated with thermal curve numbers (1 thru 9) in table below are shown on page 19.

Size-Weight-Terminations: Details associated with MIL-T-27 case (HA thru TA), tabulated below, are shown on pages 8 and 20.

AC-DC Regulated
DUAL ±OUTPUT
MODULAR POWER SUPPLIES

CEAD6 SERIES

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	FIXED OUTPUTS			Not available with "G" or "R" options.
F	Fixed output ±1.0%	No charge, std.	None	Available in all classes of regulation.
F1	Fixed output ±0.1%	$30	1	Available in classes C & D.
F2	Fixed output ±0.01%	$100	1	Available in class D only.
	ADJUSTABLE OUTPUTS			
G	Output adjust range ±1%	$10	None	Increases resolution of output adjustment.
Std.	Output adjust range ±5%	No charge	None	Provided with "R" option if no other "G" option is specified.
G1	Output adjust range ±10%	$10 or 5%	1	Reduce maximum current to 80% of rated output.
G2	Output adjust range ±20%	$20 or 10%	1	Reduce maximum current to 60% of rated output.
G3	Output adjust range ±30%	$30 or 15%	1	Reduce maximum current to 50% of rated output.
G4	Output adjust range ±40%	$40 or 20%	1	Reduce maximum current to 45% of rated output.
G5	Output adjust range ±50%	$50 or 25%	1	Reduce maximum current to 40% of rated output.
Note: Next larger case size may be required for options G2,G3, G4 & G5. The temperature coefficient is degraded in classes B, C & D for options G2 thru G5.				
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$200 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$40 or 20%	4	Storage to −55°C
H3	Temperature range −55°C to +115°C	$400 or 100%	6	Requires next larger case size. Storage to −62°C.
	DUAL OUTPUT ISOLATION			
K	Isolated outputs	$20 or 10%	1	Outputs isolated from each other and case ±500 volts.
	AC INPUT VOLTAGE AND FREQUENCY			
L	Input 95-135V, 50-420 Hz	$10 or 10%	1	Derate maximum current to 60% of rated output.
L1	Input 208V ±10%, 50-420 Hz	$15 or 10%	1	
L2	Input 230V ±10%, 50-420 Hz	$15 or 10%	1	
L3	Input 460V ±10%, 50-420 Hz	$25 or 15%	1	
L4	Input 105-125V, 400 ±20 Hz	$15 or 10%	1	Reduce case size to next smaller. Derate ripple by 5X.
L5	Input 115/230V, 50-420 Hz	$30 or 20%	1	Input terminals parallel or series for 115/230 volts.
	DC INPUT VOLTAGES			
L7	Input 12 VDC (11.6 to 13.8 VDC)	$70 or 40%	1	Derate output to 60% of normal.
L8	Input 24 VDC (23.2 to 27.6 VDC)	$70 or 40%	1	Derate output to 80% of normal.
L9	Input 14 VDC (12.0 to 16.0 VDC)	$90 or 50%	1	Derate output to 60% of normal.
L10	Input 28 VDC (24.0 to 32.0 VDC)	$90 or 50%	1	Derate output to 80% of normal.
	PROTECTION CIRCUITS			Available in all sizes except HA.
P1	Current limiting	$50 or 15%	1	Protects system circuit. Limits current to 130% of rated.
P2	Overtemperature cutout	$20	1	Limits base temperature to maximum rated. Self restarting.
P3	Crowbar voltage limit	$60 or 15%	1	Protects power supply and system circuit under all circumstances. Operates at 10% or 1 volt, whichever is greater over maximum settable voltage. Remove input power to restart.
	REMOTE PROGRAMMING			
R	Remote adjust (no pot provided)	No charge	None	Remote programming options allow power supply to be externally adjusted. Resistance to output ratio is approximately 5 mv per ohm except for class C and D units below 8.5 volts which are approximately 1 mv per ohm.
R1	Remote adjust with 1% linearity	$40 or 10%	1	
R3	Remote adjust with pot provided (A & B only)	$10	1	
	OPTIONAL STARTING CIRCUITS			
S1	Start with 30,000 mfd/amp-100,000 mfd max.	$40 or 10%	1	Recommended for high capacitance loads.
S2	Start positive output first	$20	1	
S3	Start negative output first	$20	1	
	HIGH ISOLATION			6" minimum shielded leads vs. terminal.
T	40 db transformer shielding	$40 or 15%	1	Reduces capacitance between line and circuit by 100X.
T1	100 db transformer shielding	$80 or 25%	1	Reduces capacitance between line and circuit by 100,000X.
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$20 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			
W	Potted for ruggedization in polyurethane resin. HA, JA	$10	1	Weight increased about 30%.
	KA, LA	$15	1	
	MA, NA	$20	1	
	PA	$25	1	
	QA	$30	1	
	RA	$35	1	
	SA	$40	1	
	TA	$45	1

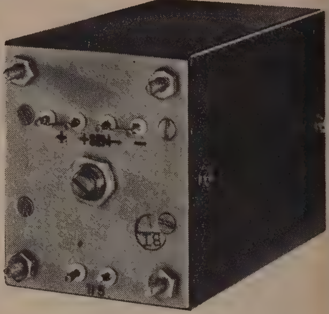
AC/DC-DC HF Regulated COMPACT MODULAR POWER SUPPLIES

CEA, *a division of Berkleonics, Inc.*
1 Aerovista Park, San Luis Obispo, Calif. 93401
Toll-Free: Phone 800-235-4150 • In Calif. 800-592-5910

CEA3 SERIES — IMPROVED SWITCHING REGULATOR

STANDARD FEATURES INCLUDE



- OUTPUTS from 4.0 to 256VDC, .1 to 60 AMPS, to 640 WATTS.
- INPUTS 50 to 420 Hz, 95 to 135VAC or 105-190VDC.
- REGULATION, 1% or .1% for line plus load.
- 80°C BASE TEMPERATURE without derating.
  Floating outputs, + or − output may be ±500VDC from case.
  Remote sensing standard, all models, eliminates load lead effects.
  Adjustment of output voltage, 50% to 100% is standard. Ranges tabulated below.
  Remote adjustment optional at no charge.
  Series starting with rated load, for multiple supply to a common load application.
  Short circuit and overload output currents will not damage supplies.
  No voltage overshoot on turn-on or turn-off.
  MIL-T-27 modular case sizes with removable covers for servicing.
  Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment.
  Specifications guaranteed, not just typical.
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.

SPECIFICATIONS — IMPROVED

REGULATION — STABILITY — RIPPLE — BASE MODEL PRICE

Class of Regulation	Line Plus Load Regulated	Line Regulation for 10% Line Change	Load Regulation 10% Load to Full Load	Temperature Coefficient Per Degree C	Stability for 40 Hours	Ripple (RMS)	BASE MODEL PRICE
A	0.5%	0.25%	0.25%	0.5%	0.5%	0.3%	Tabulated below
B	±0.1%	±0.05%	±0.05%	±0.02%	±0.1%	0.07%	A plus $30.00

Input Voltage and Frequency: 105 to 125 volts, 50 to 420 Hz or 120 to 180VDC.

Output Voltage and Current: 4.0 to 256VDC, 0.1 to 60A. See correlation in table below.

Efficiency: Up to 80%. The output rectifier voltage drop of 1.2 volts is a major loss, hence a 5V output is 64% on some models.

Recovery Time: Typically less than 1ms for a 50% to 100% load change.

Insulation Resistance: 100 Megohm DC standard for input, output and case.

Temperature, Base: −20°C to +80°C operating, −40°C to +85°C storage.

Thermal Data: Details associated with thermal curve numbers (4 thru 9) in table below are shown on page 19.

Size-Weight-Terminations: Details associated with MIL-T-27 case (GA thru RA), tabulated below, are shown on pages 10 and 20.

AC/DC-DC HF Regulated COMPACT MODULAR POWER SUPPLIES

CEA3 SERIES

OPTIONS

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	FIXED OUTPUTS			
F	Fixed output ±1.0%	No charge	None	Not available with "R" options. Available in both classes of regulation.
F1	Fixed output ±0.2%	$15	1	Available in class B only
	ADJUSTABLE OUTPUTS			
G1	Output adjust range ±10%	No charge	None	Increases resolution of adjustment output.
G2	Output adjust range ±5%	No charge	None	
G3	Output adjust 50% to 100% of nominal	No charge	None	
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$100 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$20 or 20%	4	Storage to −55°C
H3	Temperature range −55°C to +115°C	$200 or 100%	6	Requires next larger case size. Storage to −62°C.
	INPUT VOLTAGE AND FREQUENCY			
L	Input 95-135VAC, 50-420 Hz or 105-190VDC	$20 or 10%	1	Derate maximum current to 60% of rated output.
	SPECIAL CONNECTIONS			
N	Octal plug in lieu of standard terminations	$15	3	Specify option "R" or "F" with "N". Sizes GA or larger, 5 amps or less.
N1	Screw terminals #6-32	$15	3	Used for connections of 20A or less. HA size or larger.
	PROTECTION CIRCUITS			
Std.	Current limiting	No Charge	1	Limits current to protect system circuit.
P2	Overtemperature cutout	$20	1	Limits base temperature to maximum rated. Self restarting.
P3	Crowbar voltage limit	$30 or 15%	1	Protects power supply and system circuit under all circumstances. Operates at 10% or 1 volt, whichever is greater over maximum settable voltage. Remove input power to restart.
	REMOTE PROGRAMMING			
R	Remote adiust (no pot provided)	No charge	None	Remote programming options allow power supply to be externally adjusted.
R2	Remote adjust plus internal pot	$5	1	
R3	Remote adjust with pot provided	$5	1	
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$10 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			Weight increased about 50% (except W2).
W	Potted for ruggedization in polyurethane resin. GA, HA, JA	$10	1	**Fixed output** or **remote programming** option is required with option "W".
	KA, LA	$15	1	
	MA, NA	$20	1	
	PA	$25	1	
	QA	$30	1	
	RA	$35	1	
W2	Light weight rigid foam	"W" + $20.00	1

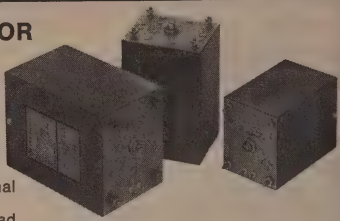
CEA2 SERIES — IMPROVED SWITCHING REGULATOR



STANDARD FEATURES INCLUDE

- OUTPUTS from 3.5 to 500VDC, .05 to 40AMPS, to 640 WATTS.
- INPUTS from 10.5 to 60VDC (CEA3 Series, 105-190 VDC).
- REGULATION 1% for line or load and unregulated.
- 80°C BASE TEMPERATURE without derating.
  - Floating outputs, + or − output may be ±500VDC from case.
  - Remote sensing on regulated models, eliminating load lead errors.
  - Adjustment of output ±5% regulated models. Other ranges are optional
  - Remote adjustment optional at no charge.
  - Series starting with rated load, for multiple supply to common load application.
  - Short circuit output currents will not damage supplies.
  - No voltage overshoot on turn-on or turn-off.
  - MIL-T-27 modular case sizes with removable covers for servicing.
  - Critical components pretested, aged, and graded.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment. **Specifications guaranteed, not just typical.**
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.

SPECIFICATIONS — IMPROVED

REGULATION — STABILITY — RIPPLE

Class of Regulation	Line Regulation for Full DC Input Change	Load Regulation from 10% to Full Load	Ripple (RMS)	Temperature Coefficient Per Degree C	Efficiency Up to	Option Required
A	None	10% + .5 V	1.0%	0.1%	90%	F
C	0.5%	0.5%	0.3%	0.02%	80%	None

FOR CLOSER REGULATION SUPPLIES SEE DC INPUT OPTIONS FOR CEA6 SERIES.

Input Voltage: 21 to 30VDC standard, other input ranges are optional.

Output Voltage and Current: 3.5 to 500VDC .05 to 40A. See correlation in table below.

Recovery Time: As fast as 10 μs for "A" regulation supplies. For "C" supplies typically less than 1ms for a 50% to 100% load change.

Insulation Resistance: 100 Megohms DC for input, output and case.

Temperature, Base: −20°C to +80°C operating, −40°C to +85°C storage.

Thermal Data: Details associated with thermal curve numbers (4 thru 9) in table below are shown on page 19.

Size-Weight-Terminations: Details associated with MIL-T-27 case (FA thru RA), tabulated below, are shown on pages 12 and 20.

PART NUMBERS

Example: 1% Reg, 5V, 40A with options "F1" and "P3"; "CEA2C50X403F1P3"

DC-DC Regulated/Unregulated CONVERTERS MODULAR POWER SUPPLIES

CEA2 SERIES

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	FIXED OUTPUTS			
F	Fixed output ±5%	No charge	None	Setting at 50% load and mid voltage. Standard for class A. Available for CEA2C.
F1	Fixed output ±1%	$15	1	CEA2C series only.
	ADJUSTABLE OUTPUTS			
G	Output adjust range ±1%	$10	1	CEA2C only.
Std.	Output adjust range ±5%	No charge	None	CEA2C only.
G1	Output adjust range ±10%	$5 or 5%	1	CEA2C only.
G2	Output adjust range ±20%	$10 or 10%	1	CEA2C only.
Note: Adjustable units will have an internal potentiometer unless "R" option specified.				
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$50 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$15 or 15%	2	Storage to −55°C
H3	Temperature range −55°C to +115°C	$100 or 100%	6	Requires next larger case size. Storage to −62°C.
	INPUT VOLTAGE OPTIONS			(For 105 to 190 VDC — See CEA3 Series)
L	Input 10.5 to 15.0 VDC	$10 or 10%	1	Load regulation, 15% ±.5 V over 100 W output.
L1	Input 24 to 32 VDC	$10 or 10%	1	
L2	Input 42 to 60 VDC	$10 or 10%	1	
	SPECIAL CONNECTIONS			
N1	Screw terminals #6-32	$15	3	Used for connections of 20A or less. HA size or larger.
	PROTECTION CIRCUITS			
P2	Overtemperature cutout	$20	1	Set at base temperature rating. Self restarting.
P3	Crowbar voltage limit	$30 or 15%	1	Set at 1 volt or 10% over maximum settable voltage, whichever is larger.
	REMOTE PROGRAMMING			
R	Remote adjust (no pot provided)	No charge	None	Remote program options allow power supply to be externally adjusted with resistance (1 mv/ohm). Not available in CEA2A series. Available in CEA2C series only.
R1	Remote adjust with 1% linearity	$20 or 10%	1	
R2	Remote adjust plus internal pot	$5	1	
R3	Remote adjust with pot provided	$5	1	
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$10 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			
W	Potted for ruggedization in polyurethane resin. FA, GA, HA, JA	$10	1	Weight increased about 50% (except W2).
	KA, LA	$15	1	
	MA, NA	$20	1	Fixed output or remote programming option is required with option "W".
	PA	$25	1	
	QA	$30	1	
	RA	$35	1	
W2	Light weight rigid foam.	"W" + $20.00	1

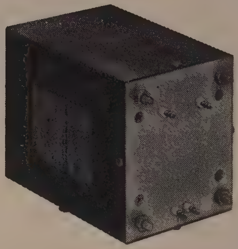
AC-DC Unregulated SINGLE OUTPUT MODULAR POWER SUPPLIES

CEA, a division of Berkleonics, Inc.
1 Aerovista Park, San Luis Obispo, Calif. 93401
Toll-Free: Phone 800-235-4150 • In Calif. 800-592-5910

CEA1A SERIES

STANDARD FEATURES INCLUDE

- OUTPUTS from 4.5 to 620VDC, up to 25 Amps, to 1000 WATTS
- INPUTS 95 to 460VAC, 50 to 420 Hz.
- 80°C BASE TEMPERATURE without derating.
- SHIELDING, line isolation, eliminating glitches and other noise problems. 20 db standard, up to 100 db optional.
  Floating outputs, + or − output may be ±500VDC from case.
  Series starting with rated load, for multiple supplies to a common load.
  MIL-T-27 modular case sizes with removable covers for servicing.
- BURN-IN (stabilization), 16 hrs. min. at rated load and high base temperature.
- 100% TESTING after burn-in, test data with shipment.
  Specifications guaranteed, not just typical.
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.



SPECIFICATIONS

Input Voltage and Frequency: 105 to 125 volts, 50 to 420 Hz are standard. Other voltage ranges are optional.

Output Voltage and Current: 4.5 to 620VDC, .05 to 25A See tabulation below. For DUAL OUTPUT SUPPLIES (CEAD1 series), contact the factory.

Regulation: Line; proportional to input. Load; 10% plus 1VDC from no load to full load.

Ripple, RMS: Less than 5%, standard. Less than 2% optional.

Voltage Setting: ±5% of any specified voltage from 4.5 to 620VDC while at 115 volts 60 Hz input and fully loaded.

Insulation Resistance: 100 Megohms DC standard for input, output and case; 1K Megohms for option "T"; 10K Megohms for option "TI".

Temperature, Base: −20°C to +80°C operating, −40°C to +85°C storage.

Thermal Data: Details associated with thermal curve numbers (1 thru 7) in table below are shown on page 19.

Size-Weight-Terminations: Details associated with MIL-T-27 case (FA thru TA), tabulated below, are shown on pages 14 and 20.

CEA1A SERIES

OPTIONAL FEATURES

The extra charge for each option is either a flat rate or percentage of the base model price; add the larger number to the base price.

Symbol Option	Option Description	Prices	Delivery (Weeks Added)	REMARKS
	EXTENDED TEMPERATURE RANGE			
H1	Temperature range −55°C to +80°C	$100 or 50%	4	Requires next larger case size. Storage to −62°C.
H2	Temperature range −40°C to +80°C	$20 or 20%	4	Storage to −55°C.
H3	Temperature range −55°C to +115°C	$200 or 100%	6	Requires next larger case size. Storage to −62°C.
	AC INPUT VOLTAGE AND FREQUENCY			
L1	Input 208V ±10%, 50-420 Hz	$15 or 10%	1	
L2	Input 230V ±10%, 50-420 Hz	$15 or 10%	1	
L3	Input 460V ±10%, 50-420 Hz	$25 or 15%	1	
L4	Input 105-125V, 400 ±20 Hz	$15 or 10%	1	Reduce case size to next smaller.
L5	Input 115/230V, 50-420 Hz	$30 or 20%	1	Input terminals parallel or series for 115/230 volts.
	DC INPUT VOLTAGES			See CEA2A series
	SPECIAL CONNECTIONS			
N1	Screw terminals #6-32	$15	3	Used for connections of 20A or less. HA size or larger.
	PROTECTION CIRCUITS			
P1	Current limiting and shorted output	$25 or 15%	1	Protects system circuit-limits current to about 150% of rated. Add 1 VDC to regulation.
P2	Overtemperature cutout	$20	1	Limits base temperature to maximum rated. Self restarting.
P3	Crowbar voltage limit (P1 features included)	$30 or 25%	1	Protects power supply and system circuit under all circumstances. Operates at 10% or 1 volt, whichever is greater over maximum operating voltage. Remove input power to restart.
	RIPPLE REDUCTION			Increase the size to the next larger case.
Q	Ripple at rated load, 2% or less	$10 or 20%	1	
	HIGH ISOLATION			6″ minimum shielded leads vs. terminals.
T	40 db transformer shielding	$25 or 15%	1	Reduces capacitance between line and circuit by 100X.
T1	100 db transformer shielding	$50 or 25%	1	Reduces capacitance between line and circuit by 100,000X.
	HIGH FLOAT VOLTAGE			
U	Output float up to ±1000V	$10 or 10%	1	Either output terminal will withstand ±1000 volts to case or input.
	RUGGEDIZED			
W	Potted for ruggedization in polyurethane resin. FA, GA, HA, JA KA, LA MA, NA PA QA RA SA TA	$10 $15 $20 $25 $30 $35 $40 $45	1 1 1 1 1 1 1 1	Increases weight about 30%.

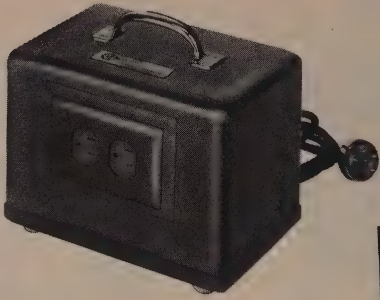
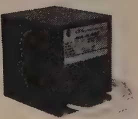
Toll-Free: Phone 800-235-4150 • **In Calif. 800-592-5910**

CEA11 TO CEA35 SERIES

FEATURES

- Stops high frequency line transients.
- Stops 60 Hz leakage current.
- Breaks AC power ground loops.
- 250 VA to 2 KVA units available from stock to two weeks.
- Input - output voltages, 95 to 270VAC.
- Portable — Ready to plug-in and use anywhere.
- Rack-mounted easily by removing feet and using bolts.
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.





Modular CEA11M to CEA35M

APPLICATIONS

This series of highly-shielded power Line Isolators offers the systems and laboratory engineers an opportunity to fully isolate electronic test equipment such as oscilloscopes. DVM's, power supplies, oscillators, amplifiers, counters, VTVM's and signal conditioning equipment. For example, with a Line Isolator connected between the power source and an oscilloscope, electrical measurements may be made without fear of tripping circuit breakers or blowing fuses because of power ground loops. Most high-frequency line transients are capacitance-coupled through standard power transformers (500 to 5000 pfd), and cause considerable unexplained interference. Reduction of such coupling capacity is the CEA secret to interference-free performance and high common mode rejection. CEA offers three choices of Line Isolators with reduced coupling capacity; 0.01 pfd, 0.001 pfd, and 0.0005 pfd. The effect of input-to-output coupling capacity is illustrated by the impedance of that capacity at various frequencies (5000 pfd for an unshielded transformer).

CEA shielded line isolators are also finding wide acceptance among OEM manufacturers of computers and computer peripheral equipment such as computer terminals. Line transients are coupled directly thru the unshielded power supplies of such equipment and act as bona fide signals to the sensitive I.C. circuits. For integral installation into OEM equipment, special physical packaging can be designed to accommodate the particular system space.

SPECIFICATIONS

Isolation: Input-to-output coupling capacity; less than 0.01, 0.001, or 0.0005 pfd.
Input-to-output DC resistance; greater than 100,000 megohms.
60 Hz leakage current less than .001μamps.

Input: 95-135 VAC, 50-65 Hz standard, other ranges optional.

Output Voltage: Within 2% of the input voltage, from no load to full load.

Output Current: See model table.

Efficiency: Better than 95%.

Mechanical: Unit has chrome handle, grey baked enamel finish, 6 ft. shielded line cord, non-scuff feet and #¼-20 inserts for bolt mounting. Modular unit has modified MIL-T-27 cases with 12″ lead, and threaded holes vs. studs; see page 20.

SHIELDED LINE CORDS FOR ISOLATOR OUTPUTS

STYLE A

STYLE B

To make optimum use of CEA Line Isolators, CEA offers specially designed shielded line cords in two styles and several lengths. Style A can be used as an extension cord for equipment that has a line receptacle mounted at the chassis (such as Tektronix scopes). Style B has stripped and tinned leads on one end and can be installed into equipment as a direct replacement for unshielded line cords (such as Hewlett-Packard equipment). The plugs on these cords, as well as the cable, are shielded and are constructed of the finest materials available. Other lengths, current ratings, and connectors are available on request.

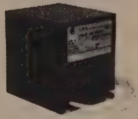
OL21 - OL25 / OWEN LABORATORIES PART DISTRIBUTED BY CEA

FEATURES

- Stops 60 Hz leakage currents
- Stops high frequency line transients.
- Less than 25 db audio noise
- Portable — Ready to plug-in and use anywhere.
- 250 VA to 2 KVA units available.
- Rack-mounted easily by removing feet and using bolts.
- 3 YEAR WARRANTY for parts and labor against defects in workmanship and materials.



Module OL21M to OL25M

APPLICATIONS

Recent investigations by safety conscious people in the medical field have shown that stray currents in the order of 10 microamps can be dangerous to patients exposed to surgical and intensive care instrumentation in hospitals. CEA's line isolators are capable of reducing line leakage currents to less than 5.0 microamps thus providing the necessary safety factor between hospital instrumentation and patient.

SPECIFICATIONS

Isolation: Leakage currents, 60 Hz, either output to case less than 5μA. DC resistance, output to case or to input, greater than 100,000 megohms.

Input: 95-135 VAC, 50 - 65 Hz is standard, other ranges are optional.

Output Voltage: Within 2% of input voltage at full load.

Output Current: See tabulation below.

Efficiency: Better than 90% at full load.

Mechanical: Unit has chrome handle, grey baked enamel finish, 6 ft. shielded line cord on the input, non-scuff feet, and #¼-20 inserts for bolt mounting. Modular unit has modified MIL-T-27 cases with 12" lead, and threaded holes vs. studs; see page 20.

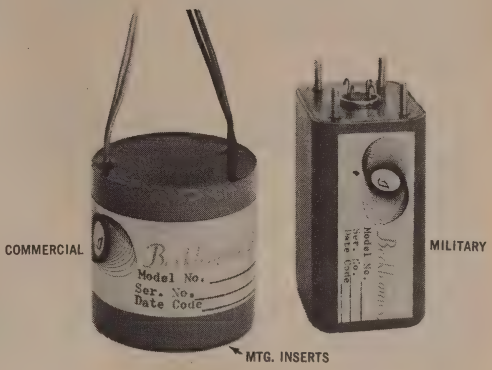
BATTERY CHARGERS FOR NI-CAD CELLS

C1.2 TO C36 / BERKLEONICS PART DISTRIBUTED BY CEA

FEATURES

These 115V, 60 Hz battery chargers are designed specifically for nickel cadmium and similar rechargeable cells. Average charge time for these chargers is 14 to 16 hours with **no damage to cells or charger** if the charger is left on indefinitely.

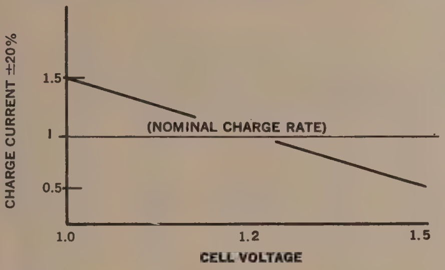
Variations of mechanical sizes and electrical specifications for every need are available on special request.



SPECIFICATIONS

INPUT: 115VAC, 60 Hz.

OUTPUT: DC current (rectified unfiltered AC) as indicated by table and curve below.



PART NUMBERS

Example: Commercial 12V, 400Ma charger; "C12.0-400"
YOUR SELECTION: Insert in the blanks as indicated.

cell charge current in Ma @ 10 Hr rate from table

THERMAL DATA THERMAL RADIATORS

CEA, *a division of Berkleonics, Inc.*
1 Aerovista Park, San Luis Obispo, Calif. 93401
Toll-Free: Phone 800-235-4150 • In Calif. 800-592-5910

Heat flows from regions of high temperature to regions of low temperature by:
1. CONDUCTION — heat flow within a material without material motion required.
2. CONVECTION — heat flow by physical motion of a material; e.g., liquids and gases.
3. RADIATION — heat flow by radiant energy, materials for the flow path not required.

The heat conductivity of various substances are: Silver 1.0, Copper .9, Gold .7, Aluminum .5, Iron .15, Steel .1, Silica .0024, Mica .0018 (.5 conductivity corresponds to about 1°C per inch or a heat flow of 5.3 watts per square inch).

The conductivity of some aluminum alloys are three times better than others, 1100F and 6063T5 are two of the better alloys.

Convection by natural means can vary about 2 to 1 for flat surface up versus a flat surface down.

Forced convection (fan-driven air) is a common cooling procedure and has the effects shown in the curve below.

Radiation depends to a large extent on the roughness of the surface. The rougher the better (e.g., the emissivity of aluminum unoxidized is .02 vs .3 oxidized).

From the above it is clear that heat flow is complex and quite variable. THE DATA GIVEN BELOW IS PRESENTED NOT AS ABSOLUTE BUT RATHER AS A GUIDE.

THERMAL DATA — Worst Case Condition: high input voltage, full load, no forced air.
(a) Power Dissipated Internally (watts) (b) Temp. Rise, chassis mounted (°C) (c) Temp. Rise, chassis & thermal radiator mounted (°C)

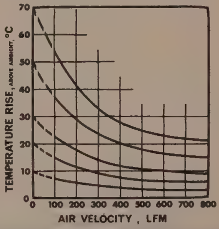
CHASSIS ³⁄₃₂″ x (In. x In.)		10x10	10x10	10x10	10x10	10x10	10x10	12x12	12x12	12x12	15x15	15x15	15x15	15x15
RADIATORS (Qty.) P/N		—	—	—	—	—	—	(1) CEATR1	(1) CEATR1	(2) CEATR1	(2) CEATR2	(2) CEATR2	(4) CEATR2	(4) CEATR2

Example: Thermal No. 5, Case SA may dissipate 160 watts, have a base temperature of 53°C above ambient for a 15″ x 15″ x ³⁄₃₂″ aluminum chassis mounting, reduce the 53°C to 28°C by adding four CEATR2 THERMAL RADIATORS (mounted thru chassis to base), and then have the 28°C decreased to 11°C by 400LFM air velocity to all surfaces.

The base limitation to the life of your CEA Power Supply is the upper temperature of the internal components. As with most temperature-affected items, the cooler the unit the greater the life expectancy. Keeping the base temperature of your power supply under +80°C during normal operation will cause the internal components to be safe and give a good life.

Temperature stability may require from 10 to 40 minutes after a change, e.g., turn-on. This can be an aid during intermittent duty, and should be remembered when performing a steady-state systems analysis.



THERMAL RADIATORS

Models CEATR1 and CEATR2 Thermal Radiators, designed for use with CEA Power Supplies, may be mounted directly into the module base or on the opposite side of the mounting body. The mounting hole configuration in the Thermal Radiators and the base of each Module are symmetrical so that the radiators may be mounted for airflow in either direction across the base of the Module. A coating of silicon grease should be applied on each mating surface of the Module, mounting body and Thermal Radiator. The mounting body must be a smooth, highly thermal conductive metallic surface. (Minimum $25.00 order.)

Thermal Radiator Model No.	Radiation Area (sq. in.)	Dimensions A	B	Weight (Pounds)	Price Each
CEATR1	75	1.000	1.93	0.75	$14.00
CEATR2	150	2.000	3.93	1.50	$20.00

AC-DC Modular Power Supplies CONVECTION COOLED DISSIPATIVE REGULATOR

C1 SERIES / SINGLE, DUAL and TRIPLE OUTPUTS

Convection Cooled Design for natural convection or forced air cooling in rack or cabinet installations. Dissipative Regulators offer low ripple, higher regulation, fast response, simplified circuitry and lower cost with efficiencies up to 65%.

SPECIFICATIONS

INPUT VOLTAGES — AC
115/230 VAC ±10% 50-420 Hz, either voltage selectable.

OUTPUT VOLTAGES and CURRENTS
Tabulated below for Single, Dual and Triple Outputs.

REGULATION
Two types available —
"A" ±0.1% line and load (NL-FL) with ±0.1% ripple p-p.
"B" ±0.005% line and load (NL-FL) with ±0.01% ripple p-p.

TEMPERATURE
−20°C to +50°C ambient or +80°C case. Higher ambients require forced air cooling or reduced output current.

PROTECTIONS
1. **Overload** and shorted output will not damage unit. Self restarting.
2. **Overvoltage** of crowbar type on all outputs. Remove power to reset.
3. **Overtemperature** turn-off, self restarting.

Output Voltage	Current		Regulation On All Outputs	CEA Part Number	Price $

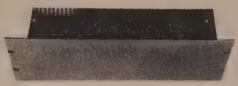
C1, C2 and C3 SERIES

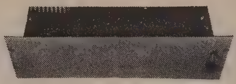
CHOOSE THE MOUNTING APPLICATION MOST SUITABLE FOR YOUR NEEDS

RACK PANEL MOUNTS



PANEL MOUNT #1
$25.00

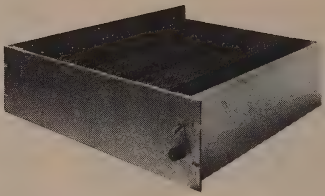
- PAINTED ⅛″ ALUMINUM PANEL 5¼″ HIGH
- ON THE C1, C2 OR C3 OF YOUR CHOICE



PANEL MOUNT #2
$40.00

- SIMILAR TO PANEL #1 WITH INPUT FUSE and ON-OFF SWITCH
- ON THE C1, C2 OR C3 OF YOUR CHOICE

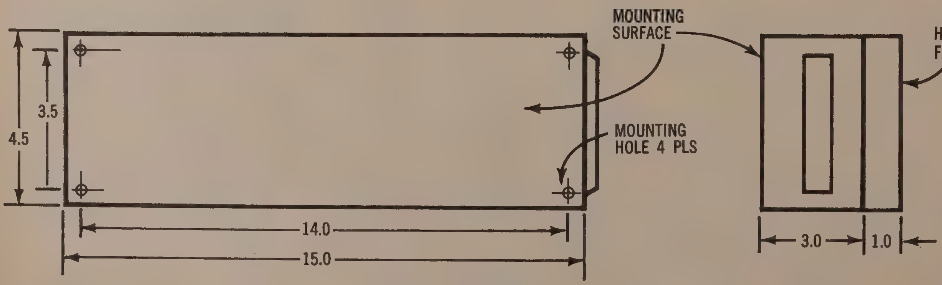
BUILD A RACK SYSTEM



RACK ASSEMBLY
$75.00

- OPTIONAL RACK SYSTEMS FOR ANY FOUR POWER SUPPLIES FROM THE C1, C2 OR C3 SERIES
- METERS, SWITCHES, INDICATORS AVAILABLE UPON REQUEST

MECHANICAL DATA



- 8-32 x ⅜″ Mounting Inserts
- Typical Connections: Terminal Strip Standard, Other Connectors Available Upon Request

CALEX

CALEX MFG. CO., INC.
3305 Vincent Road
Pleasant Hill, CA 94523
Telephone (415) 932-3911

dc power supplies

Calex manufactures modular DC power supplies and mounting kits specifically designed for use in instrumentation and control circuits. You'll find voltages of 5V to ±15V and currents of up to 1 Amp. One unit, the Model 23-100, can be externally programmed to any voltage between +4V to +16V. For data conversion circuits, the triple supply is recommended . . . it has outputs of ±15V at ±100mA *and* +5V at 500mA.

All units feature output short-circuit protection and conservative ratings. The transformers are all vacuum impregnated to ensure reliable operation over many years. Voltage accuracy, regulation, and stability are excellent. And at Calex, quantities of 1-9 are *always* in shelf stock . . . you'll never have to wait!

mounting kits

Calex provides two types of mounting kits . . .

- Connector and PC card combination for vertical plug-in installation or use in racks. Just plug in the supply.
- Barrier strip and PC card combination for mounting on a chassis or other surface. Connections to the supply are made by screwdriver to a barrier strip.

NEW!

SYNAMP® solid state AC power sources synthesized sine wave

single phase 50-60-400 Hz

ST series 250VA to 6000VA

OUTPUT VOLTAGE: Adjustable 105-130V

- High Efficiency 75% Typical
- Rack Mount Construction
- Versatility — may be used as a Frequency Converter or Precision AC Power Source
- Output Voltage Range: 105-130VAC
- Output Frequency Range: 45-460 Hz at Full Rated Output
- Modular Power Transistor Assemblies

MODEL ST2000

MODEL	OUTPUT POWER VA	INPUT	DIMENSIONS H x W x D	SHIPPING WEIGHT
ST250	250	115/230 1ϕ 47-63 Hz	5 x 19 x 20	35 lbs.
ST500	500	115/230 1ϕ 47-63 Hz	7 x 19 x 20.5	40 lbs.
ST1000	1000	115/230 1ϕ 47-63 Hz	7 x 19 x 21.5	50 lbs.
ST2000	2000	208/230 3ϕ 47-63 Hz	7 x 19 x 21.5	70 lbs.
ST4000	4000	208/230 3ϕ 47-63 Hz	21 x 19 x 21.5	150 lbs.

Specifications

OUTPUT CONFIGURATION: Single phase, two wire, isolated

INPUT CONFIGURATION: Single phase, 2 wire for Models ST250, ST500 and ST1000; Three phase, 3 wire for Models ST2000 and ST4000

OUTPUT VOLTAGE: 105-130V, internally adjustable optional panel mounted potentiometer control available

LOAD POWER FACTOR: .7 lead or lag at rated output

VOLTAGE REGULATION: Line ±1%; Load ±1%

FREQUENCY STABILITY: .25% standard, optional to .001%

EFFICIENCY: 75% typical

HARMONIC DISTORTION: Max 3% at full load. Lower available on special order

AMBIENT TEMPERATURE: −20° to +55°C

TEMPERATURE STABILITY: Voltage 0.01%/degree C typical — Frequency 0.05%/degree C typical

CONTROLS AND METERS: All models include front panel voltmeter and ammeter. Variable frequency models have front panel frequency control

PROTECTION: Input line circuit breaker. Output breaker optional at extra cost

Ordering Information

To specify give model number and option code number as shown below. For example: 500VA single phase 45-66 Hz, Model ST500-01.

Frequency	Code	Mode
45-66 Hz	-01	variable
320-460 Hz	-02	variable
45-66 Hz and 320-460 Hz	-03	2 range variable
50 Hz	-50	fixed
60 Hz	-60	fixed
400 Hz	-41	fixed

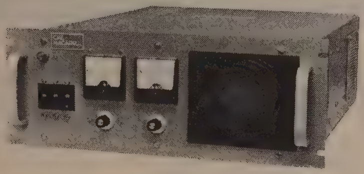
NEW! SYNAMP® solid state AC power sources synthesized sine wave

three phase 50-60-400 Hz

TT series 750VA to 12000VA

OUTPUT VOLTAGE: Adjustable 105-130V

- High Efficiency 75% Typical
- Rack Mount Construction
- Versatility — may be used as a Frequency Converter or Precision AC Power Source
- Output Voltage Range: 105-130V, 185-225V
- Output Frequency Range: 45-460 Hz at Full Rated Output
- Plug-in Power Transistor Assemblies



MODEL TT1500

MODEL	OUTPUT POWER VA	INPUT	DIMENSIONS H x W x D	SHIPPING WEIGHT
TT750	750	115/230 1ϕ 47-63 Hz	8¾ x 19 x 20	60 lbs.
TT1500	1500	208/230 3ϕ 47-63 Hz	8¾ x 10 x 20	70 lbs.
TT3000	3000	208/230 3ϕ 47-63 Hz	14 x 19 x 20	150 lbs.
TT6000	6000	208/230 3ϕ 47-63 Hz	17 x 19 x 20	225 lbs.
TT12000	12000	208/230 3ϕ 47-63 Hz	32 x 19 x 20	340 lbs.

Single Phase and Two Phase Output

Standard 3 phase power supplies may be used to provide a 2 phase output at ⅔ of rated power. An internal selector switch internally provided either 90 degrees or 120 degrees phase separation for 2 or 3 phases respectively.

Standard 3 phase power supplies may be used to provide a 1 phase output of 57% of rated power over an adjustable range of 105-130 volts.

Specifications

OUTPUT CONFIGURATION: Three phase, four wire, WYE-neutral floating, or Delta

INPUT CONFIGURATION: Single phase, 2 wire for Model TT750. Three phase, 3 wire for Models TT1500 and up

OUTPUT VOLTAGE: 105-130 Volts line to line and 185-225 Volts line to line; both sets of terminals are presented at output. Full power available at output of 105-130 Volts and 185-225 Volts. Internally adjustable. Panel mounted control available.

PHASE DISPLACEMENT: 3°

LOAD POWER FACTOR: .7 lead or lag at rated output

EFFICIENCY: 75% typical

VOLTAGE REGULATION: Line ±1%; Load ±1%

FREQUENCY STABILITY: .25% standard, optional to .001%

HARMONIC DISTORTION: Max 3% at full load. Lower available on special order

AMBIENT TEMPERATURE: −20° to +55°C

TEMPERATURE STABILITY: Voltage 0.01%/degree C typical — Frequency 0.05%/degree C typical

CONTROLS AND METERS: All models include front panel voltmeter and ammeter. Variable frequency models have front panel frequency control

PROTECTION: Input line circuit breaker. Output breaker optional at extra cost

Ordering Information

To specify, give model number and option code number as shown below. For example, 1500VA three phase 45-66 Hz, Model TT1500-01.

Frequency	Code	Mode

- Fixed or Adjustable Output Frequencies between 45 & 6000 Hz
- Each model can be operated either as a precision AC Power Supply or as Regulated Audio Power Amplifier
- Minimum package sizes . . . 2000 VA in 22¾″ rack height, 750 VA in 8¾″ rack height
- Instantaneous Overload Protection
- Interchangeable Plug-in Oscillators Frequency Stabilities to 0.001%
- Constant Voltage Output, 0.5% regulation—response time less than 50 microseconds
- Low Distortion Sinewave Output, less than 1% 300 to 1000 Hz, less than 3% 45 to 6000 Hz
- Full Rated Output into Load Power Factors of 0.7 Lead or Lag to Unity

programmable plug-in oscillators 14 & 34

FOR USE WITH NA AND TA SERIES

- Programmable voltage and/or frequency
- Output frequency range 350 to 440 Hz in 1 Hz steps
- Analog programmable by external voltage or resistance range
  Voltage: 0 to 10 Volts DC
  Resistance: 0 to 2.0 Megohms
- Digitally programmable by externally supplied BCD signals compatible with TTL, DTL and Relay Logic
- Can be used with all standard Mini-computers
- Total Harmonic Distortion less than 0.25%
- Frequency stability: 0.1%
- Single phase for use with NA and NS series. Voltage output 100 to 130V in one volt steps — other voltages available on request
- Three phase for use with TA series. Voltage output 100 to 130 line to line or line to neutral in one volt steps

Single Phase & Two Phase Output

Standard 3 phase amplifiers may be used to provide a 2 phase output at ⅔ of rated output power. Special plug-in oscillators are available with selectable 90° or 120° phase separation for 2 phases or 3 phase operation respectively.

Standard 3 phase amplifiers may be used to provide a single phase output at 57% of rated output power over an adjustable voltage range of 110-125 volts.

Write or Call for Complete Specifications

Specifications

OUTPUT CONFIGURATION: Three Phase, 4 wire wye, neutral floating.

OUTPUT VOLTAGE: 0-125 Volts line-to-line and 0-217 Volts line-to-line; both sets of terminals are presented at output. Full power available at output of 110-125 volts and 190-217 volts. Master gain control and phase 2 and 3 trim controls provided on front panel.

OUTPUT POWER: Rated output power for each model is shown in chart. Maximum power per phase is ⅓ of 3φ output.

LOAD POWER FACTOR: 0.7 lead or lag to unity at rated output; wider power factor range with slight derating.

FREQUENCY RANGE: Each amplifier model is rated at full power 45-6,000 Hz except for the models T15000A and T20000A which have a 300-500 Hz full power range. The operating output frequency range is determined by the particular plug-in oscillator which is used.

HARMONIC DISTORTION: Less than 3% over the entire 45-6,000 Hz amplifier range; less than 1%, 300-1000 Hz.

HUM AND NOISE: 60 db below maximum output voltage.

OUTPUT PHASE SEPARATION: 120 ±1° for fixed frequency models as well as 350-450 Hz models. 120 ±2° for 45-70 and 300-2,000 Hz models. 120 ±3° for 45-6,000 Hz models.

CONSTRUCTION: Models rated 300VA to 2500VA are standard 19" rack mount units with full dust covers. Bench adapters available as accessories for these models; specify suffix (—C). Side support is recommended for rack mount models. Slides are available as optional accessories; specify suffix (—S). 5KVA-20KVA models are furnished complete in cabinet enclosure. 5KVA model includes casters.

* Model A1K and A2K are standard 19″ rack mount units; bench adapters available on special order. All other models are furnished complete in cabinet enclosures. Models A3K, S5K and B5K include casters. Models S2K and S5K are designed to go through a 25″ standard submarine hatch.

Specifications

FREQUENCY RESPONSE: ±0.5 db, 100-10,000 Hz; Model A3K ±0.5 db, 200-15,000 Hz. Other frequency ranges between 5 Hz and 100 KHz available on a custom basis.

HARMONIC DISTORTION: Less than 3% over rated frequency range; less than 1.5% midband.

HUM & NOISE: At least 60 db below rated tap voltage.

- Full power into reactive loads
- Low distortion
- ±0.5 db frequency response
- Ideal for CW and PULSED duty.
- Selectable output taps for matching wide range of load impedances
- Rugged construction for marine or airborne installations
- Applications: Sonar Testing; Vibration Testing; Industrial Process Control; High Intensity Acoustic Systems

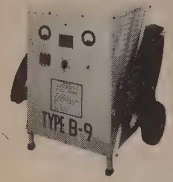
MODELS 28-UP MOBILE POWER SUPPLIES FOR AIRCRAFT STARTING



- Mobile — extremely rugged and reliable.
- Good load regulation, low ripple. Meets RF interference requirements of Mil-I-26600.
- All units feature heavy intermittent load capability.
- Easily maneuvered . . . large units have pneumatic tires.
- Weatherproof construction for outdoor duty.

CML MACARR, INC.

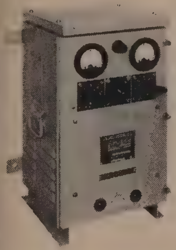
battery charging equipment
standard - custom - commercial - military

MODEL 40-30 BCN MULTIPLE PURPOSE BATTERY CHARGER

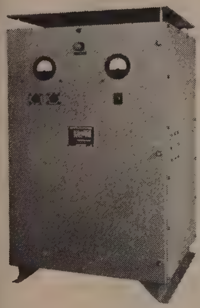
- Charges 6, 8, 12, 24 or 36 volt, 15 to 300 AH batteries, @ 2, 8, 15 or 30 Amp.
- Fully voltage-regulated, current limited. Suitable for lead-acid and nickel-cadmium batteries.
- Meets applicable U.S. Navy and U.S Army Mil Specs.



MODEL 40-30 BCN is an extremely flexible and reliable constant potential battery charger which meets the requirements of Mil-B-24095 (Naval Shipboard). It can charge a wide variety of batteries up to 36 volts nominal (18 cells) and 300 ampere hours. The charger is a fully regulated, current limited stable source for float charging, utilizing SCR's with magnetic gating. A fully discharged battery can be safely recharged with this model. As an example of efficiency, a 130 AH battery can be recharged in 7 hours.

MODEL 30 NICKEL CADMIUM AIRCRAFT BATTERY CHARGER

- Designed specifically for 24 volt Nickel Cadmium Aircraft Batteries.
- Ideally suited for charging helicopter batteries . . . reduces battery maintenance.
- Most efficient charge method — constant current charge with topping mode. Charges battery to absolutely full capacity.
- Compact and lightweight . . . can be carried on the aircraft.
- Three selectable charge modes.
- Ideally suited for charging helicopter batteries.



The Model 30 Battery Chargers cover charge current ratings from 6 to 30 amps for use on nickel cadmium aircraft batteries presently in common use. The chargers are uniquely suited to efficiently charge 24 volt aircraft batteries rated at up to 60 ampere hours. The charger also features a constant current charge mode without topping as well as a float charge mode, to maintain battery at full charge during long periods of storage. The three charge-modes are selectable by means of front panel selector switch.

MODEL 45-140BC FORK LIFT TRUCK BATTERY CHARGER

- Fast recharging. Will recharge 720 AH battery in less than 8 hours — smaller batteries in less time.
- Charges both lead-acid and nickel-iron batteries.
- Fully voltage regulated — current limited.

MODEL 45-140 BC is suitable for recharge of electric fork lift truck batteries of the sizes listed in specification W-C-260b. The unit is extremely rugged and reliable by virtue of its fully magnetic power circuitry (saturable reactors) and the solid state (controlled rectifier) regulating control. Recharge of fork lift truck batteries is extremely tough duty and the application of saturable reactors for control of the charge is ideal to its inherent current limiting characteristic and ability to withstand heavy loads.

The magnetically gated controlled rectifiers provide the regulation performance necessary to insure full recharge within the alloted time.

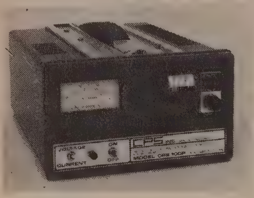
HIGH VOLTAGE SYSTEM AND BENCH SUPPLIES TO 50 KV DC

GENERAL SPECIFICATIONS

OUTPUT—Fixed with ±5% vernier or programmable over any range between 0 and full output by series RPA or alternatively a 0 to 10 V voltage (applicable to series 100 system supplies and series 1000 and 5000).
INPUT—105-125 volts; or 210-230 47-63 Hz (440 Hz most models).

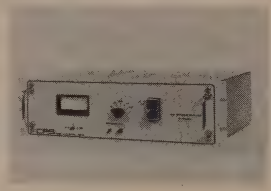
OUTPUT PROTECTION—Completely short-circuit proof. Self restoring after short removal.
TEMPERATURE RANGE—Operating 0°-50°C.



MODEL 100PA 30KV LAB SUPPLY

SPECIFICATIONS

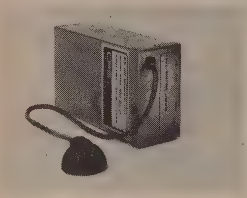
Output: 0 to 30KV @ 1.0 ma (2.0 ma versions available); Line/Load regulation: 0.001%; Ripple: 0.2V peak to peak.



MODEL 101PA UP TO 50 KV LAB SUPPLY

SPECIFICATIONS

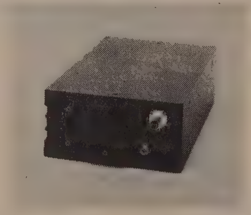
Output: 0-50kV @ 1mA (optional 2mA output available); Line/Load regulation: 0.001%; Ripple: 0.5V peak to peak.



MODEL 4008 POWER SUPPLY FOR GENERAL-PURPOSE CRT APPLICATIONS

SPECIFICATION

Anode: 15 KV @ 0.2ma; load regulation: 0.05%; line regulation: 0.1%. G-1 and G-2 outputs also available.



MODEL 5001 VERSATILE, PRECISION HIGH VOLTAGE POWER SUPPLY

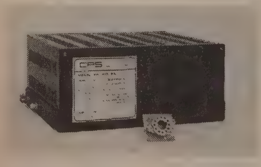
SPECIFICATION

Output: 5 models available: 2, 3, 5, 10, 20KV; with load/line regulation of 0.01%. Excellent dynamic transient response.

MODEL 5003N PHOTOMULTIPLIER TUBE POWER SUPPLY

SPECIFICATION

Output: 0 to −2KV @ 5.0ma; load regulation: 0.01%; ripple: 5mv peak to peak.



MODEL 1410 PRECISION FIBER-OPTIC CRT POWER SUPPLY

SPECIFICATIONS

Cathode: −15KV @ 250μa; load regulation: 0.01%; ripple: 0.01% peak to peak.
Filament: 6.3 vdc @ 0.6a
G-2: 1kv @ 5mA
G-1: −50 to −180 vdc @ 10μa

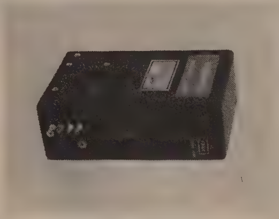
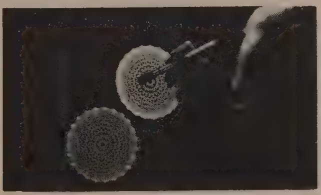
MODEL 1591 ANALYTICAL X-RAY DEVICE POWER SUPPLY



SPECIFICATIONS

Output: 10KV to 30KV adj. @ 300μa; line regulation: 0.005%; load regulation: 0.05% for 50% load variation; ripple: 0.05% peak to peak.

FOUR-COLOR CRT MONITOR CPS-8001



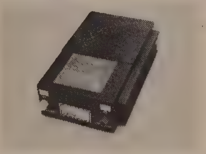
FEATURES

Four colors:	Red, orange, yellow & green
High resolution:	.015" to .025" depending on intensity
High light output:	28 foot lamberts (worst case)
High speed:	1.5μsec per inch, 18μsec color change
High contrast faceplate:	HEA coated
Low power dissipation:	High voltage switches are 90% efficient
High reliability:	All solid state
CRT size:	21" diagonal

HIGH VOLTAGE DIVIDER PROBE HVP-250

Input:	Up to 50 KV DC
Ratio:	1000:1 50 KV IN = 50 V OUT
Input:	250 MΩ
Output:	250 K
Ratio accuracy:	0.01% up to 30 KV, 20-30°C
Temperature coefficient:	10 PPM/°C
Length:	12 inches
Price:	$435

MODEL SP-1592 A COMPLETE ELECTROSTATIC FOCUS CRT SUPPLY SYSTEM



SPECIFICATIONS

Anode:	15kV @ 200 μA; load plus load regulation: 0.05%; ripple: 0.02% peak to peak.
Static Focus:	2.2 to 2.6kV adjustable at 500 μA
Dynamic Focus:	30V to 330V with respect to static focus. Slew rate is 30 volts/μsec.
G-2:	+300V @ 100μA

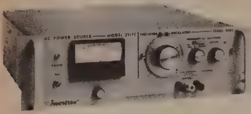
In addition to models shown, CPS offers a wide selection of other commercial and military designs. However demanding your requirements, CPS welcomes the opportunity to offer technical and pricing information for custom or off-the-shelf designs. Sales offices are located in major cities throughout the world.

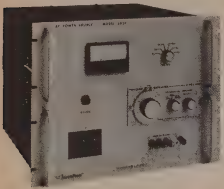
Recognized as the leader, CPS offers only designs which reflect the latest advancements made in circuit and packaging techniques.

Uncompromising insistence on the highest standards of workmanship and service assure you a long, trouble-free, life time of reliable operation.

CPS multicolored beam-penetration CRT Monitors add a new dimension to high resolution CRT graphics, data, and radar Display Monitors. Specification sheets provide detailed data on the Model 8001 four-color, the Model 8006 dual-persistance, and the Model 8007 black/white film-recording monitor units.

CALIFORNIA INSTRUMENTS AC POWER SOURCES



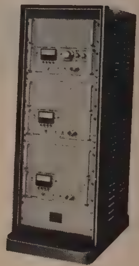


SOLID STATE *Invertron*®

THE MOST RESPECTED NAME IN AC POWER
ALL-SILICON SOLID-STATE POWER SOURCES

FEATURING 14 MODELS WITH 48 POWER LEVELS

- 100 VA TO 6000 VA SINGLE-PHASE OUTPUT
- 100 VA 2ϕ TO 18,000 VA 3ϕ OUTPUT
- FREQUENCY RESPONSES FROM 45Hz TO 20KHz
- SINE-WAVE WITH LOW HARMONIC DISTORTION
- EXCELLENT LINE AND LOAD REGULATION TO .01%
- SWITCHABLE OUTPUT VOLTAGE RANGES FOR FULL POWER AT LOWER VOLTAGES
- BROAD CHOICE OF INTERCHANGEABLE PLUG-IN OSCILLATORS
- OVERLOAD AND SHORT-CIRCUIT PROTECTION
- OPTIONAL INPUT VOLTAGES: 117 V 1ϕ TO 460 V 3ϕ



Invertrons® have earned world-wide respect through their versatility, reliability, and outstanding performance. In addition to low distortion, high input stability and high power density, these silicon solid-state AC power sources use plug-in oscillators as frequency-determining elements and can be stacked electrically to provide one-, two-, or three-phase power. All Invertrons® fit a standard 19" rack, or may be ordered with the appropriate cabinet for floor or bench use.

REMOTE-PROGRAMMABLE INVERTRONS®

Solid state Invertrons® combined with 830T-Series Programmable Oscillators provide the most advanced programmable AC power sources available on the market today. 830T-Series Programmable Oscillators feature simultaneous and independent programming of frequency, phase, and amplitude compatible with remote controllers such as a computer, punched tape, cards, etc. Models are available in single, two or three phase.

OSCILLATORS AC LINE CORRECTORS

800T-SERIES PLUG-IN OSCILLATORS

Companion Plug-in Oscillators are available in three types: (A) General-purpose, fixed-frequency; (B) Crystal-controlled, high-stability fixed-frequency; and (C) Continuously variable frequencies. All may be used with the Solid-State Invertrons® to create 1φ, 2φ, or 3φ custom AC power sources tailored to exact requirements. The fixed-frequency oscillators may be ordered with a servo-feedback option for systems requiring extremely high amplitude stabilities and accuracies. This feature provides overall regulation of up to 0.01% against line and load changes.

800T VARIABLE-FREQUENCY MODELS

Freq. Range	Freq. Accy. @ 25°C	Model Number
20Hz to 20KHz in three bands Sine or Square Wave	±1.0%	(1φ) 800T-20/20K-1-1 (2φ) 800T-20/20K-1-2 (3φ) 800T-20/20K-1-3 (3φ) 800T-20/20K-1-3D
45Hz to 75Hz in one band Sine or Square Wave	±0.25%	(1φ) 800T-45/75-.25-1 (2φ) 800T-45/75-.25-2 (3φ) 800T-45/75-.25-3 (3φ) 800T-45/75-.25-3D
300Hz to 500Hz in one band Sine or Square Wave	±0.25%	(1φ) 800T-300/500-.25-1 (2φ) 800T-300/500-.25-2 (3φ) 800T-300/500-.25-3 (3φ) 800T-300/500-.25-3D

810T FIXED-FREQUENCY GENERAL-PURPOSE MODELS

Any Single Freq. 45Hz to 10KHz Sine or Square Wave	±0.1%	(1φ) 810T-Freq.-1.1 (2φ) 810T-Freq.-.1-2 (3φ) 810T-Freq.-.1-3 (3φ) 810T-Freq.-.1-3D
Any Single Freq. 45Hz to 10KHz Sine or Square Wave	±0.1%	(1φ only) System-Servo oscillator with servo feedback set to maintain power source output at 115 VAC. Provides 0.01% line and load regulation from power source.
Any Single Freq. 45Hz to 10KHz Sine or Square Wave	±0.1%	(1φ only) System-Servo oscillator with servo feedback adjustable to produce power source output of 105 to 135 VAC. Provides 0.01% line and load regulation from power source.

820T FIXED-FREQUENCY CRYSTAL-CONTROLLED MODELS

400Hz Sine or Square Wave	±0.01%	(1φ) 820T-400-.01-1 (2φ) 820T-400-.01-2 (3φ) 820T-400-.0001-3

This line of compact low cost DC to DC converters offers a wide choice of input and output voltages for powering data conversion modules, linear and digital IC's, and other circuits from local DC bus lines. They feature efficient power conversion with excellent regulation, isolation, and temperature coefficient. Internal shielding is used around the converters and the output voltage has low noise and ripple. These converters are packaged in compact, low profile cases and weigh only 3 ounces. The table below lists in compact form the 18 dual output models and 17 single output models.

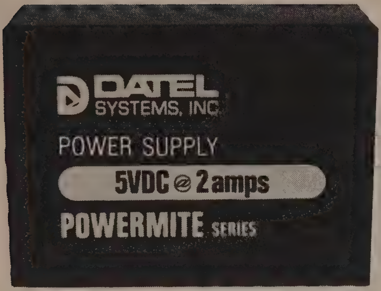
LINE OPERATED SINGLE/DUAL DC MODULAR SUPPLIES



This broad line of compact single and dual output power modules is the ideal solution for powering A/D and D/A converter modules, op amps, digital and linear IC's and other related components. These supplies are rugged, epoxy encapsulated with output current limiting, and feature excellent line and load regulation, low temperature coefficient, and high isolation. They are extremely useful for localized power distribution in systems.

GENERAL SPECIFICATIONS FOR ALL SUPPLIES:

Input Voltage .... 115VAC ±10V
Line Frequency .... 50 Hz-440 Hz
Isolation .... 25-50 Megohms
Output Voltage Accuracy .... ±1%
Output Ripple Voltage .... 1mV RMS
Operating Temperature Range .... 0°C to 70°C
Optional Inputs .... 220VAC ±20V @ 47-440 Hz (Add Suffix "E")
100VAC ±10V @ 47-440 Hz (Add Suffix "J")

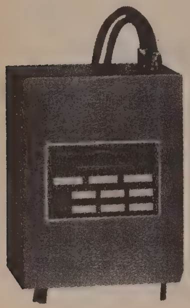
HIGH VOLTAGE EQUIPMENT

UNREGULATED SERIES "S"

These power supplies are designed for operation from either a 0-115 volt or 0-125 volt line at 60/400 cycles. Three input terminals are provided to permit proper line connection. The output is available from shielded polyethylene cables and may be varied over the full range by varying the input AC line. The two output cables are insulated for the full output voltage, so that either the positive or negative terminal may be grounded. All units have selenium rectifiers and are hermetically sealed in an epoxy, vacuum filled, metal case.

Units for 50 cycle operation at various line voltages are available on request.



FEATURES

- Solid State Rectifiers
- Low Ripple
- Reversible Polarity†
- Shielded Output Cables
- Hermetically Sealed Can
- Epoxy Vacuum Filled

†Model 40-2-4 is designed with one output cable for single polarity operation. When ordering, please specify polarity.

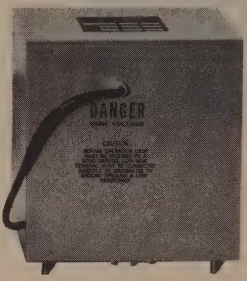
HIGHLY REGULATED ADJUSTABLE SERIES "HRM"

The HRM series of regulated power supplies are compact transistorized modules. An exceptionally high degree of regulation, low ripple and fast response without the use of vacuum tubes. All transistors are high quality silicon. These supplies are rugged and feature excellent line, load and thermal stability. Output voltage adjustment from remote control. Electronic overload protection up to and including a short circuit with immediate voltage recovery upon removal of the short. No output voltage overshoot on turn on, turn off, or power removal.



FEATURES

- Short-circuit proof (no fuses)
- All silicon transistors
- Fast response
- No warmup time required
- No voltage overshoot on turn-on or turn-off
- Adjustable output
- Remote programming
- Excellent thermal stability
- Low RFI — no choppers or high frequency oscillators
- Sealed construction
- Epoxy filled under vacuum
- Single shielded output cable
- Available for either output polarity
- Small size, light weight, compact
- Low stored energy
- Automatic resetting thermal cutout
- Meet environmental conditions and performance requirements of military specifications such as MIL-E-16400

SPECIFICATIONS

Input: 115V ± 10% 57-420 Hz single phase to 10 KV.115V ± 10% 60 or 400 Hz single phase 15KV and above

Output: See table

Regulation:

Line: Less than 0.03% for 10% line voltage change

Load: Less than 0.03% for a no-load to full-load change

Ripple: .03% RMS max to 60 Hz input
.01% RMS max at 400 Hz input

Temperature Range: −54°C to +65°C operating

Temperature Coefficient: .02%/°C

HIGH VOLTAGE EQUIPMENT

PMS SERIES
PHOTOMULTIPLIER POWER SUPPLY

The PMS Series is a family of extremely compact, rugged design DC to DC proportional converters for use as power sources for photomultiplier and other tube applications.

FEATURES

- Input reverse polarity protected
- Output isolated from input
- Output proportional to input
- Output momentary short circuit protected
- Extremely compact

Operating Temperature: 0°-60°C

Temperature Coefficient: ±.02% per degrees C, typical

Performance Curves available on request

HARD/HDRD SERIES
CATHODE RAY TUBE POWER SUPPLIES

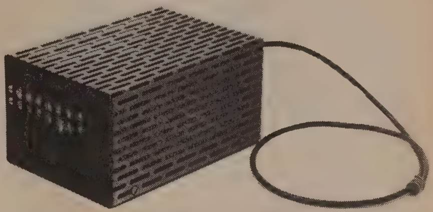
The HARD/HDRD series power supplies provide a well regulated source of high voltage at power levels from 2 to 20 watts. The units feature automatic shutdown after short and low stored energy which makes them highly suitable for use in CRT, PMT applications, as well as any application requiring a precise stable source of high voltage in a compact modular form.

FEATURES

Short Ckt Proof

Flash-Over Protected

Compact Size



SPECIFICATIONS

Input: HARD 115V 50/60 Hz 1ϕ HDRD 28 V DC ±10%

Output: Variable via resistive program from 50% to 100% of rated output (see chart)

Regulation:
Line: ±.005% for ±10% Line
Load: ±.005% for 0 to Full Load

Ripple: .03% RMS at Full Load

Temperature Range: −20°C to +55°C

Temperature Coefficient: ±.02%/°C

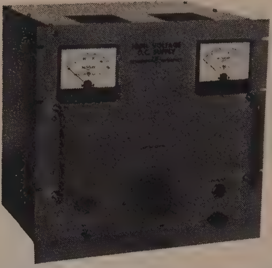
HIGH VOLTAGE EQUIPMENT

RHPT SERIES

RACK-MOUNTING DC POWER SUPPLIES and HI-POT TESTERS ALSO AVAILABLE IN CABINET ENCLOSURES

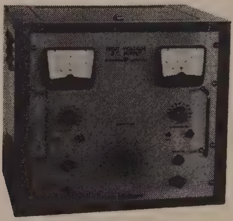
The Del RHPT series of rack mounted Hi Pot Testers are general-purpose power supplies which are fully instrumented, completely enclosed, and fully protected. They provide DC outputs up to 60,000 volts. These units are designed for standard 19-inch racks and have light gray panels. They are recommended for all commercial, industrial, and laboratory uses where reliable DC high-voltage sources are required.

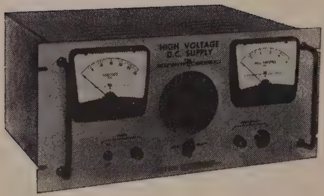
A wide selection of models is offered for all applications. Cabinets to contain these units for bench-top use are available as an option.



FEATURES

- Operate to 50°C
- Semi-conductor rectifiers
- Continuously adjustable output voltage controlled from front panel
- Reversible polarity
- Easily read 4½″ voltage and current meters 2% F.S. accuracy
- SAFETY: Meters are protected against overloads and high-voltage flashovers.
  Zero-start interlock withholds AC input from high-voltage transformer until the HV output control has first been returned to zero.
  Provision for external interlocks
- PROTECTION: Fixed overcurrent and overvoltage trips
  Surge limiting resistor
  Easily accessible HV fuses
  HV indicating light
- Line regulators available





Input: 105-125 volts, 60 Hz, single phase

Output: (See table.) Output is provided on shielded polyethylene cable.

Ripple: See table

Metering: ±2% kilovoltmeter and milliammeter, 4½″

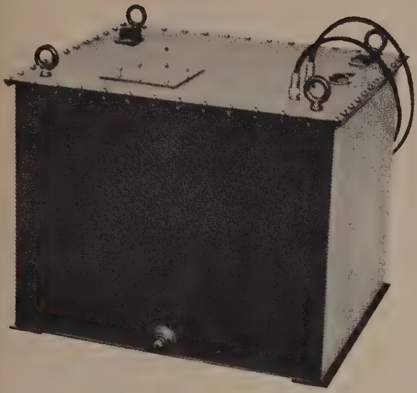
HIGH VOLTAGE EQUIPMENT

SERIES "O" OIL INSULATED



Model No. PSO 120-5-3

The Del Series PSO Oil-Insulated Power Supplies offers one of the most comprehensive lines of basic high-voltage units available to industry and laboratories. These DC supplies are designed to provide long, reliable service in such applications as dielectric testing, capacitor charging, electrostatic precipitation, electron microscopy, image intensification, plasma research, and electron acceleration. PSO series supplies feature reversible polarity on most units; shielded polyethylene output cables; high quality insulating oil in dust-free tanks, and quiet, long-life operation with low corona. Stock units are available for 115V, 208V, 220V, 440V single-phase and three-phase line inputs. Units for other line voltages and frequencies are available on request.

HAC SERIES

AC DIELECTRIC TESTERS

SOME CONVENIENT TESTER FEATURES:

A unique transformer winding arrangement in these testers permits an external capacitance decade box (not furnished) to measure:

- Capacitance
- R in phase × C quadrature components of load current
- Actual load current apart from stray-capacitance currents

HIGH VOLTAGE A.C. SUPPLY

All require 115 V ±10%, 60 Hz, single phase

Max current, all models: 5 ma

All cabinets 9½"W x 11"D x 12"H

Model No.	Output Voltage (rms)
2.5HAC-5-1	0- 2,500
5HAC-5-1	0- 5,000
10HAC-5-1	0-10,000
20HAC-5-1	0-20,000
35HAC-5-1	0-35,000

FEATURES

- Continuously variable output from zero to maximum voltage
- Easy-to-read 2% kilovoltmeter and milliammeter.
- Separate switches for line input and high-voltage output
- Fixed overload relay set for 120% of rated current — Readily accessible fuses
- Gunmetal finish cabinet — Light gray control panel
- Self-grounding line cord

These are fully protected and instrumented portable testers providing rms outputs up to 35 KV. Conservatively designed, they are recommended for all industrial and laboratory uses where reliable high-voltage AC sources are required.

HIGH VOLTAGE EQUIPMENT

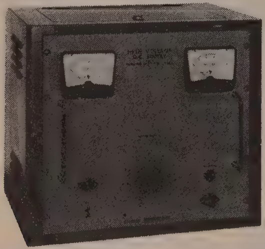
CONTROL PANELS

RM2 and 3RM2 SERIES

CONTROL FEATURES

- Standard 19″ rack-panel mounting design
- Variable autotransformer
- On-off switch
- 4½″ two-percent kilovoltmeter and milliammeter, completely protected
- Line and high-voltage primary fuses
- High-voltage indicating light

RM3 and 3RM3 SERIES



Typical RM3 or 3RM3 in Optional Cabinet

FEATURES

- Electronically controlled voltage and current overload protection accurately settable and resettable over full range from 0 to 120% of rated voltage and current
- Zero-start protection interlock
- Provision for external interlocks
- Reversible Polarity

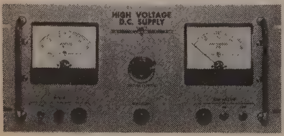
RM4 and 3RM4 SERIES



Typical RM4 or 3RM4 Control Section

CONTROL FEATURES

Each unit has a variable autotransformer driven by servo controlled motor for line and load regulation. ALSO —

- Regulation —
  - ±0.5% for ±10% line change
  - ±0.5% from no load to full load
- Precision 10-turn potentiometer voltage control
- 15 seconds from 0 to rated output (30 or 60 seconds on special request)
- 4½″ two-percent kilovoltmeter and milliammeter, completely protected
- On-off switch
- Line and high-voltage primary fuses
- High-voltage indicating pilot light
- Fixed overcurrent and overvoltage trip, preset for 110% of rated output
- Automatic return to zero on turnoff
- Zero-start interlock
- Zero position indicator
- Provision for external interlock
- Reversable polarity

HIGH VOLTAGE EQUIPMENT

TC SERIES

COMPACT, FULLY PROTECTED and INSTRUMENTED HV DC UNITS

Del TC Series Power Supplies are multi-purpose, compact, fully instrumented and fully protected units providing continuously variable ratings up to 80,000 VDC. They are recommended for industrial and commercial applications such as laboratory use, dielectric testing, electrostatic painting, electrostatic flocking, and similar service where a rugged, dependable DC high-voltage source is required.

Selenium rectifiers are used throughout to provide long life and instantaneous operation. No filament warmup time is required.

All high-voltage components are immersed in high grade insulating oil, assuring **long** trouble-free **life.**

As shown in the photograph, the high-voltage section is integral with the controls, which are mounted on a sloping-front instrument panel.

Model No. 60 TC-5-1 with castered cradle

FEATURES

- Reversible output polarity
- Selenium-rectifier circuits provide long life and instantaneous operation — No filament warmup time
- All high-voltage components are immersed in high-grade insulating oil — Assures trouble-free life
- Easy-to-read 2% kilovoltmeter and milliammeter
- SAFETY:

1. Meters are protected against overloads and high-voltage flashovers.
2. Zero-start interlock withholds AC input from high-voltage transformer unless high-voltage output control has been returned to zero.
3. Automatic shorting solenoid discharges the energy stored in the output capacitor immediately on shutdown.

- Self-grounding line cord — Shielded polyethylene coaxial output cable
- Sloping-front instrument panel

SPECIFICATIONS

Input: 105-125 volts, 50/60 Hz, single phase

Output voltage: Continuously variable from zero to rated maximum DC output voltage (see table.)

Output current: See table

Ripple: See table

Meters: ±2% full scale kilovoltmeter and milliammeter provided

Circuit protection: Fixed overload relay set for 120% of rated current
Load current suger-limiting resistor
Readily accessible fuses

HRPS SERIES

HIGHLY-REGULATED — POWER SUPPLIES

Del HRPS Series High Voltage Power Supplies are highly regulated adjustable units providing a reliable 1 KW source of power with units available having maximum output ranges covering voltages from 1 to 50 KVDC. The units hybrid regulated design allows for fast dynamic response. The units are suited for use in vacuum electronic applications. They are designed with full function color coded controls for simplified operation. The units are supplied in smartly appointed cabinets.

FEATURES

- Highly regulated for line and load
- Adjustable output 5%-100%
- High resolution of 10 turn voltage control
- 3 range meters
- Positive polarity (negative available on special request)
- Fast dynamic response
- Hybrid series regulator
- Designed to withstand vacuum sparkovers
- Automatic overload tripout
- Short circuit protection

SPECIFICATIONS

Input: 115 or 230 volts 50/60 Hz

Output: Adjustable 5 to 100% (See chart below)

Ripple: .01% RMS — at full load

Regulation:
Line : ±.0025% (For ±10% line change)
Load: ±.005% (0 to full load)

Response Time: 100usec

Resolution: .1%

Size: 1-15 KV units — 24 x 29 x 53″
30-50 K units — 24 x 29 x 70″

Model No.	Output Voltage	Output Current	Insulation
HRPS1-1000	50 V- 1000 V	1000 MA	AIR
HRPS2.5-400	125 V- 2500 V	400 MA	AIR
HRPS5-200	250 V- 5000 V	200 MA	AIR
HRPS10-100	500 V-10,000 V	100 MA	AIR
HRPS15-66	750 V-15,000 V	66 MA	AIR
HRPS30-33	1500 V-30,000 V	33 MA	OIL
HRPS50-20	2500 V-50,000 V	20 MA	OIL
HRPS60-30	Also Available 30,000-60,000 V Check factory for specifications	30 MA	OIL

TRANSFORMERS

LINE ISOLATION

Standard types available for 120 V and 240 V input lines in 1:1, 1:2, and 2:1 voltage ratios. Other input and output voltages available on request.

Recommended for industrial, research, and developmental uses.

FEATURES

- Complete varnish impregnation under vacuum
- Epoxy anchoring
- Immersed in high grade insulating oil
- Electrostatic shield between primary and secondary windings
- "AN" type connector provided for input connections
- Good regulation

VDU-UNCASED TRANSFORMER FOR VOLTAGE DOUBLER OR ONE END GROUND OPERATION

Primary: 115 V — 50/60Hz

The VDU 2.5 and VDU 5 Transformers, (as well as the EGU 2.5 and EGU 5 units), are designed for air insulation. All other transformers of this series are designed for oil operation and, therefore, must be immersed in oil by the customer prior to placing in operation.

However, the VDU 7.5 (EGU 7.5) up to VDU 30 (EGU 30) transformers can be furnished with epoxy coating for use in air at slight additional charge.

All VDU (Voltage Doubler Uncased) and EGU (End Ground Uncased) units oil immersed are available in sturdy tanks including poreclain insulators.

Type	Sec. Peak Volts	Max. Sec. Current (MA rms)	Size	Insulation Required

HIGH VOLTAGE METER MULTIPLIERS

In each model listed:

- All resistors are immersed in high-grade insulating oil
- Case is hermetically sealed and grounded
- Multiplier is designed for use with a 100 μa full-scale meter
- Neon lamp is provided across the meter terminals to assure safe operation

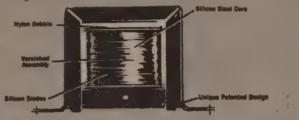
WALL PLUG-IN LOW VOLTAGE

CONVERTERS/INVERTERS/CHARGERS

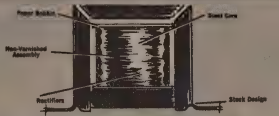
To insure high quality and top performance in our plug-in power supplies and chargers, we make our own low voltage

TRANSFORMERS

using superior materials in a smaller sized unit. The years of successfully satisfying the unique needs of the industry with specialty transformers is "at your service".



WHY IS THIS LOW COST DYNAMIC TRANSFORMER BETTER THAN THIS



STOCK TRANSFORMER COSTING MORE.

In addition to those advantages already pointed out, DYNAMIC TRANSFORMERS can be made to your SPECIFICATIONS in days and in most cases with NO COST for prototypes.

TRANSFORMERS FOR ALL REASONS

- ☐ Patented, U/L listed
- ☐ Internal or External
- ☐ Wall-mounted
- ☐ Fast-charging
- ☐ Power conversion
- ☐ Conversion/charging
- ☐ Printed circuit
- ☐ Sub-miniature
- ☐ Ferro-resonant
- ☐ Multi-input
- ☐ Multi-output

THE TRANSFORMATION OF POWER

A unique brochure explaining the many advantages and application possibilities of Dynamic's patented U/L listed transformers, converters, chargers and power supplies, technical data sheets and bulletins, are available on specific products. A request on your letterhead or phone our Sales Engineering Department WPX-1.

Designed to be listed under the U/L • CSA SPECIFICATIONS

Illustrated at right is the Model 3-1743 presently in production for use with a keyboard logic circuit. Suitable for minicomputers, calculators, remote CRT terminals, etc.

Dynamic Instrument Corp. has designed, developed and patented a complete range of low-voltage, filtered, transistor-regulated power supplies and chargers designed to supply the necessary power to a vast variety of Electronic equipment.

Utilizing a wall plug-in type unit eliminates or greatly reduces the problems involved with UL listing your product. They also remove the major heat source, reduce size and weight, and also greatly increase your design flexibility. The latest design applications of the Dynamic wall plug-in supplies are in conjunction with such sophisticated equipment as mini-computers, calculators, keyboard logic circuits, and remote CRT Terminals.

Just call or write: Dept. WPX-1.

Dynamic's product range and capabilities also cover:

POWER CONVERSION
AC-AC for products requiring low-level AC voltage. AC-DC for small electric motor driven products that do not use batteries.

SECONDARY BATTERY CHARGING
Dynamic Chargers for charging Nickel-Cadmium; Lead-Acid and Manganese-Alkaline Batteries.

AC-DC CONVERSION/CHARGING
Dynamic Converter-Chargers providing rechargeability or instant use of battery operated products.

FAST CHARGING SYSTEMS
Dynamic design and production capability relative to Fast Charging Systems.

TRANSFORMERS
Internal, External and Wall-Mounted Dynamic Transformers.

SPECIALTY TRANSFORMERS
Dynamic Plug-In, Printed Circuit Transformers; Sub-Miniature Transformers; Ferro-resonant Transformers; Multi-Input Voltage and Multi-Output Voltage Transformers.

CONVERTER/CHARGER FOR PORTABLE MEDICAL-ELECTRONIC EQUIPMENT

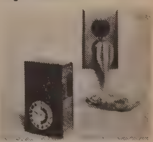
CHARGER FOR BATTERY ELECTRIC-STARTER SYSTEMS

CHARGER FOR BATTERY OPERATED TOYS

CONVERTER/"FAST" CHARGER FOR MINI-CALCULATORS

CONVERTER/CHARGER FOR MOTER DRIVEN CAMERAS

AC CONVERTER FOR PORTABLE ELECTRONIC EQUIPMENT



"FAST" CHARGER FOR ELECTRONIC FLASH

DYNAGE OPEN FRAME POWER SUPPLIES

WHERE QUALITY IS NOT EXPENSIVE

Dynage single, dual, triple output M Series Power Supplies featuring:

- Integrated circuit control
- High power per dollar ratio
- High MTBF. Few components
- Construction:
  Anodized aluminum chassis
  Glass-Epoxy FR-4 PC boards
  Computer — grade electrolytics
  Teflon wiring

Specifications:

Input:
105-125 VAC-47 to 420 Hz.
Optional: 210-250 VAC.

Output:
See models and ratings.

Adjust Range:
± 5% at ratings listed.

Regulation:
Line only ± .05% (10 VAC change from nominal).
Load only ± .2% (0 to full load).
+ .1% (50% load change).

Remote Sense: Optional.

Ripple and Noise (PARD):
5 + 15 volt outputs — 1 mv rms max.

24 volt sections — 3 mv rms max.

Temperature:

- Operating 0°C to 71°C with ratings at:
  0° to + 40°C — full rating.
  + 50°C — 80% rating.
  + 60°C — 60% rating.
  + 71°C — 38% rating.
- Storage −20°C to + 85°C.

Temperature Coefficient:
± 0.02% per degree C maximum.

Stability:
0.1% for 8 hours after warm-up.

Short Circuit and Overload Protection:
Standard.

Transient Response:
10 microseconds for 25% load change, typical.

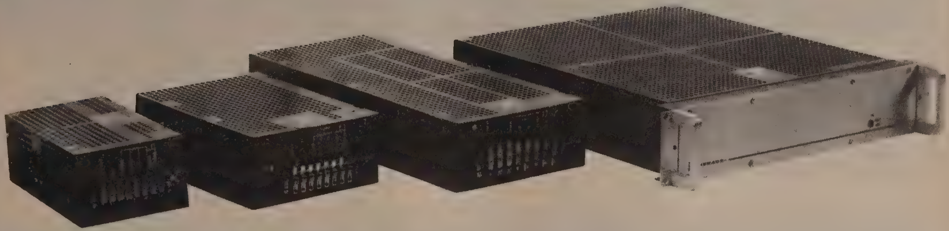
DYNAGE inc.

L SERIES FOR LOGIC APPLICATIONS, BUILT-IN O/V, STANDARD



SPECIFICATIONS

Input: 105-125 VAC, 47-420 Hz

Output (Floating): See table of Models

Output Voltage Adjustment: ±5% from nominal. See range in table of models

Resolution of Adjustment: 0.5%

Regulation: Line only: ±0.2% for ±10 VAC at constant load
Load only: ±0.3% for 0 to full load at 115 VAC
±0.2% for 25% load change at 115 VAC
Combined: ±0.5% for combined ±10 VAC change and 0 to full load variation

Ripple and Noise: 0.1% RMS max. — 1.0% P-P max.

Temperature: Operating: −20°C to +71°C (see current ratings at three temperatures)
Storage: −62°C to +85°C
Coefficient: ±0.05%/°C from −20°C to +71°C

Electronic Short Circuit Protection: Foldback type. Standard, all Units. Max Current approximately 125% of full load current. At short circuit current is approximately 25% of rated full load current at 50°C.

Overvoltage Protection: Adjustable, set for approximately 130% of output voltage at no load when shipped. Range: 110-150%

Overtemperature Protection: Standard, all Units

Remote Programming (Resistance): Standard, all Units (100 ohms per volt)

Remote Sensing: Standard, all Units

Parallel Operation: Current Sharing within ±10%

OPTIONS AVAILABLE

MODEL NUMBER Suffix required	OPTION
F (Specify level)	Fixed output (to ±1%)
FF (Specify level)	Fixed output (to ±0.25%)
M	Meters (E Case only); Voltage and current — 1 pair
N	230 VAC input

CASE SIZES:

B	$3\frac{3}{16}'' \times 4\frac{15}{16}'' \times 9\frac{3}{8}''$
C	$3\frac{3}{16}'' \times 7\frac{1}{8}'' \times 9\frac{5}{8}''$
D	$3\frac{3}{16}'' \times 8'' \times 16\frac{1}{2}''$
E	$3\frac{15}{32}'' \times 16\frac{5}{8}'' \times 17''$

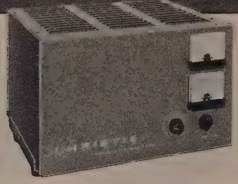
BATTERY CHARGERS & BATTERY PACKS

REV CHARGER FOR LEAD-ACID & SILVER-ZINC

Nominal Battery Voltages	Std. Current Ratings (amps)	Service	Typical Regulation	Typical Ripple	A-C Input
6, 12, 24 12, 24, 36 36, 48 72, 120	25, 50 150* 25, 50, 60*, 130* 12, 25, 30*, 50, 60*, 100*	Float or Charge	±0.25%	1%	Ratings with * are 3-ph; all others 1-ph.

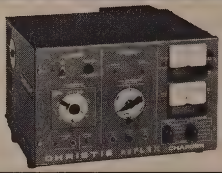


REFLEX® CHARGER & ANALYZER FOR LARGE NI-CADS

Patented charging principle employs DEPOLARIZATION PULSES to reduce battery impedance, gassing & heating, resulting in —

- 1 HOUR FULL CHARGE
- Higher battery capacity (over 130% not unusual)
- Frequent battery rejuvenation
- Better cell balance, less "memory"
- 95% vs. conventional 70% charging efficiency

	Model	For Sintered, Vented Ni-cad Batteries Rated	
CHARGER-ANALYZER	RF80GT	19, 20, 22 cell 6-55 A-H	11 cell 40-55 A-H
CHARGER only	RF80G	19, 20, 22 cell 6-55 A-H	11 cell 40-55 A-H



RAPID CHARGER® FOR SMALL NI-CADS

Patented REFLEX battery charging principle, employing depolarization pulses, provides 20-minute rapid charge for sealed cylindrical ni-cads.

Services battery packs from ½ AA to D and larger sizes.

Standard & Custom Chargers available.

DELTEC equipment has a reputation for providing quality power with the highest reliability available at an economical life-cycle cost.

The systems can solve power problems — blackouts, brownouts, transients — that cause poor performance or expensive downtime on critical electronic or computer systems. They are easily installed and maintained by the customer and can be counted on to work when needed.

Contact Deltec if your application requires special design considerations such as:

- Unusual input/output combinations — voltage, frequency, phasing
- Monitoring or control circuits
- Packaging

WRITE FOR FREE APPLICATIONS ASSISTANCE BROCHURES

Deltec has several pamphlets to assist you in understanding, evaluating and solving your power problems. They are:

Super-Isolation Transformer/Line Conditioner Installation Handbook
Super-Isolation Transformer/Line Conditioner Selection Guide

NOTE:
1) Battery chargers for external battery systems are sized for reservoir up to 1 hour backup time, others available on request. Backup time to be specified by customer.
2) Single phase input/output voltages available – 115 to 440 VAC (customer specified).
3) Three phase input/output voltages available – 208 to 480 VAC (customer specified).

STANDARD OPTIONS
Sensors, Alarms, Controls
Static Reverse Transfer Swtich (4 ms)
Frequency Synchronization and Phase Lock

"5000" Series Models are capable of providing long-term battery power for medium- to large-capacity loads. The basic system consists of: circuit breakers, rectifier/battery-charger, inverter and minimal sensing and control circuitry. Modular design permits building the system to customer requirements.

"DSU" Systems are low- to medium-power systems, rack-mountable and self-contained for simplicity of installation. Built-in gelled-electrolyte batteries provide reliable, maintenance-free power. The systems are complete with circuit breakers, rectifier/battery-charger, inverter, batteries, meters, sensors, alarms and control circuitry.

CONTACT DELTEC FOR NON-STANDARD SYSTEMS INCLUDING:

- Special Input/Output Combinations (Voltage, Phasing, Frequencies)
- Special Circuitry, Controls

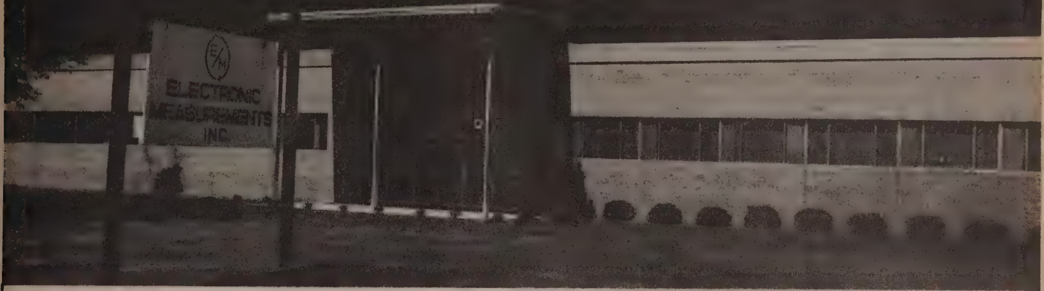
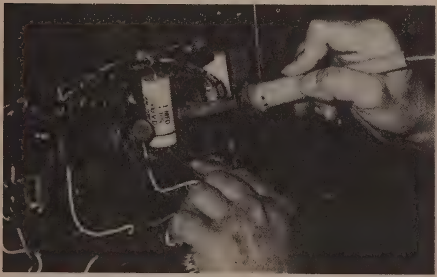
POWER SUPPLIES BY ELECTRONIC MEASUREMENTS INC.



Custom designed power supplies are nothing new at Electronic Measurements. Our design engineers can fulfill your most stringent application requirements.

Every printed circuit and subsystem must meet or exceed our published design parameters. At Electronic Measurements we worry about quality control so you won't have to.



Handcrafted workmanship at each stage of assembly assures a high level of reliability. Every unit comes with a 5 year warranty and is backed by our over thirty years of experience in building power supplies.

Electronic Measurements designs and manufactures quality power supplies for a broad range of applications under clean, modern and environmentally controlled conditions.

MORE

Precise Regulation Single Phase Input Power Supplies–500, 800, 1,600 & 2,400 Watt Units

Designed for a variety of applications, these high-efficiency 0.1% precision-regulated SCR power supplies provide from 500 to 2400 watts of true "constant voltage/constant current" power with automatic crossover depending upon load requirements. Overvoltage protection and a choice of input voltage are available as options. All SCR models are warranted for 5 years.

* **Maximum Watts per Cubic Inch**
* **Remote Sensing**
* **Remote Programming**
* **Series or Parallel Operation**
* **Designed for varied uses**
* **Rack or bench mounting**

AC INPUT:

500W, 800W & 1600W Models: 105-130V, 47-63Hz standard, 190-253V, 47-63Hz optional. 2400W Models: 190-253V,47-63Hz standard. Power Factor: 75% minimum. For input currents, see rating table. 500W/800W units shipped with 6ft. (1.83m) line cord and plug. 1600W & 2400 units have barrier strip for AC input.

REGULATION:

Voltage Mode:

For line voltage variations and load current variations within the rating of the supply, the output voltage will not vary more than 0.1% of the maximum voltage rating. This measurement may be affected by the fact that the RMS content of the ripple exceeds the amount of the output change allowed (0.1%). On an average-responding meter the regulation typically approaches 0.02%.

Current Mode:

For line voltage variations and load voltage variations within the rating of the supply, the output current will not vary more than 0.25% of the maximum current rating. This measurement is affected by the fact that the RMS content of the ripple exceeds the amount of output change allow- (0.25%). On an average-responding meter the regulation typically approaches 0.1%

RIPPLE:

Measured with either positive or negative grounded or output floating at nominal 117 VAC or 220 VAC and 100% output voltage and current into a resistive load. (See Rating Table). Ripple increases by 3% for each 1% increase in line voltage above nominal. Ripple decreases by 2% for each 1% decrease in line voltage below nominal. Ripple at 50Hz AC input is 30% above 60Hz ratings.

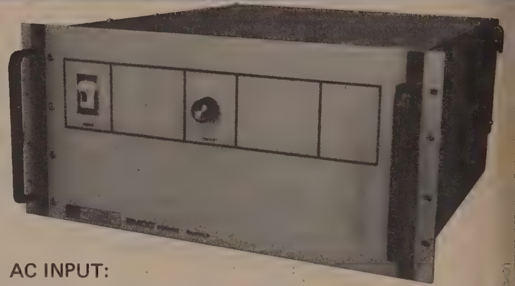
Medium Power Three Phase Input Power Supplies. Models EMCV & EMCC

Models EMCV & EMCC are designed to provide an economical 1% regulated DC source for laboratory and OEM applications where power to 10kW is required. The EMCV series are constant voltage sources which are current limited. The EMCC units are constant current supplies with voltage limiting. Both types feature automatic crossover and come with a 5 year warranty.



- **Maximum Watts per Cubic Inch**
- **High Efficiency**
- **Remote Programming & Sensing**
- **Thermal Overload Protection**
- **Current or Voltage Limiting**
- **2.5, 5 and 10kW Models**

AC INPUT:

2.5kW Models: 208/220V±10%, 3ph, 47-63Hz, * input current 10A, P.F. = 75%

5kW Models: 208/220V±10%, 3ph, 47-63Hz, * input current 20A, P.F. = 75%

10kW Models: 480V±10%, 3ph, 57-63Hz, * input current 18A, P.F. = 75%

* Typical line currents and power factors measured at nominal line and maximum output voltage and current.

Precise Regulation Three Phase Input Power Supplies – 2,500, 5,000 & 10,000 Watt Units

These three phase SCR model DC power supplies provide precision 0.1% regulation for laboratory and OEM applications. They are true "constant voltage/constant current" supplies with automatic crossover to either mode. All models are covered by a 5 year warranty and are offered with a variety of options to meet your specific application.

AC INPUT:

2.5kW Models: 208/220V±10%, 3ph, 47-63Hz, * input current 10A, P.F. = 75%

5kW Models: 208/220V±10%, 3ph, 47-63Hz,* input current 20A, P.F. = 75%

10kW Models: 480V±10%, 3ph, 57-63Hz, * input current 18A, P.F. = 75%

* Typical line currents and power factors measured at nominal line and maximum output voltage and current.

- **Maximum Watts per Cubic Inch**
- **High Efficiency**

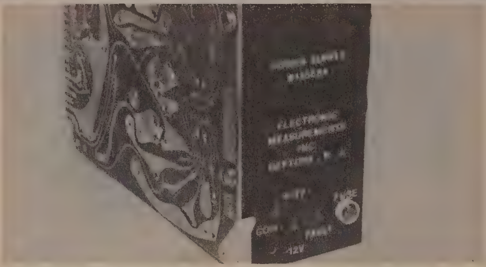
MORE

A Wide Range of Custom Designed Power Supplies. Consult EMI Design Engineers Concerning Your Needs.



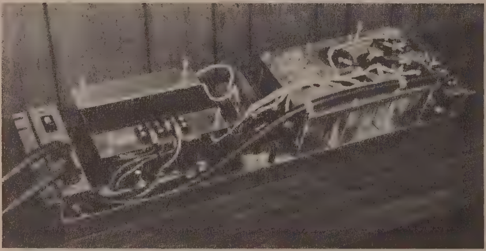
CARD FILE

The CF-1 card file power supply provides two complementary outputs as required by operational amplifiers. This unit provides 0.5% regulation, ± 12/15 VDC ± 2% at 1.5 amps output, a 50% operating efficiency and ripple of 0.1% P/P. Designed to provide excellent reliability and performance in hostile OEM applications.

EMXL RECTIFIER POWER SUPPLY

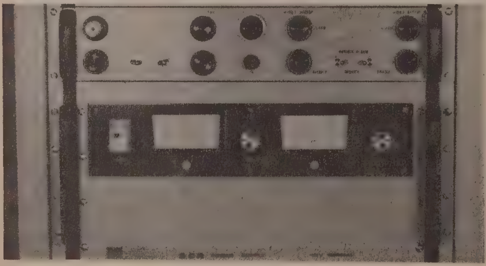
PRECISION ARC LAMP

The EMX Series power supply provides well-regulated constant current with low lamp current ripple for xenon, krypton and other high power arc lamps, as well as laser excitation and environmental testing applications. Key features include: High Efficiency, low ripple, excellent stability and small size.



BATTERY ELIMINATOR

Available as a 15 amp unit (Model 452-6) or as a 30 amp unit (Model 452-7), these DC power supplies provide economical and highly reliable voltage sources where current limiting (as required in battery chargers) is not a requirement.



EMHP POWER SYSTEM

Electronic Measurements can custom design power systems where requirements exceed 10kW. The EMHP System provides maximum versatility at minimum cost. Precise 0.1% regulation and 5-10mV rms ripple is provided through series or parallel connections of our standard SCR Series power supplies.

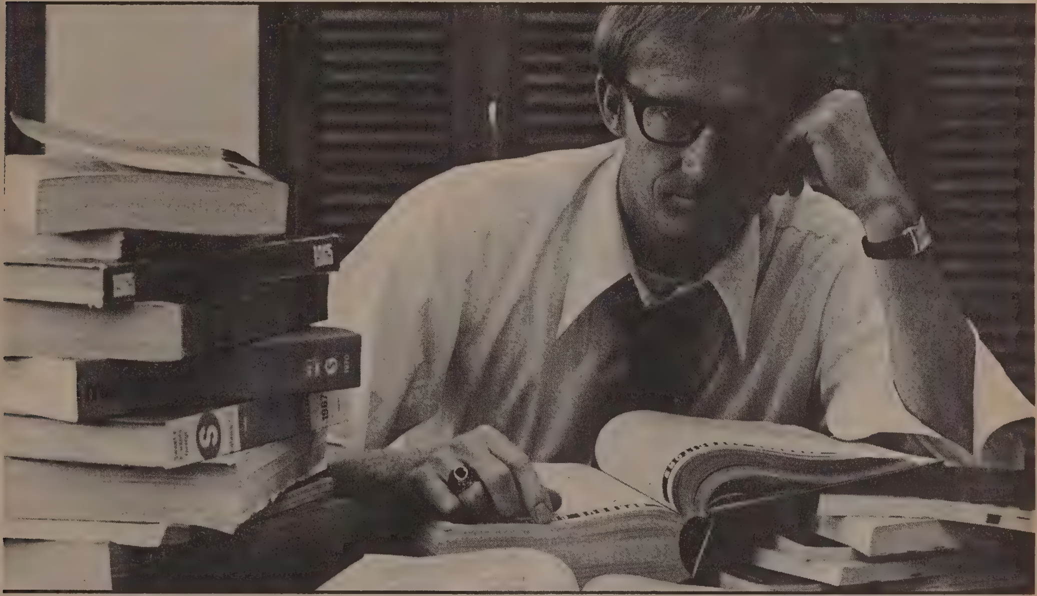
Specialists in Power Conversion Equipment

ELDEC has custom low voltage power supplies for the designer who knows what he needs but can't find it.



When you need a multi-output power supply that has to meet stringent size and weight criteria, and has to perform reliably day in and day out, turn to ELDEC, not your catalog sources.

Chances are you won't find an off-the-shelf model to do the job. ELDEC specializes in custom designed low voltage power supplies. Has for over 10 years. And they're reliable. ELDEC low voltage power supplies have been delivering top performance in tactical military aircraft under tough conditions for years.

Our state-of-the-art, high technology is available to tackle your most demanding power supply problems. ELDEC takes pride in supplying the smallest size, lowest weight power supplies available. You spec it, we'll design, build, and deliver it. When you need it.

ELDEC power supplies use advanced switching regulator and modular packaging techniques to achieve superior power output to volume density ratios. A supply doesn't go out the door unless it meets EMI specifications.

ELDEC delivers. No gap between promises and prototype. Plenty of back-up and documentation. A prestigious customer list. Get all the facts.

ELDEC

ADVANCED TECHNOLOGY

ELDEC is engaged in the custom design and manufacture of miniature, high efficiency power supplies for systems requirements. ELDEC's total resources have provided a 10-year history of field-proven performance and reliability, even in the most stringent environments.

ELDEC's advanced research, design and production facilities include in-house transformer manufacture, machine and metal shops and automated electronic assembly areas. All electronic products and systems are manufactured under the highest standards of excellence, MIL-Q-9858-A.

Some Facts About ELDEC:

- 18-years operation
- New 80,000 sq. ft. facility
- Annual sales volume exceeds $14 million
- 500 employees
- Extensive investment in modern test equipment for testing EMI, temperature, humidity, shock, vibration, etc.

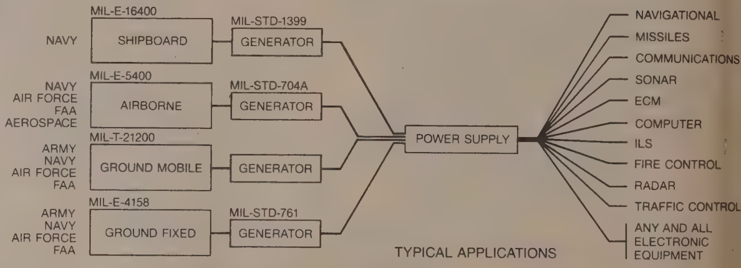
Low Voltage Power Supplies

ELDEC continues to advance the state of the art in switching regulator power supply technology, thus enabling us to supply the smallest size and lowest weight power supplies available, with no sacrifice in reliability.

Features:

- **Multi-output switching regulator supplies**
- **Densities to four watts/cubic inch**
- **Efficiencies to 90%**
- **Proven reliability**
- **MIL-STD-461 EMI proofed**
- **Compliant with all airborne, shipboard and ground-use military specifications**

Typical applications:



MIL-E-16400
NAVY
SHIPBOARD
MIL-STD-1399
GENERATOR
MIL-E-5400
NAVY
AIR FORCE
FAA
AEROSPACE
AIRBORNE
MIL-STD-704A
GENERATOR
MIL-T-21200

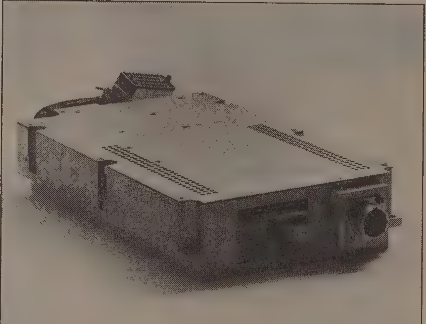
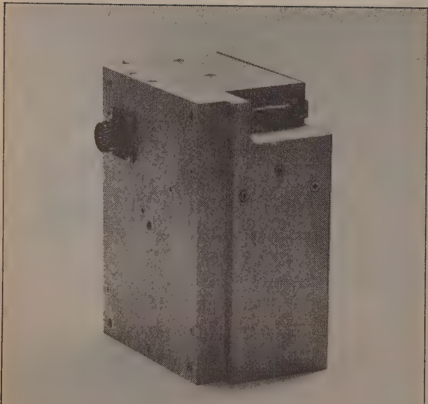
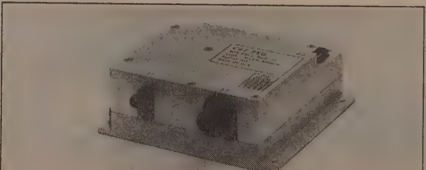
ANY AND ALL ELECTRONIC EQUIPMENT
TYPICAL APPLICATIONS



Model 4-050 LV PS



Model 4-084 LV PS



Model 4-057 HV PS

POWER SUPPLIES

High Voltage Power Supplies

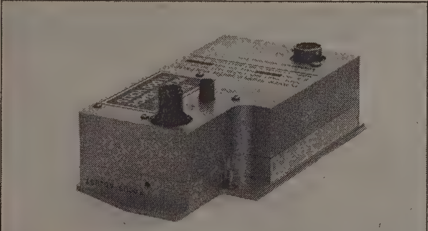
Features:

- **Multiple outputs**
- **Small size; light weight**
- **Reverse polarity and short circuit protected**
- **Low ripple and noise**
- **Monitor outputs**
- **Adjustable and programmable outputs**

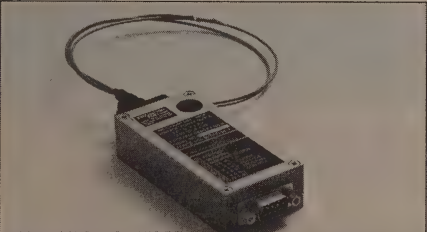
ELDEC custom designs and manufactures high reliability high voltage power supplies for display and TWT systems. Continued research has enabled ELDEC to overcome the reliability problems normally associated with other HV power supplies.

Typical applications include:

- Military and commercial display systems
- Traveling wave tube applications
- Color displays



Model 4-031 CRT HV PS



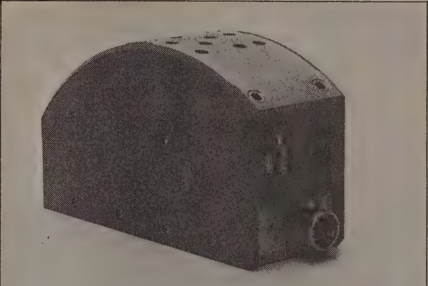
Model 7-015-02 HV PS

Battery Chargers and Power Converters

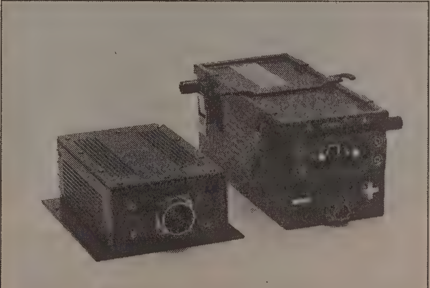
ELDEC designs and manufactures battery chargers and transformer rectifier units for many U.S.-produced commercial and military jet aircraft, including the 707, 727, 737, 747; L-1011; DC-10; A-7D CH-53; F-15; and B-1.

Features:

- **Field proven high reliability**
- **Meet all FAA and MIL-SPEC requirements**
- **Automatic, fail-safe performance**
- **Small size; low weight**



Transformer Rectifier unit



Aircraft Battery Charger

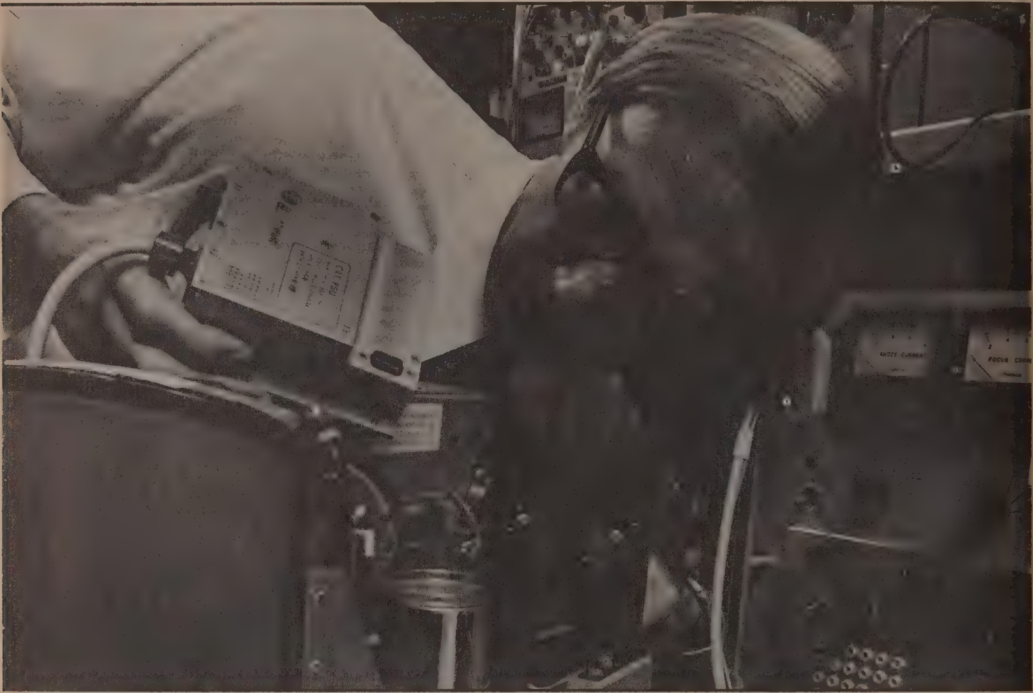
ELDEC CORPORATION

Engineering and sales offices located throughout the United States and Europe.

When you need a custom high voltage power supply, ELDEC designs, packages, and builds them so you can rely on them.



Power supplies for CRT displays. Small size. Light weight. Look to ELDEC. We have years of experience combined with field proven reliability. ELDEC specializes in high voltage, custom mil-spec requirements. Air, ground, or shipboard.

Now by-pass that make or buy decision. When reliability is on the line, rely on proven experience. And ELDEC delivers. No gap between promises and prototype. High quality levels of manufacturing? You can bet on it!

We understand the custom business. Plenty of back-up documentation and service support. A successful track record you can check on. Ask for our brochure.

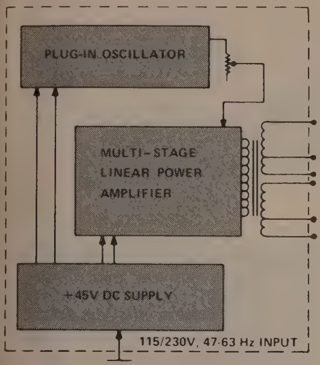
FREQUENCY CONVERTERS



AC POWER SOURCE
MODEL 121
ELGAR
SERIES 400V

Elgar has long been the industry leader in producing solid-state Frequency Converters (AC power sources) for a variety of applications. These include laboratories, receiving inspection, production testing, computer-controlled automatic test systems, and facilities which require variable voltage, fixed or variable frequencies independent of power line and load variations.

Think of an Elgar AC power source as a high-power linear amplifier driven by a precision oscillator. Actually, the basic power amplifier consists of a ±DC supply and a multi-state amplifier with a multiple-tap power output transformer. Output frequency is established by a plug-in oscillator.

Although frequently classed as instruments, Elgar power sources are actually power systems. They can deliver a variety of voltages and frequencies at the output, and the phase angles of the oscillators can be controlled, enabling the user to interconnect the output of two or more power sources into 2-phase and either Delta or Wye, 3-phase configurations.

Because of the relative ease of control of the output frequency, amplitude and phase angle, Elgar power sources can be externally programmed by a computer or other digital commands via an Elgar Decoder Programmer Oscillator. This enables avionics and other system designers to automatically "exercise" their end products under simulated power conditions.

Since the many possible output variations are achieved either by a plug-in device or by external interconnection, Elgar power sources can serve many needs without fear of obsolescence.

Note: D is an open delta configuration.

GENERAL SPECIFICATIONS

Output Voltage Ranges: 0–32, 0–130, 0–260
Output Frequency Range: 45–10,000 Hz
Load Power Factor: ±0.7 at full VA
Output Harmonic Distortion: 0.6% THD worst case

Line Regulation:
±0.25% at full load vs. ±10% change of input line voltage.
Load Regulation:
±1% from no load to full load over full frequency range and ±10% input range. Adjustable to better than 0.1% for specific load conditions. Fixed frequency systems always less than ±0.25%.

Response Time: Less than 50 μsec.
Noise Level: 70db below full output. Includes plug-in oscillator.
Gain Stability:
±0.25% for 24 hours at constant line, load and temperature.
Temperature Range:
Operating, –20° to +50°C;
Storage, –40° to +80°C.

PLUG-IN OSCILLATOR MODULES

VARIABLE FREQUENCY

Type	Model	Frequency Range (Hz)	Phase*	Calibration Accuracy	Frequency Temp. Coeff.
Decade Dial	401-V	45–10000	1	±1%	±0.02%/°C
Continuous Dial	431-V	300–500	1	±0.25%	±0.02%/°C
	461-V	45–70	1	±0.25%	±0.02%/°C
	4641-V	45–70 & 350–450	1	±0.25%	±0.02%/°C

*Oscillators are also available in two- and three-phase versions. To indicate a multi phase oscillator, change the last digit of the model number; for example, 403-V = 3-phase, and so on.

These oscillators provide 0.01% line and 0.01% load regulation and 0.01° phase angle regulation around the power amplifier(s) at the point(s) of sense. They also provide 0.1% amplitude and 0.1° phase angle stability for 1000 hours at constant line, load and temperature. Normally for fixed voltage applications. Please specify voltage. Amplitude temperature coeff. 0.005%/°C.

FIXED FREQUENCY

Type	Model	Frequency Range (Hz)	Phase*	Calibration Accuracy	Frequency Temp. Coeff.
R-C Phase Shift	451-.1	50	1	±0.1%	±0.015%/°C
	461-.1	60	1	±0.1%	±0.015%/°C
	441-.1	400	1	±0.1%	±0.015%/°C
Crystal Control	461-.01	60	1	±0.01%	±0.0002%/°C

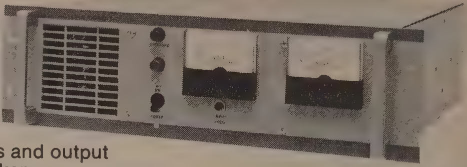
AC LINE CONDITIONERS



Elgar AC Line Conditioners provide precise, clean AC power to critical loads by eliminating high-speed AC line and load transients and distortion as well as providing precise regulation. These versatile instruments have response times 5,000 times faster than the fastest conventional AC line regulators and line isolation of 70 to 100 db, far superior to mere isolation transformers. All Elgar AC line conditioners are designed for continuous operation and are contained in rack-mount enclosures. Front panel controls include meters to monitor input and output voltages and output load current, an overload indicator and an input circuit breaker.

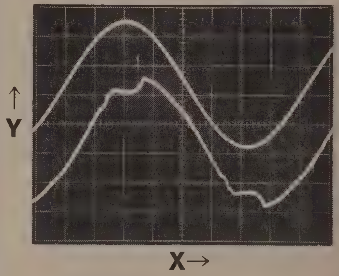
Users of voltage-sensitive equipment need isolation from high-speed AC line transients. These transients can cause erratic operation, component failures, and a reduction in equipment life. In sensitive instrumentation and data processing equipment, high-speed line transients often are the cause of erroneous information.

Elgar AC Line Conditioners are the best, most reliable solution to these problems.

GENERAL SPECIFICATIONS

INPUT/OUTPUT ISOLATION: 100 db (60 Hz)
OUTPUT DISTORTION: 0.2% max for up to 10% input harmonic distortion*
LINE REGULATION: ±0.025% for ±10% input AC line variation
LOAD REGULATION: ±0.025% for no load/full change full current into unity to zero lagging or leading load**
REDUCES 500V 10μ SEC TRANSIENTS BY 1000:1
SUPPLIES PEAK CURRENTS 3.5 TIMES RMS RATING
TEMPERATURE COEFFICIENT: 0.005% per °C
PEAK AMPLITUDE STABILITY: ±0.01% (cycle to cycle)
AMPLITUDE DRIFT: ±0.05% 24 hrs constant line, load and temperature
IMPULSE SETTLING TIME: less than 20 μsec
AMBIENT TEMPERATURE: 0–55°C
OVERLOAD INDICATION: Front panel lamp lights when rated output current is exceeded
OVERLOAD PROTECTION: Continuous overload actuates front panel circuit breaker
METERING: Reads: input voltage, output voltage, & output current
COOLING: Forced Air

*400 Hz models 0.5% max. **400 Hz models ±0.1%



Y=75 volts/cm
X=2 millisec/cm
The lower trace shows a very distorted input AC line waveform with a 75 volt peak spike riding on it. The upper trace shows the output of the Elgar AC Line Conditioner which is perfectly clean and shows no trace of the AC input anomalies.

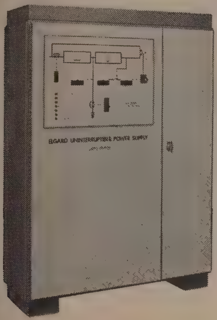
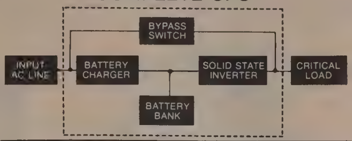
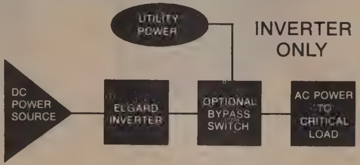
UPS/INVERTERS



COMPLETE UPS





ELGARD UPS all solid-state Uninterruptible Power Systems combine a battery charger, battery bank, solid-state inverter and bypass switch to provide clean, continuous power to critical loads. The battery charger converts AC line power to DC. Normally, this DC power simultaneously float-charges the battery bank and powers the inverter. Upon loss of input AC, the inverter continues to furnish the critical load with uninterruptible AC power by drawing its energy from the battery bank. Since the battery bank is always connected to the inverter as well as to the battery charger, there is no switchover time. AC output frequency from the Uninterruptible Power Source is phase-locked to the input AC under normal conditions. When there is no input AC, the output frequency is automatically determined by the stable internal oscillator.

In the unlikely event of a component failure within the Uninterruptible Power Source, the bypass switch will be activated and the critical load will automatically transfer to the input AC line. The standard switch is an electromechanical contactor which performs the reverse transfer with a 50- to 150-millisecond interruption. An optional solid-state bypass switch (SBS) that can make the transfer with no interruption in power to the load is available for all UPS and Inverter models.

ELGARD INVERTERS are designed to accept DC input power (derived from a nominally 125 or 130VDC rectifier system or from a battery bank with a final discharge voltage of 105VDC) and convert it to tightly regulated, single-phase AC power.

ELGARD UPS are designed for a useful life of 15 to 20 years. Mathematical analysis and operating history indicate the anticipated mean-time between failures (MTBF) will be about 20,000 hours, depending upon the model and features selected. With appropriate interface of the bypass switch (electromechanical or static) with the load, so that bypass action does not cause a transient greater than the load can tolerate, an MTBF in excess of 100,000 hours for the output load bus can be demonstrated.

GENERAL SPECIFICATIONS

Input and Output Voltages:
- 0.5 to 2.5KVA: 115VAC std., 230V available
- 5KVA and above, single-phase: 230VAC std., 115V available
- Three-phase models: 120/208, 380, 480 available

Voltage Regulation: ±1%
Instantaneous Transient (50% load change): ±8%
Frequency: 60Hz Std., 50Hz avail.
Frequency Stability: ±0.25%
Continuous Power: Rated KVA at 0.8 P.F.
Load Power Factor: 0.7 lag to unity
Harmonic Distortion: 5% THD maximum

Overload Rating:
- 0.5 to 2.5KVA:
  - 110% for 15 minutes
  - 150% for 5 seconds
  - 200% for 5 cycles
- 5KVA and above:
  - 125% for 15 minutes
  - 150% for 10 seconds
  - 200% for 10 cycles

Inverter Efficiency at Full Load:
- 0.5 to 2.5KVA: 75% minimum
- 5KVA to 15KVA: 80% minimum
- 20KVA and above: 85% minimum

STANDARD INSTRUMENTS:
- DC Voltmeter, AC Voltmeter, Output AC Ammeter

STANDARD INDICATORS:
- Input Power On
- Low DC
- Bypass Switch Position
- Fuse(s) Open
- Battery Operation
- Overheat
- Overload

CONSTRUCTION:
- In accordance with applicable NEMA standards and the National Electric Code (NEC).

ENVIRONMENT:
- Operating Temperature: 0 to 40°C
- Humidity: to 95%

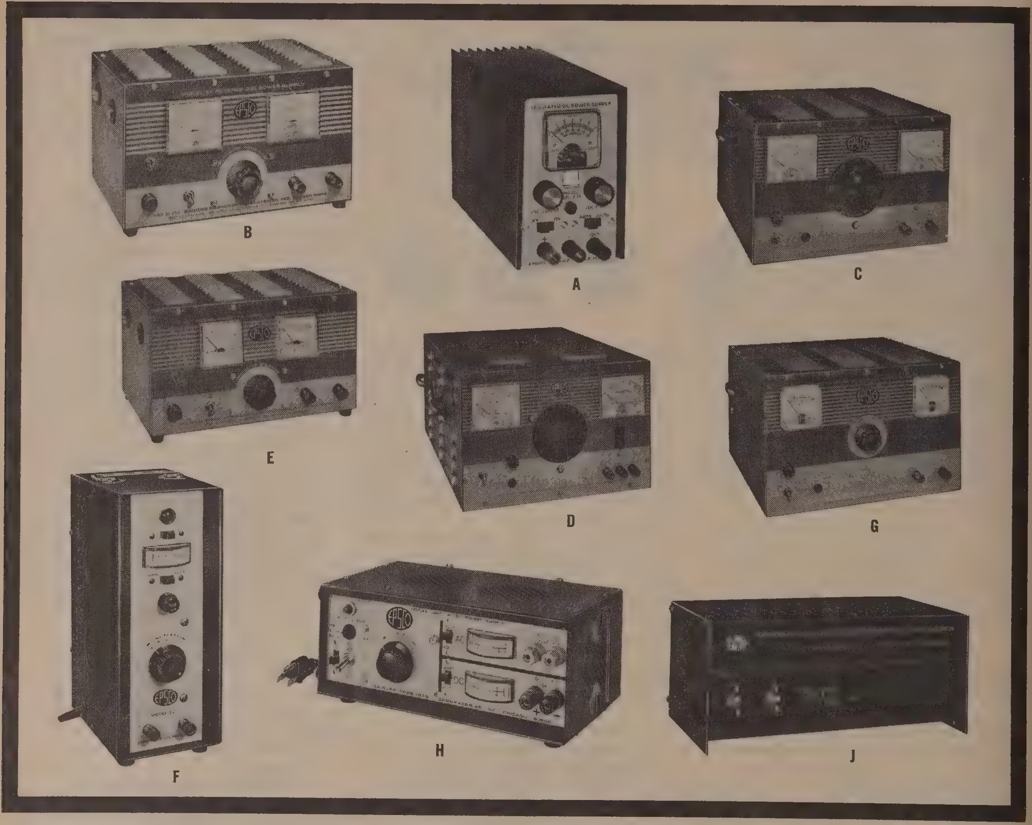
EPSCO REGULATED & SEMI-REGULATED POWER SUPPLIES



Ruggedly-constructed, low voltage dc power supplies for use in design, development, testing of transistor circuitry . . . for servicing and operating auto, aircraft, marinecraft radio, electronic equipment . . . for production line testing, industrial and educational laboratory work and many other applications.

Precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, ac ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals.

INPUT — *Regulated Models:* 105-125 vac. 60 Hz *Industrial and General Purpose Models:* 117 vac 50/60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specs.

INVERTER — Transistorized. Converts 12 vdc to 117 vac, 60 Hz to operate equipment from car, truck or boat battery or other 12 vdc source for camping, traveling, boating. Reverse polarity and short circuit protection.

SPECIAL Delivery

ERA DELIVERS SPECIAL DESIGN POWER SUPPLIES

by the thousands

In addition to hundreds of off-the-shelf power sources, ERA provides a complete custom design service. ERA's custom department, fully-staffed with top power-engineering experts can supply you with "instant" quotations, prompt prototype delivery, and quality production at competitive prices.

Our quotations and comments covering your requirements promptly supplied without obligation on your part.

Write ERA now for a quotation on your special designs.

RATING

MEETS COMPONENT, WORKMANSHIP AND ENVIRONMENTAL REQUIREMENTS OF
MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200

CERTIFIED Certificate of Conformity by Independent Laboratory supplied on request

Transpac MS Series DC Power Modules are all-silicon designs capable of meeting the highest military requirements. These units incorporate full MIL components where applicable and are designed to meet full military environmental and component specifications. Transformers are per MIL-T-27A, semiconductors are MIL-STD-701 or MIL-S-19500 preferred types. Tantalum foil capacitors per MIL-C-3965 are used throughout except in the filter sections of higher current types where MIL-C-62 military grade electrolytic capacitors are used. These units have been fully tested to meet the component, workmanship, and environmental requirements of MIL-E-4158, MIL-E-5400, MIL-E-16400, MIL-E-5272, MIL-T-21200 and are supplied with an independent testing laboratory certification as to compliance for representative models.

Solid State Inverters

CONVERT LOW VOLTAGE DC TO LINE VOLTAGE AC. ALSO HIGH-SURGE MODELS

ERA Transpac Inverters convert low voltage DC into higher voltage AC. Solid-state designs provide minimum operating maintenance, high shock and vibration resistance, high conversion efficiency and stable, trouble-free, long-life operation.

Units incorporate all advanced features including overload and transient protection, self-starting networks, reverse polarity protection, and MOPA designs where applicable.

High surge types use MOPA designs which provide for high peak power for motor starting, lamp powering, and other high surge applications.

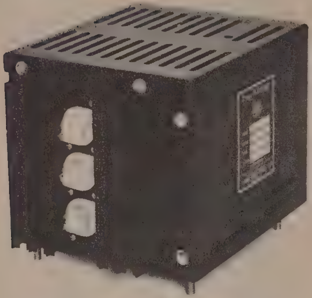
Solid-State Sinusoidal AC Regulators

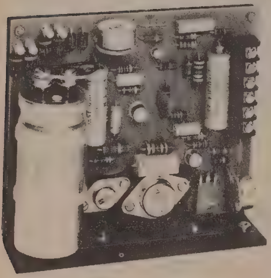


Transpac RT modular AC regulators are all solid-state designs for incorporation into equipment or for external and bench use. Utilizes a unique design approach incorporating a modulated AC bridge which is referenced to variations in the output level. This special circuitry permits fast-acting RMS regulation independent of input frequency, and provides sinusoidal output. RT units are highly efficient, require minimum no-load current and operate over a wide range of load power factors.

- Provide highly RMS-regulated sinusoidal output
- Operate over a wide range of AC inputs and frequencies
- Run cool and quiet with no distorted magnetic field interference
- Operate over a wide range of leading or lagging power factors
- Provide a modular AC Regulator for end-equipment or bench use

Power Rating	Size (Inches)	Weight	Model
250 VA	6-5/16 x 7-1/4 x 4-7/8	13 lbs.	RT250
500 VA	6-7/8 x 8-7/8 x 7-1/2	17 lbs.	RT500
1000 VA	7-13/16 x 9-15/16 x 7-5/8	22 lbs.	RT1000

DC Regulator Assemblies



"CR" series assemblies are complete power supplies and require only the addition of a center-tapped input transformer for full functioning. These units incorporate a heat sink preform and provide highly regulated dc outputs combined with protective and control features, including OVP.

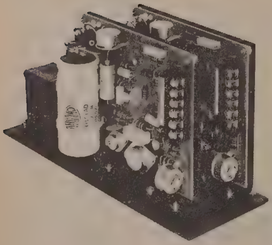
OEM DC Power Supplies



"OE" series power supplies are highly regulated open frame DC power supplies which come complete with isolating input transformers, power control, OVP protective circuitry and full heat sinking. These low cost units are available in either single or multiple outputs and are ideally suited for all OEM, IC, Op-Amp, Computor, and general applications. Also available are optional dust covers for modular power supply conversion.

Solid State Non-Regulated DC Supplies

FEATURES

- Compact Low Cost Designs
- Line Isolated
- Full Wave Silicon Rectification
- Computer Grade Capacitance Filtering
- Ungrounded Outputs
- Low Internal Impedance
- Module or Rack Mounting
- Rugged Long-Life Design

OUTPUT VDC	OUTPUT CURRENT	PANEL SIZE W x D x H (INCHES)	MODEL
28VDC	5AMP	3-1/2 x 9-1/2 x 7-3/16	F28/5
28VDC	7AMP	3-1/2 x 9-1/2 x 9-3/4	F28/7
28VDC	10AMP	3-1/2 x 9-1/2 x 9-3/4	F28/10
28VDC	20AMP	5-1/4 x 9-1/2 x 14-3/4	F28/20
28VDC	40AMP	7 x 9-1/2 x 14-3/4	F28/40

Dual Output Silicon DC Power Modules

FEATURES

- Dual outputs, ± 12 through ± 15 VDC or 4-18 VDC
- Precision tracking
- Individual offset voltage adjustment
- All silicon
- 71°C free air rating
- No heat sinking or air blow required
- Fully repairable
- Automatic overcurrent protection
- Fast warm-up stabilization time
- Highly regulated
- Wide input range

OUTPUT VOLTAGE (DC)	CURRENT 71°C	SIZE W x D x H (INCHES)	WEIGHT (LBS.)	MODEL
± (4-18)	0-60MA	2-15/32 x 3-27/32 x 3-3/4	1.6	DV418
± (12-15)	0-60MA	2-1/4 x 3-15/32 x 3-3/4	1.2	DV60
± (12-15)	0-500MA	3-3/16 x 4 x 5-1/8	2.8	DV500
± (12-15)	0-1AMP	4 x 4-3/4 x 6-1/4	3.9	DV1000

Universal Solid State Over-Voltage Protector

FEATURES

- Protects against power supply switching transients
- DC bus powered — no AC
- Connects at any location along supply DC bus
- Two-terminal operation
- Self-powered-universal application
- Fast response time
- Completely independent of connected supply or source
- Provides protection for all types of supplies regulated or unregulated
- Independent of type of power supply failure
- Protects against line inductive over-voltage transients
- Low standby current
- Temperature compensated for stability
- Low shunt trip impedance
- Wide range — continuously adjustable trip point
- Available in industrial or military models

MODEL NUMBER	0V448	0V448M*
CURRENT RANGE	0-8AMPS	0-8AMPS
VOLTAGE RANGE	4.5-40VDC	4.5-40VDC
WEIGHT	10 oz.	10 oz.
SIZE (INCHES)	1-21/32 x 3-1/32 x 1-5/16	

Solid State Emergency Power Source

stores power during
normal conditions and
automatically provides
emergency power
during line failure.

Other models provide higher power ratings of 250 VA, 500 VA, 1000 VA and higher, on order.

Specifications : MODEL EP 100

Input: 115VAC, 60 cps
Output: 115VAC, 60 cps
Output Wave Form: Approx. square wave
Power output: (AV.) 100 VA
Power output: (surge) 150 VA
Capacity: Approx. 4 hrs. at 100 VA
9 hrs. at 50 VA
Recovery time: (fully discharged to fully charged) 8 hrs.
Power input: (quiescent) 10 VA
Power input: (average charge) 280 VA
Power input: (max. charge) 450 VA
Temp. range: -20°C to + 55°C
Switching: Automatic/Manual, Failure Simulator
Metering: Battery and AC output voltage
Size: 14 x 11 x 14½ inches (W x D x H)
Weight: 30 lbs. (less battery)

Specifications for E 900

Input: 12 V DC standard (5 V, 9 V, 15 V DC, and other inputs available to your specification)
Standard Outputs: Available with either single or dual outputs, capable of up to 12 watts total. Single: 250 V DC @ up to 45 MA. Dual: 250 V DC @ 30 MA., and -16 V DC @ up to 100 MA. to provide the -12 V DC needed for the drive electronics in many applications using the Burroughs SELF-SCAN® displays.
Input/Output Isolation: 600 V RMS (60 Hz. breakdown for 1 minute)
Weight: 122 gms.
Size: 2″ (50.8 mm) x 2.5″ (63.5 mm) x 1.12″ (28.4 mm)
Mounting: Designed for PC board mounting
Packaging: Aluminum case, acting as heat sink, may rise 10–15° C. above ambient temperature at full load; may be connected to ground to provide electrostatic shielding

Although we develop our lightweight, compact DC-to-DC power supplies to activate "glow-type" information displays, our customers have demonstrated that this "big performer in a little package" has a host of other applications besides. Here are just some of them:

- Outputs to 1,500 V @ 1 MA. for portable oscilloscopes and photo-multiplier applications.
- Low wattage fluorescent tube power supply for battery operation (4 watt to 8 watt).
- High frequency AC excitation for remote sensors and transducers.
- Multiple DC and/or AC outputs from battery sources.
- Highly isolated power supplies for electromedical applications.

- **Pin layout permits mounting on most standard motherboards.**
- **Lightweight and compact size of these power supplies keeps the equipment in which they are used easily portable.**
- **Models shown here are fully encapsulated.**

CAUTION: 50,000 VOLTS

LET ERIE DESIGN and BUILD YOUR HIGH VOLTAGE POWER SUPPLIES and VOLTAGE MULTIPLIERS

When you talk about designing and packaging miniature, low current High Voltage Power Supplies and Voltage Multipliers, the name ERIE should come to mind first. Why? *No other manufacturer of these sophisticated devices has its own capacitor and rectifier technology in-house.* Only ERIE does it all. Our many years experience in producing State of the Art high voltage capacitors and high voltage silicon rectifiers --- plus an unsurpassed technology in circuit designing, packaging and encapsulation, makes ERIE an ideal source for your high voltage component needs. From very low input voltages, ERIE can produce output voltages up to 50,000 volts. Application for these compact, high reliability devices includes night-vision image intensification systems. Apollo TV cameras. CRT displays. Avionics systems exposed to rugged environments. Industrial, commercial and military equipments . . . an almost infinite variety of applications. So bring ERIE in early. Let us design and build *your* High Voltage Power Supplies and Voltage Multipliers. We're equipped to handle large or small volume orders . . . in-house.

Write for our 32-page catalog . . . High Voltage Components and Devices . . . or for technical assistance, call

Eagle-Picher offers Carefree® Rechargeable Batteries in 30 Spill-Proof, No Maintenance Sizes . . .

At Eagle-Picher you can choose from the world's largest selection of rechargeable lead-acid batteries. The Carefree® rechargeables combine the advantages of dry cell batteries with the economies of a power source that can be used over and over again.

- Spill-Proof • Long Life
- Safe • Economical
- No Maintenance
- No Memory Conditioning
- Excellent Shelf Life
- Wide Operating Temperature Range

INPUT VOLTAGE — 115 volts A.C.

SMF-70.

SMF SERIES

Case: 3"x1³⁄₁₆"x1¼"; Mounts on a chassis with 2 ea. 4-40 blind inserts; no projecting studs; ideal for printed circuit boards; fixed voltage. 4 pin connector.

Add $4 to SMF prices for 220 volts A.C. input unit. Height of case is 1½".

SUBMINIATURE MODELS

Model	D.C. Volts	D.C. Current	% Reg.	% Ripple	Price

SMF-U SERIES

A new series of subminiature, fixed voltage power supplies in a shielded metal case for mounting either on PC boards or metal chassis. Prices and specs. identical to SMF units. Order as SMF-5U, SMF-6U, etc.

INPUT VOLTAGE — 115 volts A.C.
UNREGULATED MODULES

Ideal raw D.C. supplies containing transformer, rectifiers and capacitor filter. Simply attach series regulator, zener diode or 'IC" to convert to a regulated power supply; all solid state.

NEW!!!
DUAL OUTPUT 15 V.P.C. SUPPLY

Dual 15 v. supply specially designed for P.C. boards and operational amplifiers; metal case isolates it electrostatically from adjacent circuits; two independent 15 v. outputs isolated from case; can be grounded neg. or pos.

MODEL NO. — EE-15U.
INPUT VOLTAGE — 115 v. a.c.
OUTPUT VOLTAGE — 15 v. d.c.
OUTPUT CURRENT — 100 ma from each tap.
LOAD REGULATION — .1%.
RIPPLE — .03%.
ISOLATION: 1000 v. ins. (between outputs and case).
OUTPUT CONNECTION: 6 P.C. pins.
CASE DIMENSIONS: 2½″ x 2″ x 1⅞″. (See E-10-U front cover)
PRICE: $50.

SUBMINIATURE DUAL OUTPUT
FOR P.C. BOARDS

Lightweight; Epoxy; SMMP case: 1⅝″x1⅞″x 1½″; MMP case: 2″x2¾″x2″. 6 pins.

Models NI-1 through NI-4 also available in epoxy encapsulated plastic case for PC board mounting 1⅝″x1⅞″x1½″. NI-6 through NI-12 in case 2″x2¾″x2″ for PC board mounting.

The following regulated modules are recommended for use as indicator tube supplies:
HV-175 • HM-200 • HV200

Write for complete catalog of of power supplies & rectifier transformers. No charge.

**SEE SECTION 5600
FOR LIST OF FERROTRAN TRANSFORMERS**

ABOUT FERROTRAN POWER SUPPLIES

All Ferrotran power supplies are designed so that line voltage is applied to a conventional, laminated, **layer-wound**, 50-450 hz, silicon-steel transformer followed by silicon rectifiers and condenser filters.

- No pre-regulators or high frequency circuits are used so that noise effects are minimized.
- No random-wound transformers or toroids are used.
- No circuits are used which eliminate the transformer.
- All components used are of recent domestic manufacture.

SOLID STATE POWER SUPPLY MODULES

All silicon, long-life, semi-conductor POWERTRAN power supply modules.
Guaranteed 3 years.

MIL-SPEC MODULES

Meets MIL-E-5272C as follows:
Acceleration—Non-op; Proc III; 10g along each axis for 10 minutes.
Shock—Non-op; Proc V; 30g for 6 ms each axis.
Vibration—Proc XII; 5-20cps double amp. of .25 in.; 20-400cps—5g; 400—3KC—7.5g.
Temp. (operating)— —65° C to +75°C
All power supplies described on these pages may be militarized. Below are representative units and prices.

Model	D.C. Volts	D.C. Current	% Reg.	% Ripple	Case	Price
MSM-4.8	4.8	15ma.	3.0	0.1	AJ.	**$75**

SPECIAL COMPONENTS

In addition to its off-the-shelf products, FERROTRAN designs all types of power supplies and transformers to meet special requirements. This is done at relatively little cost to the customer.

For example, we can package a power supply in a high or low silhouette, with blind inserts or studs, with solder pin connectors or porcelain terminals, with connectors on the same side of the studs or on opposite sides.

We can locate printed circuit pins as per your specifications.

We can attach special AC or UHF fittings supplied by the customer.

You can be sure that when you buy a FERROTRAN power supply, you buy the finest product available.

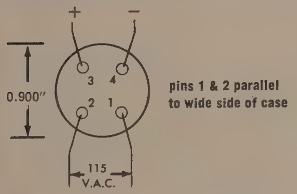
POWER SUPPLY DESIGN INFORMATION

MECHANICAL FEATURES

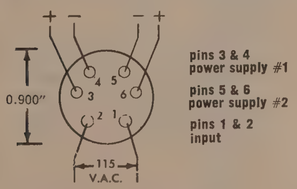
CONNECTOR — Compression type multi-lead glass headers, 0.900" dia. for all units. Hook type solder pins are standard. Hooks are ¼-inch high. (Transformer type terminals or octal plug-in types may be specified. Transformer terminals are 7/16" high x 3/16" in dia. Octal plug-in terminals fit standard 8-pin sockets.

CONNECTIONS

Single D.C. Output Voltage Connections for E, EH, M, HM, MC, MCH, HV, SMF, SM, SU, MCS, MV, NI Modules.



Dual D.C. Output Voltage Connectors for EE, MM, HMC, HHM, HHV, SMA, SMAC Modules.



HCV module, as per above sketch. Pins 1 & 2 115 AC input. Pins 3 & 4 DC output. Connect a fuse between Pins 5 & 6 equal to d.c. rated current of module.

CONNECTOR MOUNTING — All connectors are mounted dead-center in stud side of case. Clearance hole for standard hook connector is 1 1/16".

HEATSINKS — Internal, for all units. No transistors or zeners mounted externally; no fins mounted externally.

CASE MOUNTING—Chassis mounted with four threaded studs.

DIMENSIONS PER MIL-T-27A

LB	4 5/16	3 11/16	4½	3 5/16	2 11/16	10-32x½

ELECTRICAL FEATURES

INPUT VOLTAGE RANGE — Regulated from 105 to 130 volts a.c. input; max. is 140 v.

INPUT FREQUENCY RANGE—55 to 450 cycles; 55 to 2 kc at small additional charge.

REGULATION—Load regulation is specified in tables. Line voltage regulation is approximately 3% (105-130 v. a.c.)

RIPPLE — RMS value specified in tables at 60 cycles input and at currents indicated; will be reduced at lower currents. For approximate ripple at 400c divide 60c. ripple by 6.

OUTPUT VOLTAGE — Fixed voltage units have an output voltage within 5% of values shown. Customers may specify exact output voltage required at no extra charge.

COMPONENTS—All components rated for minimum of 85 degrees C. and are of domestic manufacture. All semi-conductors are silicon.

POLARITY—Outputs are floating off case with 1000 v. d.c. test voltage; may be used positively or negatively.

STABILITY — Fully operable on turn-on; voltage varies within a few percent during first five minutes; after half-hour of operation, voltage remains stable within a small fraction of 1%.

TEMP. (STORAGE) — −54°C to +85°C.

TEMP. (OPERATING) — −30°C to +70°C exc. where specified.

NOTE: All modules in these pages may be obtained with a 220 v. a.c. input. These units will work at 50 cycles.

WARRANTY

The manufacturer warrants its product for a period of three years. If failure of product occurs during this time, manufacturer will repair unit at no charge, or if it is non-repairable, to replace the unit on a pro-rated basis. Ferrotran's only obligation shall be to replace such quantity of product proved to be defective. Manufacturer shall not be liable for any injury, loss or damage direct or consequential arising out of use or inability to use the product.

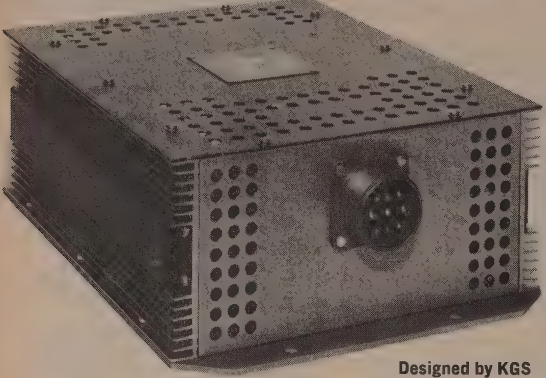
FLITE-TRONICS 60 Hz & 400 Hz STATIC INVERTERS



Designed by KGS

Other Inverters Available:

- Model PC-14D ( ) 60 VA
- Model PC-14B 125 VA
- Model PC-15BC( ) 250 VA
- Model PC-15H ( ) 300 VA
- Model PC-17 600 VA

Environmental specifications of the above models, same as PC-17A

- 12 VDC to 24 VDC Converters
- 24 VDC to 12 VDC Converters
- Three Phase Converters
  Model PH-3ϕ-400

For applications requiring greater than 750 VA of continuous power, the Flite-Tronics' Model PC-17A Inverter can be paralleled as necessary to double, triple, or quadruple the output power of a single unit. This is simply done by phase locking the oscillator in the PC-17A. Malfunction of a single unit when connected in this manner will not damage the other units in parallel. Each unit has its own overload protection. Each device is capable of self-preservation.

SPECIFICATIONS MODEL PC-17A (750 VA) STATIC INVERTER

INPUT VOLTAGE:
28 VDC ±2.0 VDC

INPUT CURRENT:
39A — full load
1.5A — no load

OUTPUT VOLTAGES:
115 VAC +5% −7%
26 VAC +5% −7%

OUTPUT FREQUENCY:
400 Hz ±1%

OUTPUT POWER:
750 VA continuous for 115 VAC output
150 VA continuous for 26 VAC output
NOTE: Total continuous output power 750 VA.

OUTPUT WAVEFORM:
Sine Wave, Single Phase

HARMONIC DISTORTION:
7% maximum (Typically 3%)

POWER FACTOR:
.8 to −.95

ALTITUDE:
45,000 feet

EFFICIENCY:
70% typical

TEMPERATURE:
−65°F to 160°F

WEIGHT:
16.2 lbs.

SIZE:
Width 8½″
Length 12″
Height 4$\frac{1}{16}$″

INPUT OVERVOLTAGE:
Withstands 130% overvoltage (37 VDC) for five minutes minimum while delivering full rated 750 VA output power. Output voltage under this condition 115 VAC +5% −7%.

EMISSION RFI:
Radiated & Conducted . . . 90KC to 1000MC.

Far below levels specified in Appendix A of RTCA Paper 120-61/DO-108 Category "A".

HUMIDITY:
Greater than 95% for ten days, temperature cycled between 75°F to 160°F.

VIBRATION:
Tested to withstand in three directions:

.08 DA	5-15 Hz
.036 DA	15-70 Hz
10 G's	70-500 Hz

SHOCK:
To withstand at least 10 G's for 11 milliseconds in three directions.

OVERLOAD CAPABILITY:
Deliver 150% of rated output current at rated output voltage for a duration of not less than 5 minutes (i.e., 900 volt amp load).

INPUT VOLTAGE PROTECTION:
Unit withstands transients of 88 volts lasting 1 millisecond on the 28.0 VDC input line.

EXCESSIVE OVERLOAD & OUTPUT SHORT CIRCUIT:
Withstands without damage or degradation loads exceeding 150% nominal to an output short circuit. Unit delivers rated output on removal of above condition.

SPECIFICATIONS MODEL PC-16 STATIC INVERTER

POWER OUTPUT:
250 VA Continuous
150% Overload 5 minutes
pf — .8 to 1.0

VOLTAGE INPUT:
1. 28 VDC ±2 Volts
2. Withstands 88 Volt Transient for 1 Millisecond

INPUT CURRENT:
14 Amp — full load
1 Amp — no load

FREQUENCY:
60 HZ ±1 Hz

VOLTAGE OUTPUT:
115 VAC RMS +5% −7%

AMPLITUDE DISTORTION:
Less than 7%

WAVE FORM:
Sine Wave

PHASE:
Single

SHORT CIRCUIT
Withstand for 1 minute or longer

TEMPERATURE:
−10°F to +160°F

ALTITUDE:
45,000 Ft.

WEIGHT:
16 lbs.

SIZE:
7½″ x 12″ x 4″ overall dimensions

For application requiring greater than 250 VA of continuous power Model PC-16 can be paralleled to double or triple the output power of a single unit.

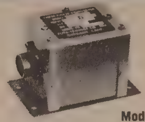
Model PC-17
Designed by K.G.S.



Model PH-3φ-400
Designed by K.G.S.

PC-15BC ( ) TSO'D (250 VA) STATIC INVERTER

SPECIFICATIONS:

INPUT VOLTAGE:
28.0VDC ±2VDC, operates electrically down to 20VDC.

INPUT CURRENT:
13.2A Full Load
.75A No Load

OUTPUT VOLTAGE:
115VAC rms +5% −7%
26VAC +5% −7%

OUTPUT FREQUENCY:
400Hz ±1%

OUTPUT POWER:
250VA @ 115VAC and 75VA @ 26VAC. Total load not to exceed 250VA

OUTPUT CONFIGURATION:
1 Phase Sine Wave

HARMONIC DISTORTION:
Typically 3% (7% max)

POWER FACTOR:
.8 to 1.0

ALTITUDE:
45,000 feet

EFFICIENCY:
70% typical

TEMPERATURE:
−65°F. to 160°F.

WEIGHT:
7.5 lbs.

DIMENSIONS:
W6" L10⅝" H3⁷⁄₃₂"

INPUT OVERVOLTAGE:
Withstand 130% input overvoltage for 5 minutes while supplying full rated VA output power. Output voltage under this condition 115VAC +5% −7%.

OVERLOAD CAPACITY:
Capable of 150% output current overload for at least 5 minutes.

INPUT VOLTAGE PROTECTION:
Inverter withstands transients of 88 volts lasting 1 millisecond on the 28.0VDC input line.

EXCESSIVE OVERLOAD AND OUTPUT SHORT CIRCUITS
Withstand without damage or degradation loads exceeding 150% of rated output to an output short circuit. Inverter delivers rated output on removal of above condition.

HUMIDITY:
Tested to greater than 95% for ten days, temperature was cycled between 75°F. to 160°F.

VIBRATION:
Tested to withstand in three directions:

.08 DA	5-15 Hz
.036 DA	15-70 Hz
10 G's	70-500 Hz

SHOCK:
Tested to withstand at least 10 G's for 11 milliseconds in three directions.

EMISSION RFI:
Radiated and conducted . . .90 KC to 1000 MC, far below specification limits of RTCA Paper 120-61/DO-108, Appendix A.

PC-17 TSO'D (600 VA) STATIC INVERTER

SPECIFICATIONS:

INPUT VOLTAGE:
28.0VDC ±2VDC, operates electrically down to 20.0VDC.

INPUT CURRENT:
31 Amps full load
1¼A no load typical

OUTPUT VOLTAGE:
115VAC +5% −7%
26VAC +5% −7%

OUTPUT FREQUENCY:
400 Hz ±1%

OUTPUT POWER:
600VA @ 115VAC and 125VA @ 26VAC. Total load not to exceed 600VA.

OUTPUT CONFIGURATION:
Sine Wave, Single Phase

HARMONIC DISTORTION:
Typically 3% (7% max)

POWER FACTOR:
.8 to −.95

ALTITUDE:
45,000 feet

EFFICIENCY:
70% typical

TEMPERATURE:
−65°F. to 160°F.

WEIGHT:
14.6 lbs.

DIMENSIONS:
W8½" L12" H4¹⁄₁₆"

INPUT OVERVOLTAGE:
Withstand 130% input overvoltage for 5 minutes while supplying full rated VA output power. Output voltage under this condition 115VAC +5% −7%.

OVERLOAD CAPACITY:
Capable of 150% output current overload for at least 5 minutes.

INPUT VOLTAGE PROTECTION:
Inverter withstands transients of 88 volts lasting 1 millisecond on the 28.0VDC input line.

EXCESSIVE OVERLOAD AND OUTPUT SHORT CIRCUITS:
Withstand without damage or degradation loads exceeding 150% of rated output to an output short circuit. Inverter delivers rated output on removal of overload condition.

HUMIDITY:
Tested to greater than 95% for ten days, temperature was cycled between 75°F. to 160°F.

VIBRATION:
Tested to withstand in three directions:

.08 DA	5-15 Hz
.036 DA	15-70 Hz
10 G's	70-500 Hz

SHOCK:
Tested to withstand at least 10 G's for 11 milliseconds in three directions.

EMISSION RFI:
Radiated and conducted . . . 90 KC to 1000MC, far below specification limits of RTCA Paper 120-61/DO-108, Appendix A.

PH-3φ-400 THREE PHASE CONVERTER

Flite-Tronics Co., Inc. introduces a **three phase converter** Model PH-3φ-400, for use with Flite-Tronics' 400 Hz static inverters.

The PH-3φ-400 is designed to convert two Flite-Tronics' inverters into a 115VAC, 400 Hz DELTA three phase power source with 60 degrees between phases. A transformer can be used to realize 120 degrees between phases. The PH-3φ-400 will also convert three inverters into a WYE 115/200VAC, 400 Hz three phase operation.

SPECIFICATIONS:

INPUT:
28VDC at .15 Amp. max.

FREQUENCY:
400 Hz

FUNCTION:

DELTA CONFIGURATION

2 Each Inverters	Output VAC	Phase Angle	Total Power
PC-15BC ( )	115	60°	500VA
PC-17	115	60°	1200VA
PC-17A	115	60°	1500VA

WYE CONFIGURATION

3 Each Inverters	Output VAC	Phase Angle	Total Power
PC-15BC ( )	115/200	120°	750VA
PC-17	115/200	120°	1800VA
PC-17A	115/200	120°	2250VA

ENVIRONMENTAL:
Designed to meet RTCA paper DO-138 Category A

TEMPERATURE:
−55°C. to 71°C.

ALTITUDE:
50,000 feet

SIZE IN INCHES:
L3¾" W2⅛" H2⅜"

WEIGHT:
0.5 lbs.

GATES

POWER SUPPLIES

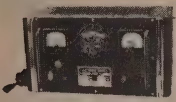
A single source for all possible types of "brute force" and regulated power supplies that can fill 90% of your design and application needs. Gates Power Supplies give you absolutely lowest cost and long life. The units are excellently constructed of high rated components for trouble free, years of service.

Silicon or Selenium. Single and three-phase units. 1 to unlimited Volts, 1 to unlimited Amps. Metered and unmetered Static or variable outputs. Rack, cabinet or chassis mounts. Unit or hundred quantities 48 hour delivery. Two year guarantees. Power Supplies for OEM Application, Testing Prototype, Lab Type Units, Plating, Motor Control, Cathode Protection, Transistor Power, Anodizing, Battery Charging, Battery Conversions, Marine Types, Aircraft Starting.

GATES ELECTRONIC COMPANY, INC. / 526 Van Nest Ave., Bronx, N. Y. 10460 / (212) 881-5900 — 823-8200

GATES POWER SUPPLIES

SILICON POWER RECTIFIER



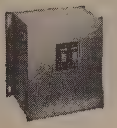
For transister circuits and electronic equipment

MODEL G92F

Input: 115 VAC, 60 Hz, 1 phase. **Output:** 0-32 VDC, 0-10* Amps DC Continuous Duty. **Regulation:** No load to full load 15%. **Ripple:** Less than 0.3% RMS. **Meters:** Volt. & Amp. 2% Accuracy. **Dimen.:** 17″ x 9″ x 9″.

***Also available in 5 Amperes**

INDUSTRIAL POWER UNIT WALLMOUNT

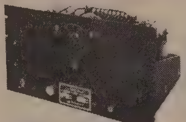


MODEL A10

Input: 115 or 230 VAC, 60 cycles, single phase. **Output:** 115 VDC, 125 Watts. **Application:** Power sources for operating DC Motors, Relays, Solenoids, Magnetic Chucks. **Dimen.:** 11″H x 9″W x 6½″D.

Also available 250 Watts

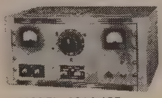
SILICON POWER SUPPLY



MODEL G48-6FM

Input: 115 VAC, 60 cycles, single phase. **Output:** 0-48 VDC, 0-6 Amps. **Control:** Continuously variable over entire range. **Ripple:** 1% RMS. **Dimen.:** 19″W x 13″D x 10½″H, Fits RETMA, Western Electric racks.

SILICON POWER SUPPLY

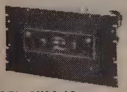


MODEL GS14-15F

Input: 115 VAC, 60 cycles, single phase. **Output:** 0-14 VDC, 0-15 Amps Continuous Duty. **Ripple:** Less than 1% RMS. **Meters:** 2% Accuracy. **Dimen.:** 9″H x 17½″W x 9″D.

Rack Model Also Available

SILICON RACK MOUNT SUPPLY

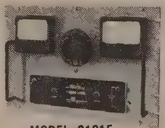


MODEL GX30-10

Input: 115 VAC, 60 cycles, single phase. **Output:** 26, 28, 30 VDC, 0-10 Amps Continuous Duty. **Regulation:** 10% no load to full load. **Ripple:** 0.3% RMS. **Dimen.:** 8¾″H x 19″W x 10″D.

Price: $175.00 Net

AIRCRAFT BATTERY ELIMINATOR



MODEL G101F

Input: 115 VAC, 60 cycles, single phase. **Output:** 0-32 VDC, 0-20 Amps Continuous Duty. **Ripple:** 0.5% RMS. Unique overload device prevents needle slam and shows overload condition. **Regulation:** VDC at full load, 30; VDC at 1/10 load, 35. **Meters:** 2% Accuracy. **Dimen.:** 19″ x 14¼″ x 12¼″.

For Rack or Bench Use

ALL TYPES OF POWER SUPPLIES

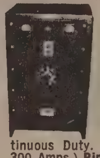
SILICON POWER RECTIFIER
MODEL G50-50R

Input: 220 VAC, 60 cycles, 3 phase. **Output:** 0-50 VDC, 0-50 Amps Continuous Duty. **Ripple:** .3% RMS. **Regulation:** No load to full load 8%. **Meters:** 2% Accuracy. **Dimen.:** 21″ x 15″ x 19″.

SILICON INDUSTRIAL POWER UNIT
MODEL G30-100

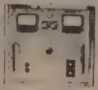
Input: 220 VAC, 60 cycles, 3 phase. **Output:** 0-32 VDC, 0-100 Amps Continuous Duty. Also 440 and 480 Volts. **Ripple:** .3% RMS. **Regulation:** 5-8% 1/10th load to full load with constant input and at maximum output voltage setting. **Meters:** 2% Accuracy. **Dimen.:** 21″ x 15″ x 19″.

SILICON AIRCRAFT BATTERY ELIMINATOR
MODEL G48-100



Input: 220 or 440 VAC, 60 cycles, 3 phase. **Output:** 0-32 VDC, 100 Amps Continuous Duty. (Also avail. 150 and 300 Amps.) **Ripple:** .5% RMS. **Regulation:** 5-8% 1/10th load to full load with constant input and maximum output voltage setting. **Meters:** 2% Accuracy. **Dimen.:** 25″ x 25″ x 43″.

SILICON REGULATED POWER SUPPLY
MODEL G30-200

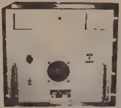


Input: 115 VAC, 60 cycles, 1 phase. **Output:** 5-30 VDC, 0-40 Amps. **Ripple:** 1% RMS. **Regulation:** ±1% from no load to full load. **Meters:** 2% Accuracy. **Dimen.:** 21″ x 15″ x 19″.

SILICON POWER SUPPLY
MODEL GX30-5

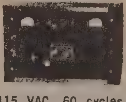
Input: 115 VAC, 60 cycles, single phase. **Output:** 28-30-32 VDC, 0-5 Amps, DC Continuous Duty. Also 6 Amps. **Regulation:** 12% no load to full load. **Ripple:** .5% RMS. **Dimen.:** 5″W x 13½″L x Overall Height 9″.

SILICON GENERAL PURPOSE RECTIFIER
MODEL G-115



Input: 115 VAC, 60 cycles, single phase. **Output:** 0-32 VDC, 0-50 Amps DC Continuous Duty variable over entire range. **Ripple:** 1% RMS. **Dimen.:** 19¼″H x 14″W x 17½″D.

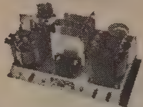
DC POWER SUPPLY
MODEL G94F



Input: 115 VAC, 60 cycles, single phase. **Output:** 0-300 VDC Continuous Duty variable 0-1 Amps. **Ripple:** 3 MV RMS. **Dimen.:** Rack 8¾″H x 19″L x 9½″D. Cabinet 10½″H x 22″L x 12″D. Rack or cabinet.

Also Available 0-350V 0-2 Amp

SILICON POWER SUPPLY
MODEL GX30-20



Input: 115 VAC, 60 cycles, single phase. **Output:** 0-34 VDC, 0-20 Amps Continuous Duty. **Regulation:** No load to full load 18%. **Ripple:** Below 1%. Silicon Rectifiers, High Efficiency. **Dimen.:** 10″ x 17″ x 3″.

1φ & 3φ SILICON PLATING SUPPLIES

Volt & Amp. Meters. Powerstat Control or Tap Switch. Controls Start at Zero. Overload Protection. AC Input — 110-115-220 VAC 1φ, or 220-440-480VAC 3φ. 3φ Units 5% Ripple. Cabinet Enclosure Fan Cooled. (Also Available 28 VDC.)

GATES

ELECTRONIC COMPANY, INC.
526 VAN NEST AVE., BRONX, N.Y. 10460
TELEPHONES: (212) 881-5900 — 823-8200

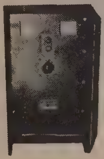
GATES POWER SUPPLIES

MODEL G230-25

Input: 208/440, 3ph 60 Hz. **Output:** 230 @ 25A. **Ripple:** 4.5%. **Regulation:** 1/10 Load 8%. **Dimensions:** 21″W x 15″D x 14″H.

Meters Extra

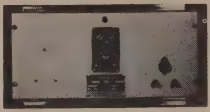
MODEL G12-250



Input: 208, 3ph 60 Hz. **Output:** 0-12V @ 250A. **Ripple:** 4.5%. **Regulation:** 1/10 Load 8%. **Meters:** Volt. & Amp. 2%. **Dimensions:** 20″W x 20″D x 35″H.

Also 12V, 300A and Up

MODEL G220-10

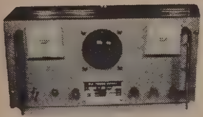


Input: 115VAC, 1φ, 60 Hz. **Output:** 220VDC @ 10A. **Ripple:** 48% (also 1% supplied). **Meters:** None. **Dimensions:** 21″W x 15″D x 10″H.

SILICON INDUSTRIAL POWER UNIT
MODEL G30-40F

Input: 115VAC, 60 Hz, 1 phase. **Output:** 0-32 VDC, 0-40A DC, continuous duty. **Ripple:** 1% RMS. **Dimensions:** 12¼″H x 19″W x 13″D. **Regulation:** D.C.V. at full load: 32 minimum D.C.V. at 1/10 load: 35 maximum.

MODEL GT125-5F



Input: 115VAC. **Output:** 0-125 @ 5A. **Ripple:** 0.5%. **Regulation:** Unregulated. **Meters:** Volt & Amp. 2%. **Dimensions:** 21″W x 15″ D x 10½″H.

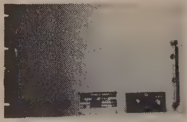
Available Rack

MODEL GT14-40

Input: 115VAC. **Output:** 0-14 @ 40A. **Ripple:** 0.1%. **Regulation:** Unregulated. **Meters:** Volt & Amp. 2%. **Dimensions:** 19″W x 13½″D x 8½″H.

Cabinet Available

MODEL GX28-50



Input: 115VAC. **Output:** 28 @ 50A. **Ripple:** 0.5%. **Regulation:** Unregulated. **Meters:** None. **Dimensions:** 19″W x 13½″D x 12¼″H. Rack.

Also Supplied with Cabinet

MODEL G45-30

Input: 115VAC. **Output:** 45, 42, 40, 36, 32, 30, 29, 28, 26 @ 30A. **Ripple:** 1%. **Regulation:** Fan Cooled. **Meters:** Volt & Amp. 2%. **Dimensions:** 19″Wx10″Dx8½″H.

Overload Protected

MODEL G20-200

Input: 220VAC, 60 Hz. 1 or 3φ. **Output:** 0-22VDC @ 200A. **Ripple:** 1%. **Cabinet:** 35″ x 20″ x 20″. **Meters:** Volt & Amp. 2%.

NEW SCR REGULATED POWER SUPPLIES

GCR32-30 — **Input:** 115VAC. **Output:** 24-32 @ 30A. **Ripple:** 1%. **Meters:** ±1%. **Dimensions:** 19″W x 17″D x 12¼″H.

GCR32-25 — **Input:** 115VAC. **Output:** 24-32 @ 25A. **Ripple:** 1%. **Meters:** ±1%. **Dimensions:** 19″W x 17″D x 12¼″H.

GCR32-20 — **Input:** 115VAC. **Output:** 24-32 @ 20A. **Ripple:** 1%. **Meters:** ±1%. **Dimensions:** 19″W x 17″D x 10¼″H.

Also GCR32-15.

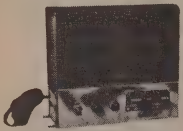
HIGHEST QUALITY—LOWEST PRICE

SILICON POWER SUPPLY—MODEL GX24-1



Input: 115VAC, 60 Hz, 1 phase. **Output:** 24VDC, 0-1 Amperes DC, continuous duty. **Ripple:** 0.3% RMS. **Regulation:** 8% no load to full load. **Dimensions:** 3″ x 5″ x 10″.

Available also 0-2 Amps and up.

PORTABLE SILICON BATTERY CHARGER MODEL G612-20

Input: 115VAC, 60 Hz, 1 phase. **Output:** 6/12VDC, 20 Amperes continuous duty. **Meter:** Amp. meter 2% Accuracy. **Dimensions:** 11″H x 9″W x 6½″D. (Also available constant voltage battery charger. Output 12VDC, 45 or 48 or 50 Amps continuous duty. Input 105-130VAC.)

SILICON RECTIFIER MODEL GT32-30

Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 30 Amperes, 0-32VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 1% RMS. **Voltage Control:** Powerstat. **Meters:** 2% Accuracy volt & amp. meter. **Dimensions:** 10½″ x 13½″ x 19″. **Weight:** 92 lbs. approx.

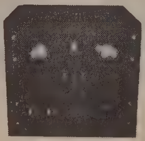
Overload Protected

SILICON RECTIFIER MODEL GT32-24

Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 24 Amperes, 0-32VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 1%. **Voltage Control:** Powerstat. **Dimensions:** 8¾″ x 13½″ x 19″. **Meters:** 2% Accuracy volt meter, amp. meter. **Weight:** 75 lbs.

Overload Protection

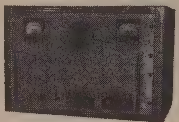
BENCH PLATING RECTIFIER MODEL GL50-8



Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 50 Amperes, 0-8VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 2% at extra cost. **Voltage Control:** Powerstat. **Meter:** 2% Accuracy, volt & amp. meter. **Dimensions:** 21″ x 15″ x 10″.

Overload Protected

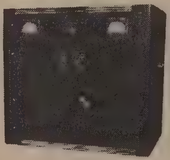
BENCH PLATING RECTIFIER MODEL GL100-8



Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 100 Amperes, 0-8VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 2% at extra cost. **Voltage Control:** Powerstat. **Meters:** 2% Accuracy, volt & amp. meter. **Dimensions:** 21″ x 15″ x 10″.

Overload Protected

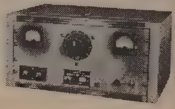
BENCH PLATING RECTIFIER MODEL GL200-6



Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 200 Amperes, 0-6 VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 2% at extra cost. **Cooling:** Fan. **Voltage Control:** Powerstat. **Meters:** 2% Accuracy, volt & amp. meter. **Dimensions:** 21″ x 15 ″ x 19″.

Overload Protected

BENCH PLATING RECTIFIER MODEL G50-15



Input: 115VAC, 50-60 Hz, 1 phase. **Output:** 50 Amperes, 0-15VDC. **Rectifier:** Full wave silicon rectifier. **Ripple:** 2% at extra cost. **Voltage Control:** Powerstat. **Meters:** 2% Accuracy, volt & amp. meter. **Dimensions:** 21″ x 15″ x 10″.

Overload Protected

FIXED VOLTAGE, 1% LINE AND LOAD REGULATED POWER SUPPLIES

SPECIFICATIONS

AC Input: 105-125V, 60 Hz, 1 phase. **Regulation:** ±1% for ±10% line change. ±1% for no load to full load. **Ripple:** 0.1% +10MV rms maximum. **Grounding:** Floating output; either positive or negative may be grounded. **Protection:** Automatic short-circuit protection.

A single source for all possible types of "brute force" and regulated power supplies that can fill 90% of your design and application needs. Gates Power Supplies give you absolutely lowest cost and long life. The units are excellently constructed of high rated components for trouble free, years of service.

Silicon or Selenium. Single and three-phase units. 1 to unlimited Volts, 1 to unlimited Amps, Metered and unmetered Static or variable outputs. Rack, cabinet or chassis mounts. Unit or hundred quantities 48 hour delivery. Two year guarantees. Power Supplies for OEM Application, Testing Prototype, Lab Type Units, Plating, Motor Control, Cathode Protection, Transistor Power, Anodizing, Battery Charging, Battery Conversions, Marine Types, Aircraft Starting.

NOBRUSH® FREQUENCY GEORATOR CORPORATION

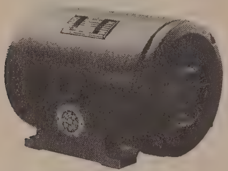
Celebrating our 25th anniversary

PERMANENT MAGNET GENERATOR DESIGN

"NoBrush" Motor Generators and Frequency Converters are efficient, compact, dependable, quiet running units for powering all types of electronic systems and electrical equipment. The heart of each "NoBrush" power system is a "NoBrush" permanent magnet generator which features a cast aluminum rotor designed to give superior voltage stability. • A typical "NoBrush" generator is mounted with a high quality induction or synduction motor within a single aluminum alloy shell. • Oversize pre-lubricated ball bearings sealed for life, coupled with the absence of brushes, commutators or slip rings, insure long-term maintenance-free operation. • Georator brushless permanent magnet generators are noted for their compact construction, ruggedness, ability to withstand short circuits, and excellent wave form. • All Georator power systems whether utilized for frequency conversion or basic power requirements, provide true "line isolation and stabilization" for protecting sensitive electronic systems from momentary power interruptions, switching transients, brown outs, or voltage spikes.

PERMANENT MAGNET FEATURES:

- ☐ *Line Isolation and Stabilization*
- ☐ *Stable Output Voltage*
- ☐ *High Overload Capacity*
- ☐ *Withstands Short Circuits*
- ☐ *Extremely Low R. F. Noise*
- ☐ *Minimum Maintenance*
- ☐ *Lightweight*
- ☐ *Low Audible Noise*
- ☐ *Cool Operation*
- ☐ *Operates in Adverse Environments*



60 TO 60 Hz LINE ISOLATOR SERIES 30 UNIT SHELL

This small isolator stabilizer Motor-Generator offers full line isolation for small power requirements up to 1 KVA. Permanent magnet field generator coupled with the high inertia of the rotating system assures maximum electrical isolation between line and load. The rugged unit shell construction gives long, maintenance-free operation.

Model No.	KVA Rating	Phase In/Out	Output Voltage	Input Voltage	Dimensions H"/L"/Weight

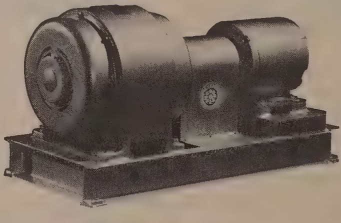
30-195	1.0	3/3	120/208	230/460	14.8"/16.1"/130 lbs.
30-199	1.0	1/3	120/208	115/230	14.8"/16.1"/130 lbs.

These 60 to 60 Hz brushless generators, including those in the next column are designed to accept long term input variation of up to ±15% from nominal with no change in output. Inertia stabilization allows these units to absorb input line transients of as much as 30% for as long as 500 milliseconds with less than 1% change in output.



60 TO 60 Hz ISOLATOR STABILIZER SERIES 37 IN LINE

Larger Motor Generators in ratings up to 25 KVA are also available to provide full line isolation and distortion free power to protect electronic equipment from power line excursions and momentary power loss.

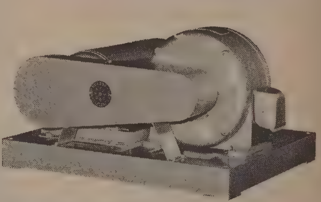
Series 37 Data Sheets containing detailed specifications are available upon request.



50 TO 60 Hz and 60 TO 50 Hz FREQUENCY CONVERTERS

These ruggedly built, belt driven, motor-generator sets are mounted on a sturdy steel frame base. Units in the 0.5 to 5 KVA power range are designed around the highly efficient NoBrush Permanent Magnet Generator. Units in the 6.25 to 25 KVA power range have brushless rotating rectifier type generators with voltage regulators, to provide ±1% output voltage regulation. These motor-generators provide frequency conversion, basic power, and superior line isolation and stabilization for exported and imported electrical and electronic equipment.

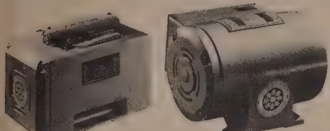
CONVERTERS & GENERATORS

The simplest, most rugged, most dependable power source.



60 TO 400 Hz FREQUENCY CONVERTERS SERIES 30 UNIT SHELL

A highly compact, brushless, Motor Generator Set for conversion of 50 or 60 Hz power to 400 Hz or higher frequencies. Generator and Motor Rotors are pressed on a common shaft, with shielded ball bearing at ends of shaft, all contained within an aluminum alloy shell.

Model No.	KVA Rating	Phase In/Out	Output Voltages Full Load *	Input Voltage **	Dimensions H"/L"/Weight

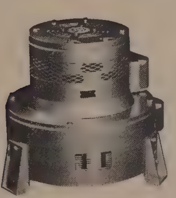
30-029	2.5	3/3	115/200	208-220/440	12¼"/15¼"/153 lbs.

☐ Other Generator Outputs Available: 120, 180, 280, 360, and 840 Hz

☐ Other Standard and Non-Standard Voltages.

☐ Exact 400 Hz Output.

☐ DC Outputs at Low or High Voltage.



60 TO 400 Hz FREQUENCY CONVERTER SERIES 33 VERTICAL

High quality induction motor is close coupled to a famous "NoBrush" generator for a really outstanding unit. Very compact, with high power to weight and size ratio. Available variations include: 50 Hz Input; Standard and Non-Standard AC output voltages; DC outputs at low or high voltage; and other output frequencies.

Model No.	KVA Rating	Phase In/Out	Dimensions Diameter	Height	Weight

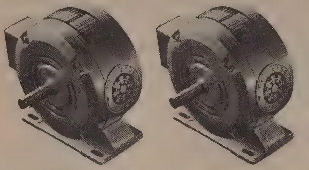
30-120	25.0	3/3	23.0"	26.5"	1,213 lbs.



ALTERNATORS PERMANENT MAGNET

The original, revolutionary, "NoBrush" generator. Permanent magnets yield stability, reproducibility, ruggedness and virtually zero R.F. noise. Available in large variety of ratings, frequencies and voltages. Supplementary windings with rectifiers available for D.C. output.

400 Hz ALTERNATORS

Model No.	KVA Rating	Phase Out	Speed RPM	Dimensions H"/L"/Weight

36-009	2.5	1	1714	17¼"/6¾"/105 lbs.
36-010	5.0	1	1714	17¼"/6¾"/137 lbs.
36-011	5.0	3	1714	17¼"/6¾"/103½ lbs.
36-012	7.5	3	1714	17¼"/6¾"/120 lbs.
36-013	10.0	3	1714	17¼"/6¾"/135 lbs.
36-151	15.0	3	1714	25"/11.2"/310 lbs.
36-152	25.0	3	1714	25.3"/17"/730 lbs.

☐ Alternator Frequencies Available Include:
50, 60, 120, 180, 240, 300, 360, 420, 840 Hz.

☐ All Units are Available with:
- Standard and Non-Standard AC Voltages.
- Multiple DC Outputs/Low Voltage taps.
- Special Housings for Flange Mountings.

☐ Separate ROTORS and STATORS can be provided for OEM Applications.

☐ Permanent Magnet Alternators for: Pilot Excitors—Field Flashing—Tachometers—Control Applications—Aircraft.

LIGHTWEIGHT 400 Hz ENGINE-GENERATORS

Lightweight portable 400 Hz permanent magnet engine generators are available with 1 ϕ or 3 ϕ outputs from 0.5 KVA to 2.0 KVA. Choice of outputs include 400 Hz, or combination of AC and DC output, or entire output rectified to single or dual DC output.

VOLTAGE REGULATED 60 TO 400 Hz FREQUENCY CONVERTERS

This new, Series 39, Regulated, Vertical Frequency Converter combines the "NoBrush" permanent magnet generator together with control windings and simplified sensing electronics, to provide both the traditional "Brushless" rugged design and a closely regulated 400 Hz power system. Voltage regulation is ±1.5% no load to full load, 0.8 to 1.0 power factor, with a voltage adjustment feature of ±5%.

Model No.	KVA Rating	Voltage Output	Voltage Regulation	Phase In/Out
39-001	5	120/208	±1.5%	3/3
39-002	5	115/230	±1.5%	3/1

60 TO 180 Hz, 360 Hz, 840 Hz FREQUENCY CONVERTERS FOR HIGH FREQUENCY TOOLS, MOTORS, AND LIGHTING

These frequency converters are available for powering high frequency metal-working tools, wood-working tools, motors, and lighting systems. The highly dependable, minimum maintenance, PERMANENT MAGNET BRUSHLESS DESIGNS are available in many ratings up to: 5 KVA for 180 Hz applications; 10 KVA for 360 Hz applications; and 30 KVA for 840 Hz applications.

Celebrating our 25th anniversary

NOBRUSH® FREQUENCY CONVERTER SERIES 30 • UNIT SHELL DESIGN • FOR CONVERSION OF 60 TO 400 CYCLES

APPLICATION: Wherever a dependable, trouble-free source of 400 cycle power within the range of 2½ KVA is required. As a source of high frequency power for electronic apparatus; for test and research work; for the servicing of aircraft electrical equipment; for portable radio and military electronic devices; for high frequency motors; in the operation of electronic computers.

CONSTRUCTION: Generator and motor stators contained within aluminum alloy unit shell. Generator and motor rotors pressed on unit shaft, with ball bearings at ends of shaft. All "NoBrush" units are ruggedly designed and manufactured to withstand extremes of mechanical and electrical operating conditions.

AVAILABLE VARIATIONS: Other output frequencies—180, 280, 360, 840 cycles

Other standard or non-standard output voltages

Reconnectable output windings for full power at either of two voltages

Low voltage taps

Auxiliary D.C. output at low or high voltage

Two phase output

Militarized construction

Other standard single or three phase input voltages

50 cycle input

Synchronous motor drive

Specifications subject to change without notice.

SPECIFICATIONS

INPUT: Low-slip induction motors utilized for drive, available in single and three-phase models.

DUTY: Continuous.

BEARING TYPE: Ball bearings, sealed, lubricated-for-life.

OUTPUT VOLTAGE: 115 volts, for single phase output. Three phase output models reconnectable for 115/200 (120/208) four-wire or 115 volts delta, line-to-line.

OUTPUT VOLTAGE STABILITY: Within 1% for constant load and constant input frequency.

EFFECT OF INPUT VOLTAGE CHANGE ON OUTPUT VOLTAGE: Output voltage will change less than 1% for input changes of plus or minus 10%, or for short period input disturbances as great as 30%.

OUTPUT FREQUENCY: From 420 cycles at no load to approximately 410 cycles, full load.

OUTPUT FREQUENCY STABILITY: Within plus or minus ½% at constant load and constant input frequency.

EXCITATION: Internal, permanent magnet.

REGULATION: Inherent usually within an 8% envelope for unity p.f. loads from no load to full load. Regulator not required for most applications. See typical curves.

WAVE FORM: No sharp peaks or spikes. Total harmonics, single or three phase, within 4% for ratings 1 KVA or over; -5% -8% for ratings under 1 KVA, depending on model. Improved wave form on special order.

TEMPERATURE RISE: 40°C (72°F)

COOLING: By internally mounted fan.

AUDIBLE NOISE: Approximately 70 db. (Measurement on 'B' scale, at 3 feet distance from unit, in accordance with ASA Standard No. Z24.7-1950.)

R.F. NOISE: Extremely low; may be considered zero for most applications.

NOBRUSH® FREQUENCY CONVERTER

SERIES 33 • VERTICAL MODEL FOR CONVERSION OF 60 TO 400 CYCLES

APPLICATION: Wherever a dependable, trouble-free source of 400 cycle power within the range of 2½ to 10 KVA is required, where 60 cycles (and in some cases, 50 cycles) is available for primary energy.

SPECIFIC APPLICATIONS: As a source of high frequency power for: electronic equipment; test and research work; servicing of aircraft and missile electrical equipment; portable radio and military electronic devices; high frequency power tools; induction heating; shipboard high frequency power supplies; aircraft trainers; military ground equipment.

CONSTRUCTION: Motor & Generator Stators mounted within rugged cast aluminum housings. Motor & Generator Rotors mounted on a common shaft with ball bearings at ends of shaft. Unit is compact, 2 bearing, low contour. Permits mounting in limited space. All "NoBrush" units are designed and built to withstand extremes of mechanical and electrical operating conditions.
